PRIZE WINNERS

MARKET and 40th STREETS., PHILADELPHIA, PA.

In fine condition at a low price; 3 in., \$8.00 per 100; 4 in., \$12.00 per 100; 5 in., \$20.00 and \$25.00 per 100, bud and bloom. Also Ferns, Asparagus pl. nan.
CONVERSE GREENHOUSES. Webster, Mass.

E.S. MILLER, Wading River, N.Y.

GERANIUMS

We are prepared to furnish Geraniums in large quantities, for immediate shipment, in the best assortment of standard varieties in the country, from 2-in. pots at \$2.00 per 100, \$18.50 per 1000. From 3-in. pots at \$3.00 per 100, \$25.00 per 1000.

SPECIAL COLLECTION

1000, 50 each of 20 good distinct double varieties, our selection for \$18.50, 3000 for \$52.50, 6000 for 100.00, cash with order. We have been sending out these collections for a number of years, and they have given general satisfaction, as every variety is a good one. We have no trash sorts to work off.

DOUBLE PETUNIAS, mixed colors, propagated from select stock, fine stock, 2-in. pots \$2.00 per 100, \$18.50 per 1000; fine stock 3-in. pots \$3.00 per 100, \$25.00 per 1000.

See last issue for other stock.

R. VINCENT, JR. & SONS CO., White Marsh, Md.

WASHINGTON

Dark Pink Sport of
ENCHANTRESS

DO not get this variety confused with the Lawson-Enchantress which we discarded some years ago. Washington-Enchantress differs from Rose Pink Enchantress as night from day. Washington is a sport from Enchantress with the best cerise or beautiful dark pink color—the Lawson shade—with stem, habit and productiveness same as Enchantress, and keeping qualities of the best. Stock is clean, healthy and well rooted. Guaranteed satisfactory in every respect.

\$10 per 100; \$20 per 250; \$75 per 1000 C. O. D.

Chicago Carnation Co.

35-37 Randolph St., Chicago, Ill.

CARNATIONS—Rooted Cuttings

CANNAS

Thirty fine varieties. Dormant tubers.

Send for list of varieties and prices.

Wood Brothers
FISHKILL, N. Y.

A Grand New Carnation

BRIGHT SPOT

Outclasses everything heretofore grown in the dark pink class.

Won first honors in the 100 class for best dark pink at the A. C. S. Meeting, Pittsburgh, January, 1910, also at the Chicago Flower Show, November, 1909.

It is a pure bright dark pink of even shade, size 3½ inches, an early and continuous bloomer, brings fully 25 per cent. more flowers to the plant than Lawson at its best; flowers well shaped on long, wiry stems; calyx does not split. It is a good shipper, and the cuttings root easy.

Price per 100, \$12.00; price per 1000, \$100.00; price per 5000, \$400.00; 25 at 100, 250 at 1000 rates. Place your order now, to be in on early deliveries.

NIC. ZWEIFEL, North Milwaukee, Wisconsin

AZALEAS

Six, nine and twelve dollars per dozen. Pink, white, variegated and red. Red in small size only:

BEGONIAS.

5 inch 50c; 6 inch 75c; 7 inch \$1.00 each. Extra fine plants.

CYCLAMEN.

5 inch \$5.00 per dozen. Larger plants \$9.00 and \$12.00 per dozen.

PRIMROSES.

5 inch \$3.00 per dozen.

A FINE LINE OF PYRAMID BOXES FROM \$3.00 TO \$5.00 PER PAIR.

JOHN MCKENZIE, North Cambridge, Mass.

Heavily Rooted Carnation Cuttings

NOW READY and on up to MAY 1. Enchantress, Rose Pink Enchantress, Beacon, Winsor, \$2.50 per 100. White Enchantress, Georgia, \$3.00 per 100. Dorothy Gordon, \$5.00 per 100. Mrs. C. W. Ward, \$6.00 per 100. Alma Ward, \$7.00 per 100.

CAREFULLY PACKED; GOOD COUNT.

Tritoma syn. Kniphofia

Tritomas, commonly called Torch Lilies or Red-hot Poker plants, are natives of South Africa and Madagascar. Of strong bushy habit of growth with foliage of good substance and tall flower spikes in colors of rare intensity their ever-increasing popularity is readily understood. A fair-sized specimen in full flower will attract attention even if placed amid the choicest collection of summer-flowering plants. A group of them, numerous enough to send up from 50 to 100 torch-like racemes of bright scarlet, orange, or coral-red hue, borne on strong erect stalks from 2-4 feet high is bound to develop into a brilliant floral spectacle of unique beauty. Tritomas are elegant subjects for border planting and are known as highly useful bedding plants when conspicuous mass-effects are desired. For the latter purpose the most advantageous position is to place them so that their radiant shades stand out in vivid contrast against a dark evergreen background.

Longest known is the old tall-growing variety *Tritoma uvaria grandiflora*, in bloom from September until November. Its late-flowering habit, while perhaps of little or no consequence in middle and southern States to some extent, limits northern planting. The more recent introductions of early and free-flowering varieties have increased the ornamental value of tritomas immensely. They will now without doubt win the same popularity in the North that they have met South.

Among novelties tried, nearly all leading hardy-plant firms point out *Tritoma hybrida* "Express" as the best of the early ones, flowers appearing by the beginning of July. The ever-blooming torch lily *Tritoma hybrida* Pfitzeri, not exactly new, but still one of the best in existence, is in flower from early in August until the frost stops vegetation. Color of racemes a bright orange-scarlet. The same color and other qualities are said to distinguish the novelty R. Wilson Kerr, described as

TRITOMA HYBRIDA—PFITZERI

one of the best so far introduced. Of lower growth is *T. corallina*, a free and continuous bloomer producing coral-red spikes, while the color of *Obelisque* is yellow.

Torch lilies, though generally classed among the hardy perennials, do not endure severe frosts and therefore require proper protection during winter. Throughout the middle Atlantic States a leaf-covering held down by brush is usually sufficient, while further north it is safer to take the plants up late in fall and overwinter them in sand, in cool but sheltered inside quarters.

Forcing Melons

See Cover Illustration.

HIS EMINENCE

HERO OF LOCKINGE

SUPERLATIVE

The accompanying photographs are of three fruits which were used on Christmas, the pictures having been taken a few days previously. They show what can be done in the way of producing much prized delicacies.

The seed was sown on August 29 and grown under conditions similar to those that have been recommended in these columns from time to time.

"Hero of Lockinge" is regarded as the best all round melon for winter work. "His Eminence" is an excel-

lent fruit and does exceedingly well up to Christmas. "Sutton's Superlative" is a green-flesh melon of fine quality. The flesh is rich and of sugary sweetness.

The view shown in the cover illustration of this paper was taken in one of the melon houses under the care of Edward Kirk, gardener on the estate of George W. Vanderbilt at Bar Harbor, Me. Two of the varieties above mentioned are seen—Hero of Lockinge on left and Superlative on right side of picture.

SUPPLEMENT WITH THIS ISSUE
Index to Vol. XII.

 Come one,
 come all

Only ten weeks now remain before the doors of Mechanics Building, Boston, will swing open, presenting to the American public and the horticultural trade the grandest floral spectacle ever witnessed on this continent. No event planned for the immediate future can compare with this stupendous undertaking in direct importance and practical value to the plant and flower trade and allied industries. It is, in itself, sufficient to monopolize the attention and interest of every individual, from the Atlantic to the Pacific, who would like to see horticulture attain its proper position among the refined and refining influences of our land. All those who can possibly do so owe it to themselves and to their business to join in the great pilgrimage which is expected to move Bostonward in the latter part of March. It may be a very long time before an equal opportunity is again offered.

 Give us
 parcel post

The note on another page of this issue in reference to the action of the Canadian Railway Commission on express tariffs will have a very familiar sound for anyone who has followed up information regarding conditions on this side of the line. The facts therein presented show the utter inconsistency from every principle of a fair-price-for-the-service standard, in the carrying charges as now made by the express companies. With a system of railway transportation using the same rails, engines and service as is used for the transportation of other goods and passengers, yet simply on account of the collection and delivery, a charge for additional service is made which is so excessive and unjust as to demand emphatic action by the proper authorities. Patient and submissive, the public have permitted the extortion to go on for years with scarcely a word of protest and, judging from the apathy still shown, prefer to submit indefinitely rather than to take action to bring about a reform.

 Boys,
 get busy

President George Asmus has shown good judgment in the selection of directors to serve for the next three years on the executive board of the National Society. They are young men and have been chosen, apparently, not only as representing the younger element in the Society's membership, but in recognition of the record already made by both appointees as loyal and efficient workers in any capacity in which they have ever been called upon to serve. Intelligent study of the needs of the organization and persistent following up of live issues, with a determination to broaden the Society's scope, enlarge its usefulness and impress upon the horticultural profession the splendid possibilities in such an organization are among the qualities most needed in the official representatives of any association with a practical mission, and which have never been more urgently needed in the S. A. F. than at the present time. The trade and profession all over the country are now in the same sort of receptive mood as in the early days of the Society's history and there is an abundance of young healthy enthusiasm which wide-awake action now will be sure to set in motion. Boys, get busy.

Seasonable Notes on Culture of Florists' Stock

ALOCASIAS

At this season of the year, water should be withheld so as to allow these plants a season of rest—that is the herbaceous species. As the leaves show signs of maturing water can be withheld altogether until they start up again. Plants that have become too big and of a straggling nature should be cut into pieces, taking care to retain an eye to each piece. Use air-slacked lime over the cuts. Let the pieces lie in a warm place for a few days until they become dry, then lay them in a propagating frame on the sand and cover up with moss. Keep the atmosphere moist, with a temperature of 80 degrees. This is the best way to propagate *Alocasia Lowii* and *Sanderiana*, as they make but few small bulbs. *Alocasia macrorrhiza variegata*, *metallica*, *Thibautiana* and *Sedenii*, when strong, produce quite a few rhizomes which can be propagated. After they have started they can be potted up in a compost of one-third each of fibrous peat, turfy loam and chopped sphagnum.

FUCHSIAS

Bring in now some of your fuchsias that have been resting; shake and repot in good fresh soil. They can be started in a temperature of from 55 to 60 degrees. Shorten them back to firm ripe wood, and give them a good daily syringing, and you will be able to get a fine batch of cuttings in three or four weeks. These plants can be propagated with good success up to the end of February. They like a bottom heat of 70 degrees with a top heat of about 55 degrees. When they are rooted, which should be in about two or three weeks, they can be potted into 2½ or 3-inch pots, using a compost of two parts of fibrous loam to one of well-rotted manure and one part of leaf-mold, with a fair sprinkling of sand. Place the plants near the glass and syringe often so as to promote growth and to keep down aphides and red spider. They can be shifted along until they are in the desired size. Five and 6-inch makes a good salable size. They can be pinched, which will induce them to break into two or three leading growths. If a more compact plant is needed they can be stopped a second time. *Fuchsia speciosa* is an old but standard variety for vases, veranda boxes or beds.

HELIOTROPE

Now is a good time to start and increase your stock of this plant. Put in cuttings of the best varieties, bearing in mind that the dark colored varieties emit a stronger fragrance, while their flowers last longer. When rooted pot into 2½-inch, using a compost of fibry loam two parts and well decomposed manure one part. They will need to be shifted as they get well-rooted. When well-established they like a cool, airy and sunny house, but guard against sudden falls of temperature and cold draughts. Give them a temperature of not over 50 degrees at night with a buoyant atmosphere at all times, for they don't like to be huddled up in warm and over-

humid quarters. They will need careful watering and frequent spraying until they begin to bloom. When they become root-bound in 5 or 6-inch pots they should have occasional applications of weak manure water.

LONGIFLORUMS

These lilies should be brought in now and placed on a bench in a house having a temperature of not over 50 degrees. Care should be exercised in watering at this stage. In about two weeks the temperature can be raised to 60 degrees—that is, if the pots are well filled with roots; if not, it would be better to give them 55 degrees. Place them as near the glass as accommodation will permit. In the six weeks previous to Easter they will endure a good strong heat—anywhere from 65 to 70 degrees in order to bring them right. Fumigate moderately once a week so as to keep down the aphids.

PROPAGATING CROTONS

There is no question that it is better to moss all the good tops available, and the sooner a beginning is made the better. Select the stem and denude of leaves for a distance of 2 or 3 inches. With a sharp knife make an incision upward in the wood of half an inch, and from one-half to one-third through. Place a little sphagnum in the incision to keep it open, then put a small quantity of sphagnum about the size of an egg and tie it on. Place these plants by themselves so the moss can be kept moist, while the roots should be kept rather dry which will hasten the process of rooting. In about four weeks, under favorable conditions, the roots should be seen coming through the moss, when it is time to sever the tops from the parent plant and pot them. After the tops are potted they should be placed in a frame where there is a gentle bottom heat. Keep the atmosphere well charged with moisture. For a week or two they should be shaded from the sun and care exercised in watering. When the foliage is in no way limp and the plants have the appearance of sturdiness, they should be taken out and placed on a bench in a house where the temperature can be maintained near 70 degrees at night, and given frequent syringings in order to keep the air moist. Crotons can also be propagated by cuttings in a warm propagating frame.

THE PROPAGATION OF DAHLIAS

Young plants propagated from now on will give abundance of flowers. Old roots that you have under the bench can be placed on a bench where there is some bottom heat and sufficient soil scattered on the roots. The young growth will soon start. Give them a temperature of from 55 to 60 degrees. These can be cut off 3 or 4 inches long or so as to leave a joint at the base, and inserted in the propagating bed. They will soon root and should then be potted and grown on. When once established in small pots give them the fullest light and plenty of syringing to keep down thrips and spider. When well rooted in their small pots they should be shifted into 4-inch and given a house where the temperature is near 50 degrees. If you have not much room at hand you can defer this until February or March.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: *Abutilons*; *Acalyphas*; *Canterbury Bells*; *H drangeas*; *Odontoglossums*; The Care of Stock Left Over.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS

Appointments by President Asmus.

Directors, three years:
E. Allan Peirce, Waltham, Mass.; Harry A. Bunyard, New York, N. Y.

Botanist: Prof. John F. Cowell, Botanic Gardens, Buffalo, N. Y.

Pathologist: Prof. H. H. Whetzel, Ithaca, N. Y.

Entomologist: Dr. S. A. Forbes, Urbana, Ill.

Washington Representative of the Society: William F. Gude, Washington, D. C.

Tariff and Legislative Committee: John G. Esler, Saddle River, N. J., chairman; F. H. Traendly, New York, N. Y.; J. C. Vaughan, Chicago, Ill.; Patrick Welch, Boston, Mass.; J. O. Thilow, Philadelphia, Pa.; E. G. Hill, Richmond, Ind.

Committee on School Gardens: Benjamin Hammond, Fishkill-on-Hudson, N. Y., chairman; C. B. Whitnall, Milwaukee, Wis.; Michael Barker, Chicago, Ill.

State Vice-Presidents.

California, Edwin Lonsdale, Lompoc; District of Columbia, Z. D. Blackstone, Washington; Georgia, Daniel C. Horgan, Macon; Illinois, North, Fred Lautenschlager, Chicago; Indiana, J. F. Ammann, Edwardsville; Iowa, Theo. Dorner, Lafayette; Iowa, James S. Wilson, Des Moines; Louisiana, Harry Papworth, New Orleans; Maryland, Chas. L. Seybold, Baltimore; Michigan, East, Norman A. Sullivan, Detroit; Michigan, West, Elmer D. Smith, Adrian; Missouri, East, Fred H. Weber, St. Louis; Mis-

issippi, S. W. Crowell, Rich; New Hampshire, R. E. Hannaford, Portsmouth; New York, East, A. L. Miller, Brooklyn; Ohio, North, Frank A. Friedley, Rocky River; Ohio, South, C. E. Critchell, Cincinnati; Pennsylvania, East, S. S. Skidelsky, Philadelphia; Rhode Island, L. J. Reuter, Westerly; Tennessee, C. L. Baum, Knoxville; West Virginia, A. Langhans, Wheeling; Ontario, John Cannon, Hamilton; Manitoba, H. E. Philpott, Winnipeg; Quebec, George A. Robinson, Montreal; Alberta, A. M. Terrill, Calgary.

E. Allan Peirce.

E. Allan Peirce, appointed by President Asmus to the honor of directorship in the Society of American Florists, is a well-accredited representative of Boston floriculture. He is the son of the late E. N. Peirce, popularly known as "Farmer Peirce," and in association with his brother conducts the large plant and flower-growing business established by his father at Waverley, Mass., under the title of Peirce Bros.

Allan Peirce was born in Arlington, Mass., on May 11, 1869. He has indomitable industry, resourcefulness almost unlimited and has the qualities of persuasive leadership well developed. His hustle of last year as State Vice-President of the S. A. F., whereby he brought in a big list of new members is generally known. He is a director in the Boston Flower Exchange, the original Park Street Market. On the preparatory local work for the National Flower Show, Mr. Peirce has rendered signal service.

E. ALLAN PEIRCE
Director for Three Years.

PRESIDENT GEORGE ASMUS

Harry A. Bunyard.

Harry A. Bunyard, appointed a director in the S. A. F., is well known as a traveling man and now general manager for Arthur T. Boddington. He was born January 3rd, 1868, at Ashford, Kent, England. His father, Thomas Bunyard, was one of the sons of the old established firm of Thomas Bunyard & Sons, Maidstone, Kent, "Nurserymen, Seedsmen and Florists." At 14 years of age Harry was apprenticed in his father's business, going from there to Sander's, St. Albans—spending considerable time in the seed and orchid departments. In the Royal Horticultural Society's Gardens at Chiswick, London, he studied and worked under the late Archibald Barron—and during that time was foreman of the orchid and herbaceous departments; while here, he competed for the prize offered by the London Gardeners' Chronicle, for the best essay on "Roots and Their Work," securing second prize against nearly one hundred competitors of Great Britain.

In the year 1888, Mr. Bunyard arrived at Castle Garden as an emigrant, securing his first "job" with Peter Henderson & Co., working at their greenhouses in Jersey City; the following year he took a position with Pitcher & Manda as herbaceous foreman, becoming their first traveling man and remaining with them to their dissolution. Mr. Bunyard was the first man to sell orchids west of Chicago,

HARRY A. BUNYARD
Director for Three Years.

CLUBS AND SOCIETIES

and can tell many anecdotes of his experience along these lines; later he traveled for Clucas & Boddington Co., then again with Arthur T. Boddington, where he has been located for the past six years.

Mr. Bunyard is a life member of the S. A. F., attending in Buffalo in 1889, and practically every convention since that time. He is vice-president of the New York Florists' Club, and secretary of the National Sweet Pea Society of America, which he organized in 1909, and is an active member in many other horticultural and floricultural societies.

Mr. Bunyard believes that a man's business should be his hobby and should endeavor to educate himself along these lines. He is also a great believer in advertising. Among the other "chores" that he does at odd times is the designing of the covers for the Boddington catalogues.

Department of Registration.

As no objections have been filed, public notice is hereby given that the registration of the Geraniums, "Panama," "White Cloud," "Ruby," "General Wooster," "Barnaby Rudge" and "Bright Eyes," by F. H. De Witt, Wooster, Ohio, becomes complete.

H. B. DORNER, Secretary.

December 29, 1910.

CANADIAN EXPRESS RATES.

Railway Commission Orders Them Cut.

Ottawa, Dec. 24.—The Canadian Railway Commission has directed the express companies of the Dominion to file lower tariff rates within three months. The commission declares that express rates are too high, and that, as the express companies are owned by the railway companies, there is no occasion for the existence of separate companies to handle the express business.

A rate reduction of at least 10 per cent. in through express traffic is ordered, local rates to be correspondingly cut. The existing form of shipment contract is ordered abolished. The commission holds in its judgment filed to-day that the present form of contract is unreasonable and designed to enable the companies to escape responsibility for shipments lost or damaged.

The commission affirms that the express companies overpay the railways for accommodations in stations and intimates that this is a convenient way of disposing of profits which otherwise might be so conspicuously large as to be inconvenient.

Describing methods of financing in various express and railway companies, the commission points out that the Dominion Express, owned by the Canadian Pacific Railway, is capitalized and pays dividends on \$2,000,000, although the railway board could find only \$24,500 cash which had ever been put into capital. In seven years the Dominion Express earned \$21,473,686 and paid the Canadian Pacific Railway \$13,409,249, or 63.9 per cent. During the same time the Canadian Express Company, owned by the Grand Trunk Railway, earned \$13,362,266 and paid the Grand Trunk \$8,467,307, or 55.5 per cent. on assets stated as \$212,719.

CONNECTICUT HORTICULTURAL SOCIETY.

Our last business meeting of the old year was held on the 30th ultimo, at the County building, with a small attendance, due partly to the holiday season. Although extremely cold weather, two of our active floriculturists risked exposing some valuable flowers; and we were favored with an exhibition of *Cypripedium insigne* by J. A. Weber, and primula and Lorraine begonia by Alex. Cumming, Jr. President Huss appointed three judges, H. L. Metcalfe, John Gerard and Francis Roulier, who awarded a diploma to Mr. Weber, and a diploma and a certificate of merit to Mr. Cumming. The following named persons joined at this meeting: W. F. Ruscoe of New Britain, Robert Hunnicks of Rockville, and T. F. Keller of Hartford.

Much valuable information was imparted by the reading, at the president's request, of three printed articles,—one by Charles Thos. Beasley, of Norwich, on the culture of the Begonia Gloire de Lorraine; one by Edgar W. Ela, of Woburn, Mass., from the "Dahlia News," on the wintering of dahlia roots; and one by "Jayheff," of Salem, Mass., from the same source, on another way of wintering roots. These papers led to a helpful discussion, and it was suggested that the next meeting of our society be specially devoted to making up a schedule of addresses to be made and papers to be read at the coming new season's meetings. Secretary Smith promised a paper on the subject of the pear, and Mr. Weber one regarding poinsettias. Other voluntary contributions of this kind are expected.

We start the new year with a membership of 182, with constantly increasing interest in our work, with a harmonious membership, and with great expectations that 1911 will bring us the best and most profitable year in our history.

GEORGE W. SMITH, Secretary.

Melrose, Conn., Jan. 3, 1911.

AMERICAN GLADIOLUS SOCIETY.

President Hendrickson has appointed the following committee to investigate the diseases of the gladiolus, each member to work in connection with the experiment stations in the different states:

New York—Arthur Cowee, Berlin, N. Y.
Ohio—M. Crawford, Cuyahoga Falls, O.
Wisconsin—H. H. Bridge, Lake Mills, Wis.
Massachusetts—L. Merton Gage, Orange, Mass.
Indiana—E. Y. Teas, Centerville, Ind.
Michigan—C. H. Ketchum, South Haven, Mich.
Connecticut—B. F. White, Terryville, Conn.
Iowa—G. D. Black, Independence, Iowa.
New Jersey—I. Leonard, Iona, N. J.
California—Dr. W. Van Fleet, Chico, Cal.
Illinois—H. B. Dörner, Urbana, Ill.
L. MERTON GAGE, Sec.

The next meeting of the Rochester (N. Y.) Florists' Association will be held in its regular meeting room on the evening of January 9, at which time election of officers for the ensuing year and other important matters, besides light refreshments, will be attended to. Everybody come.

PERPETUAL FLOWERING CARNATION SOCIETY.

At the exhibition of the Perpetual Flowering Carnation Society in London, December 13, the American Carnation Society offered a challenge cup for three vases of a dozen blooms each of novelties raised in America, the cup to be held by the winner for one year. W. E. Wallace, Eaton Bray, Bedfordshire, was the winner with Dorothy Gordon, May Day and Pink Delight; C. Engelmann took a second prize. The Covent Garden Bowl Trophy and a silver gilt medal was offered as the first prize for two varieties of market carnations, 60 flowers of each variety, 36 to be shown in two vases and 24 in two boxes each, as packed for market. Mr. Wallis was first with Pink Delight and White Perfection; C. Engelmann second, with Regina and Carola.

F. Dorner & Sons Co., La Fayette, Ind., U. S. A., offered special prizes for 12 blooms of Scarlet Glow, and first prize, was awarded to W. E. Wallace; second and third went to G. Lange and E. Engelmann.

It was stated in the report read at the annual meeting held in the evening that "A practical working arrangement has now been matured between the honorable secretary of the Perpetual Flowering Carnation Society and the secretary of the American Carnation Society, with a view to preventing the duplication of names in either country, and of affording mutual information of interest to growers on both sides of the Atlantic."

THE FLORISTS' CLUB OF PHILADELPHIA.

S. S. Skidelsky was the star attraction at the meeting of the club held on the 3rd inst. Another attraction was an excellent lunch for the members in lieu of the usual New Year's Day fest. Mr. Skidelsky's subject was "Are We Progressive," and he handled this flexible proposition in his usual able manner. We hope to find room in our columns for this valuable contribution to current thought at an early date. J. Otto Thilow, as chairman of the committee on essays and publication, made interesting announcement of many able speakers for the coming months. William H. Taplin will appear in February on "Carnations of Today" and A. H. Wohlert in March on "Landscape Gardening." Z. D. Blackstone is on the list for a talk on "Special Sales for Retail Florists." Xavier E. Schmitt of the Park Department and Mrs. Smith, the violet grower, are also to be heard during the year—the dates to be announced later. Adolph Farenwald enlivened the meeting by accusing many of our large growers of producing calico when the public wanted silk—thereby swamping the market. To judge from the tone of indignation on this state of affairs calico ought to be a penitentiary offence.

The executive committee of the National Sweet Pea Society of America will hold its annual meeting early this month at the Hotel Astor, New York City. W. Atlee Burpee will preside.

Obituary.

Fred Dörner.

The death of this eminent carnation raiser, as recorded briefly in part of our edition of last week, is a severe loss to floriculture and the news will be received with profound regret throughout the world and keenest sorrow among those who have been closely associated with him in the American Carnation Society and in other organizations and business life. Fred Dörner was held in high esteem as a man of strict integrity, possessing manly qualities and companionable traits that endeared him to his business associates and fellow citizens as well as abilities in his chosen profession which brought him honor not only at home but abroad.

Fred Dörner was born in Baden, Germany, November 29, 1837. He came to Lafayette, Ind., when 18 years old and obtained employment for a time with a florist named Lloyd. He followed farming for a period and started as a florist in Lafayette in 1870, renting some greenhouses on Underwood

FRED DÖRNER

street. In 1875 he moved to Indiana avenue, moving in 1889 to a new location and in 1905 had a modern establishment of over 100,000 ft. of glass. He died on Thursday, December 29, after a week's illness of pneumonia. He had been, however, in poor health ever since last winter.

It was in 1892, we think, that Mr. Dörner first attracted attention to his abilities as a carnationist, when he exhibited at the A. C. S. first annual meeting in Buffalo, a sensational group of seedlings. From that time he was a constant worker in that organization and was elected its president at the meeting in Boston in 1895, presiding at New York the following year. The number of his introductions was large and it is needed only to name a few of them—such as Mme. Diaz Albertini, Mrs. G. M. Bradt, William Scott, Storm King, The Stuart, White Cloud, Lady Bountiful, Red Chief, Winona and Pink Delight—to indicate the tremendous influence Fred Dörner's productions have exerted on the florist trade wherever an American carnation is grown or used.

John J. Gormley.

The Chicago retailers lost one of their best known men when John J. Gormley passed away early Saturday morning, Dec. 31st, 1910. Three weeks only had he been out of his store, known as Canger & Gormley's at 29 State street, and while it was thought that his ailment was a serious one his death was a surprise to his family and friends. But a few hours previous to his death he was reading his favorite poems by Robert Burns while sitting in his accustomed chair and listening to the Scotch airs which he requested his daughter to play on the piano.

John J. Gormley was born in the north of Ireland, Sept. 3, 1863, and when twelve years of age came to Boston to work for his uncle, John Gormley, then one of the leading florists of that city. Just previous to the World's Fair he came to Chicago and for many years was manager for the E. Weinhoeber Co., going into business for himself about seven years ago. He was considered one of the most expert decorators in Chicago and was a genial, whole-souled man, a favorite with all. The funeral was under the auspices of the Royal League, Sunday at 2 o'clock, and interment was at St. Boniface Cemetery. All the old florists were represented and the floral offerings were unusually many and beautiful. The casket was covered with Beauties sent by his partner, Mr. Canger, and white roses by E. Weinhoeber.

Mr. Gormley leaves a widow and two daughters, Helen and Mary.

Louis Muth.

Louis Muth, retail florist at Fifth street and Fairmount avenue, Philadelphia, died of typhoid fever on December 28th, at the age of about 35 years. He had been four years in business at that location, succeeding Albert Knapper. Previous to that he worked for eleven years for Habermehl. Mr. Muth was an expert decorator. He leaves a wife and one boy.

The Late Uhei Suzuki.

When the death notice of Uhei Suzuki appeared in your paper, some people in the horticultural line knew that the founder of the Yokohama Nursery Co. had passed away, but very few realized who the man really was, what he had achieved and how greatly horticulture is indebted to him in Japan, the United States and Europe.

Born in some country place in Japan, he came to Yokohama a poor country fellow. All he could call his own was a wife, a boy—Bunzo—and a few of those famous dwarf trees, which long years after became the admiration of our people here and were bought at marvelous prices, when brought here for the first time. He became head gardener to some English nobleman residing in Yokohama, who was a lover of Japanese gardens and horticulture.

The gold banded lily (*L. auratum*), although they were admired by the Japanese on account of their gorgeous flowers, were chiefly valuable at that time as a vegetable, the bulbs being boiled and preserved in sugar. A German—Louis Boehmer—settled in Yokohama and started to export some of them to Europe where

they created quite a sensation on account of their beautiful flowers. The demand increased, although high prices prevailed because the largest part of the shipments generally reached their destination in rotten condition. Mr. Boehmer engaged Mr. Suzuki as his buying agent and they began to export, besides *L. auratum*, *L. speciosum album*, *rubrum* and *Melpomene* in large quantities.

That was at the time of Japan's awakening, but foreigners were still restricted to the boundary lines of the seaports which were opened to foreign trade. Wide awake Suzuki saw with a sharp eye the future possibilities for a new trade and urged the Japanese farmers who heretofore had made a bare living to take up the cultivation of lily bulbs, which up to then had mostly been gathered wild. By degrees one after the other followed his advice and the price paid for the bulbs was such that the Japanese could not afford any longer to use them as a vegetable. Then came the time when Mr. Suzuki saw in the Japanese *Lilium longiflorum*, a good substitute for the Bermuda grown *Lilium Harrisii*, for which there was an

JOHN J. GORMLEY

increasing demand. He severed his connection with Boehmer Co. and started the Yokohama Nursery Co., buying up property on the Bluff in Yokohama, which today is considered the most exclusive neighborhood and mostly settled by foreigners. There he created his gardens which are now among the greatest attractions of Yokohama. Some of the first American visitors were the late Dr. Smith, father-in-law of Wm. F. Dreer, and John T. Morris of Philadelphia. Mr. Morris visited the gardens first and induced Dr. Smith to see them also and both gentlemen bought several thousand dollars' worth of plants which surprised Mr. Suzuki so much that he had doubts whether their checks on the Hongkong and Shanghai Banking Corporation would be honored. Mr. Morris started the first Japanese garden in this country which is still considered the best. Some years after Mr. Dreer took a trip to Japan and became one of the first trade customers of the Yokohama Nursery Co. on a large scale. Mrs. Berger of H. H. Berger & Co., San Francisco, followed

and later J. K. M. L. Farquhar of Boston. In the meantime Bunzo Suzuki, the oldest son who had come over to the states to study horticulture, had opened a branch office in New York and became very well known and highly regarded in the American and European trade. After he retired some years ago his brother, Hamakichi, who had been his father's assistant came over to America and Europe to look after the interest of the company. He is now the head of the concern and as he inherited all the excellent qualities of the deceased there is no doubt he will be quite as successful.

There is no man who did more to exploit Japanese horticulture commercially than the deceased and he can be called the Japanese pioneer in this line. Through his efforts horticulture trade became what it is now, a valuable asset in the Japanese trade balance. He was a captain of horticulture and won an everlasting victory for his country. C. L.

CHICAGO NOTES.

A car load of southern smilax was used at the decoration of the Auditorium for the Charity ball.

Several shipments of the Wittbold Watering System have lately been made to the Philippine Islands.

John Starret had the largest decoration yet at the La Salle hotel for the New Year's Day. 500 tables all done with Kallarney roses made some work.

The many friends of John J. Gormley of Canger & Gormley learned with regret of his death on the closing day of the year. Further notice is given in the obituary columns.

The unusual state of the glass market is again causing some large sales among the local growers, and some will build more extensively next year than they had previously planned.

D. D. Johnson of the Evergreen Brand Fertilizer Co. is on a business trip this week. Though not the time for fertilizers to be most in demand, still quantities are used by the under-glass gardeners and there is no really dull season in this line.

Phil Schupp states that the rumor that the J. A. Budlong Co. will leave their present quarters in the Atlas Block is incorrect. They are crowded and their constantly increasing business really demands more room, but the present location he considers too desirable to leave.

A severe storm swept over the city Jan. 2nd and many florists were greatly inconvenienced by delayed trains. On the 3d three of the through trains on the Rock Island were tied up by deep snow west of Des Moines, Ia. Shipments of flowers were also delayed by overtaxed express cars during the holiday week. Southern shipments suffered most.

The Chicago Carnation Co. will give a free excursion to their plant at Joliet, Ill., on Wednesday, Jan. 11, 1911. The train will leave the La Salle Street station over the Rock Island at 11.45 A. M. Manager Pyfer extends the invitation to anyone interested in carnations to inspect this plant, where the best of the old varieties are grown as well as the choicest new ones, conspicuous among which is their Washington, which has made a fine record. Also, among the new ones, they are growing Dorothy (Gor-

don, Scarlet Glow, Shasta, Sangamo, Conquest and others. The Chicago Carnation Co., since opening the Chicago office has greatly increased its volume of business.

Chas. McKellar is the latest Chicago florist reported to be suffering with blood poison as the result of handling plants and flowers. A few weeks ago we reported nine cases as receiving treatment at the Cook Co. Hospital within a month. Mr. McKellar did not cut his hand but the skin was broken or "chapped" and the poison, supposedly from the chemicals used in spraying, infected two fingers of the right hand. This week the left hand is also swollen and very painful.

Wm. J. Smyth has had an unenviable experience with his large plate glass store windows three years in succession. This time it was on the day following Christmas when an automobile crashed into the window on the Michigan avenue side, demolishing it and ruining the plants. The loss was met by insurance and the new glass is now in. Mr. Smyth's store, which is one of the finest in the city is at the corner of 31st street and Michigan avenue, and in spite of a board walk which ought to give ample protection automobiles find it hard to resist the attraction the store possesses. Two years ago the same thing happened on the 31st street side and the auto came into the store. One year ago during a severe storm the Michigan avenue window blew in but Mr. Smyth boards up the window and goes on selling flowers with the good nature characteristic of the man.

Personal.

Post. Choles, of Louis Russo's, Madison, Wis., was among the week's visitors.

Clifford Pruner has just returned from a business trip to St. Louis, Mo., in time to be drawn as a juror.

Among the salesmen starting out from here for the new year was J. J. Karins of H. A. Dreer's, Philadelphia, on his way to the Pacific coast.

Harry Nicholson of the Chicago Car. Co., is calling on the trade in the East. He will visit Boston and Framingham, Mass., where his father, Mr. Nicholson, resides.

Miss Frances Brundage spent a portion of the holidays with her sister in Missouri and found the Xmas there a decidedly green one, no snow and the weather warm.

W. C. Johnson of the E. H. Hunt Supply House is back from the Gulf coast where he found business to be good. This firm report the year's business to surpass that of any previous years.

PHILADELPHIA NOTES.

Samuel S. Pennock reports very few oranges this year from his fruit ranch in Florida. Too bad!

Jasminum grandiflorum, an old and sweet-scented favorite greenhouse plant, is seen in fine shape at Pennock Bros. at present. This comes from the Colflesh greenhouses and is much esteemed in the cut flower trade.

Paul F. Richter of the Henry F. Michell Co. has been enjoying a well-earned vacation at Pinehurst, Florida, and has just returned to business feeling much refreshed and invigorated after his brief sojourn in the sunny south.

J. D. Nevius, known the country over as a chicken authority, will give a lecture at Michell's on the 23rd inst. "The Importance of Poultry Raising" to the gardener, florist, suburbanite and farmer, will be the title of his subject.

The Joseph Heacock Co. will open wholesale cut-flower headquarters in the premises lately occupied by Edward Reid on Ranstead St., above 15th. It is reported that this move is solely for the purpose of better serving the customers of this extensive growing establishment with large plants from Wyncote and Roelofs.

Among the distinguished new members elected to membership in the Florists' Club at its meeting on the first Tuesday of February, 1911, were the following: D. S. Adams, late of J. M. Thornburn & Co.'s; H. Wintzer, of Henry A. Dreer's; G. W. Hampton, of H. F. Michell's. If any of our contemporaries can beat us in getting the news in "on time" let them try to beat that item. We give the news "red-hot" every time.

Things are happening at Michell's these days. The latest live item is the engagement for this house of D. S. Adams, late of J. M. Thornburn & Co.; H. Wintzer, late of Henry A. Dreer's, and G. W. Hampton, the latter of whom we briefly mentioned last week. We look for much good work from these gentlemen—not only for the good of their house but for the trade in general.

We had the pleasure of a call from A. N. Pierson of Cromwell, Conn., on Wednesday. He brought with him three big vases of three of his rose specialties for 1911, Lady Cromwell, Prince de Bulgarie and Dark Pink Killarney. These varieties are very distinct and beautiful and created much interest in the trade here. We append a few notes in connection with these which our readers will be glad to peruse:—

Lady Cromwell—a sport from My Maryland originating at Mr. Pierson's place at Cromwell, Conn., about two years ago. Shell pink on the outside shading deeper to the center. During the hot weather Mr. Pierson says the dark center is not so pronounced and the whole flower is then a self of most charming shade like a Safrano or Sunset but a much larger flower.

Prince de Bulgarie (Pernet-Ducher 1902)—name being lost it was sold as Mrs. Taft until Mr. Pierson found out its real name by having an expert French rosarian grow fifty plants for purpose of identification. A lovely shell pink deepening to the center, beautiful formation, full, many petaled. Mr. Pierson says that for ten months in the year it is one of the best roses he has ever grown. Perfect in stem and foliage.

Dark Pink Killarney—This is so distinct and lovely a flower that it is eminently worthy of a more distinctive name. The under side of the petal is claret with lighter silver-shaded reflex. Originated at Montrose Greenhouses, Montrose, Mass. Mr. Pierson says this variety is especially brilliant in coloring during the winter months when the parent Killarney is so variable and often unsatisfactory.

Visitors this week: A. N. Pierson, Cromwell, Conn.; J. P. Brazleman, New Castle, Indiana; P. Joseph Lynch, West Grove, Penna.

FINE FERNS

Ready For Immediate Retail Sale

We have an exceptionally fine and large stock of ferns in the following varieties,—first-class plants of exceedingly good value—plants that will please the most critical buyers, both in regard to quality and value.

NEPHROLEPIS ELEGANTISSIMA (Improved). The finest of this type—never showing a Boston frond; has not reverted in the last four years. Fine plants, 6-in., \$6.00 per dozen; 8-in., \$12.00 per dozen; large specimens in 12-in. pans, \$3.00 to \$5.00 each.

NEPHROLEPIS ELEGANTISSIMA COMPACTA. This bears the same relation to elegantissima compacta that Scottii does to Bostoniensis. It is a dwarf, compact plant, especially fine in the small sizes. Fine plants, 6-in., \$6.00 per dozen.

NEPHROLEPIS SCHOLZELI. Fine plants, 3½-in. pots, \$2.50 per dozen; 6-in. pans, \$6.00 per dozen; 8-in. pans, \$12.00 per dozen.

NEPHROLEPIS BOSTONIENSIS. Extra strong plants, 8-in. pans, \$12.00 per dozen.

NEPHROLEPIS SCOTTII. 8-in. pans, \$12.00 per dozen.

SMALL FERNS FOR FERN PANS. Best and hardest varieties assorted: Pteris Mayli, Wimsetti, Adiantoides, Aspidium Tsussimense, Crytomium falcatum, etc. Strong plants, 2¼-in. pots, \$3.50 per 100.

CROTONS. Nice assortment, well colored, 5-inch, \$9.00 per dozen.

\$25.00 per 100.

ELLIOTT AUCTION CO. 42 Vesey St., New York

¶ Shakespeare is said to have possessed a brain-vocabulary of about 15,000 words; Webster about 8000; while the average man has perhaps 1000. Now the English language is simple as compared with the Japanese. The modern printer in Japan must make a selection from about 8000 characters to "set-up" even an ordinary story. These characters stand for words and sometimes whole sentences. Just think it over before you begin to study that interesting language.

¶ The Japanese children now study English in many schools in Japan and in the course of time it will not be so difficult to get together. Perhaps then we can go into the bulb fields and talk English to the growers. It can't be done now however and it takes a well educated Japanese to be a successful bulb merchant. Mr. Arai is one of the ablest men in the business; a man conversant with all the ins and outs; the people; their products; and the value of a lily bulb from A to Z. He is personally in the fields much of the time and among the growers all of the time. Horseshoe Brand lily bulbs are marketed under his personal supervision and they are the choicest from the Orient.

A BLUE ROSE

The Greatest Rose Novelty of the Century

It flowered with us this season and was greatly admired.

The New Rambler (Violet Blue), hailed by the German rose growers as the forerunner of a genuinely cornflower blue rose, is a seedling of Crimson Rambler, very vigorous and hardy, and free blooming.

Send for description and price.

roots, having a full crew of men at work.

Fennville, Mich.—J. E. Hutchinson and Henry Lamb have organized the Sanocide Spray Co., which firm proposes to manufacture a lime and sulphur composition. The plant will have a capacity of 300 barrels per day.

Seed Trade

Steps Retraced.

The action of Messrs. Theodore Cobb and E. C. Dungan in leaving J. F. Noll & Co., was a surprise to very many in the trade. A few there were, who were not very much surprised and as a matter of fact, claim that they expected this all along, but they are probably in the class of "I told you so" who generally are very accurate prophets after the thing has happened. It is generally known that Mr. Cobb is back with his old house, D. M. Ferry & Co., while Mr. Dungan has returned to the shelter of his old friend, William Henry Maule. With reference to the business of J. F. Noll & Co., we are informed that it will be continued as heretofore, under the direction of Mrs. Noll and her brother-in-law, Robert, or Bob as he is familiarly known.

A Troy Failure.

The recent assignment of Josiah Young, the Troy, N. Y., seedsman and florist, just at the beginning of the current business season, has caused some little surprise although among those familiar with conditions but it has been anticipated for some time. It is generally reported by those best qualified to express an opinion, that Mr. Young has been steadily losing money for a period of several years and that on one or two occasions, his losses were quite heavy. It is unfortunate that he could not have turned his losing streak into a winning one and made a success of his business and he will generally have the sympathy of those who know him best. We are informed that his liabilities are something about \$20,000 while his available assets are not considered sufficient to pay more than 25 per cent. on the dollar. There seems little likelihood of a reorganization and continuation of the business and it will doubtless be wound up as soon as the stock on hand can be disposed of. What Mr. Young's plans for the future are, we have not been informed but wish him success in whatever line he may decide to embark.

Sweet Corn.

For some time, there have been rumors of damage to the sweet corn crop of the country, particularly from Ohio. Just how serious this is going to prove we are unable to say but judging from the quotations that are freely made by the Connecticut and other growers of seed corn, we take it that the damage is not very serious or that Ohio is not a very important factor in this branch of the seed business which, if correct, will be something of a shock to the Ohio corn growers who have generally thought they would put the handle on the whip.

Pea Prices Maintained.

Both seedsmen and canners are contracting liberally for seed peas of the 1911 crop and as a general rule, the seed growers are drawing about the prices originally fixed. There have

Henry F. Michell Co.,

518 Market St., PHILA., - - PA.

been some slight modifications of the first quotations which, of course, is inevitable because of the fact that prices of the leading responsible growers must of necessity be somewhere nearly uniform and, as each grower starts out independently without any definite knowledge of what his competitors are doing, he only learns after he has called on the trade and hears the quotations of others in his line. As a whole, however, both canners and seedsmen have paid the advanced prices with less grumbling than seemed possible early in the season. They have doubtless been educated to appreciate the fact that not only are seed stocks short but that the advanced prices which the seed growers are compelled to pay their farmers necessitates an advance over last year's figures and as the market is virtually bare even at this early period, consumers are making liberal provisions for next year's requirements. Should the growers be able to deliver practically full on on next season's contracts, there will be a considerable shrinkage in the orders which will be placed another year, as it is very well known that the seedsmen at least are ordering largely in excess of actual requirements to anticipate the annual and increasing shortage.

Notes.

Springfield, Mo.—The Diamond Seed Co., a new concern capitalized at \$25,000 is to be located here. W. J. Wood is president.

Kendrick, Ida.—W. W. Tracy, Jr., will grow vegetables and flower seeds for the wholesale trade on a farm recently purchased near here.

San Diego, Calif.—The Harris Seed Co. has decided to move into the old Post Office Block on F street, owing to increased business in their seed and nursery department. They will equip a sales yard for fruit trees as well as ornamental trees and plants.

Coffeyville, Kans.—It is stated that the Binding-Stevens Seed Co., of Tulsa and Muskogee, Okla., are anxious to open another branch, and are considering Coffeyville very favorably. If a suitable site can be se-

cured and prospects are favorable they will open it early this year.

We are informed that Curtis Nye Smith of Boston, attorney for the American Seed Trade Association, has secured a hearing on the Mann Seed Bill before the committee on Interstate and Foreign Commerce at Washington, D. C., on January 17.

McHutchison & Co., the horticultural importers, recently received on two steamers within 24 hours, shipments of lily of the valley pips totaling 1,033 cases—all consigned by Aug. Bitterhoff Sohn, Berlin, Germany, for re-forwarding. Mr. McHutchison says that deliveries of valley pips are generally good this season, though the crop is short—not enough to go around. Prices are high and are continually advancing in Germany upon high grades.

Prospects for next season are that the crop will be smaller than usual—the demand larger than usual with a higher range of prices prevailing and an unceasing demand for high-grade pips. Notwithstanding reports to the contrary, the highest grade of pips that Germany produces are now being shipped to this country; medium grades go to Russia and Europe and the poorest are used almost exclusively in Germany.

tronage. There was practically no stop in the business rush since Christmas. Bright cold weather would help us a great deal now but nevertheless the natural slackening up of the demand will bring the supply of cut flowers and flowering plants nearer to the mark needed than it was in the past. Best wishes of the season to the trade at large and especially to HORTICULTURE, which so justly deserves the full confidence of reader and advertiser because of its untiring efforts to produce a clean, interesting and very educational weekly. F. DANZER.

Washington. — The unseasonably high temperature with which the New Year entered, accompanied by an almost three days continuous rain, brought the high prices which prevailed during the Christmas season, tumbling down, down. While the supply is decidedly in excess of the demand as yet, the retail florist is not like one who labors without hope. Should the promised fair weather prevail during the remainder of the week the numerous social affairs on the list will clean up all good stock. There has been an unusual demand for lily of the valley, considering the state of the market, but it was

ST. LOUIS NOTES.

A big consignment of double violets sent by an eastern firm came in on Monday morning, December 26, and the express company sold them to down-town florists to pay charges.

Ostertag Bros. have a big force at work in the Coliseum decorating for the Metropolitan Opera season, an event which should cause a demand for first-class flower stock of all kinds.

The appointment of Fred H. Weber as state vice-president for eastern Missouri will be well received by the local trade as Mr. Weber is a hard worker in behalf of the S. A. F., and the local Florist Club.

Fred J. Ammann caused quite a commotion among the residents of Edwardsville on Christmas by delivering all his plants and flowers in an undertaker's wagon, his own flower wagon having broken down and the residents thought from the many stops made by the wagon and unloading of flowers that an epidemic had taken place in their city.

The Alexander Floral Co., recently organized and purchased from George Waldbart four acres of ground on the Olive street road near the North and South road and have now installed Mr. John Weinderli as manager. They have started to build a new King Construction house, 25 x 150. Mr. Weinderli says that the company will build a large range this spring and start growing roses for this market, something that is needed here very much.

Flower Market Reports

BOSTON

Trade is very sluggish here since New Year's. That day is not observed as a holiday in Boston and has never had any prominence as a flower buying occasion, locally, but there are always more or less calls from outside territory for shipments a day or two previous. This helped out a little this year, as usual, but since then there is almost nothing going on and flowers are accumulating in wholesale hands and prices sliding downward. Roses of all kinds are very plentiful. They are of elegant quality from all growers and are well worth standard prices, but the market is very unresponsive. Carnations, too, are weakening. Lily of the valley and violets are coming in freely—the latter tending downward in value. Not much change is likely for another week, by which time the public will, perhaps, have recovered from the effects of their Christmas spending and begin to consider the flowers once more.

BUFFALO

The holiday trade was quite satisfactory to both wholesaler and retailer. It may be said that the holly and other green festooning was sold for better prices than the year previous and a general clean-up on the decorating material was had. More plants were sold, prices being about the same as in previous years. All standard sorts were in good supply and the weather was favorable for delivery. There was no scarcity in the rose line only that Richmond in medium grade was in heavy demand.

Pink and white Killarney were excellent, also Maryland. Beauty was in good supply, but the demand was light. Carnations were not any too plentiful in this section but on Friday and Saturday all orders were filled. The market was well supplied with lily of the valley, which sold exceedingly well, also Roman hyacinths and peas. There were plenty of narcissi, lilies, stevia and other material which had a good sale.

A decided lull is now being felt in the Chicago market and the first week of the new year is marked with a falling off of business. This is partly due to the natural reaction after

the strenuous days of the preceding fortnight and partly to the extremely cold weather. Many flowers were used at the festivities which greeted the coming in of the new year and sales were very satisfactory throughout the market. The cold spell will hold back stock so there will probably be no great accumulation during the quiet of the present week. Only white flowers have been at a complete standstill, colored ones moving, though quite slowly. There is little sale for paper whites, and mignonette after its first appearance was almost unsalable. Violets and peas are out of the race this week.

Flower Market Reports

(Continued from page 21)

Plants were fairly well cleaned out and the growers are already getting their Easter stock in shape for the next holiday.

It has been said
NEW YORK "Blessed is he who expects little, for he will not be disappointed." It is possible, perhaps, to account, on some such proposition, for the absence of any complaint among New York dealers concerning the New Year's business. This holiday, so dear to the New Yorker, has long ceased to hold any great prominence as a flower festival and this year especially no particular preparations for a big demand were made. As it turned out, crops were generally very light and clean sales at normal values were the result. In fact, there was a demand in excess of the supply on some lines and a buoyant tone characterized the market for Saturday, Sunday and Monday. On Tuesday, however, there was a decided break in values—some prices being cut to about half as compared with those of last week—this being the first step in discounting in advance the two weeks period of dullness which is always characteristic of early January. Roses have already begun to come in more freely—all varieties in excellent quality. Cattleya Trianae is plentiful and violets are undoubtedly in for a heavy decline in value before long. Stevia has been one of the best sellers during the last two weeks. Gardenias are excellent and have held their own nicely. Paper white narcissi have been in over-supply. Roman hyacinths are poor generally but lily of the valley is fine. Gardenias

have enjoyed a splendid run. Carnations are beginning to reassert themselves now that the market price has come down to a level more nearly in line with the retail buyers' estimate of their value.

PHILADELPHIA New Years week was a good deal of a disappointment

ment all around in the cut flower business of the Philadelphia market. The volume of business was fair but the prices realized were far from reaching the average of last year. The usual leader (American Beauty) did not seem to be in much greater supply than usual but market values for same were away behind. And that condition was the index for all roses. Every variety suffered in like proportion. None of the roses brought anything like the prices they should have brought. Carnations held their own better but it cannot be said that there is any scarcity of these now—like what there has been all through the season, up to the present. White carnations seem to be the most plentiful. Colored carnations of equal grade with the whites, have been bringing twenty-five per cent. more. Cattleyas took a big drop, consequent not so much on a decreased demand but from an influx of flowers. Extra fine gardenias are coming in most liberally and, all things considered, the prices are holding up well for these. The clean-up is good also, so that when returns are figured out on this crop it is likely to compare very favorably with anything on the list. The lily of the valley market has improved quite considerably since Christmas and is now in good healthy condition. Violets are good and are selling up clean but in sympathy with outside conditions prices have dropped a little. Among the derelicts at present are long roses—that is fancy and special grade Beauty, poinsettias, Roman hyacinths, paper whites and white carnations.

Stevia is selling well and the greens market is all right.

PERSONAL.

We are pleased to learn that Mr. F. Sander of St. Albans, England, and Bruges, Belgium, contemplates visiting this country in latter part of January. Mr. Sander will find a stupendous increase in the growing of orchids here since the time of his last visit to us.

Flower Market Reports

(Continued from page 23)

Business for Christmas
ROCHESTER proved satisfactory to all. Made-up baskets of every size and shape were the favorites. Azaleas, poinsettias, ericas, etc., were easily disposed of but unfortunately the quality was not up to the usual standard. Moderate price sales predominated, and most of the store men were through with the rush earlier than usual. The largest call was for made-up pans of short poinsettias, about \$2.00 to \$3.00 each. Ericas of irregular shape for basket work were also much sought after. Cut flowers of every description were sold out clean, and stock of any kind was hard to get. Carnations were particularly scarce, except the white varieties, which were over-plentiful. Red sold readily at \$10 per 100 with supply limited. Roses grown in this vicinity were very scarce, and those shipped in to the wholesale market were disposed of to good advantage, but the high prices somewhat retarded sales. American Beauties were of poor quality and this, coupled with the high figures, kept the demand from becoming brisk. Holly was very good this season, and when consideration of the quantity handled is made, but few legitimate

kicks can be registered. Laurel roping was also in good demand, and a larger quantity was used than in former years, due to the scarcity of ground pine roping, very little of which was seen in this city. On the last day the weather moderated from the extreme cold spell of the preceding days, this fact facilitating easy delivering and but few complaints from patrons who received frozen plants. Last reports are to the effect that all connected with the business are entirely satisfied with the volume and financial results of the season's trade.

New York Bowlers.

Last Friday night R. J. Irwin of Philadelphia and L. W. Wheeler of Holliston, Cal., were visitors at the N. Y. Club's alleys. The prize was won by Manda with a score of 201. A similar prize—a bottle of champagne, will be offered for high score at this week's game. On Monday afternoon next—previous to N. Y. Florists' Club meeting—bowling will be indulged in as usual. Scores last Friday were as follows:

Shaw, 155 171 152	Manda, 147 201 168
Irwin, 175 170 146	Kakuda, 143 149 138
Berry, 130 143 195	Wheeler, 123 138 147
M'Ardle, 133 158 160	Nugent, 103 128 123

Christmas at Burpee's.

We had the honor of being an on-looker at the annual Santa Claus celebration at the Burpee seed store in Philadelphia for the first time this year. We had heard years ago of Mr. Burpee's kindly notion of giving the youngsters in the neighborhood a little Christmas gift of candy or other pleasing memento but had no idea it had grown to be an event of municipal importance. At first it embraced only about 25 of the nearby youngsters, but in a few years the number swelled to 500 and last year it was 1000. This year there were over 1500 in line to greet Santa Burpee. He responded to them in person; no deputy could be permitted to fill this kindly function. He was aided by his chief lieutenants from Manager Earl and Treasurer Brown down through the ranks. We will not soon forget this splendid exhibition of good fellowship and kindly feeling. It meant far more than signing a check for ten million. It meant days of planning and arranging and the personal sacrifice and strenuous labor of one whole day—when most men would rather have been taking a day off for themselves—especially such a busy and hard worked man as W. Atlee Burpee. Mr. Burpee was ably seconded by his son, David, and by his sister, Mrs. A. B. Scott, in the presentation ceremonies. That is the true Christmas spirit. "Peace on Earth: Good will to men." No exchanging of presents at department stores next day in this crowd.

Landscape Gardening

PROF. CRAIG

A course for Home-makers and Gardeners taught by Prof. Craig and Prof. Batchelor, of Cornell University.

Gardeners who understand up-to-date methods and practice are in demand for the best positions.

A knowledge of Landscape Gardening is indispensable to those who would have the pleasantest homes.

T., care HORTICULTURE

SUPERINTENDENT or head gardener wants position; open for engagement March 1st, 1911, or later; 20 years' experience in the growing of flowers, fruits and vegetables under glass, as well as out of doors. Married. Only first-class position will be considered. State salary and give full particulars in first letter. Private interview desired. T. D., care HORTICULTURE.

FOR SALE

I am a farmer and have for sale strictly choice clover seed. Also handle mammoth and alsike clover, timothy and millet seed. Reid's Yellow Dent, Leaming, Boon Co. White, and Silver Mine and the big Silo fodder seed corn. Please ask for samples and prices. I also buy all kinds of seed. L. F. Stoecker, Farmdale or Peoria, Ill., Box 18.

FOR SALE Special 16 x 18 and 16 x 24 double thick glass in "A" and "B" qualities. Buy now and save money. Write PARSHELSKY BROTHERS, INC., 50 Montrose Ave., Brooklyn, N. Y.

NEW YORK NOTES.

Badgley, Reidel & Myer, wholesale florists, who had deposits in the Northern Bank of New York, announce that they are not embarrassed in any way by the closing up of the bank.

Wm. G. Badgley has resold his interest in the formula for Wilson's Plant Oil to Andrew Wilson and others. Mr. Wilson will manufacture and continue the sale of this insecticide under the old name of the Wilson Plant Oil and Fertilizer Company, with office in New York City.

The Forster-Mansfield Co., manufacturers of rustic work, refrigerators, etc., have taken a lease of the entire building at 145 West 28th street, where they have heretofore occupied the upper floors only, and will make extensive improvements, putting in new machinery, etc., on the ground floor.

NEWS NOTES.

Montello, Mass.—The Crawford Greenhouses have been purchased by C. E. Field, who is growing a general stock for the wholesale market.

Berlin, N. J.—L. K. Peacock has removed from Williamstown Junction to Laurel Springs. He expects to grow five acres of dahlias next summer.

Bridgeport, Conn.—James E. Beach, florist, has purchased property adjoining his on Park avenue, having a frontage of 100 feet on Noreh avenue.

Ravinia, Ill.—Herman A. Dreiske has purchased more land and is preparing to handle shrubs and nursery stock in addition to his regular stock.

Maywood, Ill.—Ernest Rober, 1712 Fourth avenue has sold one-half interest to Martin Radke. The business will now be conducted under the name of Rober & Radke.

Seattle, Wash.—The down town business of L. P. Walz has been disposed of and he will now devote his entire time to his rose gardens at 2320 Forty-second street.

FIRE RECORD.

Addison, N. Y.—Fire badly damaged the new greenhouse of Joseph Newcomb on Dec. 21st.

Adams, Mass.—On Dec. 17th fire slightly damaged the roof of the boiler house of A. J. Boothman.

Minneapolis, Minn.—On Christmas night the building of the Kusik-Eckhardt Co. was destroyed by fire.

Derry, N. H.—On Dec. 11th fire destroyed the factory of the Benjamin Chase Co., wooden plant label manufacturers.

Syracuse, N. Y.—The boiler house and one greenhouse of L. S. Baker, Pleasant avenue, were badly damaged by fire recently.

Peoria, Ill.—A barn on the premises of J. C. Murray, florist, 2014 Perry avenue, was burned on the evening of Dec. 26th; loss about \$100.

Brattleboro, Vt.—Fire nearly destroyed the heating plant of C. E. Allen's greenhouse on Dec. 28th; loss several hundred dollars, insured.

INCORPORATED.

Salt Lake City, Utah.—Green River Valley Orchards Co., capital stock \$50,000. Directors: Doran Perrine, Jesse M. French, J. F. Spiker, W. A. Kulp and F. G. Porter.

New York, N. Y.—The Japanese Nursery and Construction Co., to import and sell Japanese plants, shrubs and trees; capital stock \$35,000. Incorporators: Kengo Moriva, H. Brevoort Odel and Geo. W. Dobbs, of Yonkers.

Martinsburg, W. Va.—The Levels & Onhoko Orchards Co., capital stock \$100,000, to do a nursery, agricultural and horticultural business. Incorporators: J. C. McKown, of Paw Paw, W. Va.; H. A. Downs, J. M. Small, H. B. Shoemaker and Dudley Harley, of Martinsburg.

GREENHOUSES BUILDING OR CONTEMPLATED.

Niles Center, Ill.—F. Stielow, range of houses.

Newport, Wash.—Ralph D. Kaler, one house.

North Easton, Mass.—Oliver Ames, one 80-foot house.

Corona, Calif.—John F. Flager, house 10 x 20 feet.

Providence, R. I.—A. Holscher, range of houses this spring.

Exeter, N. H.—James E. McAlpin, rose house 60 x 400 feet.

Hillsboro, Ohio.—Simon J. Hider, two houses 20 x 100 feet.

Catonsville, Md.—Charles Cook, one house 10 x 100 and one 20 x 100 feet.

Newport, R. I.—A. C. James, greenhouse, plant house and stable, to cost about \$13,000.

Rochester, N. Y.—The King Construction Co. is keeping a large force of men busy with the new house 25 x 150, which is being built for H. Neun, South avenue. Mr. Neun is a manufacturer of paper and other boxes and recently conceived the idea that he would embark into the wholesale plant business as a side line.

Lorain, Ohio.—A reorganization of the Frank Mecera Co. has been effected and they will now conduct the business under the name of Mecera & Carek Co.

WASHINGTON

Dark Pink Sport of
ENCHANTRESS

DO not get this variety confused with the Lawson-Enchantress which we discarded some years ago. Washington-Enchantress differs from Rose Pink Enchantress as night from day. Washington is a sport from Enchantress with the best cerise or beautiful dark pink color—the Lawson shade—with stem, habit and productiveness same as Enchantress, and keeping qualities of the best. Stock is clean, healthy and well rooted. Guaranteed satisfactory in every respect.

\$10 per 100; \$20 per 250; \$75 per 1000 C. O. D.

A Grand New Carnation BRIGHT SPOT

Outclasses everything heretofore grown in the dark pink class.

Won first honors in the 100 class for best dark pink at the A. C. S. Meeting, Pittsburgh, January, 1910, also at the Chicago Flower Show, November, 1909.

It is a pure bright dark pink of even shade, size 3½ inches, an early and continuous bloomer, brings fully 25 per cent. more flowers to the plant than Lawson at its best; flowers well shaped on long, wiry stems; calyx does not split. It is a good shipper, and the cuttings root easy.

Price per 100, \$12.00; price per 1000, \$100.00; price per 5000, \$400.00; 25 at 100, 250 at 1000 rates. Place your order now, to be in on early deliveries.

Fruit and Vegetables under Glass

STRAWBERRIES IN POTS

Strawberries which were started December 1st will have commenced root action and will be pushing up growth on the crown. As soon as this is noticed, ascertain if roots have thoroughly started and if this is so they will be looking for food. Lightly prick up and remove the top soil and replace with new, making it firm with a rammer. When mixing soil add a sprinkling of manure. This should not be a quick-acting manure but one which will last some time, otherwise the plants will receive a boost and have nothing left. This is all the manure or feed the plants should have until the fruit is set. Many make a mistake by feeding up to this stage. Luxuriant and soft foliage is the result, which often means a shy set. An occasional watering of weak soot water will be beneficial, but nothing else until your fruit is swelling and then give all possible. A temperature of 50 degrees at night will suit them until they come into flower.

VARIETIES OF VINES

The grape vine—*Vitis vinifera*—was found growing wild in Western Asia, Northern Africa and Southern Europe. All our earliest records have mention of the vine and vineyards. The Holy Bible refers to both in its earliest records. It is no wonder then that having been known for such a long period, under cultivation for a great part of this time, we find endless varieties, producing a varied quality of fruit—some the result of Nature's planting, adapting themselves to different countries of the world, others the direct result of careful hybridizing by the hand of man and it is these latter we are interested in growing under glass. New introductions are sent out every year, each claiming some additional quality or combinations of two or more "old timers," but it is surprising how some of these so called old timers have held their own in the past and today cannot be replaced. Some have even improved with increased knowledge of their requirements, one instance being the drainage of borders. Olden growers were satisfied that a vine when growing needed a good supply of moisture at the root, but that drainage and consequent sweetening of the border, together with the food substances liberated by the air acting on the soil, were not necessary.

The old Black Hamburg stands out preeminently above all other black sweetwater varieties. No record of its origin is to be found, but an old edition of "Baron's Book on Vines" states that it was imported into England more than two centuries ago by a Mr. Warner, from Hamburg and was known for a time as Warner's Black Hamburg. When grapes were first grown under glass in this country, Black Hamburg was a pioneer. Some twenty or more varieties are synonymous with Black Hamburg, but the original has enjoyed a popularity equalled by no other grape. It can be grown in any house, alongside almost any other variety and then is the surest cropper we have. It will force earlier than any other grape and does just as well in a late house. The quality, too, is good and when kept with other later varieties holds its sweetness for a considerable time. I have emphasized on the merits of Hamburg for it is the best all-round grape grown and no house should be planted without including it. For pot work it is second to none, a good setter always and finishes every berry.

The Muscat of Alexandria commands next attention on account of its exquisite flavor. To do this variety to perfection a house should be devoted to it, as it requires a little higher temperature than most of the others and has other peculiarities, one in particular being its shyness

to set. When finished this grape will more than repay any extra trouble it has entailed.

Foster's seedling and Buckland's Sweetwater are white grapes, well adapted for early and mid-season houses. I know of no better trio for an early house than these two and Hamburg.

Madresfield Court was raised at Madresfield Court, Worcester, England, from a Muscat of Alexandria, crossed with Black Morocco. A good mid-season grape, first-class in flavor. Its chief fault is a lack of color and a liability to crack, but careful watering will alleviate this. Apply Towers is a mid-season to late variety of good size and color.

Gros Maroc and Gros Colman are late varieties with exceptionally large berries. Fine for exhibition. Maroc carries a better color and finish, but Colman will often keep longer.

Black Alicante is one of the finest keeping grapes, but should only be grown for its keeping properties. Lady Hutt is the best late white grape, keeping its flavor well and will hang or keep "bottled" for a considerable time. Raised from Gros Colman x Alicante.

The above varieties could be added to at length, but they include the most reliable in their respective classes.

POTATOES

are sometimes grown under glass as a novelty—more so than a very productive crop. They are easily grown either in benches, or large pots. Water carefully and see that they are kept free from insect pests. If room and time can be given them, plant at once. A night temperature of 55 to 60 degrees will suit them best, but they will grow along with other crops.

CAPSICUMS

are grown to a great size and look well in pots, the smaller varieties somewhat resembling the salanum or Jerusalem Cherry. A sowing made now and grown into 6 in. and 8 in. pots will produce a quantity of peppers before they are obtainable outside.

ONIONS FOR EXHIBITION

Onions intended for exhibition should be sown at an early date, as a good long season is essential for them to attain the size required for this purpose. Size is the greatest point when on exhibition but they must also be well matured and have a good clean appearance. Like everything grown expressly for show purposes, onions exact that amount of care and attention which must be given to obtain the desired results. Sow in flats in moderately rich soil. Do not bury at all; only slightly cover the seeds, giving a night temperature of 50 to 55 degrees. Care must be taken in watering right along as onions resent drought at anytime. Seedlings can be potted off into small pots, as soon as large enough to handle. Save every root, otherwise seedlings are checked. Ailsa Craig is undoubtedly the most popular variety for this work and I should say has won more prizes since its introduction than any other onion ever did. This variety alone is enough to grow, but those wanting a variation can use Exhibition and Sutton's Globe, a variety of good size which shows up well when staged.

LEEKS

Leeks are similar to onions in many respects and can be grown with them until they are planted out in the garden when a different course must be taken. Strong plants when planted out will make exhibition stuff by fall. Sow the same as you would onions and after coming through encourage a sturdy growth. Some prefer the very long growing varieties while others contend that those with better girth are best. This is often a point

of argument for judges and brings the critics down on them. Leeks can be drawn out when blanching is commenced; this can be dealt with later. Prizetaker and Improved Musselburgh have often led the way.

ASPARAGUS

Where a quantity of asparagus is forced each year it is necessary to replenish the stock. This must be done each year and crowns well looked after for three or four seasons before they will be ready for forcing. If possible a longer life than this should be given them, as the larger the crowns the better the results. From now on asparagus can be sown and can be grown along with onions and leeks. Good-sized plants will then be ready for the spring. Some, however, prefer to wait until spring and sow in beds outside. Connover's Colossal Perfection, Giant French or Early Giant Argeateuil can be used.

From now on reference may be made in these columns to early vegetables—those which can be sown inside, grown on for a time, and when the weather is warm enough in spring planted outside to come to maturity. This is a problem no one can solve satisfactorily for all our readers, as some states and even counties are much earlier than others, each locality having its own season, consequently, due allowance must be made. Some, perhaps, will use earlier dates; others again must perforce be weeks later.

George H. Penson

Mr. Penson's next notes will be on Pests of Vines under Glass; Propagation of the Vine; Temperatures, Vents and Airing; Peaches; Globe Artichokes.

Mushrooms

Where there can be had a plentiful supply of fresh horse manure and where you have sheds, cellars, or places under the greenhouse benches where the temperature can be maintained at from 45 to 50 degrees, or still better a mushroom house, this is a paying crop. When making up the beds, put the manure in layers of about 3 or 4 inches deep, and beat each layer down until you have it 10 or 12 inches deep. If the heat becomes too strong—that is when it runs up and over 115 degrees—make holes with a stick all over the surface of the bed in order to moderate the fermentation. The beds should be spawned when the heat goes down to 90 degrees, and still has a tendency to drop. Break the bricks into pieces about the size of duck eggs and insert all over the bed about 3 inches deep and 6 to 8 inches apart; cover and beat down firm. Keep the surface moist by syringing every day. I don't mean to saturate the beds, only give enough to moisten the top. When the heat goes down to 70 degrees cover with two inches of moist loam and beat down firmly. Keep the temperature as near 50 degrees as possible. In 6 or 8 weeks the crop should begin to appear. Other beds can be made up in succession until February.

John J. M. Farrell

An Honor Worthily Bestowed

The second issue of the George Robert White gold medal for distinguished services in horticulture has been awarded to Jackson T. Dawson, for 40 years connected with the Arnold Arboretum. Mr. Dawson is too well known to the majority of our readers to require any in-

JACKSON T. DAWSON

roductions, and his achievements are known all over the civilized world. As a plant propagator he is acknowledged to have no superior and his knowledge of trees and hardy plants and their culture places him in the foremost rank of American horticulturists. The premier honor which is implied in the award of this medal is worthily bestowed.

The Martyrs of Horticulture

Thousands of friends whom E. H. Wilson has never seen or heard of are filling the air with wireless prayers and messages of sympathy in his sore affliction. If he had a receiver there to catch them all he would know how intense the interest of his many friends. We all remember the anxiety we had when our beloved Hansen left home for his final Siberian trip. These are men of destiny; the heroes of peace; and their courage and persistence are not surpassed by the bravery of our military heroes. The results are infinitely greater than the hero Hobson brought back to us. Mr. Wilson's work is something stupendous. It is germinal. In his collection will be choice things susceptible like the dahlia and carnation of great improvement. God bless and restore him.

York, Nebraska.

C. S. Hammon

Seasonable Notes on Culture of Florists' Stock

ABUTILONS

For those who have formal beds or other similar planting to do the dwarf abutilons are unsurpassed. They are now used in large numbers in cemeteries, public parks, and for vases, window boxes, etc. To have good thrifty plants by bedding-out time, start rooting cuttings now. Stock plants that were lifted last fall should now be put into heat—say from 55 to 60 degrees at night and they will soon get into active growth. Syringe on all bright days and keep the atmosphere in a nice moist condition and in a short time you will have good material to propagate from. Insert the cuttings in a propagating bed and they will soon root. Pot into 2 or 2½ inch pots, giving any good soil and good drainage. As they grow on use the hose to keep down the mealy bug. Abutilon Savitzii is the most useful. A. vexillarium is especially good for hanging baskets and veranda boxes.

ACALYPHAS

Where there is a demand for highly colored plants for subtropical bedding, or mixed border, or for the decoration of the show house or conservatory the acalypas have but few equals. To have nice plants in 4 or 5-inch pots for setting out by the last of May or the first week in June, shorten back the shoots of your stock plants, and place them now in a temperature of about 65 degrees at night, on a light sunny bench. With a moist atmosphere and abundance of syringing they will soon push a number of young growths that will root where there is a good bottom heat. When they are fairly well rooted they should be potted into 2½ or 3 in. pots using good fibrous loam, well enriched. Acalypha Macafeana has ability to stand the winds better than most coleuses. It also stands well in good condition in the late summer and fall.

CANTERBURY BELLS

These are splendid spring flowering plants. It is now time to arouse these plants into activity if wanted for Easter. Start in about 45 degrees at night, and when new growth increases raise the temperature slowly until the minimum of 50 degrees is reached. If the plants are subjected to too great a heat, especially right after being started into growth, they will not attain perfection. Every opportunity must be availed of to admit sufficient fresh air on every favorable occasion. When they have filled their pots with roots, feeding will help them materially, and more than repay for the trouble. The best colors for Easter are pink and white. They make beautiful objects in pots for Easter decoration.

HYDRANGEAS

Plants that are intended for Easter should now be given a slow start in a cool house so to break into new growth. With syringing and top-sprinkling a good break will be secured. After a good start has been made in a temperature of 50 degrees, a temperature as high as 65 or 70 degrees at night may safely be employed in bringing the plants to a rapid development, though a less heat steadily held is more likely to produce the best results. A moderately humid atmosphere in their advancing new growth will be most beneficial. Give them full sunlight as it imparts vigor and depth of color to the foliage. Hydrangeas when in full root action will need liberal supplies of water, with some liquid manure at least once a week. Plants that do not throw much bloom will provide good material for cuttings. Put a good batch of these in a warm propagating bed; they will soon root and make fine plants for another year.

ODONTOGLOSSUMS

The temperature through the winter months should range about 50 degrees at night with from 60 to 65 degrees with sunshine. They will stand as low as 40 degrees without injury, but less water and syringing should be given under such circumstances. It is always better that the temperature should never fall below 45 degrees at night. Plants that have not been repotted as yet should be attended to without delay. There is no question that autumn potting is the best. A very satisfactory compost is chopped, live sphagnum, fibrous peat, and charcoal. Give plenty of air, but using care to avoid cold draughts. Of course a good deal of judgment will have to be used as to outside conditions in giving air. When resting it is a difficult matter to water these orchids, so much depends upon the state of the weather. Give judicious light syringing on all bright days, and taking care in dull or wet weather not to have the atmosphere overcharged with moisture. Better keep a little more fire heat so as not to entirely cut off ventilation, or induce a stagnant atmosphere.

THE CARE OF STOCK LEFT OVER

Save as many stevia plants as you think will do for stock; cut down and place in light cool house for future cuttings. Select your poinsettias for stock plants by lifting with all the soil or as much of the soil adhering as possible and set closely packed in boxes, covering the intervening bare spaces with soil from the bench. These should be rested under a somewhat dry warm bench until March or later. Give a little water now and then to prevent a shriveling. Azaleas should be placed in a very cool, light house. Anything above the freezing point will do. See that at no time they are allowed to get extremely dry. Ericas will take the same treatment. All such flowering plants as Begonia Lorraine, cyclamens and primroses should be given the minimum temperature with plenty of ventilation to keep them in as good condition as possible until sold, but if the stock is unsalable don't let it occupy valuable bench room. The busiest time of the year with most growers begins right after the holidays, with but little let-up until Easter. If any of your young stock has been neglected on account of the Christmas preparation give every attention now. Look around and see if you are short of anything for future use and, if so, buy now. There is plenty of it offered through the advertising columns of HORTICULTURE.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: Care of Carnations; Dr. George Andrew; Grafting Roses; Pauax; Victorine; Simlex; Tuberosa Begonia.

Cattleya Trianae The President

See page 11 Illustration

Without doubt this is one of the grandest varieties of this prolific species of cattleyas ever produced. The flowers are large and of great substance as well shown in the picture. Petals measure 8 inches across and are 3¾ inches in diameter. The sepals are 1½ inches broad. Both petals and sepals are very deep rose color. The lip is 2¾ inches wide, proportionately long and extremely dark crimson, this color extending well back into the throat. The throat itself is marked beautifully with yellow. We are indebted to Julius Roehrs Company of Rutherford, N. J., for this beautiful photograph.

which appertain to such a gigantic undertaking. To fully please and conform to the views of everybody in an enterprise of this kind is a manifest impossibility. Final decisions must be arrived at and definite rules of action laid down and it is to be hoped that a general and cordial acquiescence in what has been done may be accorded. No one will doubt that those gentlemen who have given their time and best abilities to the fulfilment of the obligations imposed upon them have been actuated solely by the desire to do right and to conserve with singleness of purpose and fidelity to duty, the best interests of the profession and of the Societies which stand back of this enterprise. Now is the time for a long pull, a strong pull and a pull *all together*.

**For better
business methods**

The movement inaugurated in Boston some weeks ago for the purpose of better controlling the giving of credit in the trade and protecting

the dealers against a repetition of the heavy losses of the past has begun to take definite shape and the unanimity displayed by all interests is a very hopeful omen. The Boston agitation is largely based upon the signal success achieved by the wholesale flower trade of New York City in the system adopted by them two years ago. The plan finally agreed upon in Boston and eventually in other centres may vary somewhat from that of New York as local conditions may demand more or less elasticity but the principle involved is identical. We look to see the matter taken up in due time in all the central sources of supply, with the result that eventually mutual co-operation will bring about a well-established organization of all commercial horticultural interests and thus will be effectuated a most notable and much needed reform. The enforcement of a reasonable credit limitation in the wholesale trade will unavoidably compel prompter collections on the part of the retailers and thus all departments of the business will stand upon a sounder and altogether better basis.

A correspondent, well-acquainted with "Pure seeds" the seed-trade, writes "If the American public wants the very best in

seeds it will have to pay more." We have some doubts as to the sincerity of some of the more active advocates of stringent seed legislation, whose zeal impresses us, by its range and tenor, as inspired by political rather than philanthropic considerations. Yet no seedsman or friend of the seedsman will be found opposed to the principle of better seeds. If better seeds are possible they are possible only through greater care and increased labor on the part of the man who grows them. If the standard of the men who grow and the men who market the seeds is impaired, because of prices which are too low to enlist ability of the highest order, then the standard of the seeds will surely deteriorate and the result would be a national calamity instead of a public benefit. Purity and reliability in seeds is "a consummation devoutly to be wished" but you can't have them unless men with the necessary ability and conscience are kept on the job and that is a consummation you must be prepared to pay for. It is a question whether the "rank and file" will take kindly at first to the prohibition of cheap seeds and it may be accepted as a foregone conclusion that the squealing will not all come from the seedsmen.

Preparations for the National Flower

"Shoulder Show are rapidly nearing completion to shoulder" and the Boston committees on whom

has fallen most of the burden of work

have been laboring diligently on the myriad of details

BRITISH SOCIETIES.

National Rose Society.

It was announced at the annual meeting of the National Rose Society, held in December, that during the past year 1,000 new members have joined, bringing the total up to 4,584. Not only is the Society numerically strong, but it has also a satisfactory surplus at its bankers. Since the death of Dean Hole, a change is made in the presidency at stated times, in order that this honor may be divided amongst the chief workers. This year's choice fell upon the Rev. J. H. Pemberton, who for many years has been an enthusiastic rosarian, and is the author of a well known work: "Roses, Their History, Development, and Cultivation." The Dean Memorial medal, awarded by the Society to the member who, in the opinion of the council has done the best work for the Society, was presented to the honorary secretary, Mr. Edward Mawley, of Berkhamsted, to whose able and painstaking efforts a great deal of the Society's success is due. Mr. Mawley has been in harness for some years; in addition to attending to the heavy details of the Society's work, he has rendered a praiseworthy service in popularizing the "Queen of Flowers" by his informative articles, and by his editorship of the official publications issued. His annual rose analysis is always a carefully prepared and comprehensive statement of immense value to everyone interested in this particular flower. The British horticultural societies are particularly fortunate in the personnel of its officials; especially is this the case with the National Rose Society, which has been splendidly officered from the time of its inception in 1876.

Multum in Parvo.

The Ancient Society of York Florists has this year reached the 150th anniversary of its existence.—The Royal Horticultural Society has bestowed the Victoria Medal of Honor upon: Mr. J. Cypher, a noted orchidist, of Queen's Road Nursery, Cheltenham; Mr. Thos. Coomber, The Hendre Gardens, Monmouth; Mr. C. R. Fielder, The Gardens, North Myms Park; Mr. H. B. May, a fern specialist, of Edmonton; Mr. A. H. Pierson, a fruit expert, of Lowdham, Notts.—The National Vegetable Society recently held its annual meeting, when an encouraging report was presented and passed. The framing of the schedule for the next year's show is to be dealt with by the Committee in January.—The returns of the Board of Agriculture show that the yield per acre of potatoes this year in Great Britain is slightly larger than in 1909, and well above the average for the past ten years.—The first provisional schedule of the International Horticultural Exhibition has lately been issued. The Executive Committee propose to organize a horticultural education exhibition, and to hold a conference. Amongst the suggested subjects is the following: "The different methods of training young horticulturists in this country and on the continent of Europe, and in America." Fuller details of the proposed exhibition can be obtained from Mr. E. White, 7 Victoria street, Westminster, London, S. W.

W. H. ADSETT.

ALPINE ROCK GARDENING.

Rock gardening is, as yet, an "infant industry" in America. It is possible to count on one's fingers all that are really worthy of the name, although mounds of rocks with plants among the stones are not infrequent. Alpine gardening has an irresistible

charm when one once begins to make a study of it and the myriad of lovely little plants suitable for such work. Our illustration shows a bit of the famous rock garden at the York nurseries of James Backhouse & Son, who make a specialty of Alpine plants.

MASSACHUSETTS HORTICULTURAL SOCIETY.

An appropriation of \$5,500 for prizes and gratuities to be awarded at the society's 1911 exhibitions was made by the Massachusetts Horticultural Society at its inaugural meeting last Saturday, in addition to awarding the George Robert White gold medal for the greatest advancement of horticulture to Jackson T. Dawson of the Arnold Arboretum.

Walter Hunnewell of Wellesley, presided in the absence of the newly elected president, Charles Parker, who is ill.

The report of the trustees, read by Secretary William P. Rich, showed that there has been received a fund of \$2,882 from the estate of the late John S. Farlow, the income to be expended annually for the encouragement of pear and grape culture.

The treasurer's report showed the total receipts for the year to be \$20,018.06, expenses \$18,657.39, surplus \$1,360.67, special funds and additional receipts \$9,936.

Secretary Rich said that the proposed alteration of the interior of Horticultural Hall, in order to adapt it to more general public uses, was indefinitely postponed owing to the

great cost of the work. Mr. Rich was appointed secretary and librarian, and Walter Hunnewell treasurer for the ensuing year.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

Ladies' Night. Installation of Officers.

The next regular monthly meeting of the club will be held at Horticultural Hall, on Tuesday evening, January 17, at 8 o'clock.

The following officers elected at the December meeting will be installed and will make short addresses: President, Peter M. Miller; vice-president, Thomas Pegler; secretary, W. N. Craig; treasurer, Peter Fisher; executive committee, J. P. A. Guérineau, Robert Cameron, William Downs and William J. Kennedy.

The committee on S. A. F. entertainment for the national spring show have held several meetings within the past few weeks and will make a progressive report.

In lieu of a regular lecture a pleasing entertainment has been prepared, to which ladies are cordially invited. The regular club business will be shortened as much as possible in order to make it interesting for all who attend.

CLUBS AND SOCIETIES

NEW YORK FLORISTS' CLUB.

The opening meeting of this club for the New Year, last Monday evening, was well attended. The new officers were duly installed, felicitations and oratory were on tap in unlimited supply as were also the more material things in the dispensation of which the newly elected president is an acknowledged past-master. Retiring President Miller made one of his characteristic addresses on resigning the chair to his successor, thanking the press, the committees and the members for their efficient help in achieving the success of the past year. John Birnie and Joseph Manda escorted President Nugent to his post and after the applause had subsided the new executive voiced his appreciation of the honor and expressed sanguine hopes for the coming year. Vice-President Bunyard, Secretary Young, Treasurer Rickards and Trustees Traendly, Totty, Weber and Hendrickson followed in order with appropriate sentiments and promises of loyal service.

The president appointed standing committees as follows: Legislative—Messrs. O'Mara, Birnie and Pierson; essay, Shaw, Siebrecht, Pepper; awards, Miller, Totty, Simpson, Sheridan, Traendly, Hogg, Weston, Duckham; exhibition, Marshall, Turner, Hendrickson, Rasbach, Kennedy; house and entertainment, Berry, Rickards, Fenrich.

Patrick O'Mara made an interesting report on the efforts that had been made in the endeavor to secure legislative sanction and appropriation for new greenhouses at Cornell. Although a period of economy is now on, he thought the outlook for this excellent proposition was encouraging. On behalf of the committee which visited the Robert Scott & Son greenhouses at Sharon Hill, Pa., Secretary Young reported a verdict of 86 points on Rose Double Killarney and 85 on Irish Melody and final certificate of the club was awarded.

The treasurer's report showed a net balance in treasury of \$3,920.73. A vigorous and at times witty discussion followed the annual report of the trustees, particularly as relating to the expenditures of the entertainment committee and the number of "ladies' nights" permissible for the year. Messrs. Weathered, Schenck, Miller, Koehne and Shaw were appointed to make arrangements for the annual dinner and Messrs. Fenrich, Einsman, Young, Butterfield, Donaldson, Weber, Scott, Meyer, Chadwick and Langjahr on annual outing. Messrs. Traendly, Bunyard and Miller were made a transportation committee for the occasion of the National Flower Show at Boston next March. Messrs. Pepper, Shaw and Weathered and Messrs. Sheridan, Young and Butterfield were appointed to bring in resolutions on death of Mrs. F. W. Bruggerhof and Mrs. E. C. Horan, respectively.

On the exhibition tables were some vases of finely grown sweet peas from Geo. T. Schuneman, the varieties being Mrs. Alex. Wallace, Mrs. C. H. Totty, Mrs. Smalley, Christmas Pink and Watchung. Seedling carnations from W. C. Roberts of Ossining, No. 40, dark crimson, and No. 66, bright scar-

let. A cultural certificate was awarded to Mr. Schuneman on the basis of 88½ points, and Mr. Roberts was accorded a vote of thanks.

TARRYTOWN HORTICULTURAL SOCIETY.

The regular meeting of the Tarrytown Horticultural Society was held in its rooms on Thursday evening, December 29th, 1910. The prize of the evening, given by Mr. Abel Weeks for the best 18 blooms of carnations, was won by Wm. Pope, gardener to H. Darlington, Mamaroneck, N. Y., who staged a number of high-class flowers. Mr. Weeks also made a splendid exhibit of carnations, staging 12 vases in 12 varieties. As he was the donor of the prize he did not enter for competition, but was awarded honorable mention.

This being the annual meeting, the

SAMUEL J. TREPP

Of Glen Cove, N. Y.,

President Nassau County Horticultural Society.

secretary and treasurer submitted their yearly reports, which as regards increased membership and financial standing showed up very creditably in favor of the society.

New officers were elected for the year, viz.: President, John Brunger, gardener to I. N. Seligman, Irvington, N. Y.; vice-president, George Wittlinger, gardener to Miss Blanche Potter, Ossining, N. Y.; secretary, E. W. Neubrand, Tarrytown, N. Y.; treasurer, Chas. Weeks, Tarrytown, N. Y.; corresponding secretary, Geo. McIntosh, Eastman place, Tarrytown, N. Y. The dinner committee reported that they had arranged for the annual dinner to be held at the Hotel Tarry on Wednesday evening, January 18th, at 7 o'clock. Tickets can be had from Secretary Neubrand. Friends wishing to purchase tickets should procure them as soon as possible so that proper arrangements can be made for their accommodation.

WM. SCOTT, Cor. Sec.

CHICAGO FLORISTS' CLUB.

The regular meeting of the Chicago Florists' Club was held Thursday, January 5, at the Union Restaurant, and the following officers unanimously elected: President, H. Philpott; vice-president, A. Kohlbrandt; secretary, A. T. Pyfer; treasurer, E. F. Winterson. It was voted that the vice-president should constitute a committee of one to send flowers in behalf of the club wherever death should occur in the membership. The following named were elected to membership: H. B. Dorner, Urbana, Ill.; Wm. Wolniewicz, 1214 E. School street; N. Kotthaus, Ridge avenue; Geo. Gobel, 2242 Warren avenue; R. M. Reburn, 51 Wabash avenue; G. Bezdek, Wilmette, Ill.; A. Malchow, 3743 N. Clark street; J. W. Starrett, 5657 Saginaw avenue; J. N. Schmitt, 913 Montana street.

The club had as guests Geo. F. Brown of Greenfield, Mich., and A. N. Pierson of Cromwell, Conn., the latter having on exhibition roses Prince de Bulgarie and a sport of My Maryland, both of which were awarded club certificates. The Chicago Carnation Co. showed Washington, Princess Charming and some seedlings, one of which is to compete for the Kroeschell cup offered for 25 blooms of a carnation five inches in diameter. Honorable mention was awarded this collection. W. N. Rudd exhibited a vase of mixed seedlings and one of red carnations.

After the installation of the officers a supper followed, with Frank Benthay as toastmaster. Phil. Foley in his own inimitable way presented the retiring president, Geo. Asmus, with a handsome gold watch, the gift of the club members. Mr. Foley had substituted a dollar watch and much amusement was afforded in the search for the right one. The new president, H. Philpott, is a British subject with home and business at Winnipeg, Manitoba, and comes nearly a thousand miles to his duties each month. He is a most enthusiastic worker in the interest of the club, and last year as vice-president he missed but one meeting.

The following committees were announced by the president: Sports and pastimes, Allie Zeck, Wm. Wolf, Wm. Graff; transportation, Phil. Foley, H. B. Howard, Ed. Winterson; good of the club, A. Henderson, E. C. Amling, Anton Then.

TUXEDO HORTICULTURAL SOCIETY.

This Society held its annual meeting on Tuesday evening, January 3, President Thomas Murray in the chair. There was a large attendance. Officers for the year were elected as follows: President, David S. Miller; vice-president, C. R. Russell; treasurer, James Allen; secretary, Albert Fischer; executive committee, Joseph Tansy, Wm. Brock, Wm. Hastings, P. Cassidy, R. H. Schaeffer, Simon Hillmers, Albert Fischer.

A motion to have the by-laws revised will be acted upon at the next meeting.

After the meeting the members adjourned to the ante room where a supper was served.

ALBERT FISCHER, Sec.

FINE FERNS

Ready For Immediate Retail Sale

We have an exceptionally due and large stock of ferns in the following varieties,—first-class plants of exceedingly good value—plants that will please the most critical buyers, both in regard to quality and value.

NEPHROLEPIS ELEGANTISSIMA (Improved). The finest of this type—never showing a Boston frond; has not reverted in the last four years. Fine plants, 6-in., \$6.00 per dozen; 8-in., \$12.00 per dozen; large specimens in 12-in. pans, \$3.00 to \$5.00 each.

NEPHROLEPIS ELEGANTISSIMA COMPACTA. This bears the same relation to elegantissima compacta that Scottii does to Bostoniensis. It is a dwarf, compact plant, especially fine in the small sizes. Fine plants, 6-in., \$6.00 per dozen.

NEPHROLEPIS SCHOLZELI. Fine plants, 3½-in. pots, \$2.50 per dozen; 6-in. pans, \$6.00 per dozen; 8-in. pans, \$12.00 per dozen.

NEPHROLEPIS BOSTONIENSIS. Extra strong plants, 8-in. pans, \$12.00 per dozen.

NEPHROLEPIS SCOTTII. 8-in. pans, \$12.00 per dozen.

SMALL FERNS FOR FERN PANS. Best and hardiest varieties assorted: Pteris Mayii, Wimsettii, Adiantoides, Aspidium Tsussimense, Crytomium falcatum, etc. Strong plants, 2¼-in. pots, \$3.50 per 100.

CROTONS. Nice assortment, well colored, 5-inch, \$9.00 per dozen.

F. R. PIERSON CO., Tarrytown-on-Hudson, New York

NEWPORT HORTICULTURAL SOCIETY.

A large number of members attended the regular meeting of January 10 when Professor A. E. Stene of the Rhode Island State College gave one of his characteristic instructive lectures on tree pests. The browntail moth, having recently been found near the borders of this city, came in for the largest share of attention. The gypsy moth, elm leaf beetle, tussock moth and other insect foes in their different stages were clearly described and up-to-date remedies prescribed. At the close of the lecture Mr. Stene also answered many questions about various plant diseases and justly earned the rising vote of thanks which was given him by all present.

The lecture was followed by a business session which was chiefly devoted to the matter of adopting a plan to encourage the members to work in various ways for the good of the society, and the scheme settled on is to offer special prizes to members scoring the highest number of points for the year by a prepared scale which gives a certain number of points to each grade of award won at the exhibitions and regular meetings. Points are also to be given for horticultural essays read at meetings, also for attendance at meetings and for causing the election of qualified new members. Three prizes are offered in the contest; the first two

are silver cups, and as the scheme is a new one it is expected that much interest will be taken in the contest.

NATIONAL SWEET PEA SOCIETY OF AMERICA.

A meeting of the executive board of the National Sweet Pea Society of America was held at the Astor House, New York City, on Thursday afternoon, January 6, President W. Atlee Burpee presiding. Secretary H. A. Bunyard announced that the National Flower Show committee had offered the Society \$150 with which to arrange premiums for a sweet pea section at the Boston show next March, provided the Society would duplicate the amount for the same purpose, making \$300 in all. The offer meeting the approval of the board, the required \$150 was made up then and there. Wm. Sim of Cliftondale, Mass., produced a proposed schedule of premiums and after some discussion the same was accepted. The date for the Sweet Pea Day at the show was left to Secretary Bunyard and Mr. Sim to arrange. It will probably be March 29, and the Society will meet in the evening. It was arranged that Prof. A. C. Beal be invited to present a paper at the meeting, on "Trials of Sweet Peas Under Glass." G. W. Kerr, of Fordhook, Doylestown, Pa.; Wm. Duckham, of Madison, N. J., and James Wheeler, of Natick, Mass., were selected as judges, and Wm. Sim was elected to act as manager of the sweet pea exhibition. Many details as to entries were discussed and settled. It was decided that the scale of points for judging be as follows:

Stem, 25; color, 20; size, 25; number of flowers on stem, 15; substance, 15.

Suitable recognition, in the form of certificates to novelties and other exhibits not classed in the premium schedule, will be given.

In regard to seed trials during the coming season, the secretary was instructed to write seedsmen to furnish such seed of novelties and varieties for trial as it might be desired to try, and that the executive board suggested that the trial ground should contain not more than 100 of the latest varieties and not more than 25 seeds of any one variety. A letter from Prof. John Craig was read, in which that gentleman regretted his inability to attend the board meeting, and asked for instructions in different matters relating to trials during the coming season. It was decided to hold a summer show this year, and that invitations be sol-

icited from cities wishing to have the exhibition.

YONKERS HORTICULTURAL SOCIETY.

On Friday, Jan. 6th, a well-attended meeting of this society was held in Higgins' Hall. A. Herrington installed the officers elected for 1911, previously speaking very highly of work done by the gentlemen who held office in 1910. He said that the sound position, financial and otherwise, held by the society is due to efforts made by the retiring officers. President Lee Whitman spoke of the necessary hard work for the coming year. Invitations were received from the Morris County and Tarrytown Horticultural societies, inviting members to the annual dinner given by each of those bodies. The Yonkers dinner committee were instructed to go ahead and make arrangements for an early date.

Julius Roehrs Co. exhibited cut blooms of some fine forms of Cattleya Trianae, Lycaste Skinneri alba, Laelia anceps alba, etc. A committee composed of A. Herrington, W. H. Waite, and A. Bennett, awarded a certificate of merit to this exhibit.

H. M. BLANCHE, Cor. Sec.

Dec. 20, 1910.

For your Journal we have the highest admiration. Very truly,
D. L. S.

You may depend on it for positive results, without fear of failure or dissatisfaction.

NEWS NOTES.

Marysville, Kans.—H. R. Fisher is now proprietor of what was formerly the Marysville Floral Co.

Oakland, Calif.—A branch store of the San Francisco Evergreen Co. will be opened here in the near future.

Chicago, Ill.—J. H. Rohmer has been engaged as carnation foreman for Wietor Bros. He was formerly with Bassett & Washburn, Hinsdale.

Altavista, Va.—The Altavista Truck & Floral Co. has been organized here by David Harris, formerly manager of the Glennova Gardens, Huntsville, Ala.

Ocean Heights, N. J.—The greenhouses of M. S. Fleming have been purchased by George H. Berke, and will hereafter be known as the George H. Berke Nurseries; a general line of stock will be grown.

Bar Harbor, Me.—John H. Stalford has erected the largest greenhouse in town on property he recently purchased in the rear of the Malvern Hotel. This house is 200 feet long with concrete walls and every modern improvement.

St. Louis, Mo.—The Alexander Floral Co. is a new firm just started here. Four acres of land have been purchased near the North and South road and one greenhouse 25 x 150 feet is being constructed. Roses at present will be their specialty.

In ordering goods please add "I saw it in HORTICULTURE."

There are a lot of grasshopper growers in America—Hopping Willies—kid glove geranium growers, who manage to exist on a job here and there as long as their canned horticultural knowledge lasts and before the crop comes in and the boss finds out he's up against it. They are the real "green-fly" of the growing business. The great trouble with the majority of help a man hires is that they gauge their labor by their wages and the boss never believes they are worth more than they get. You may think your employer is easily fooled but look out that it is not you who is fooled, for the average employer is very watchful of the actions of his men and generally knows more than is generally credited to him about it. The only men who ever succeed are the stick-to-it kind; perseverance pays plus. They are the kind who realize the boss has more cares than the employee, and as they gradually shoulder these cares, they become the boss themselves. There comes a time when every boss is glad to lay down his tools, especially when he knows a good man to take them up. Rome was not built in a day.

Now some buyers of bulbs are like Hopping Willies—buying from one man and another—the first arrival usually. Don't do that—make your order interesting to a good house and that house will take better care of you than half a dozen houses, each with a part so small that it hardly pays them to call again. Get as near the real source of supply of quality as you can, for your own sake, and you will profit by it. In lily bulbs and french bulbs you can't get nearer to the source of quality than **Horse-shoe Brand**, and the real cost is no more and often less. You can't buy better bulbs anywhere and you might get worse. Prices reasonable

Not How Cheap But How Good

Seed Trade

Mr. Sempke, who represents W. W. Barnard on the road, spent part of last week calling on the St. Louis trade with good results.

Logan City, Utah.—The new address of the seed store of T. J. Poulter is 122 North Main street, they having moved on Jan. 1st.

San Diego, Calif.—George R. Seley, after having been engaged in other business for several years, has opened a seed store at 1544 E street.

Springfield, Mo.—The Springfield Seed Co., at a recent meeting of the stockholders, voted to increase the capital stock from \$25,000 to \$75,000.

Gibbsboro, N. J.—A contract seed growing business has been started here by John C. Long, formerly manager of the Panmure Seed Gardens, Newfield, N. J.

Springfield, Mo.—The Diamond Seed Co. has been incorporated with a capital stock of \$25,000. The incorporators are W. J. Wood, T. H. Sander and others.

Houston, Texas.—The Cross S. Farming Co. has been incorporated with a capital stock of \$1,000,000, to grow, sell and purchase seeds, plants, trees, etc. Incorporators: E. J. Buckingham, Carl F. Groos, H. L. Howard and Mason Williams.

Curtis Nye Smith has just received a telegram from Hon. Jas. R. Mann, chairman of the Committee on Interstate and Foreign Commerce, H. R., that the hearing on the Mann Seed Bill has been postponed to February 2nd. Mr. Smith has notified President F. W. Bruggerhof of the Wholesale Seedsmen's League, that on January 9th Senator Depew introduced in the Senate of the United States a bill (S. 10,098) to provide for the introduction of foreign nursery stock by permit only, etc.

LOW FARES TO ITHACA.

The New York State College of Agriculture has just been notified by the Secretary of the Trunk Line Association that a reduced rate of 1½ cents a mile within a radius of 150 miles of Ithaca has been granted for Farmers' Week and that tickets are good from February 18th to 25th inclusive. This is a marked reduction and should command attention from all persons considering the possibility of attendance at Farmers' Week at Ithaca.

CHARLES H. TUCK.

IN BANKRUPTCY.

Troy, N. Y.—Josiah L. Young, engaged in an agricultural, seed and flower business at 375 River street has filed a petition in voluntary bankruptcy. Liabilities \$21,315, assets \$17,778.

Jan. 6, 1911.

Dear HORTICULTURE:—An old fellow who lost his wife said, "By jocks, I'd rather lost a good cow." So I'd rather part with a dollar than forego the pleasure of your company for another year. Here's the evidence—P. O. money order, \$1.00.

PHILADELPHIA NOTES.

Jno. Burton of Chestnut Hill has been seriously ill with grippe, lumbago and other complications for the past week, and at this writing (January 11) is reported no better. We do not wish to be an alarmist but, like the rest of his myriads of friends, we are some anxious.

Hugh M. Taylor of Lloyd, Fla., a distinguished water melon grower, and W. Fosgate of Santa Clara, Cal., one of the leading general seed growers of the Pacific coast, were the guests of Howard M. Earl, of W. Atlee Burpee & Co., at Dooner's on the evening of January 6th. Your correspondent had the pleasure and honor of a hurried introduction to these distinguished visitors—and hopes to have a chance for more intimate acquaintance the next time—so that the readers of Horticulture may get the benefit of their researches and conclusions in their special lines. If he is fortunate enough to get this it will be worth reading.

W. H. Grenell, of Saginaw, Mich., and Pierrepont Manor, N. Y., was in Philadelphia recently and enjoyed interviews with the seed trade of that city. Mr. Grenell is considered one of the leading seed growers for the wholesale trade—his specialty being peas and beans. He has held a high position in that line for the past 25 years. At one time he had the honor of being president of the Seed Trade Association of America. On being asked, he gave a rather pessimistic forecast as to the pea and bean outlook, and could see no probability for the growers making any money in the near future—not within the next three years at least. He made the sensational statement that new stocks would have to come from abroad before we could get back on an even keel. This is strenuously denied by some leading seedsmen here. The idea seems to prevail that the growers are exaggerating the situation—even acknowledging the fact that they have been "up against it" for a year or two. One thing is sure—there will have to be bigger profits both in the growing and vending of high-grade seeds, if the same high-class ability is to continue in the business instead of having bright,

honest and experienced men drifting into easier and more profitable occupations.

Visitors:—G. Carson Boyd, Wilmington, Del.; John A. Cook, Beverly, N. J.; Mrs. McAllister, Passaic, N. J.; Chas. Rooney, Edgemoor, Del.; James Cruickshank, of R. & J. Farquhar & Co., Boston, Mass.; G. Braselman, New Castle, Indiana.

W. E. Maynard of N. Y., was another of our rare visitors recently. He is as debonnaire and hearty as ever and it is as good as a trip to Atlantic City to have a half hour's chat with him.

INCORPORATED.

Lawrence, Kans.—The Ince Nursery Co., capital stock \$10,000. President, Paul R. Brooks; vice-president and manager, J. W. Ince; secretary and treasurer, E. L. Ince.

St. Joseph, Mo.—The Kelsey Nurseries, capital stock \$50,000; to conduct a general nursery business. Stock holders, Edwin S. Welch, Ida A. Welch of Shenandoah, George L. Welch, May H. Welch of Fremont, Nebr., Charles G. Ferguson, Anna B. Ferguson and Carl A. I. Ferguson of St. Joseph, Mo.

Westboro, Mass.—Manuel Gardner has given up his position with his father and accepted one in the Walter E. Draper greenhouses in Rochdale.

avenue, run by E. C. Rock and W. J. McNulty, has gone out of business.

Pottsville, Pa.—Fire destroyed the contents of the florist store of W. Guy Payne during a fire which burned the block in which the store is located. Loss about \$250.

Detroit.—The comparatively short supply is in reality causing a good deal of loss in business. Retailers have no opportunity to make any great display and prices rule too high to be popular.

Bellevue, Ohio.—R. C. Arlin, of Clyde, has purchased the florist business of I. Husbands. Mr. Husbands will retire from business. Mr. and Mrs. Arlin have conducted the Bellevue Cut Flower Store on South West street for sometime and will still continue the same under the name of R. C. Arlin Flower Store. The greenhouses will also go under his name.

Louis Winter has opened the "Ideal Cut Flower Store" at 25 N. Ninth street, Philadelphia.

CHICAGO NOTES.

Important Move Anticipated.

A meeting of the stockholders of the Flower Growers' Market was held Sunday, Jan. 8th, and their location after the 1st of May discussed. A proposition to occupy a new building at the northwest corner of Lake and Market streets, to be completed by Sept. 1st, was submitted to them and the same will be presented to the wholesale florists and commission men in the Atlas block during the present week. It is generally known that the Atlas block which now houses fourteen wholesalers, is to be torn down in the near future, thereby making a new location necessary at some time. Should the proposed location be accepted the shipping facilities will be even better than at the corner of Randolph and Wabash, which has been the stronghold of the wholesale florists for many years. Meanwhile some suitable location in the old neighborhood may present itself, as the building east of Randall's and Amling's, but this would hardly accommodate all likely to seek new quarters in the near future.

Storm.

Considerable glass was destroyed on

Sunday, Jan. 8th, by the hurricane which swept over the city, the wind blowing continuously for five hours, and reaching a velocity of 62 miles. When the large plate glass windows of the stores are blown in it is really remarkable that no more serious damage was done to the areas of glass in and about the city. Cranston seems to have suffered most though all places have not yet been heard from. Bassett & Washburn, at Hinsdale, had considerable glass to replace, and the Batavia Greenhouse Co. kept a force of men employed all day to repair damage. The intense cold made quick work necessary to protect stock. Frank Beu had a pile of sash held down by a heavy iron door which the wind carried away with the loss or but one sash, and Miss Gunterberg, commission dealer, having no greenhouses to be demolished, had to surrender her eye glasses to the gale. Among the more serious results was the injury to James Smith, employee of Peter Reinberg, whose head was so severely cut when he was hurled to the icy walk that a physician took several stitches in the gash.

Cold Storage Facilities.

At a meeting of the wholesalers held Tuesday afternoon a proposition was submitted by representatives of the University of Chicago to erect such a building as florists would find most convenient and equip with cold storage, etc. The site is to be the S. W. corner of Lake and Market streets, and has a frontage of 200 ft. on the river and 200 ft. on Market street.

After some discussion it was decided to call frequent meetings and reach a decision as early as possible. All interested are invited to attend.

Trade News.

The E. F. Winterson Co. is receiving a car load of cannas from the A. T. Boddington Co. this week. Their new catalog will soon be out.

The business of the firm of Canger & Gormley will hereafter be assumed by John Canger. The death of his partner John J. Gormley was announced last week.

Last week the E. Wienhoeber Co. had a table decoration which called for 180 white orchids and but two days in which to get them. A telegram to the east secured these favorites and a man was sent with them to assure their safe arrival. Mr. Wienhoeber

regards the present season as rather above the average in business.

Personal.

Chas. McKellar's condition is still quite serious, blood poisoning having developed in both hands.

A. F. Longren and C. W. Johnson, representatives of the E. H. Hunt supply house, are both started on their first trips of the new year. They found trade excellent on their last trip and the house reports a larger business than ever before in its history.

Visitors: Geo. Brown, Greenfield, Mich.; A. N. Pierson, Cromwell, Conn.; Albert Stahling, Detroit; Thos. Brown, Detroit; W. H. De Graaff, Leiden, Holland.

Detroit, Mich.—Philip Breitmeyer has sold the Breitmeyer Building for something like \$400,000—which enabled him to clear up the estate and dissolve the Breitmeyer Building Co. He personally leased the building for 20 years and intrusted his son Harry with the management of the same.

The Michigan Cut Flower Exchange being unable to renew its present lease has bought 75 feet frontage on Randolph street and will erect thereon a commodious, up-to-date wholesale house next summer.

Flower Market Reports

BOSTON Business has picked up a little within a few days and is decidedly improving as compared with conditions of a week ago. Roses are especially showing strength. Violets have weakened in price and carnations remain about stationary. Orchids are again plentiful—particularly Cattleya Trianae. Gardenias have broken badly, largely on account of shipments from Philadelphia, where they appear to be in excess of requirements. Lily of the valley is plentiful and selling at normal rate. Lilies also move fairly well. Lilac is a staple just now, of excellent quality and gradually making for itself a place in the local market.

Since the holidays, trade **BUFFALO** has been a little on the quiet side, though it cannot be said that business has been dull, the weekly calendar being filled with receptions, balls, etc. The market has been in good condition and has cleaned up daily except on one or two lines. Beauties have had no demand whatever and seemed to remain with the wholesaler, while not enough Richmonds could be had. Violets and lily of the valley are in good supply, but demand somewhat weak. Carnations are coming in more plentifully and some choice stock is received. Beacon and Enchantress have had the best sale, while Pink Delight, Melody and Ideal are good and sell readily. Narcissi are a little too plentiful. Roman hyacinths, lilies and peas shared in the demand. Too much smilax at present, but other greens sold well.

CHICAGO A decrease in the quantity of stock coming in is the main point of difference this week from that of last. While there is plenty to go around and no one need fear that his order may not be readily filled there is less to be found by the late comers and customers can no longer dictate prices. Beauties feel this change as much as any flower now in the market, and long ones are more quickly disposed of than the short grades, a condition just the opposite of a week ago. Roses are of excellent quality and the market has few left each day. There are some especially fine Killarneys and those growers who have dropped Bridesmaid in their favor are not regretting the change. Carnations may be had at all prices and the best ones are well worth the price asked. Quite a number of bursted calyxes are seen and these sell at one-half price for funeral work. Tulips are here too early to find a hearty welcome. Lilies are plentiful enough to meet the demand. Orchids locally grown supply small orders and peas, violets and lily of the valley move along fairly well. It is thought that ferns may advance in price on account of the increased charges for cold storage.

Conditions in the cut **CINCINNATI** flower market have been fairly satisfactory since the beginning of the New Year. Roses are less plentiful. A heavy crop for the holidays has resulted in some shortening of receipts. Beauties have fallen to their normal mid-winter price, with the medium

grades scarcer and in more active demand than the specials. Pink and White Killarney are easily the favorite roses of the day, judging by the quantity consumed. There is an extra

heavy demand for short grades of all white and pink sorts. Richmonds are in less active demand than a week ago, although cleaning up nicely. Carna-

Flower Market Reports

(Continued from page 53)

tions have dropped at least 50 per cent in price and are coming in more plentifully since the New Year, the call for white and light shades predominating. Double violets are overabundant, the majority selling below the dollar mark. Good singles are coming in more freely. Sweet peas are selling but not well, the supply increasing daily. Of paper whites and Roman hyacinths there is an abundant supply. Longiflorum lilies and callas meet with a ready sale. Lily of the valley is in good supply and sells fairly well. Poinsettias are still to be had and there is yet call for them. One of the growers in this vicinity missed a big houseful for the holidays. Asparagus plumosus and Sprengerii in very active demand and more could have been sold especially plumosus. Of smilax there is an abundance with a moderate demand.

Conditions are gradually assuming normal mid-winter form. The supply in general is not excessive and the daily demand has kept it fairly well on the move. There is no difficulty to fill orders for anything in the line of choice or ordinary cut flower material and the quality generally is most excellent. Cattleyas are no longer on the short side and gardenias have also become very plentiful. The receipts of violets are increasing.

Of course, nobody PHILADELPHIA looks for any brisk trade during most of January. On the contrary, all the people interested in the cut flower business expect a dull two weeks at least. This year was no exception. The usual reaction was here, and general conditions for the past week were very little different from what they have been for several years. A few small glints of sunshine came the latter part of the week when several good-sized functions in the social world loomed up, and helped to give the market a fairly good clean-up; but not enough to raise prices above regular quotations. Of Beauties there are not nearly as many coming in as a week ago. Quality of these is still O. K. for the season. Plenty of fine Richmonds. White roses find ready sale but pinks are exceedingly sluggish and greatly over done as to supply. They hang fire very much—especially the higher grades; which would seem to be not in accord with Adolph Farenwald's dictum—that what swamps the market is—"too

much calico and not enough of silk." In this case it would seem to be too much silk and not enough of calico. Carnations are more plentiful. Good whites sell about as well as anything at present. Orchids, violets, lily of the valley and gardenias, are all on the plethoric platform. Sweet peas are in good supply and never better quality for this season of the year. Among the minor items:—white and yellow daisies and stevia are about the only good sellers. Roman hyacinths, paper whites, lilies, swainsona, etc., very draggy.

The holiday trade in TWIN CITIES the Twin Cities held its own. It was no record breaking business, but fully as good as last year. Cut flowers and pot plants were plentiful, the home market being well able to supply the demand. Holly and mistletoe were practically all sold out; some late country orders could not be filled, but for the cities there was enough. Owing to the dry summer some growers had had to buy new carnation stock, and consequently were not able to cut the usual amount of flowers for the holidays.

A CORRECTION.

In our Philadelphia Notes in last issue occurs the following line in reference to the Jos. Heacock new quarters in the city: "serving the customers of this extensive growing establishment with large plants from Wyncote and Roelofs." This should read: "serving the customers of this extensive growing establishment, with large plants at Wyncote and Roelofs." As corrected the word "plants" takes on a different meaning.

In the same column, in reference to Mr. Pierson's roses read "inner" side of petals, for "under" side.

THE FLORISTS' CLUB OF PHILADELPHIA.

We have the following latest announcement from J. Otto Thilow, chairman of the Florists' Club committee on Essays and Publications:

"Z. D. Blackistone of Washington, D. C., will address the club at the May meeting on 'The Advantage of Special Sales to a Retail Florist.' This will be worth hearing, especially for retailers.

CINCINNATI FLORISTS' SOCIETY.

The regular monthly meeting of The Cincinnati Florists' Society was held at Wm. Murphy's salesrooms on Monday evening, January 9th. There were about twenty members in attendance. Flower Show matters were brought up and the committee reported that they were nearing their goal of a \$10,000 guarantee fund, and by the next meeting hope to report the entire amount subscribed. A special meeting will be held Monday, January 23rd.

NEW ENGLAND DAHLIA SOCIETY.

This enterprising organization had a meeting at Horticultural Hall, Boston, on January 11. Officers were elected as follows: President, J. K. Alexander; vice-president, E. Allen Lindsay; treasurer, Loring M. Bates. The meeting was very harmonious and the society starts on the new year with rosy prospects.

CLUB AND SOCIETY NOTES.

The St. Louis Florist Club meets this week Thursday for the first time this year. The organization is now 25 years old and great efforts will be made by the officers to make this the banner year in point of attendance.

The Retail Florists' Association of St. Louis held a meeting last week. All the old officers were re-elected. President, C. C. Sanders; vice-president, Theo. Muller; secretary, F. E. Weber, Jr.; treasurer, R. J. Windeler. The Association will hold its annual banquet on Saturday night, January 14th, at the Marquette Hotel. Chas. Schoenle and F. H. Weber are a committee to arrange for same.

PERSONAL.

M. A. Leganger is now employed with the A. L. Randall Co., Chicago, Ill.

Port Chester, N. Y.—Edwin C. Leonhard, of E. Leonhard & Son, florists, and Miss Louise Leonhard were married last week.

Vernon T. Sherwood is now with S. J. Goddard, Framingham, Mass. He was formerly at the Mt. Desert Nurseries, Bar Harbor, Me.

David S. Adam has taken a position with the Henry F. Michell Co., Philadelphia, Pa. He was formerly for many years with J. M. Thorburn & Co.

On January 9 the eve of his retiring as chief executive of Detroit, almost 400 representative business men tendered Philip Breitmeyer an elaborate banquet.

C. S. Harrison of York, Neb., has just returned from five weeks' banishment to Excelsior Springs, Mo., where he has been taking treatment for his old enemy, rheumatism.

We are glad to learn of the assured convalescence of Timothy McCarthy, superintendent of Swan Point Cemetery, Providence, R. I. Mr. McCarthy has been very sick for the past month and a legion of friends will now feel a happy relief on learning that he is on the road to recovery.

Visitors in Boston.—C. W. Brownell, Walden, N. Y.; King Edward McWilliams and Mr. Getricks, of Newport, R. I.; Paul Berkowitz, of H. Bayersdorfer & Co., Phila., Pa.; Wallace R. Pierson, Cromwell, Conn.; A. Zirkman, representing M. Rice & Co., Phila., Pa.

OBITUARY.

Mrs. Charles Hunt.

Mrs. Charles Hunt died at Graniteville Staten Island, N. Y., on Saturday, Dec. 19.

John L. Turner.

John L. Turner of the seed and implement firm of Griffith & Turner, died at Baltimore, Md., on Dec. 29.

Charles Brice Bowditch.

Charles B. Bowditch died on New Year's day at his home, 1012 Hall street, Grand Rapids, Mich. Mr. Bowditch had been a resident of Grand Rapids for twenty-one years, having come here from England. For thirteen years he was florist at the Michigan Soldiers' Home. He is survived by three brothers and a sister.

J. F. H. Meinhardt.

J. F. Henry Meinhardt of St. Louis, Mo., father of Fred H. Meinhardt and Miss Matilda Meinhardt, died on Wednesday, January 4, after a lingering illness. The funeral took place on Friday, January 6, from the family residence, 6074 Florissant avenue.

Mr. Meinhardt was not so well known among the trade as are his children. The trade was well represented and many floral designs were received. Mr. Meinhardt was 68 years of age and leaves a wife and six children to mourn his loss.

ning! Some of the epicures around New York can clip their board bills a bit next week.

The fourteenth annual dinner of the Florists' and Gardeners' Club of Rhode Island will be held at their rooms, 96 Westminster street, Providence, on Monday evening, January 16.

DURING RECESS.

New York and New Jersey Association of Plant Growers.

The third annual dinner of the Association will be held on Thursday evening, February 2nd, 1911, at 7 o'clock, at Cafe Martin, New York City. The dinner committee has spared no efforts to make this the banner dinner of the Association. A large private dining-room has been secured together with the proper appointments, and the menu selected will be sufficient to appease the appetite and thirst of all participants. There will be no speech-making. Music and professional talent has been engaged to furnish amusement during the course of the dinner and the remainder of the evening.

This will be strictly a business men's dinner at which all members, their wives, and friends, can enjoy a pleasant evening. There will be no formal evening dress, and all persons attending are requested to appear in their business suits.

Julius Roehrs, Jr., Herman C. Steinhoff and Louis Dupuy are the dinner committee.

New York Bowlers.

Scores recorded on Friday evening, January 6:

Chadwick	221	236	189	190	203
Nugent	101	90	96	113	102
Kakuda	122	124	129	166	107
Scott	154	146	147	159	146
Manda	155	145	181	177	151

The special prize—a bottle of champagne—given by the Alex. D. Shaw Co., was won by A. Kakuda. This prize will be repeated each evening until further notice, and can be won but once by any of the Club's members.

There was a large attendance last Monday afternoon of club members looking on and advising. There were some close contests, and much enthusiasm. Scores were made as follows:

Chicago Bowlers.

At the meeting of the Chicago Bowling Club, Wednesday last, the following scores were made:

MASSACHUSETTS AGRICULTURAL COLLEGE.

The short course in floriculture at the Massachusetts Agricultural College opened January 3rd, with a smaller attendance than had been expected. During the course this year an unusually large number of outside speakers had been engaged so that the course seemed to be an especially attractive one and one which would appeal to a large number of practical men.

The following have registered for the course:

John F. Freehan, Great Barrington, Mass.; Roy A. Hatch, Cliftondale, Mass.; Warren Kinder, Charleroi, Pa.; Errol L. MacDonald, Seekonk, Mass.; Waldron K. Nason, Jamaica Plain, Mass.; Maude M. Perkins, Newburyport, Mass.; Frank B. Place, Dighton, Mass.; William M. Post, Danbury, Conn.; Etta Rotman, Millis, Mass.; Louis V. Schmidt, Jamaica Plain, Mass.; Guilford Smith, Bar Harbor, Me.

The first talk was given last week by Mr. Cobb, sales manager of Lord & Burnham Company, who spoke of the Lord & Burnham type of construction. Mr. Cobb showed a large number of drawings by means of the reflectoscope, of private and commercial ranges which his firm had built. He also spoke of the details of construction, to which they attach especial importance and he gave a very clear idea of the important factors to be considered in greenhouse construction.

On Friday, R. O. King, of King Construction Company, spoke on their construction. Mr. King's talk emphasized the original ideas which have been brought out in the King construction and he showed by lantern slides a large number of commercial ranges which they have constructed. Mr. King spoke especially of their iron-frame truss construction and explained the theory on which their houses are built.

The first part of the week the afternoons were devoted to a study of the Lord & Burnham construction as shown in the College range and on Saturday the observation trip was to the large range of the Montgomery Rose Company in Hadley, which was built last year by the King Construction Company.

Twin Cities.—Holm & Olsen in St. Paul have added a landscape department and nursery to their establishment, under the management of E. W. Reid, formerly with L. L. May & Co.

Amundson, florist in Minneapolis, was put out of his holiday business through fire, which destroyed everything, causing a total loss.

Kusick & Co., commission dealers in flowers and florists supplies, also suffered some damage in their establishment through fire occurring about two weeks later.

DREER'S "Riverton Special" Plant Tub

No.	Diam.	Each	Doz.	100

WHAT THE USERS SAY

KROESCHELL versus CAST IRON

I have one of your new 1910 model Kroeschell Boilers and same has proven very satisfactory.

We have no trouble to keep temperatures in the coldest weather. We fire once or twice during the day and once at night, and have had the best satisfaction I have ever experienced in a boiler.

Formerly I had two cast iron boilers: one cracked and I took both of these boilers out.

My coal bill with the cast iron boilers ran from \$195 to \$207 per season during the past seven years. This year, with your boiler and soft coal, my coal bill was only \$103 and I still have some coal left.

Your boiler is the best and cheapest on the market, not alone for the price, but also in fuel saving. I am very glad that you are so well known in Buffalo, N. Y., I have never heard anything but praise, in which I join heartily. Wishing you every success, I remain,

MAX BUEHLER, Forks, N. Y.

WASHINGTON

Dark Pink Sport of
ENCHANTRESS

DO not get this variety confused with the Lawson-Enchantress which we discarded some years ago. Washington-Enchantress differs from Rose Pink Enchantress as night from day. Washington is a sport from Enchantress with the best crisp or beautiful dark pink color—the Lawson shade—with stem, habit and productiveness same as Enchantress, and keeping qualities of the best. Stock is clean, healthy and well rooted. Guaranteed satisfactory in every respect.

\$10 per 100; \$20 per 250; \$75 per 1000 C.O.D.

A Grand New Carnation

BRIGHT SPOT

Outclasses everything heretofore grown in the dark pink class.

Won first honors in the 100 class for best dark pink at the A. C. S. Meeting, Pittsburgh, January, 1910, also at the Chicago Flower Show, November, 1909.

It is a pure bright dark pink of even shade, size 3½ inches, an early and continuous bloomer, brings fully 25 per cent. more flowers to the plant than Lawson at its best; flowers well shaped on long, wiry stems; calyx does not split. It is a good shipper, and the cuttings root easy.

Price per 100, \$12.00; price per 1000, \$100.00; price per 5000, \$400.00; 25 at 100, 250 at 1000 rates. Place your order now, to be in on early deliveries.

Fruit and Vegetables under Glass

PESTS OF VINES

The following named pests will be found the chief of those affecting a vine while growing under glass, but by being continually on the alert, and checking them before they have got ahead to any great extent, they can be kept down. Red spider, thrips, mealy bug, vine weevil and mildew.

Where pests have been at all troublesome last year the vines should receive several washings before being started into growth as advised in a previous issue. This will ensure a clean start which is half the battle. Preventive methods should be adopted all along, as vines will not stand for much fumigating. Red spider as usually is the case with all plants, is caused by a lack of moisture in the house or cold draughts. When found syringe with as great a force of water as possible without damaging the foliage. If fruit is coloring hand sponging must be resorted to and as soon as crop is cut give several syringings with some approved insecticide on alternate evenings.

Thrips are found under similar conditions to spider, as a rule the latter appearing first. In a like manner water is inimical to them. If sponging has to be done, add a weak solution of soap and sulphur to the water.

Mealy bug, once established, is hard to eradicate. Severe war should be waged against them during the resting period of the vine. Remove all loose bark and get well into any crevices or holes that may be on rod or spur when washing. This should be done at intervals during the whole of this resting time. Examine the rods when breaking, on all sunny days, and kill any stray ones which may have escaped the winter raids.

The vine weevil is a little fellow who feeds on the tender roots in its larva state and when come to maturity devours the tender foliage, and after doing its damaging work through the night, retreating to the soil again for the day. The amount of damage which can be done in a short time by a quantity of these will be readily recognized, especially as it is almost impossible to destroy them in the soil without injury to the roots of the vine. As soon as their presence is known lay an old sheet under the vine. At night shine a bright light on them while eating and shake the whole trellis. This will cause the majority to fall on the sheet when they can be taken up and destroyed. Pieces of cloth tied lightly on the rod will also answer the purpose, the weevils secreting themselves underneath it as daylight approaches. They will be found to be of a dark color, hard round body, wingless, having six legs.

Mildew is often the cause of bad ventilation. Use sulphur on the hot pipes, as you would for roses, or blow a little in the air on to affected spots. As soon as berries are set seems to be the worst period; after this the foliage and skin of the berries get harder.

Vines started 1st of December which are breaking should have the temperature raised to 48 to 50 degrees at night with advance by day.

PROPAGATION OF THE VINE

The vine is one of the most simple plants to propagate, roots being produced on every part of the stem when placed under suitable conditions. Nature itself shows us this. Let the roots of an established vine become in anyway deranged and the usual humid atmosphere kept up, the whole stem or part of it will become a mass of hanging roots. These are known as aerial or adventitious roots and would, if allowed, fix themselves in the soil and help supply the plant with food. This and layering are Nature's own way of propagation. You will notice by this the roots are emitted from hard wood and so it is that you seldom see a vine propagated from a cutting made from young and tender growth, or from the leaf, as is possible with such plants as the saintpaulia, gloxinia and the several begonias, etc. Cuttings made from tender growths could be inserted but the percentage of rooted plants from these would be very small.

The usual methods of propagating the vine, using the ripened wood, are by cuttings, layers and eyes and also by budding, grafting and inarching. Layers are about the most natural methods, as the vine in its wild state is naturally a trailing plant, supported by stronger trees and wherever a shoot reaches the ground it takes root. If this method is adopted, a shoot can be trained near the soil or a pot suspended below it, filled with soil and kept moist. The shoot should have the bark slightly cut away on the underneath side for about an inch and then be pegged down firm into the soil. As this takes root it can be gradually severed from the parent. By cuttings is the method usually adopted for outside vines when raised in quantity. A shoot is taken about a foot long, having a heel to it, and placed in a bed allowing only the top two or three eyes to break. "Eyes" is the method universally used for propagating vines under glass. Select only the best ripened wood, with good solid eyes. Cut the eyes away, cleaving only $\frac{3}{4}$ inch on each side. The cut is best made sideways giving more rooting surface. It is not necessary to cut these any more, as the end below the eye will callous and root, but if a little of the wood is removed beneath the eye there is a double chance, as this will callous and root as well as the end. Eyes should be pegged firmly down into 4-inch pots, having a compost of three parts loam, one sand and one leaf soil. Plunge in propagating case and give a bottom heat of 70 degrees and top heat of 65. Keep moist but not sodden. Eyes should root in two to three weeks. After top growth commences admit a little air. This work of propagating can be done at once or through February; by starting now a good long season is sure.

(Budding, grafting and inarching to be dealt with later.)

TEMPERATURES, VENTS AND AIRING

Fruit houses, unlike many plant houses, require a moving temperature. By this I mean you cannot fix one temperature for the whole growing season. As the seasons would come on gradually, so must the temperatures inside. Certain scales are used by some, but there is no hard and fast rule; the conditions and state of the growth must govern. Instances are peaches and nectarines in flower, 45 to 50 degrees (night); Hamburgh vines, 65 degrees; Muscat vines in flower 70 degrees; peaches stoning, 55 to 58 degrees; but these

should not be rigidly kept up if the weather is very severe; a drop of a few degrees is better than over-doing fire heat. A few degrees either way must be given at the grower's discretion.

Airing a vinery is a very important factor, numerous ills arising out of carelessly admitting too much air, or not enough. At this time of the year little air will be needed, but as the sun increases in power more will be necessary. Avoid all draughts which will cause mildew or spider later. The result of insufficient air will be burning of the tender growths and later on rust, spot and scalding of the berries.

PEACH TREES

started in December will now be in flower. Keep a night temperature of 45 to 50 degrees. Give all air possible through the day, using a crack on the bottom towards noon. Run house up to 65 to 70 degrees with sun heat and keep a dryer atmosphere. Trees should receive a sharp shake at midday to distribute the pollen or the flowers touched gently with a fine brush, or a soft piece of fur. A rabbit's tail mounted on a stick often serves the purpose well.

GLOBE ARTICHOKE

There is always a doubt of this serviceable vegetable surviving the winter, although every care may have been taken to protect them. A sowing should be made now to replenish any that may have died and also to furnish new beds. Sow in pans or flats in well drained soil and pot on when ready. Give all possible light by placing on shelf or bench near the glass. These can be grown with onions and hardened off with them.

LETTUCE

A few flats of lettuce can be sown to furnish a first cut where a supply has not been kept up the winter through. Varieties are so numerous mention of them is almost needless, some varieties claiming preference to others in certain districts. All Year Round, Balmoral and May King should be given a trial.

ENDIVE

requires similar growing conditions to lettuce until time for blanching. The cool end of the house should be given to it. If sown now it will be necessary to blanch it by inverting a pot over each or making a section of the bench dark.

George H. Benson

Mr. Benson's next notes will be on the following topics: Fruit Trees in Pots; Reference Boards; Beans for Pot Work.

Seasonable Notes on Culture of Florists' Stock

CARNATION CUTTINGS

Cuttings should be taken early in the morning while they are fresh and crisp. Do not take those that are too young and soft. Dip them in cool water and trim up in a cool place. Insert as soon as possible in the propagating bench. Spray lightly early every bright morning so as to keep the foliage moist during the day, but try to have the foliage dry by night. The cuttings that were put in during December will likely be ready to pot by this time. After a cutting is well rooted you should lose no time in potting up for they don't improve by remaining in the sand any longer. Before potting harden them up a little by gradually giving more sunlight each day, until the roots have pushed far enough to enable them to stand full sun. Cuttings thus treated will take hold much quicker as there will be less wilting after potting. Use new soil that has been exposed to the action of weather. Screen through a half-inch mesh and it is important to have it moist enough. Pot firmly and water thoroughly as soon after as practical. Shade for a few days and then give full sunlight.

DRACAENA INDIVISA

This is one of the most useful plants for the retail florist. For all outdoor embellishments such as the filling of vases, window boxes and tubs, it is almost indispensable. It takes a full two years or over to make a good specimen. Seed should be sown now in sandy soil and kept moist, in a temperature from 60 to 65 degrees at night. When the young seedlings are large enough pot them into 2½-inch pots and shift during the summer as their growth may require until the spring following, when they should be planted outside in the open ground until fall. Those that are in 5 to 7-inch pots should now be given from 50 to 55 degrees at night. Give them a dose of liquid manure about once a week and they will make fine plants for spring sales.

GRAFTING ROSES

Having formed an idea of what stock is needed it behooves the grower to either graft or propagate now right along. Before you start grafting see that your grafting frames are made as nearly air tight as possible and so arranged that a temperature of about 80 degrees can easily be maintained. Apply a good coat of whitewash to the woodwork, see that free drainage is arranged, and then finish off with about 2 or 3 inches of screened ashes or sand. Before the pots are put in give the bed so prepared a good soaking, to furnish

FIREFLY CLARKIA.

The Journal of Horticulture for June 9th, 1910, says of the elegant novelty herewith pictured, that "It may be taken for granted that there will be many more pot-grown Clarkias next year, since Messrs. Sutton so successfully exhibited those beautiful, graceful pyramids of theirs at the Temple Show. The variety Firefly, a lovely rosy-scarlet, standing 4 ft. high, would make an ideal conservatory ornament, and some of us will try our skill to reproduce something like it. Carnation-flaked and Double Salmon are also fine varieties.

enough of moisture for the plants for the first four days, when a little air can be given which will require constant watchfulness in nursing them along, and finally at the expiration of about four weeks in having presentable plants. Air should be administered very carefully at first only for a few minutes night and morning, and from day to day gradually increase the supply. To preserve the foliage, a fair supply of moisture will be needed to sustain the vitality of the scion. In about five weeks the plants should be well hardened and can be moved to some bench near the light where they will need some shading for a week or so coupled with extra care in watering, syringing and ventilation.

PANAX VICTORIAE

This panax is nearly as decorative as some of the best aralias and at any stage of its growth there is not the slightest difficulty experienced in its culture. In the way of filling it can be used the same as pandanus and dracaena, making it very useful for the florist's use. Cuttings can be put in now; they will root in about two or three weeks. Use fibry loam with an addition of leaf mold and sand and grow on and shift when necessary. If grown on without interruption they will make nice specimens in 6-inch pots by fall. Give a temperature of 65 degrees at night.

SMILAX

Seed should be sown now to supply the indoor plantation in June. For rapid germination a steady heat and moisture are needed. From 60 to 65 degrees will be right. For the starting of the seed any good grade of sandy soil that is fairly open will do. Keep the flats or pans covered with a piece of glass until the seeds have pushed forth their growth. Give all the light possible and keep up atmospheric heat and moisture. They should be transplanted when they have made their third pair of leaves, into 2-inch pots, using a friable sandy and moderately enriched soil, and then grown on, avoiding any check in their growth. Towards spring they will need another shift into 3-inch pots. The old beds that are starting up a new crop should have a mulch of partly decayed cow manure, but remember that light and frequent applications are to be preferred to one heavy mulch.

TUBEROUS BEGONIAS

Seed should be sown now for those who intend to grow them from seed for the coming season. Sow in pans, using some rough soil on the bottom, and then filling up with a compost of finely sifted loam two parts, leaf mold one part, and sharp sand one part. The mixture should be then thoroughly moistened, and the soil pressed firmly and even. Stand them in a house where the temperature ranges from 65 to 70 degrees, and shade from the direct sunlight. In about a month or six weeks the seedlings will be ready to prick out into flats, using the same compost as that in which the seeds were sown. In March they should be ready for 2-inch pots, using a mixture composed of soil one-third, old manure one-third, and one-third of leaf mold and sand in equal quantities. At this stage they will be better in a temperature of from 58 to 60 degrees with a raise of 75 degrees with sunshine. With the strong spring sunshine they should be shaded for two or three hours during hottest part of the day. Seedlings require a warm temperature for the first three

months, and little trouble will be experienced afterwards.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: Asparagus; Cattleyas and Laelias; Primulas; Seeds to Sow; Sowing Palm Seed; Sweet Peas.

British Horticulture

RETROSPECTIVE

In looking back over the records of 1910 it cannot be said that the year was altogether satisfactory to the horticultural trade. The death of King Edward, with the resultant temporary cessation of social events, made a considerable difference to the florists. The turmoil and trouble of two general elections in one year did not improve matters. Then again the very unsatisfactory weather during the summer caused widespread damage to out-door crops. The various societies have continued their activities; the Royal Horticultural Society has placed to its credit a list of notable events, the chief, of course, being the Temple and the Holland House shows. The latter exhibition was noteworthy from the fact that it was the last one which will be held in the historic grounds of Holland House. Good progress has been made with the arrangements for holding the International Horticultural exhibition, at Chelsea, in 1912. The National Rose, Sweet Pea, Dahlia, Carnation, and other societies have held excellent shows during the year, whilst a new comer has been added to the list in the shape of the National Vegetable Society, which held its first show, in the autumn, under very encouraging conditions. Another new organization with a promising future is the National Hardy Plant Society. There are unmistakable indications of the increasing interest taken in horticulture amongst all classes, and this is an omen fraught with the brightest prospects for all concerned in its prosperity.

W. H. Adsett,

Aster Southcote Beauty

(See Cover Page.)

This new race much resembles the single "Ostrich Plume" aster, which has become so exceedingly popular, especially in England, during the last few years. It has all the beauty of habit and flower which the latter possesses. The flowers have long, perfectly formed petals and very small golden-yellow centres, as is shown in the illustration, and are carried on long stiff stems from 12 to 20 inches in length. The colors include beautiful shades of blue and pink, as well as pure white. Southcote Beauty is of great value as a border plant, attaining a height of 2 to 2½ feet, and is probably unrivalled by any other aster for cutting and house decoration. Messrs. Sutton & Sons, the introducers, tell us that in future years it is hoped to save distinct colors, but at present only mixed seed containing the tints mentioned above is procurable.

A gigantic undertaking

Members of the National Flower Show committee and others active in the work of the various societies interested in this approaching event have been in session

for several days in Boston working industriously on the multitudinous details of schedules, rules and management. Much interest attaches to the fact that this is the first attempt in this country, so far as we are informed, to combine in one enterprise the rather conflicting interests of a popular horticultural exhibition with

competitive features and a trade show where wholesale buying and selling may be carried on. The committee has encountered many snags and perplexing questions in its efforts to harmonize and conserve all interests concerned in the two schemes and in so adjusting rules as to overcome all ambiguity and ensure a fair deal to all. The affair grows in magnitude every day and the space reservations in both sections are now so large that there is no question that the acres of floor space in the big Mechanics Building will be completely filled with exhibits. The only matter on which any anxiety can now be felt is the financial outcome and prospects on that line are also looming up.

Progressiveness All broad-minded florists and their friends who wish well to the profession will feel in hearty sympathy

with the sentiments expressed in Mr. Skidelsky's Philadelphia talk on progressiveness which appears in this issue. Mr. Skidelsky's views are in evident accord with those repeatedly expressed in these columns and the subject is one which cannot be agitated too often or too urgently, for, on the carrying out of the principles advocated depends very largely the direction of development of floriculture in the immediate future and the position the art and its practitioners are destined to occupy. With the many avenues now available for acquiring a knowledge of the principles of horticulture, such as the trade journals, the societies general and special and the practical courses in the various agricultural colleges, there is no reason for any man now to jump into the florist business with no other equipment than a little money and an idea that "the business looks good" and the man who does so is hardly entitled to sympathy. That the "hit or miss" course no longer holds out any prospect of success, in competition with well-trained men and the application of advanced business methods, is a condition which we should view with much satisfaction for it is development along a line which leads directly to a higher and better position for the vocation itself and for those who follow it.

Unequal distribution of flowers It is often interesting to compare the flower market reports from various points at identical dates and anyone who will follow up these reports as they appear in the trade papers from week to week will find much food for inquisitive thought. Last week for instance, our Chicago report was to the effect that while there was no particular overstock of anything there was an abundance for all demands; Buffalo full supply and moderate demand, surplus on some things; Cincinnati an abundance; New York somewhat overstocked; Philadelphia quite overstocked. Then see what Detroit said: "Short supply causing a good deal of loss in business. Retailers have no opportunity to make any great display and prices rule too high to be popular." Detroit is but a few hours' run from the plethoric markets above quoted. Why did she not make her needs known and why did not the dealers in other markets scent this opportunity for trade? Much more glaring instances of lack of balance in flower distribution are frequently in evidence and, no doubt, will continue to recur, until the producers and handlers of cut flower stock in different centres wake up and evolve some practical method of co-operation so that famine in one place and stagnation of supplies at another will no longer be possible. Then, perhaps the unstable and constantly fluctuating values which have caused so much trouble in the flower trade will be reduced to a minimum and thus all interests will be benefited.

ARE WE PROGRESSIVE?

(A paper read before the Florists' Club of Philadelphia by S. S. Skidelsky.)

If I could prove to the satisfaction of the craft that at the bottom of most of our failures lies the inexorable cause of ignorance, inefficiency and a disregard for the little details which go a good way towards the make-up of the sum and substance of a successful business undertaking,—I should indeed be proud of my achievement. I shall not venture, however, to treat the subject in an exhaustive manner for fear that I might fail in the attempt.

With your permission I will read a letter which appeared a few months ago in one of our trade papers. It read, "Can you tell me what is the matter with my violets? I am enclosing a few leaves, and if you can give me any information regarding them, it will be appreciated. I have a greenhouse 22 x 70, chiefly in violets, and there is something wrong with them. We also have our sweet peas in the same house, and I am enclosing some of them. They are not doing as well as they might. Will you tell me what to do with them? I am located in Eastern Missouri." And this from a citizen of Missouri, who, according to the popular belief, should have been "shown" before he undertook the growing of violets and sweet peas—not after. I need hardly add that the Missourian in question represents a type not at all uncommon amongst us.

This Missourian might as well have undertaken the construction of an aeroplane or the preparation of a brief in an important case before the Supreme Court. The results, to be sure, would have proven equally unsatisfactory. Can we imagine, for a moment, a competent machinist, a cabinet-maker, or an attorney or a physician doing their work on the mere assumption that if one does "not succeed, he must try and try again?"

"The florist business looked mighty good to me," remarked an ex-coal dealer in a western town, one day, to me. "I sold out my business," he continued, "and built a range of six houses. Not knowing a thing about growing, I engaged a man, who claimed he knew it all, with the result that I lost heavily the first season. The season following, I hired another fellow, a carnation grower, and planted four of my houses to carnations, and two with miscellaneous bedding stock. As bad luck should have it, we had a dry season, the plants made poor growth in the field, and when benched they began to wilt and to stem-rot. Neither of us knew what to do about it. Another failure stared me in the face, but I was determined to make the best of it, and so put in a batch of lettuce to help pay for the coal at least, let alone money-making. Well, sir," concluded the would-be florist, "if you know of anybody looking for greenhouses, please send him around. I'll sell out cheap."

Now, here is a case of a man, who, because the florists' business looked good to him, did not at all hesitate to dispose of his coal business, and to embark in something he did not know anything about. Can we imagine a carpet-weaver or a doctor undertaking their respective work without any training, but simply because the carpet business or the M. D. profession looked good to them? Hardly. But horticulture, evidently, puts no obsta-

cles in the way of the novice. On the contrary, it seems to allure coal dealers, carpenters, machinists, clerks and, if I may change Milton's verse, it invites all, "All hope cherish, ye who enter here." Men and women, too, who know no more about flower or plant culture, than they do about bridge building, often embark unhesitatingly in the florists' business, trusting to mere pluck or luck, with the result, as might be expected, of failure in the end.

The thought has often occurred to me that but few professions or trades, if any, are being conducted on the "hit or miss" principle to the extent in which the florist business is being conducted. To be sure, we have very competent and able growers everywhere. We can point to men who have achieved success because of their ability and foresight. There are rose growers, carnation growers, plantmen, specialists in every branch, many of whom are well-known to all of us. But such men, we must admit, constitute but a handful as compared with the number of incompetents. I will hazard the assertion that to every successful carnation or rose grower, to every man who knows not only how to do things, but why and when to do them as well, there are dozens at least, who grope in the dark, who know nothing about soils, about the use and abuse of fertilizers, about the requirements of plants, about the proper handling of bulbs and seeds; who, in brief, are utterly unfit for the work they are doing. My own observations, during nearly a quarter of a century of road life, among all classes and conditions of florists, have led me to but one conclusion, and that is, that our business, notwithstanding the tremendous progress it has made, lacks in those fundamental elements, which are so necessary in order to insure its permanent healthy growth. The florist who makes a failure of his roses, for example, and cannot diagnose the cause of the failure in order to apply the remedy, or to nip the very failure in the bud, proves conclusively that he had not studied his trade or profession. In other words, he has not the theoretical knowledge or scientific basis upon which to work out his practical results.

On the other hand, the man who makes a success of his plants and is equally at sea to explain the whys and wherefores, is no more to be commended than he, who, through mere chance or accident, hits upon a streak of good luck. The "hit or miss" principle accounts equally for the results in both cases. It was a "miss" with one, and a "hit" with the other, while the law of cause and effect underlying both, is a mystery or a closed book to either.

The question naturally arises, Why do people venture into a trade or profession, the essential knowledge of which they do not possess? Why give up a paying coal business and build greenhouses, without first mastering the art of growing? Why so many failures everywhere, while those really successful, because of a thorough training, intelligent observation, deduction and application, are comparatively few? Is it because the florist business "looks so mighty good?" Granted. Then that much more reason why we should bend all our energies

and put forth our best efforts towards equipping ourselves in every way in order to build our success upon a more solid foundation.

The farmer who tilled the soil for generations past, and who thought he knew all about it, as his fathers did before him, is just beginning to realize that he has yet much to learn, that his primitive methods of farming will not do, if he is to keep pace with the progress of the times. In this connection it may not be amiss to quote a few lines from an article of Gantt, in the Engineering Journal, having a direct bearing upon the subject under consideration. "In the United States our superb national resources have enabled us to make phenomenal progress without regard to the teachings of science, and in many cases in spite of our neglect of them. But we have reached a point where we must recognize that the proper application of science to industry is of vital importance to the future prosperity of the country."

The progressive farmer has evidently arrived at the same conclusion, if we are to judge by the number of farmer boys filling the halls of the state agricultural colleges, the farmers' institutes, the agricultural departments of the high schools, the University extension courses, etc. The experimental stations established in various states, in most cases as a result of the pressure brought to bear by the farming element upon the state legislatures, is but an additional proof that the farmer is not only awakening, but that he is wide-awake to his interests. He is not content to let "well enough" alone, but wants to accomplish the best results possible. He wants to know something about the chemistry of the soil, about the ways and means of improving it, about diversified crops; in brief, he realizes that in order to increase and to improve his product, he must combine brain and brawn, and work out his problems upon scientific principles.

In his annual report, Secretary of Agriculture Wilson tells us that "since October, 1908, the number of institutions in the United States giving instruction in agriculture has increased from 545 to 875. Departments of agricultural instruction have been established in thirty-eight public high schools. Two hundred and fourteen institutions now give teachers' training courses in agriculture. Farmers' institutes are now organized in every state. The attendance at the institute meetings was 2,395,908. Ninety-nine movable schools of agriculture were held with an attendance of 65,977." These are interesting facts.

Now, what the farmer has accomplished or is striving to accomplish, should not be beyond the reach of the horticulturist as well. If the farmer deems it wise, and to his interests to send his son to an agricultural college, and to take advantage of a university extension course, often brought to his very doors, as has been the case in some western states, why should the horticulturist neglect his opportunity to broaden out and to equip the rising generation with a more thorough knowledge of the details of the profession in which they are engaged? Our business has grown to gigantic proportions, and the capital invested is beyond the dream of the florist of

only a generation ago. Just think of it—twenty years ago, Boston supplied Chicago with cut flowers. Need I tell you that Chicago no longer depends upon the Hub for her supply of cut flowers? Our progress in a commercial way has indeed been phenomenal, and while we have ample reason to congratulate ourselves upon the success achieved, we must at the same time not overlook the fact that our business growth, unless we increase our means and efficiency, cannot possibly continue along successful lines.

Take the labor problem for example. Scan through any of our trade papers, and you will readily see that on an average there are three good positions open to every competent man. I think I am safe in making the assertion that the man who can manage a greenhouse and can produce the stock possesses an asset far greater than that of the boss who invests his money in the greenhouses, and worries about the weekly pay-roll besides. I will go farther and say that no profession (granted that we are ornamental horticulturists, and not mere tradesmen) is as much in need of professionals as the florist profession is. Good and competent men, men who know HOW to do things, are wanted everywhere. Such men are scarce.

But to come to the point. Since we have reached the stage in our commercial development beyond which we cannot go unless we increase our means and improve our efficiency, is it not high time that we make the effort to have well-equipped horticultural schools where young men, our future ornamental horticulturists, may take a course of training, and, like the wide-awake farmer, learn to know the details of their business more thoroughly than their predecessors? It seems to me that horticulture in general is of sufficient importance to assert its rights, like manual training or any profession taught in our special schools, colleges and universities.

A horticultural school, under the leadership of a competent head, and a staff of well-trained instructors, would not only teach the young man something about the elements of soil, phosphates, hydrogen, the proper use and application of fertilizers, the nature of pests, fungus, and the right way of fighting and overcoming these evils, but it would also teach him system and method, two most potent factors in the success of any business.

We all know only too well the difference between intelligent, systematic work, and that of the sloven who, like the proverbial bee, keeps continually at it but, unlike the industrious insect, accomplishes but poor results. System and method are indisputably the means that were in a great measure responsible for the success of many of our prominent growers of today. Peter Henderson represented a striking example of what system could accomplish in a business way, and no less an authority than the great English peer, Gladstone, himself, tells us that "the man with a method and system accomplishes more in a week than the sloven will in a month."

Our business demands that we devise means and ways of conducting it in a business way. We can no longer remain passive to our own interests, nor dare we ignore the methods which the progressive and wide-awake farm-

er sees fit to employ in order to adapt himself to the exacting business conditions that confront him to-day. The cry is already heard that the "big fellows" are swallowing up the little ones. Translated into other words, it simply means that the progressive horticulturist is forging ahead, while the one who cannot see beyond the limit of his own shadow, is dropping by the roadside. It is merely a question of the survival of the fittest.

In a recent announcement in the "Outlook," the editors promise for the near future a timely article on "The new science of business." "There is a new thing in the world of industry," they tell us. "It is the efficient application of exact scientific principles to present business methods. It has been applied in machine shops and foundries, in cotton mills and paper mills, in bleacheries and dye works, in printing and lithographing establishments, and in other businesses. The science of management can be applied to every department of every business."

There certainly cannot be any question about it, nor can any one doubt the urgent need of horticultural schools everywhere, if the scientific principles are to be applied in our greenhouses, as well as in the machine shops.

MASSACHUSETTS HORTICULTURAL SOCIETY.

Lecture by J. Otto Thilow.

The lecture season for 1911 at Horticultural Hall, Boston, had a most brilliant opening on Saturday, January 14. It was the initial meeting under the new 2 o'clock plan. For nearly forty years the custom has prevailed of holding these meetings for lectures and discussions at 11 a. m., and the wisdom of the new rule was at once demonstrated, for the audience was in quality one of the finest ever assembled in Horticultural Hall and in numbers and enthusiasm it outranked any similar occasion on record. Of course, all of the enthusiasm and a goodly part of the attendance were due to the ability of the lecturer and the popularity of the subject of his address, "Gardening for and by the Amateur." Mr. Thilow gave most hearty testimony repeatedly throughout his paper to the great influence of women in the development of horticulture in recent years. On this subject he said:

Our strongest and most influential exponents of gardening and the care of flowers are women who have been enthusiastic, and have applied their skill with such profitable and gratifying response that they have given their experience through the pen and have enthused many anxious and willing students in the same direction, and while it might appear to some to be only a spot in a certain lad, the commercial horticulturist can testify that it has been an uplift to his business and is constantly increasing."

Referring to the recent trend toward gardening with color schemes the lecturer said:

"This can be accomplished only when space will permit, as quantity is necessary to secure the color, and space to have the variation and effect, and unless one is fairly familiar with the blooming period, the effect is spoiled by a portion of the plantings either not in bloom or beyond that point, destroying the harmony of bloom at a period when most needed. The best way of overcoming these troubles is to have a space in a well-tiltivated garden large enough to hold a few specimens of each of the varieties in different colors, and the different classes—noting the blooming period of the varieties, and the variation of same.

With all this close attention and study, the period of perfection is short and the spots taken up by one variety and color shows to greater disadvantage than were the spaces filled with plants of different species of the same color.

Those experienced in the use of seeds of annuals can do much better, and get a much longer blooming period when these annuals are used in connection with perennials. For example, in yellow. To begin with the opening of the season: *Doronicum* and *Pansies* would be the first; *Wallflower* and *Escholtzia* the second; *Trollius*, *Aquilegia*, *Coreopsis* and *Calendula* the third; *Heemerocallis*, *Gladiolus*, *Helenium* and *Hollyhock* would be the fourth; *Marigold*, *Hardy Sunflower*, *Zinnias* and *Gaillardia*, the fifth.

You will at once perceive that this can only be done where space is large enough to contain from three to five distinct classes, and planted in such a way that with one variety blooming, to produce the whole effect in yellow—and this effect to continue from the beginning of the *Doronicum* to the *Hardy Sunflower* and *Zinnias*—which really runs into the frost season, making the period from frost to frost. The same effect can be had with other varieties in pink, white, red and blue. It must also be observed that the color block will not maintain the same height throughout the season, viz.: If the first period is to be yellow with *Pansies*, it will be dwarf, and if with *Doronicum* it will be from eighteen to twenty-four inches high. The same would be true of other colors, but a choice can be made from a complete list of plants or seeds, divided up in color and height."

Mr. Thilow gave a number of valuable lists of combinations for contrasting and harmonious effect in plantations of annuals in association with perennial border plants, arranged according to succession of bloom. Copies of these lists may be procured on application to the secretary, W. P. Rich, Horticultural Hall, Boston. In the course of his talk Mr. Thilow remarked:

"Suffice it to say that none but a thoroughly experienced horticulturist can keep pace with and give the required information that is demanded by the average amateurs, men and women."

Before he had got through with his audience he had abundant reason to thank his stars that he was "a thoroughly experienced horticulturist," for the questions were fired at him in veritable volleys for over an hour and a half after he had finished the lecture proper. Whether on fertilizers, insects, fungus diseases, botany, culture or any other related question of farm, orchard, garden or greenhouse practice, Mr. Thilow proved to be invulnerable, and it was remarked on all sides that he was the best informed and best prepared lecturer who had ever faced a Boston horticultural audience and the rare honor of a rising vote of thanks from an audience of four or five hundred people was enthusiastically accorded him.

At the meeting of January 7, 1911, gratuities were awarded for exhibits as follows:

Mrs. J. L. Gardner for *Cattleya Trianae*, *Eranthemum pulchellum*, and cactus-flowered *cineraria*, \$3.00; Weld Garden, gard. D. Finlayson, superior culture of *calanthes*, a silver medal; for *Cymbidium* X *Holfordianum* C. chunium X C. grandibrum, a first class certificate; E. B. Dane, gard. D. McKenzie, for *Cypripedium* X *Merlin* Magnificum, a silver medal; for C. insigne Sanderne X Leeanum, and C. insigne nobile nigrum, first class certificate. The *calanthes* in Mr. Finlayson's group included *McWilliamii*, *Sandhurstiana*, *Veitchii* and *V. compacta*. More of these beautiful orchids should be grown for commercial use.

The annual dinner of the Nassau County Horticultural Society will be held at the Schleicher's Hall, Glen Cove, Jan. 25th, inst.

CLUBS AND SOCIETIES

NEW ENGLAND DAHLIA SOCIETY.

The annual meeting of the New England Dahlia Society was held in Library Hall of the Massachusetts Horticultural Society on Jan. 11th, 1911. The meeting was called to order by President Henry W. Kendall. The election of officers for the year resulted as follows: President, J. K. Alexander, East Bridgewater, Mass.,

J. K. ALEXANDER

President-elect New England Dahlia Society

vice-president, N. Allen Lindsey, Marblehead, Mass.; secretary, Prof. G. W. Bullard, Medford, Mass.; treasurer, Loring M. Bates, N. Bridgewater; executive committee, H. L. Winters, of Medford, Mass.; W. C. Brady, of Wollaston, Mass.; A. L. Brown, Marblehead, Mass.; Edward F. Dwyer, Lynn, Mass., and Geo. F. Stillman, Westbury, R. I. The meeting was one of the largest in the history of the Society and many interesting subjects were discussed. The amendments which were presented at the previous annual meeting were acted upon and voted to be placed on file with the exception of article IX., which was accepted as follows:

The Society shall publish once a month a paper called the "Dahlia News" for the dissemination of information on the dahlia, which paper shall be for sale by the society at one dollar per annum.

The following amendment to be added to the by-laws was presented to be voted upon at the next meeting:

If after due hearing a majority of the executive committee shall be of the opinion that any member has acted in a manner detrimental to the interests of the society, such committee may recommend to the society expulsion of such member. The society may legally expell such member at any meeting legally held.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

On Tuesday evening, January 17, Horticultural Hall was filled to overflowing with a merry throng, the occasion being Ladies' Night and installation of officers. Formal proceedings were brief. Officers' reports showed a prosperous and harmonious condition, the membership with the addition of ten new applicants numbering 422, and the balance in treasury

amounting to \$1,600, a gain of \$214 for the year. The average attendance at the meetings during the past year was 148.

The new officers were duly introduced by ex-President Westwood in his inimitable style.

It was decided that a banquet be held next month. The speaker at the next meeting will be Edwin Jenkins of Lenox, Mass., on the subject of Science in Horticulture. Date of meeting will be announced later. Wallace R. Pierson being called upon gave a few interesting facts regarding the sensational new roses Prince de Bulgarie and Dark Pink Killarney. Committees were appointed as follows:

Exhibition—D. Finlayson, Arthur Griffin, W. J. Harvey, A. A. Pembroke, W. A. Patten, Geo. M. Anderson, George Page, Kenneth Finlayson, W. McGillivray, W. E. Fischer, J. L. Smith, George Shields, W. C. Rust, David Weir and Albert Batley. Entertainment—P. J. Turley, C. J. Harvey, F. Murray, W. D. Nickerson, John Reid, G. W. Butterworth, J. P. Van Baarda, W. A. Hastings.

A vote of sympathy was passed on behalf of Julius Heurlin who last week lost one of his boys by scarlet fever and now has another very dangerously ill with the same disease.

The entertainment section was then turned loose and songs were delightfully rendered by Mrs. McEwen, Messrs Miller and Miss Guttenburg, after which refreshments were served and then the floor was cleared for dancing. It was a very enjoyable affair and well managed all through.

On the exhibition tables were lilacs from W. W. Edgar Co., primroses from Martin Sullivan, violets from H. F. Woods, solanum from T. J. Grey Co., and Roses Prince de Bulgarie and Dark Pink Killarney from A. N. Pierson, both of the latter being awarded a report of superior merit.

OVERWHELMED!

A large amount of reading matter which should have appeared this week is unavoidably left over for next issue because of lack of space. This includes interesting reports from the following clubs and societies: Pittsburgh Florists' and Gardeners' Club, Chicago Florists' Club, Horticultural Society of New York, Florists' and Gardeners' Club of R. I., St. Louis Florist Club, Westchester and Fairfield Horticulture Society, Worcester County Horticultural Society, Conn. Horticultural Society, Southampton Horticultural Society, N. J. Floricultural Society and Nassau County Horticultural Society.

PENNSYLVANIA HORTICULTURAL SOCIETY.

The January meeting of this society was held on the 17th inst., Henry F. Michell, vice-president, in the chair. There were no exhibits and most of the time was taken up with business matters not of general interest to the outside public. A motion was passed inviting the National Sweet Pea Society to hold their annual exhibition in Philadelphia this year, and offering the co-operation of the P. H. S. in that connection. The date for this is not yet fixed, and it is understood that an invitation for the same event is offered by Boston. A report from

a joint committee of the P. H. S. and the Florists' Club was submitted, and met with approval. The main object of the committee is to endeavor to make the fall exhibition larger and more successful. The general opinion seems to be that under the present financial condition of the society, nothing effective can be done without a guarantee fund, and steps are to be taken to put such a fund under way. Some additional prizes were announced for the spring exhibition, March 21-23. William Kleinheinz, president of the National Gardeners' Association, announced that that society was deeply interested in the success of the National Flower Show, Boston, March 25th, and urged all members of the P. H. S. to make every effort to attend and reap big benefits from this great event.

ROCHESTER FLORISTS' ASSOCIATION.

Much friendly competition was aroused by the two tickets placed in the field a month ago, and interest culminated at the election held on the evening of January 9. The following officers were elected, the successful candidates being about evenly divided between the two tickets: President, George B. Hart; vice-president, George J. Keller; secretary, H. B. Stringer (each ticket); treasurer, W. L. Keller; trustees, F. R. Schlegel, Charles Suhr, J. O. Pridmore. The election was made unanimous.

By the treasurer's report it was shown that the association is in a flourishing condition. President Hart

GEORGE B. HART

President-elect Rochester Florists Association.

and the newly elected trustees were constituted a committee to consider the advisability of removing the association to other quarters. The report will be received at the February meeting, as will the report of the banquet committee.

A woman's auxiliary has been formed with Mrs. W. L. Keller as president. Meetings will be held in the association rooms the second Wednesday in each month.

FINE FERNS

Ready For Immediate Retail Sale

We have an exceptionally fine and large stock of ferns in the following varieties,—first-class plants of exceedingly good value—plants that will please the most critical buyers, both in regard to quality and value.

NEPHROLEPIS ELEGANTISSIMA (Improved). The finest of this type—never showing a Boston frond; has not reverted in the last four years. Fine plants, 6-in., \$6.00 per dozen; 8-in., \$12.00 per dozen; large specimens in 12-in. pans, \$3.00 to \$5.00 each.

NEPHROLEPIS ELEGANTISSIMA COMPACTA. This bears the same relation to elegantissima compacta that Scottii does to Bostoniensis. It is a dwarf, compact plant, especially fine in the small sizes. Fine plants, 6-in., \$6.00 per dozen.

NEPHROLEPIS SCHOLZELI. Fine plants, 3½-in. pots, \$2.50 per dozen; 6-in. pans, \$6.00 per dozen; 8-in. pans, \$12.00 per dozen.

NEPHROLEPIS BOSTONIENSIS. Extra strong plants, 8-in. pans, \$12.00 per dozen.

NEPHROLEPIS SCOTTII 8-in. pans, \$12.00 per dozen.

SMALL FERNS FOR FERN PANS. Best and hardiest varieties assorted: Pteris Mayli, Wimsetti, Adiantoides, Aspidium Tsussimense, Crytomium falcatum, etc. Strong plants, 2¼-in. pots, \$3.50 per 100.

CROTONS. Nice assortment, well colored, 5-inch, \$9.00 per dozen.

F. R. PIERSON CO., Tarrytown-on-Hudson, New York

FIRE RECORD.

Savanna, Ill.—Fire totally destroyed the residence of J. Y. Lambert with all its contents on Dec. 30th.

Canton, Ohio.—Fire damaged the greenhouses of Charles Lindacher to the extent of \$1500 on Jan. 2nd.

Sturgeon Bay, Wis.—The 40 x 90 packing shed at the Evergreen Nursery was destroyed by fire recently.

Washington, Iowa.—The greenhouse

of J. Melinsky was totally destroyed by fire on Jan. 10th; but little insurance was carried.

Louisville, Ky.—One greenhouse of Mrs. G. W. Hodges and a barn filled with hay and boxes of glass were totally destroyed recently.

Summit, N. J.—Fire on Jan. 10th destroyed about 8,000 carnation plants, one greenhouse 20 x 250 feet and the boiler shed at Valentine Hamann's.

W. Fairview, Pa.—A warehouse, boiler room and several greenhouses of H. S. Miller were destroyed by fire of unknown origin Jan. 1st. Loss several thousand dollars.

South Hadley Falls, Mass.—The greenhouse of O. A. Judd & Son, market gardeners, Lathrop street, was partially destroyed by fire the morning of Jan. 11th. The fire was confined to one end of the greenhouse.

Keefer of Plainsfield, who will remove it to that place.

Auburndale, Mass.—F. W. Fletcher has erected a neat little building with flower store in front, at Riverside, of concrete block construction.

Angola, N. Y.—The firm of Neubeck Bros. has been dissolved, M. C. withdrawing and John J. continuing the business under his own name.

Richmond, Ind.—A project is on foot to erect a greenhouse to cost about \$5,000 at the Eastern Indiana Hospital for the Insane, to grow flowers for the inmates.

Hillsdale, Ore.—A new florist business has been started here by John C. Elliott. He has secured an eight-acre tract and will build a 130-foot carnation house in the spring.

You may depend on it for positive results, without fear of failure or dissatisfaction.

\$2.50 PER GALLON; \$1.00 PER QT.

"FUNGINE"

An infallible remedy for mildew and other fungus diseases. A clean, safe and easily applied spraying material, particularly adapted for the greenhouse.

\$2.00 PER GALLON; 75c. PER QT.

For sale by seedsmen.

ROSES FOR 1911

DARK PINK KILLARNEY. A sport of Killarney, similar in habit, but more highly colored than Killarney at its best. Grafted plants only, from 2 1/4-inch pots: \$20.00 per 100, \$180.00 per 1000.

LADY CROMWELL. A shell pink sport of My Maryland that for pleasing color is unsurpassed. A wonderful producer, and a color that sells. Grafted plants only, from 2 1/4-inch pots: \$30.00 per 100, \$250.00 per 1000.

PRINCE DE BULGAIRE. The best prices for cut flowers should be the standard for judging Roses, and this Rose has been the money getter. Strong and vigorous in growth, and with beautiful shell pink bloom. Grafted, \$20.00 per 100, \$180.00 per 1000. Own Root, \$15.00 per 100, \$120.00 per 1000.

DOUBLE PINK KILLARNEY. Originating with Robert Scott and Sons, who supply us the word for grafting. Stronger in growth than Killarney, and with at least ten more petals. Grafted stock only: \$30.00 per 100, \$250.00 per 1000.

MRS. AARON WARD. By far the most pleasing of the yellow Roses now on the market. A general favorite. Grafted, \$25.00 per 100, \$200.00 per 1000. Own Root, \$12.00 per 100, \$100.00 per 1000.

MELODY. We have reserved for our orders own-root plants of this choice novelty. No grafted plants. From 2 1/4-inch pots, \$30.00 per 100, \$250.00 per 1000.

RADIANCE. Strong in growth and making plenty of stem. Cerise pink in color. Grafted plants, \$18.00 per 100, \$150.00 per 1000. Own Root, \$10.00 per 100, \$90.00 per 1000.

A. N. PIERSON, Inc., - Cromwell, Conn.

A BLUE ROSE

*The Greatest
Rose Novelty
of the Century*

It flowered with us this season and was greatly admired.

The New Rambler (Violet Blue), hailed by the German rose growers as the forerunner of a genuinely cornflower blue rose, is a seedling of Crimson Rambler, very vigorous and hardy, and free blooming.

Send for description and price.

Roses, Carnations Chrysanthemums

Rooted cuttings and young pot plants. Write for prices. All the best sorts and quality the best.

S. J. REUTER & SON, Inc., Westerly, R. I.

Jan. 11th, 1911.

"HORTICULTURE is the very best magazine that comes to my table and I cannot do without it." "J. S. F." Illinois.

There is one thing certain about Cold Storage Lily bulbs and that is that the best quality is an absolute necessity to successful results. Poor bulbs may bring some returns if planted when they arrive from Japan, but they will not stand the Cold Storage strain. Now good Cold Storage Giganteum lilies are not only profitable but a very handy flower to have for funeral work, and you can depend upon them if you get good bulbs. A good Cold Storage Gig. will flower regardless of cloudy days, when your carnations look like pistache nuts or green almonds and you need flowers. No grower should be without at least a few Cold Storage Giganteum at all times of the year because they are one of the most useful and ornamental flowers produced. Horse-shoe Brand Cold Storage Giganteum are of superior quality. The prices for various sizes are reasonable and we will supply them in any quantity and at any time of the year. Order early and we will reserve them for you. Your business needs them whether you like to handle them or not, and you must attend to your business or your business will not attend to you.

Write Us.

Not How Cheap
But How Good

The Best Cold Storage facilities for bulbs in America are at New York, where the majority are stored.

Seed Trade

Fullerton Still Unconvinced.

Mr. Fullerton is the editor of the Long Island Agronomist. All epics, from Paradise Lost down, start with the subject. And so in this epic—we start out with Fullerton—who to himself is both subject and object. Fullerton is not a case of "man's first disobedience and the fall," however. He is a case of chronic scold—all because the seed trade refuses to go into the insurance business. Because, after paying his grower ninety cents a pound, and charging his customer a dollar—a net profit of ten cents—the seedsman declines to throw in a five thousand dollar crop guarantee, free gratis, Fullerton gets wrath with him!

It seems to us that HORTICULTURE has treated this Fullerton lad seriously on this subject time and again. But here he is again in the January number of his organ, playing the same old tune. The only cure for Fullerton is to start him in the seed business for a while. He would soon find that to guarantee that high-grade Golden Self-Blanching celery will not sport back to the wild celery is a pretty hazardous proposition. But we are told that Fullerton is a very nice fellow—knows all about the seedsmen, visits them, talks with them, sympathizes with their difficulties, likes them! If all that be true, he certainly takes an odd way of showing it. We fancy he is very much like the wonderful philanthropist the poet sang about:

"A warm and generous heart he had,
Alike for friends and foes.
And every day the naked clad—
When he put on his clothes."

If he keeps on in the same bigoted, self-righteous course he is now pursuing he is in grave danger of going to the place where no clothes are required.

G. C. WATSON.

Sweet Pea Novelties in England.

A bewildering list of new varieties confronts the enthusiast who is desirous of being up-to-date in his stock of sweet peas. I heard this week of one raiser having over thirty novelties on offer this season. W. J. Unwin is sending out a batch of new aspirants for fame as follows: Mrs. W. J. Unwin, orange scarlet flakes on white ground; Eric Harvey, white ground, wings edged deep rosy pink, with pink tinted standard; Freda Unwin, light blue self; Nettie Jenkins, a soft lavender self, described as a "Lady Griseld Hamilton Spencer;" May Farquhar, deep blue, similar to Lord Nelson; Mrs. R. Hallam, soft salmon, flushed primrose at base of standard; Mrs. H. D. Tigwell, primrose ground, with rose flakes; Mæde Ridge, white ground, flushed with heliotrope pink. C. W. Breadmore has a useful lot of novelties, including Freda, a waved pure white; A. N. Dickson, violet and purple waved variety; Charles Irving, a deep salmon Spencer; Mollie Clegg, lavender mauve Spencer, etc. Gilbert & Sons are making a special feature of Lady Florence Willoughby, cream pink, and Hyacinth, described as of a wine color. *Pride & Sons*, who have hitherto distinguished themselves in the rose world, have now taken up sweet pea raising. Their new varieties comprise: Blue Belle, of a tint the name

**The Man-who knows-always Sows
MICHELL'S "DISTINCTIVE" SEEDS**

PRIMULA OBCONICA GIGANTEA

The most improved form of this beautiful flower, rich in colors, size of bloom and luxuriant in growth. Seeds should be sown in February to produce the best plants.

Fresh Crop Seeds Just Arrived.

Henry F. Michell Co., 518 Market St., PHILA., - - PA.

indicates; Mrs. R. Massey, similar in color to Agnes Johnston, and Mrs. Stewart Champion, a cream pink waved variety. Judging from the number of firms who are offering sweet peas, the "boom" is still a reality with signs of permanency.

W. H. ADSETT.

A Great Water Melon.

All the big seed houses are booming the Tom Watson water melon this year. Authorities seem to differ as to its origin, but it seems clear that Georgia and the Hon. Tom are highly complimented. A leading seedsman writes us:

"People down South really have little to say as to the origin of the Tom Watson water melon. If you ask those who are supposed to know, each fellow has a different story to tell. Nevertheless, the variety originally came from Georgia and was named in honor of Hon. Thomas Watson. It is a good melon and one that we sold very heavily of last year, but even although we had taken time by the forelock, we did not have anything like sufficient seed to go round.

We have somewhere about, what is presumably a history of the variety, and I think we have also in our trial grounds still another history, so as to who originated the variety it is not for me to say. Better ask Fullerton."

American Seed Trade Association.

The Executive Committee of the American Seed Trade Association met at Detroit on the 11th inst. and selected Milwaukee for the next convention city. There were present the president, Mr. E. L. Page, all the members of the committee, Messrs. J. C. Robinson, S. F. Willard, C. N. Page, S. F. Leonard and Kirby B. White, together with Watson S. Woodruff, chairman of Committee on Seed Legislation, Albert McCullough, chairman of the Membership Committee, and Messrs. W. H. Grenell and John Smith.

Arrangements were also made to attend the hearing on the Mann Bill which has been postponed to February 2nd. C. E. KENDEL, Sec'y.

Notes.

Cedar Rapids, Iowa.—The Hamilton Seed & Coal Co. have incorporated with a capital stock of \$25,000.

Grenloch, N. J.—The Bateman Mfg. Co., who make the Iron Age implements, celebrated their seventy-fifth anniversary on Jan. 12th.

Chas. W. Scott of the Yokohama Nursery Co. has just returned from Bermuda and reports the Harris crop in fine condition at present.

Mobile, Ala.—A new concern, the Southern Seed Store has started in business at 11 St. Francis street under the management of S. G. Forbes.

John Tobin, president of the Missouri Seed Company, has been elected a director of the Mid-Continental Fire Insurance Co., of Kansas City, Mo.

Moulton, Iowa.—A. C. Croft Seed Co. incorporated, capital stock \$10,000. Incorporators: A. C. Croft, William Edwards, W. C. Bowie, S. Richardson, W. J. Willett, Elmer Wood and E. L. Stickney.

A telegram received the other day by W. Atlee Burpee & Co., announced that the long deferred rains had at last struck California. Our old friend, Edwin Lonsdale, at the Burpee ranch in Santa Barbara county will now be happy as the plows can now be started. Tears, prayers, entreaties for rain, will take a back seat, and hustle will hold sway.

CALENDARS RECEIVED.

We hereby acknowledge the receipt of calendars, useful and beautiful, for the year 1911, from R. M. Ward & Co., Geo. E. Dickenson, Wm. Hagemann & Co., A. T. De La Mare Co., all of New York, W. Atlee Burpee & Co., of Philadelphia, Benj. Hammond, Fishkill, N. Y., and several others.

Please take out my ads, Feverfew and Snapdragon, as they are all sold. Many thanks to your paper.

SEND FOR LIST OF GOOD SELLING SUPPLIES

H. BAYERSDORFER & CO., 1129 Arch Street, PHILADELPHIA, PA.

PERSONAL.

S. J. Reuter, of Westerly, R. I., starts on a trip west this week.

Oscar E. Addor has resigned as corresponding secretary of the Nassau County Horticultural Society, having removed to Larchmont, N. Y.

George Scott, brother of the late John Scott, of Brooklyn, N. Y., and foreman at the Scott estate, was married to Miss A. Stevens, of Dalkeith, Scotland, on Tuesday, January 17. Rev. A. Scott, brother of the bridegroom, performed the ceremony.

Visitors in Boston: J. Otto Thilow, Phila., Pa.; J. S. Hay, representing H. A. Dreer, Riverton, N. J.; Robert MacMillen, Greenwich, Conn.; W. A. Manda, South Orange, N. J.; Wallace R. Pierson, Cromwell, Conn.; Louis J. Reuter, Westerly, R. I.; F. R. Pierson, Tarrytown, N. Y.; George Asmus, Chicago; H. A. Bunyard, New York; W. F. Kasting, Buffalo; F. H. Traendly, New York; E. W. Breed, Clinton, Mass.; S. S. Butterfield, New York.

Much regret is expressed by members of the Southampton Horticultural Society at the removal from their neighborhood of W. B. Jones, who goes to the Marcus Daly estate at Hamblinton, Montana, and their best wishes go with him. During the year he was with them he proved so sociable and agreeable that he became very popular with the members of the society. He was engaged on an entirely new estate and accomplished a great deal in the almost unprecedented dry season.

CHICAGO NOTES. Wholesalers' Plans.

A meeting was held at Hoerber Brothers' on Saturday, Jan. 14, by the wholesale florists regarding the matter of moving to a building that shall be erected for this purpose only. Every thing is as yet very undecided and it may be some time before a decision is reached. A committee comprised of the following wholesalers was appointed to consider the way to dispose of the unexpired leases held by many parties, should they decide on the plan on hand. C. L. Washburn, chairman, August Poehlmann, Geo. Reinberg, J. B. Deamud, N. Weitor, Geo. Foerster, C. M. Dickerson.

Personal.

Philip Eichling is again at his old post at Harry Rowe's expecting to be there permanently.

Elsa Oechslein, oldest daughter of Ernest Oechslein of River Forest, is very ill with pneumonia.

S. J. Pearce has been confined to his room for the past week with rheumatism, his many friends hope to see him out soon.

Word reaches us from Los Angeles that Chas. E. Morton, formerly of Chicago, has accepted a position as manager of the Los Angeles flower market.

Charles McKellar, while not fully recovered from the blood poison that attacked his hands was able to be at his store for a short time last Saturday.

Horace Cheesman has just returned from an extensive trip. He reports great improvement in the south where the florist business seems to be increasing and much building going on or contemplated.

Visitors—R. H. Smyth, Benton Harbor, Mich.; Jos. W. Edmundson, representing the Braslan Seed Co., San Jose, Calif.; W. H. Buckbee, Rockford, Ill.; Fritz Bahr, Highland Park.

NEW FLOWER STORES.

Portland, Ore.—Lubliner and Trinz.
Oakland, Calif.—Gill's Floral Depot.
Evansville, Ind.—Wm. Blackman Floral Co., 522 Main street.

A new retail store will be opened on the 21st Jan. at 1734 Penn. Ave., N. W., Washington, D. C., by O. W. D'Alcorn, who has been conducting a bulb industry at Congress Heights.

IN BANKRUPTCY.

Oshkosh, Wis.—Oshkosh Floral Co. assets \$3,980.85, liabilities, \$4,339.08.

PHILADELPHIA NOTES.

John Burton is reported a little better, although still confined to sick room.

Robert Craig started on a visit to Cuba and the Isle of Pines on the 14th inst.

John Westcott and wife with a party of friends expect to leave shortly for a visit to Bermuda.

Visitors: George Struck, of Knight & Struck, New York city; D. Cameron, representing Sander & Son, St. Albans, England; Charles W. Scott, representing Yokohama Nursery Co.; J. Braselman, New Castle, Indiana; H. Frank Darrow, New York; F. H. Hunter, representing Waldo Rohnert, Gilroy, Cal.; Mr. Willard, Western Springs, Ill.; Mr. Rogers of Rogers Bros., pea and bean growers, Chaumont, N. Y.

INCORPORATED.

Council Bluffs, Iowa.—J. F. Wilcox & Sons are to incorporate. No stock will be sold outside of the family, except perhaps to two or three trusted employees. The capital is not yet decided upon.

New York, N. Y.—Charles F. Meyer, to deal in plants, bulbs, shrubs and nursery stock. Capital stock \$50,000. Incorporators: C. F. Meyer, E. A. Marsen and C. Schwake.

Flower Market Reports

BOSTON At present writing there is a noticeable sea city in the rose market and a demand for more than are readily obtained. The crop is off, generally, and a cold snap has arrived just as the mid-winter gaieties are getting under way. Carnations are about right as to supply to meet the call. Other things are in full supply and some are too plentiful—for instance, daffodils, jonquils, lily of the valley and violets. All these, however, are of excellent quality. There is an adequate supply of cattleyas, and of gardenias there are more than are needed. Calendulas, freesias, pansies, yellow daisies, calanthes, amaryllis, myosotis, ericas and a variety of other things not usually considered as staple are available in limited quantities and serve to give desired variety for flower buyers.

A week of cloudy weather shortened the supply on most lines and flowers have been rather on the short side. Roses especially have fallen in supply. Floral work was in evidence and a good outlet was had on carnations, peas, violets, narcissi, etc. Beauties are coming in better quality, though there is no special demand for the long grade. Since the holidays Beauties have been of poor quality. Richmonds have been fine but supply limited. Spring flowers such as tulips and trumpet narcissi have made their appearance. Freezias are fine. Mignonette and stevia have had a good call. Violets have been on the quiet side. Little or no demand for lily of the valley.

There has been a rapid transit change in the market the past few days, as owing to the prolonged stormy and dark weather stock has shortened up in all lines, naturally increasing the demand. Possibly the shortage most felt is in pink and white roses, it being impossible to secure enough for the local demand alone. Beauties have become crippled and not so good in color, especially so in the long-stem grade. Carnations have stiffened owing to the scarcity of roses, the demand for pink and white being unusually strong. The quality is as good as for the past four or five weeks. The demand for lilies and callas is equal to the supply, although on some days a shortage is reported. Sweet peas are moving nicely as are also tulips, narcissi and Roman hyacinths. Mignonette has improved again and commands a fairer price, the best selling for \$8.00 per 100. Jonquils are obtainable but quality is not very good, although every day sees an improvement. The retailers around town report a very active business the past two weeks. Many dinners, banquets and numerous other large orders have kept them on the alert.

Business continued satisfactory for the week ending January 14th. Beauties in all lengths are fairly plentiful, with enough to meet all requirements. Richmonds are in very light supply and demand. All other teas are more plentiful with the exception of Killarneys and Brides. The shortage of Killarney is very noticeable, with an extra heavy demand. The request for Brides at times is in

excess of the supply. Single violets with increasing numbers hurt the sale of doubles to some extent. True, double violets are selling, but at rock-bottom prices. The call for carnations

is excellent at prevailing normal mid-winter prices. The demand from out-of-town is exceptionally heavy. Paper Whites and Roman hyacinths are a

Flower Market Reports

(Continued from page 85)

glut on the market. Lily of the valley sells fairly well. Longiflorums and callas meet with a ready sale and at times more could be sold. Orchids are to be had but more slowly. Poinsettias are still to be had in quantity. In greens the demand for plumosus is far in excess of the supply, while Sprenger is a shade more plentiful. Smilax is moving rather slowly.

The warm and cloudy
NEW YORK weather of last week
has been succeeded by

a cold wave that has cut down the supply of roses and carnations, with a consequent stiffening of prices. Beauties of the special grade have reached 75 cents, with a corresponding increase in the price of lower grades and the supply is light. White and pink Killarneys have shared in the improvement of prices. Bridesmaids are comparatively few in number and general quality is not so good as last week. All white roses, particularly short and medium grades, are in limited supply and brisk demand. Carnations which were difficult to move last week are now selling well, the cut being much lighter. There are plenty of Paper Whites and tulips, the latter not running good—short stems mainly and imperfect blooms. Normal conditions prevail as to lily of the valley, the run of good stock bringing \$2.50 to \$3.00. Cattleyas are in good supply, the best grade being quoted at 40 cents, but a considerable quantity going for less. Lilies are quoted at \$10 to \$12 for the best quality. Green stock is plentiful.

Market conditions
PHILADELPHIA here the past
week were fairly

satisfactory and quite an improvement over our last report, especially towards the end of the week when a number of important society affairs developed which helped to clean up the surplus very nicely and increased the average as to prices. In addition, there was a distinct falling off in receipts, due to the dull weather, and in part also, to some items being near to the "off crop" stage. This was particularly the case with American Beauty and other red roses. American Beauty is not coming in in nearly as large volume as a week ago, and may be classed among the "off crop" items most decidedly. Pink roses are selling very well—with Killarney in the lead. White roses are also in good demand with supply slightly on the short side. These latter did not advance materially in price, however; but it would not

Gardenias.....	15.00 to 30.00	10.00 to 50.00
Adiantum.....	.50 to 1.00	.75 to 1.00
Smilax.....	8.00 to 10.00	6.00 to 12.00
Asparagus Plumosus, strings.....	20.00 to 30.00	20.00 to 30.00
" " & Spreng. (100 bchs).....	15.00 to 25.00	15.00 to 35.00

have taken much more to have sent them up several notches. Carnations are still plentiful, but the cloudy weather affected them also, of course, and with roses short many orders went carnationwards that would not otherwise have gone that way—so that helped the situation greatly. Gardenias are still selling at low figures, although the dull weather has kept the supply down a little. The same may be said of orchids. The demand for violets is none too good, and the supplies from both local and distant points large. Later on the supplies will be even larger, but there is usually a much better demand as the season advances for these. Lilac and lily of the valley are a bit draggy. Sweet peas and lilies are going very well. Paper whites and Roman hyacinths are on the down hill. Some fair mignonette around but no freesia in sight as yet.

Conditions as they are reported just as we go to press (Thursday, January 19), are much more severe than above notes show. The scarcity all along the line is the most pronounced in recent years.

The dull condition
WASHINGTON of the market immediately following

the advent of the New Year was broken last week, and there was particular activity in the line of decorations. The strained condition of the violet market has finally been relieved and they are coming in in quantity, singles bringing \$1.00 and doubles \$1.00 to \$1.25. Bulbous stock is beginning to be shown in large quantities; paper white narcissi are plentiful, but tulips are as yet scarce as are also yellow narcissi. There is a big demand for gardenias for street wear for the fair debutantes, and they easily bring from \$3.00 to \$4.00 per dozen.

During Recess

Morris County (N. J.) Gardeners' and Florists' Society.

The annual dinner of this Society was held at the Mansion House, Morristown, N. J., on the evening of January 16. There was a large attendance and a hilarious and altogether glorious time. The dinner was a fine repast and the speeches were fitting to the occasion. Patrick O'Mara was toastmaster and, as is well known, there are few if any equals for this past-master of the art. William Turner responded for the Monmouth County Horticultural Society; Mr. Murray for the Elberon Horticultural Society; Harry A. Bunyard for the traveling man, "Horticulture Afoot and on Heels;" Mr. Everett, for Nassau County Horticultural Society; Mr. Woodcock for the Tarrytown Horticultural Society; Chas. H. Totty, for the "Future of Horticulture;" John Hayes, for

the N. J. Floricultural Society; W. H. Waite, for the Yonkers Horticultural Society; Wm. Duckham, for the Morris County Gardeners and Florists; A. Herrington, for "Ornamental Horticulture." A troupe of colored performers dispersed music without stint.

Chicago Bowlers.

The Bowling Club will visit Joliet on Sunday next when they will pick two teams from the members present. The first team will bowl with the All-Star team of Joliet, the second team will bowl a team from the employees of the Thompson and Chicago Carnation Co.'s. They expect to have a most enjoyable time and invite all florists to join them.

At the meeting on January 11, W. Lorman was elected secretary in place of A. Zech. The following scores were made:

VIOLETS.		ORCHIDS.	
Wint's'n, 129	144 120	Hu'b'n'r, 182	165 156
L'b'r'm'n, 148	177 130	Farley, 112	147 137
Fr'd'm'n, 137	156 156	Graff, 156	127 176
Lorman, 127	126 136	Degnan, 124	175 201
Yarnell, 155	179 150	J. Zech, 162	178 160
693 762 692		804 792 891	
ROSES.		CARNATIONS.	
Wolf, 151	127 158	Ayers, 152	191 151
Byers, 127	135 135	Kraus, 107	148 156
Foster, 166	185 156	Go'r'sch, 174	144 156
Welsh, 112	111 100	Shultz, 133	113 105
Fisher, 200	157 132	A. Zech, 154	138 167
756 715 702		720 734 730	

New York Bowlers.

Scores recorded last Friday night were as follows:

Watkins	94	96
Kunkel	104	131
Berry	139	109
Nugent	85	97	89	92	...
Kakuda	128	129	124	137	141
Scott	119	129	118	132	156
Shaw	148	159	152	139	170
Manda	139	170	155	181	141

The Alex. D. Shaw & Co.'s high score champagne prize, Friday evening, January 13th, was won by the Bowling Club's secretary. Another similar prize from the same house went to J. Austin Shaw. The first handicap game will take place January 27th—the prize, by an old bachelor admirer of the bowling club—a pair of ladies' shoes.

Cincinnati Bowlers.

Following are the scores bowled Monday evening, Jan. 16:

Al. Horning, 168	154	F. W. Ball, 89	129
Ed. Sch'm'n, 140	169	H. Sundhaus, 97	131
W. Sch'm'n, 175	144	E. B'sen'y'r, 118	123
R. Witt's'r, 134	155	O. Hoff's'r, 90	192
R. Murphy, 143	171	L. Fritz, 110	98
F. Dellar, 118	146	A. Hendarp, 149	99
R. Dellar, 133	168	C. Pfeiffer, 81	87
C. Hoff's'r, 128	167		

Al. Horning won the knife offered by The J. M. McCullough's Sons Co. for the best average of the evening.

NEWS NOTES.

Austin, Tex.—Dr. A. B. Conley, the newly named superintendent of public buildings and grounds, announces the appointment of Charles Alfey, of Fort Worth, as State Florist.

Des Moines, Ia.—James M. Pierce, president of the Pierce's Farm Weeklies, has erected at Eldora three modern type Lord & Burnham greenhouses, and has associated with him J. S. Pollard, a florist of large experience. It is proposed to add to the florist business an extensive nursery department, and thirty acres of land have been secured as a starter.

Flower Market Reports

(Continued from page 87)

This market is in first-class condition and the wholesalers are well pleased, the demand being good on almost everything in season. The retailers say that they, too, were pleased with the business of last week as there were a great many social events that called for fancy cut stock in roses, carnations, orchids and violets. At present there is no overproduction of anything, except it be California violets and even these have sold well at \$5.00 per 1000 for the very best, and from \$2.50 to \$3.50 next choice. Fancy long American Beauties sell at \$6.00 per dozen; carnations, \$3.00 to \$4.00; roses, from \$4.00 to \$8.00; extra fancy, \$10; sweet peas, 50c. to \$1.00 per 100; lily of the valley, \$3.00 to \$4.00; Roman hyacinths and Paper White, \$2.00 to \$3.00; lilies and callas, at \$10 to \$15 per 100. Smilax had quite a cut at \$12.50; in fact, all greens sold well.

OBITUARY.

Sidney Joseph.

Sidney Joseph, of Cincinnati, O., who has been conducting a flower farm near Dresden, Germany, for the last few years, lost his life by falling from a cliff in the Hartz mountains on January 9. The body will be brought by relatives to Cincinnati for burial.

John W. Remagen.

John W. Remagen, florist, died at his home 1124 North Main street, Lima, Ohio, Jan. 1st.

We are informed of the death of the father of Henry A. and W. H. Siebrecht of New York, but have no particulars. Further notes next week.

Landscape Gardening

PROF. CRAIG

A course for Home-makers and Gardeners taught by Prof. Craig and Prof. Batchelor, of Cornell University.

Gardeners who understand up-to-date methods and practice are in demand for the best positions.

A knowledge of Landscape Gardening is indispensable to those who would have the pleasantest homes.

THERE is no use in talking when you are up against facts.

The facts are these: In all our quarter of a century of greenhouse building not one, no not one grower has ever gone back to a wooden house after having bought one of our Half Iron Frame Houses. Neither have they ever bought a Half Iron Frame after buying one of our Full Iron Frame.

Don't you go backward when the other fellows are doing their darndest to go forward. Get in line — and keep there.

These two "Iron Framers" were erected for L. B. Coddington, Murray Hill, N. J. —one each in 1909 and 1910.

When you build we ought to build for you.

WHAT THE USERS SAY

KROESCHELL versus CAST IRON

I have one of your new 1910 model Kroeschell Boilers and same has proven very satisfactory.

We have no trouble to keep temperatures in the coldest weather. We fire once or twice during the day and once at night, and have had the best satisfaction I have ever experienced in a boiler.

Formerly I had two cast iron boilers: one cracked and I took both of these boilers out.

My coal bill with the cast iron boilers ran from \$195 to \$207 per season during the past seven years. This year, with your boiler and soft coal, my coal bill was only \$103 and I still have some coal left.

Your boiler is the best and cheapest on the market, not alone for the price, but also in fuel saving. I am very glad that you are so well known in Buffalo, N. Y., I have never heard anything but praise, in which I join heartily. Wishing you every success, I remain,

MAX BUEHLER, Forks, N. Y.

KROESCHELL BROS. CO., 466 W. Erie St., Chicago, Ill.

Wholesale and Retail Florists

You both will profit by using McCray Refrigerators. Don't cut down prices because of spoilage. Stop the spoilage. Our patented refrigeration will keep your stock fresh because of the perfect circulation of cold, dry air.

A GRAND NEW CARNATION—BRIGHT SPOT

Outclasses everything heretofore grown in the dark pink class.

Won first honors in the 100 class for best dark pink at the A. C. S. Meeting, Pittsburgh, January, 1910, also at the Chicago Flower Show, November, 1909.

It is a pure bright dark pink of even shade, size 3½ inches, an early and continuous bloomer; brings fully 25 per cent. more flowers to the plant than Lawson at its best; flowers well shaped on long, wiry stems; calyx does not split. It is a good shipper, and the cuttings root easy.

Price per 100, \$12.00; price per 1000, \$100.00; price per 5000, \$400.00; 25 at 100, 250 at 1000 rates. Place your order now, to be in on early deliveries.

NIC. ZWEIFEL, North Milwaukee, Wisconsin

CHRYSANTHEMUMS

WASHINGTON

DO not get this variety confused with the Lawson-Enchantress which we discarded some years ago. Washington-Enchantress differs from Rose Pink Enchantress as night from day. Washington is a sport from Enchantress with the best cerise or beautiful dark pink color—the Lawson shade—with stem, habit and productiveness same as Enchantress, and keeping qualities of the best. Stock is clean, healthy and well rooted. Guaranteed satisfactory in every respect.

Fruit and Vegetables Under Glass

FRUIT TREES IN POTS

Fruit trees in pots intended for early work should be started now or along through February according to time the fruit is wanted. The middle of February is a good time to start pears and apples, the increasing sun power bringing them along without any trouble. Early varieties can be started at once and grown with peaches and nectarines, etc., in a

comparison with previous records you will know how you stand. Boards about 6 in. x 9 in. should have the top corners rounded off and a hole cut through, and after a coat of white paint these will not look unsightly if hung up in one corner of the house and the following items written on them, leaving spaces for the dates.

A 6 in. x 9 in. will serve three or four years. A great advantage of these is that entries can be made at any time and they are always in the house for reference.

BEANS FOR POT WORK

Beans can be grown successfully in 8 and 9 in. pots, if a bench cannot be given up to them. In this way they can be moved around to fill up vacant spaces where a temperature can be had to suit them. Half fill the pots with rich soil, leaving it loose and insert six or eight seeds. The remaining soil can be added later as a top dressing. Black Valentine and Ne Plus Ultra are the best for pot work. The latter being more compact than the former, takes less twigs or strings to support it.

Pot on tomatoes, cucumbers and melons as soon as roots are nicely to the side of the small pots. Give every encouragement to induce them to make growth. A fine spray two or three times a day will be beneficial on bright days.

EGG PLANTS

Seeds can be sown now, and if room can be found in a warm

Duke of York Peach in Fruit
No. 1

mixed orchard house or placed in vineries as they are starting. Firm the soil in any pots which may have become at all loose and give a good watering.

Enough lime in the water to slightly color it will be greatly beneficial, purifying and sweetening the soil for the young roots to work into. Orchard trees must be brought on very gradually to obtain the best results. Forty to forty-five degrees at night is sufficient to start them. Syringe every morning and again soon after noon if there is any sun heat.

The first illustration, from a photograph taken last May, shows a Duke of York peach, carrying twenty-four first-class fruit, growing in a 12-inch pot. The second illustration is of the same tree pruned, and potted on to a 14-inch pot, ready to carry another good crop. Twelve to fifteen is enough to expect from any tree in a 12-inch pot. This one was an "extra."

Third picture shows a King of the Pippin apple which carried twenty fruits last year and shows plenty of flower buds for this year.

REFERENCE BOARDS

Now that many fruit houses will soon be starting into growth and are often expected to carry ripe fruit by a certain date each year, a record of their growth will always be found helpful, for, by

Duke of York Peach Pruned and Potted
No. 2.

house, this appetizing vegetable will pay for its inclusion, yielding solid fruits long before they are obtainable from the garden. A rich soil, moderately moist, and an absence of insect pests are its chief requirements.

George H. Penon

Mr. Penon's next notes will be on the following: Bud Drooping on Peaches and Nectarines; Care of Pot Vines; Melons; Care of Strawberries; Onions and Leeks.

Seasonable Notes on Culture of Florists' Stock

ASPARAGUS

While *Asparagus plumosus* will grow well without re-planting for a few years when rightly managed, the wise grower will have young stock coming along so as to renew the beds before exhaustion tends to lower the quality. Now is the time to sow for the renewal of old or the planting of new beds in June or July. Good plants will grow from seed sown now into potting size in from six to eight weeks. Use a well-enriched, friable, sandy soil and keep a temperature steadily as near 65 degrees as possible. See that a congenially humid atmosphere is also maintained. For the first potting use two-inch pots with well-enriched loam and grow on avoiding any check and stock will be ready for 3-inch pots in April. During all this time they should have plenty of light and moisture. *Asparagus Sprengeri* will take the same treatment.

CATTLEYAS AND LAELIAS

All these that have been potted or top dressed should be frequently syringed, but it must be borne in mind that over-watering at this season when the roots are inactive is very injurious. When new breaks appear and are fairly showing they should be encouraged by having that abundance of moisture about the house and benches, which is necessary to make a healthy growth that will produce fine flowers. Shading from the middle of February onward until fall should not be neglected. Use slat roller blind for shading, which gives the plants a certain amount of direct sunlight without damaging the foliage. This is better than a complete shade on the glass as when there is a long spell of dull weather the plants can then be exposed to full light. At this time and as the season advances such Cattleyas as *Schroederæ*, *Mendelii*, *Mossiae* and *gigas* as well as *Laelia purpurata*, *majalis*, and *crispa*, will require attention in the way of ventilation which should be very carefully regulated. Although they are fond of plenty of air, all cold draughts or sudden changes should be avoided. Remove all thrips and scale by frequent sponging.

PRIMULAS

From now until the first of May several sowings should be made to supply the demand for next season. Use finely sifted loam, leaf mold, and sand in equal parts. The seeds should only be covered very lightly and set the pans where the temperature stands near 70 degrees. Cover with a pane of glass and keep them moist and shady. In three or four weeks the seedlings will need to be pricked out. When they have three or four

leaves they should be potted off. Primulas when large enough do better and throw larger and finer flowers if potted in a rather stiff but fibrous soil, to which has been added some old manure, so the soil should be made heavier at each potting.

SEEDS TO SOW

For spring use and sales it is time now to sow such varieties as *Centaurea*, *Vinca rosea*, *Impatiens*, snapdragon, *Begonia semperflorens*, the trailing and upright Lobelias, *Salvia*, *Torenia*, single and double *Petunia*, *Marguerites*, *Phlox nana compacta*, *Mignonette*, *Cannas*, *Musa ensete*, *Grevillea*, *Gerbera* and *Verbena*. Where much stock of this sort has to be raised it is a good plan to select for this particular purpose a bench with bottom heat to set the flats on. For the sowing of these seeds use a well decomposed soil with about one-fourth of thoroughly rotted manure and enough sand to make it a little light, sifted for the top layer. After sowing press all down firmly and water with a fine rose. For a top covering, after the boxes are placed side by side, paper will answer very well. Given a temperature of about 60 degrees, with bottom heat a few degrees higher and enough of atmospheric moisture with a reasonable amount of moisture in the soil they will germinate promptly.

SOWING PALM SEED

As the fresh imported seed of palms that are used in commercial places arrive, if you have room and contemplate growing some young stock, just select at about 65 degrees with a good bottom heat. See that perfect drainage is provided for as it is very essential in starting palm seed. After covering the bottom of the bench with potsherds, put a layer of sphagnum over all, and then fill with about three inches of a compost of equal proportion of soil, peat and leaf mold. The seeds should be covered from a half inch to one inch according to their size. It is well to employ some sashes to cover the bench as it helps to regulate the atmospheric moisture while controlling the temperature, thereby keeping them in a comparatively uniform state. Palm seed is very irregular in germination. While some will germinate in three or four weeks others may not show for nearly a year. When the first leaf has expanded they should be potted into small pots and grown on.

SWEET PEAS

The benches of sweet peas that are flowering should be encouraged by some feeding as the days are beginning to lengthen now and root action will be more vigorous. Give them a mulch of partly decomposed cow manure mixed with a little soil. This can be applied just before a watering, then there will not be any danger of the foliage becoming injured. This mulch will help to protect the roots that are coming to the surface, and at the same time encourage better growth and bloom. Green fly from now on will prove more troublesome, so heroic measures must be taken to keep the plants clean. Fumigate as soon as they appear. Look after the ventilation closely, giving air on all favorable occasions. If you want a continuous crop of good flowers from early until late spring sow from now until the middle of February. If the bench is occupied sow in 4-inch pots.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: Adiantums; Calceolarias; Forcing Shrubs; Geraniums; Ramblers for Easter; Violets.

Vicissitudes of the rose market

Since our last report the flower market has experienced a brief feverish period, in which roses of all classes were the active factors. A sudden

and very decided drop in temperature after a warm spell which had encouraged rapid blooming appears to have been the main cause and it can hardly be said that the brisk call and sharp advance in values which ensued affords any very substantial basis for the erection of additional rose houses at once. That the spurt was but temporary in character was plainly evidenced by the rapidity with which a "bull" market was transferred into a "bear" market after one day of balmy sunny skies. So far as the growers were concerned they seemed to look upon it as merely an episode—a very welcome one which they would like to see often repeated, of course, but not to be construed, as it would have been in the past, as justifying any hope for continued high values. Only those few growers who "live in the past" and base their presumptions upon conditions and consequences which formerly prevailed entertain any notion nowadays of the feasibility of enforcing values other than those which result directly from the fluctuations of supply and demand. Experience has taught us that unfortunately markets, like corporations, have no souls and that where perishable material is concerned, the cost of production counts for but little as an immediate factor.

Production and distribution

Following the line of the foregoing remarks, it requires no argument to convince any reasonable person that one of the things most to be de-

sired for all interests in the flower trade is a practical means of distribution of the products, which will tend to promptly unload surpluses and prevent accumulations.

We think that most observers will agree with us when we say that, in the flower industry, the art of production has made infinitely greater progress than has the science of distribution. Had the latter kept pace with the former no one can deny that conditions today would be very different from what they are. As recently remarked in these columns, the existence simultaneously of a surplus in one market and a famine in another, with absurd inequalities in market quotations, as not infrequently happens, is a condition which warrants serious thought and which in any other line of business would long ago have called forth general consideration and an effort towards remedial measures. Our societies, clubs and associations have, within the past two or three decades, done an inestimable amount of good along the line of cultural advancement, and, today, as a result, we lead the world in the quality of many staple products. There are indications that these organizations are now about to turn a goodly share of their time and effort towards improvement in the direction suggested above and we look for helpful results if the work proposed is followed up to a finish.

CLUBS AND SOCIETIES

PITTSBURGH FLORISTS' AND GARDENERS' CLUB.

At the regular meeting of the Club on the evening of Jan. 3rd, President Burki being absent, Mr. Wm. Falconer was called to the chair. Nominations for officers for 1911 were made as follows: President, Jno. W. Jones and Wm. Allen; vice-president, P. S. Randolph; treasurer, H. L. Blind; secretary, H. P. Joslin; asst. secretary, C. S. Crall; executive committee, E. C. Reineman, Jno. Bader, Neil McCallum. Election will take place at the February meeting.

It was suggested to the chair that it was none too early to take up the matter of a committee to have in charge the arrangements for those who expected to attend the National Flower Show in Boston in March, and the chair stated he would name the committee later.

Jas. Wiseman, gardener for D. M. Clemson, showed pots of fine cyclamen. Jno. W. Jones, Phipps conservatories, showed *Primula stellata*. C. H. Sample, of the Elliott Nursery, Springdale, showed red-berried branches of *Rosa multiflora* which he thought might be available for Christmas decorations. T. P. Langhans, of the Pittsburgh Cut Flower Co., showed branches of *Ruscus aculeatus* "Butcher's Broom," which he believed to have a future before it for Christmas decorations. This plant grows abundantly in Europe and the branches are dyed red and green in Germany and exported. Neil McCallum, West End Park, showed medicinal herbs and read from several ancient authors, and particularly from the *Materia Medica* of Culpepper, showing the views of the ancients on these herbs, and their belief that they were good for what's the matter with you.

Subject for February meeting—Carnations. H. P. JOSLIN, Sec'y.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The next club meeting will be held at Horticultural Hall on Tuesday evening, February 14, instead of February 21, the hall being rented on the latter date. Edwin Jenkins of Lenox, Mass., will speak on "Science in Horticulture." There will be special exhibits of carnations and roses, and introducers of novelties should bring or send a bunch of each variety along.

The annual club banquet will be held at Horticultural Hall February 28. Tickets are ready and may be procured from the officers of the club or members of the executive committee.

W. N. CRAIG, Sec'y.

CINCINNATI FLORISTS' SOCIETY.

A special meeting of the Cincinnati Florists' Society was held Monday evening, Jan. 23rd, with about twenty members in attendance. The meeting was called to hear reports from the finance committee in regard to the projected flower show. The committee reported \$13,050 subscribed to the guarantee fund and hope to bring same up to \$20,000. It was decided to hold a show at Horticultural Hall, November, 1911, from the 13th to 18th inclusive. The committee is now at work on the schedule of premiums and will have same ready for discussion at the next regular meeting.

FLORISTS' AND GARDENERS' CLUB OF RHODE ISLAND.

The annual dinner of this Club took place in Swartz Lodge Hall, Providence, on Monday evening, January 16, nearly 100 members and friends being present. Previous to the dinner a brief business session was held, when officers were elected as follows: President, Robert Johnston; vice-president, Eugene Appleton; secretary, Wm. E. Chappell; treasurer, William Hill; librarian, Harry Bout. The tables were prettily adorned with araucarias in baskets and carnations. Among the guests were: Thos. J. Grey, of Boston; Chas. W. Smith, secretary of the Rhode Island Horticultural Society; Prof. H. J. Wheeler, of the Rhode Island Agricultural College, and W. A. Brown, secretary of the R. I. Poultry Association. An eloquent address was made by Thos. J. Grey in response to the toast of Floriculture and Horticulture of the Sister City (Boston), in which the speaker made affectionate reference to the many accomplished men in the craft who have passed away leaving an undying fame for themselves and the city in which they labored. Prof. Wheeler made an interesting address on the present day problems of agriculture and horticulture, especially mentioning the insect pests that menace the work of the arboriculturist.

Other speakers included Charles W. Smith, on behalf of the Rhode Island Horticultural Society, of which he has been secretary for 21 years, and from which he is retiring this week; Michael Sweeney, who was introduced as the "Chauncey Depew" of the Club; James B. Canning, who spoke on the subject of "Progress in Design Work;" Charles Macnair, on "Ways and Means of Delivering Flowers;" H. Howard Pepper, on "Outdoor Growing of Hybrid Roses;" John Burke, on "Rose Culture;" James Burke, on "Carnation Growing," and several others.

The committee in charge consisted of Alex. Macrae, chairman; James Dillon, H. C. Neubrand and Robert Johnston.

WESTCHESTER AND FAIRFIELD HORTICULTURE SOCIETY.

On the call of a number of gardeners and florists, who met at the Rye Nurseries, Rye, N. Y., on December 28th, 1910, it was resolved to form a horticulture society, and so therefore formed the Westchester and Fairfield Horticulture Society. We held our next meeting on January 11th, 1911, and decided on a permanent meeting place, Royal Arcanum Hall, in Stamford, Conn., also setting the date for holding our meetings, which is the second Friday of every month. Our next meeting will be therefore, on Friday, February 10th, 1911, at 8 p. m.

The officers are as follows: James Stuart, president; Alex. Geddes, vice-president; Martin M. Benedek, secretary; Thos. Aitchison, treasurer; executive committee, William Morrow, Stamford, Conn.; Chas. Adcock, New Rochelle, N. Y.; H. L. Hand, Port Chester, N. Y.; Robt. Williamson, Greenwich, Conn.; J. T. Burns, New Canaan, Conn.

All interested in said Society will kindly address all communications to the Secretary, Martin M. Benedek, Box No. 136, Mamaroneck, N. Y.

FLORISTS' CLUB OF PHILADELPHIA.

Ex-Mayor Smith invites the florists to an organ recital, a lecture on the flowers of Yellowstone Park, and a dance at Scottish Rite Building, Monday, January 30., 7.30 P. M. Here's a quotation from his letter to secretary Rust of the Florists' Club:

"Out of compliment to the Florists' Club and the lecturer (J. Otto Thilow) I shall be very happy to have you invite the membership of the Florists' Club and their ladies to be present—see our new hall—and accept our courtesies."

The entertainment is "open without card" to all members of the Florists' Club and their ladies. The organ recital will be by Professor F. J. O'Brien, and will be worth in itself going a long way to hear. J. Otto Thilow's lecture on "The Flowers of Yellowstone Park" will be lavishly illustrated by stereopticon views, and those who know this witty and eloquent speaker can easily imagine the treat in store for them when he accompanies each view with a running narrative sparkling with gems of thought, garnered from a wide experience and passed through the crucible of a wise head. The organizer will render selections at intervals during the lecture so as to add still further to the alluring effect. The dance will follow.

ST. LOUIS FLORIST CLUB.

The St. Louis Florist Club held an interesting New Year's meeting on Thursday afternoon, Jan. 12.

Our members from over the river came out in full force. President Cannon opened the meeting at 2 o'clock with all his staff of officers present. The bulletin committee reported through Secretary Beneke that the bulletin is now on a paying basis, and would be continued to be published every second Tuesday in the month.

The free scholarship of the Missouri Botanical Garden was voted upon and the vote favored Mr. Fred G. Grassart of Belleville. The other applicant was Mr. F. K. Smith, of Charles City, Iowa.

There was a big discussion as to how the club should celebrate its twenty-fifth anniversary next June. It was finally decided to instruct the trustees to prepare plans and report at the next meeting.

It was also decided that the February meeting should be known as the carnation meeting, the trustees to select good discussions for this meeting and florists who have new varieties should send blooms for inspection. Fred Ammann invited the members to the annual meeting of the Illinois State Florists' Association on Feb. 8 to 9. The invitation was accepted with thanks.

NORTH SHORE HORTICULTURAL SOCIETY.

The North Shore Horticultural Society held its twelfth annual banquet, Wednesday, January 25th. About 200 sat down to a feast of the holiday bird. Music was rendered by Long's Orchestra and the hall was artistically decorated with hemlock trees and branches, and the tables with flowers. President Alfred E. Parsons welcomed the guests, and made a very interesting and witty address. Among the other speakers, humorous and eloquent, was F. W. Byers, who spoke, feelingly of the "Community Spirit," which is so valuable an asset in town prosperity.

CHICAGO NOTES.

Bulb Troubles.

It is still early in the season but indications are that some of the bulb troubles of two years ago are to be repeated this year, especially with tulips. Reports from two of Chicago's largest growers show that bulbs from one of the largest Holland growers whose stock has hitherto been perfectly satisfactory here, is this year coming entirely blind—that is, failing to produce flowers. This is not the result of early forcing as bulbs were not placed in heat till after the holidays and other bulbs under similar treatment have produced perfect flowers. The varieties so far tried are the early forcing ones—Proserpine and Montresor. What the result will be in later varieties remains to be seen, but, for the sake of the growers who have invested thousands of dollars it is to be hoped that the loss of two years ago will not be again experienced.

Among the Trade.

J. Kidwell expects to build a house for his men at the place at Wallworth Farm this spring. Mr. Kidwell is getting his plant there in excellent shape and cutting some fine stock.

The subject of the removal of the wholesale florists to Market and Lake streets continues to be agitated. Several meetings have been held and a decision is likely to be reached soon.

Zeck & Mann are showing several novelties shipped to them from the south, among which are wild violets, camellias and a vine bearing yellow bell shaped flowers, very attractive in appearance.

The Chicago Carnation Co. are showing some very flattering testimonials regarding the quality of the stock of rooted cuttings of the Washington carnation they have shipped so far this season; 50,000 have already been delivered. This firm has just received a large shipment of Dorner's carnation White Wonder. It was excellent stock.

Personal.

George Asmus has returned from a trip to Boston.

Julius Schnapp is no longer with Canger & Gormley.

Arthur Christianson has accepted a position with Paul Blom & Co.

T. C. Yarnall has resigned his position with the J. B. Deamud Co.

Henry Goebel started this week for a trip in the interest of the Chicago Carnation Co.

E. C. Amling is settled in the new store on Randolph street, where he has double the floor space.

Lloyd Vaughan states that never in his experience has there been such a shortage in flowers along all lines.

Little "Billy" Hornberg, Jr., has been seriously ill and friends are glad to hear that he is on the road to recovery.

Miss E. Mechelson, who is with her sister, Charlotte Mechelson, will take a vacation from business and visit in Keokuk, Iowa.

Mr. and Mrs. A. Lang leave tonight for a visit in Omaha, where Mrs. Lang's parents will celebrate their golden wedding.

W. E. Ward, bookkeeper for the E. H. Hunt supply house has just returned from the funeral of his mother which

took place at Darlington, Wis., on the 20th of January.

C. M. Dickinson of the E. H. Hunt Co. is glad to be back to the store again. Jury duty is not a pleasure, even if it is the duty of a citizen.

Frank Oechslein surprised his friends by announcing Jan. 19th that his bachelor days were over and that he was married to Miss Rosa Maier. Mr. and Mrs. Oechslein have the best wishes of the trade.

Chas. McKellar is able to resume his place in his store and assist in directing the business, although still unable to use his hands. Mr. McKellar's is the last of the many cases of blood poisoning reported among the florists this season.

Ulrich E. Helie, lately with Holm & Olson, of St. Paul, Minn., has taken a position with Canger & Gormley and will have charge of the decorating, etc. Mr. Helie has had experience also in several of the eastern cities, including Boston and New York.

Several of our florists are suffering with rheumatism. Frank Klimmer has been confined to the bed for two weeks. Sam Pearse, who has been ill is now suffering a relapse and H. C. Blewitt of Desplaines has not been able to be in the market for several days.

Visitors—F. A. Butchert, Rosari, Man., John Telelaar, representing Van Meenween & Telelaar, Lisse, Holland; Joe Stuppe, St. Joseph, Mo.

PHILADELPHIA NOTES.

John Westcott and party left for Bermuda on the S. S. "Oceanic," Thursday, January 26th.

We are pleased to report that John Burton is so far recovered as to have been able to take a short trip to town from his residence in Chestnut Hill on the 24th inst.

R. Eisenhart, Torresdale, is setting the pace among the local violet growers here this year. His crops of both singles and doubles are exceptionally good and are undoubtedly the best coming to this market.

Jno. Welsh Young is credited with the best freesia that has reached this market so far. It is only medium long but fine as to size, substance and purity. The stock seems to have been grown moderately cool and is well-hardened off. Freesia growers please note the last line.

W. R. Gibson is on a visit to his mother here and will remain for some time to regain his health before returning to Seattle. It will be remembered that he met with an almost fatal accident while horseback riding near Seattle last summer. His physicians say that with good nursing and quiet he will get well.

The business of the late J. Wm. Colflesh, grower of foliage and flowering plants at 53rd and Woodland avenue, will be conducted under the same title and along the same lines as heretofore by his sons, J. Wm. Colflesh, Jr., C. Ben. Colflesh, and David E. Colflesh, who have formed a partnership. They are good boys and have been brought up in the business, and we feel sure will worthily uphold the good reputation of the establishment.

Visitors: W. R. Gibson, Seattle, Wash.; William J. Stewart, of Boston, Mass.; B. Hammond Tracy, Wenham, Mass.

During Recess

Chicago Bowlers.

The following score was made by the Chicago bowlers at their regular weekly meeting, January 19th:

Violets.			Orchids.

On Sunday, January 22, the Chicago bowlers, eighteen in number, went to Joliet to play the teams of the Chicago Carnation Co. and the Thompson Carnation Co. By a conflict of arrangements the alley was not wholly at the disposal of the florists and only a portion of the teams could participate, greatly to the disappointment of the Chicago boys, who played without spirit and all three games went to Joliet. February 5th is set for a return game at Chicago, when the home team will seek to reverse the results of last Sunday.

New York Bowlers.

Scores last Friday night were as follows:

Ch'dw'k,	183	183	180	Berry,	125	131	123
Scott,	135	150	157	Watkins,	84	88	108

Nugent,	89	164	90				

A St. Louis Feast.

The Retail Florists' Association of St. Louis gave a banquet to its members on Monday night, Jan. 16, at the Marquette Hotel. The only invited guests were the four wholesalers, Messrs. Kuehn, Berning, Smith and Angermuller, who say they enjoyed a splendid evening. There were twenty members of the association present. The tables were nicely decorated with cut flowers and smilax. After a most enjoyable feast President C. C. Sanders, who acted as toast-master, called upon each one for a few remarks. Vice-President Theo Miller, Secretary F. C. Weber, Jr., and Treasurer R. J. Windler were in excellent humor after the feast and said they spent the most pleasant evening of their lives.

Tarrytown Horticultural Society.

The twelfth annual dinner of this Society took place on January 18th at the Hotel Tarry. The attendance was large and enthusiastic applause greeted Toastmaster C. H. Tibbets and his corps of entertaining speakers. Among the latter were: J. Austin Shaw, J. H. Sperry, W. Odell, F. B. Conine, J. F. Dinkel, Thos. Everett and others. There was fine music and the tables were beautifully decorated with flowers and greenery.

Geo. Staff, of New Castle, Ind., has organized a bowling club among the growers of that city.

OBITUARY.

Samuel C. Moon.

The nursery trade of America has lost a distinguished member in the passing away of Samuel C. Moon. He was a good nurseryman in all that the word implies—commercially, scientifically, and from a civic standpoint. He was born and bred in the business—his father, to whom he succeeded, having been a nurseryman before him. The horticultural world has lost a distinguished member, as Samuel C. Moon was much more than a mere merchant—he had ideas, aims and convictions far above the mere making of money. The State of Pennsylvania has lost a good citizen, as Samuel C. Moon cared more and did more for the advancement of arboriculture, agriculture and horticulture during his active and beneficent efforts covering some fifty years, than the most highly lauded politician or destroyer in that day and generation. The United States and the world at large can ill spare such men. His life was devoted to the fundamental principle of conservation of natural resources, and the embellishment of home surroundings—catering to the profit, comfort and pleasure of all and every citizen of this great republic. A noble aim and nobly carried out.

Mr. Moon is universally admitted to have known more about trees, shrubs and other hardy plants than most nurserymen. He was not only a great scholar, but an experienced grower, and he gave fully and freely from his rich stores without thought of reward, recompense or praise. He was public-spirited in the highest degree. If a club or society wanted a lecture, he would travel hundreds of miles to oblige them. If some organization wanted a picnic, with instruction thrown in, he would invite them to his wonderful nursery of old and young trees at Morrisville, at his own expense, feed them, talk to them, have his family entertain them, and send them all home again, safe, happy and wiser. A most estimable character was Samuel C. Moon—a Quaker, but not bigoted. A broad minded, whole-souled, genial, warm-hearted man. The writer knew and loved him for 25 years, and the longer the more. A fine man—and everything a man should be. All blessings on his memory.

Mr. Moon's death occurred at his residence, near Morrisville, Pa., Jan. 21st, in his 57th year. The funeral services were held on the 25th inst. Interment at Fallsington.

A widow and one daughter, Miss Jane C. Moon, survive. Two brothers, William H. Moon and James M. Moon, also survive, both of them being nurserymen. G. C. W.

The Late H. C. W. Siebrecht.

As briefly announced in our last issue, Heinrich Christian Wilhelm Siebrecht, father of Henry A. and William H. Siebrecht and their sister, Mrs. Carl Meyer, died on Monday, Jan. 16th, at Astoria, Long Island City, where he had made his home with his son, Wm. H. Siebrecht, since the death of his wife 10 years ago.

Mr. Siebrecht was 92 years old, and had enjoyed good health during his entire long life, never knowing hardly

what sickness was. He passed away evidently without pain—simply slept away. He first came to this country on a visit to his two sons, who were then in business at the corner of Fifth avenue and 42nd street, in 1870, after which time he with his wife made nine round trips between here and their home in Germany, living there and here at intervals during many years, but finally made their home in old Astoria.

Mr. Siebrecht, besides being a wide-awake and progressive farmer, was also a manufacturer of damasks and fine linens, in which line he was considered quite an artist in his day in designing new patterns. This was before the time of machinery for weaving such goods. Notwithstanding his busy career in these lines, he found some time for horticulture, especially the raising and cultivation of fruit trees. He was quite an amateur nurseryman; always had a small nursery in his garden. Endowed with an extraordinary strong constitution and with the love of outdoor life and plain and regular living, no doubt these were material factors for his good health and long life. Besides three children, he is survived by 18 grandchildren and 19 great-grandchildren.

The funeral services were held at the home of his son, Wm. H. Siebrecht, Astoria, Wednesday, Jan. 18th, at 8 P. M. The interment was in St. Michael's Cemetery, Long Island, beside his wife in the family plot.

Moses F. Tiger.

Moses F. Tiger died at his home on East Main street, Patchogue, L. I., N. Y., at the age of 60 years. He came to Long Island about thirty years ago and established a nursery at East Patchogue. He leaves a widow and one son.

William Amos, Jr.

Wm. Amos, Jr., of Woodside, Long Island, N. Y., died at St. John's Hospital on January 23, aged 40 years. He leaves a widow and five children.

Denver, Colo.—Claiming that sparks from an engine of the Denver Laramie Northwestern Railroad Co., set fire to property adjoining the Mapleton Nurseries and destroyed a large number of trees, W. H. Green has brought suit against the road to recover \$4,000 damages. J. M. Copeland and the Bank Investment Co. making similar allegations have also assigned their claims to Green.

SOCIETY OF AMERICAN FLORISTS
AND ORNAMENTAL HORTICULTURISTS.

Registration of Rose.

Public notice is hereby given that Jackson & Perkins Company, of Newark, Wayne County, New York, offer for registration the rose described below. Any person objecting to the registration or to the use of the proposed name, is requested to communicate with the secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

Raiser's Description.—Abelle Weber-Pate (Thalia X Mlle Eugenie Verdier) Lambert X Rugosa "America," (Harvard Gardens '94), Seedling from Herr Peter Lambert, Trier, (Treves), Germany. Citron-yellow, to deep orange center; dwarf polyantha; foliage and habit like Mrs. Cutbush.

Name, "Yellow Baby Rambler."
H. B. DORNER,
Secretary.

January 19, 1911.

Additional Appointments.

Committee on School Gardens.—Wm. R. Smith, Washington, D. C.; C. L. Seybold, Lanvale and Fremont avenues, Baltimore, Md.

State Vice-Presidents.—Colo., I. Edw. Johnson, Colorado Springs; Conn., Wallace R. Pierson, Cromwell; Fla., C. D. Mills, Jacksonville; Ky., H. G. Walker, Louisville; Me., William Miller, Bar Harbor; Neb., John J. Hess, Omaha; N. J., Ant. C. Zvolanek, Bound Brook; N. Y., west, S. A. Anderson, Buffalo; Tex., Eugene Corley, Dallas; Wis., J. E. Matthewson, Sheboygan.

NASSAU COUNTY HORTICULTURAL SOCIETY.

The regular meeting of the Society was held in Pembroke Hall, Glen Cove, Jan. 11th. Winners for the day were: J. Elmslie, V. Cleres, J. McDonald. V. Cleres received honorable mention for tomatoes, J. Petroecia, cultural certificate for cauliflower; V. Cleres, cultural certificate for Winsor carnations. Julius Roehrs Co. sent some fine orchids and Mr. Muller gave us an instructive talk on their culture. Mr. E. Westlake was elected corresponding secretary and Henry Cliff member of the executive committee. Exhibits for next meeting will be carnations, 12 white, 12 pink, 12 red; also a special prize for a vase of 12 Alma Ward.

FINE FERNS

Ready For Immediate Retail Sale

We have an exceptionally fine and large stock of ferns in the following varieties,—first-class plants of exceedingly good value—plants that will please the most critical buyers, both in regard to quality and value.

NEPHROLEPIS ELEGANTISSIMA (Improved). The finest of this type—never showing a Boston frond; has not reverted in the last four years. Fine plants, 6-in., \$6.00 per dozen; 8-in., \$12.00 per dozen; large specimens in 12-in. pans, \$3.00 to \$5.00 each.

NEPHROLEPIS ELEGANTISSIMA COMPACTA. This bears the same relation to elegantissima compacta that Scottii does to Bostoniensis. It is a dwarf, compact plant, especially fine in the small sizes. Fine plants, 6-in., \$6.00 per dozen.

NEPHROLEPIS SCHOLZELI. Fine plants, 3½-in. pots, \$2.50 per dozen; 6-in. pans, \$6.00 per dozen; 8-in. pans, \$12.00 per dozen.

NEPHROLEPIS BOSTONIENSIS. Extra strong plants, 8-in. pans, \$12.00 per dozen.

NEPHROLEPIS SCOTTII. 8-in. pans, \$12.00 per dozen.

SMALL FERNS FOR FERN PANS. Best and hardiest varieties assorted: Pteris Mayii, Wilmsettii, Adiantoides, Aspidium Tsussimense, Crytomium falcatum, etc. Strong plants, 2¼-in. pots, \$3.50 per 100.

CROTONS. Nice assortment, well colored, 5-inch, \$9.00 per dozen.

NEWS NOTES.

Peru, Neb.—J. R. Duncan & Co. have leased land and will establish a nursery here.

San Mateo, Calif.—W. Peterson has taken over the business formerly carried on by Charles Fick.

Baltimore, Md.—A wind storm Jan. 9th blew down part of the green-houses of William Bester & Sons. Much glass was broken.

Akron, Ohio.—A farm near here has been purchased by Menna Yoder, who will build a large greenhouse and grow vegetables for market.

Boston.—A. Leuthy is displaying with pardonable pride the first specimens flowered in this country of the handsome new azalea which the raisers, Messrs. Hearens & Mille of Somers, have named for him. This azalea seems to be of a new type, having very thick, dark, waxy leaves resembling rhododendron foliage. The flower is deep pink, double and very large.

BURNETT'S "LIBERTY" TOMATO

For Main Crop and Exhibition Purposes

Liberty Tomato, introduced by us three years ago, still holds undisputed reputation as the best main crop and exhibition variety. The finest Tomato on the market to-day. An exceedingly heavy cropper and bears abundantly until very late in the season, in clusters of from ten to twelve perfect fruit. All exhibitors and growers should not fail to give Liberty a trial. Pkt. 20c., $\frac{1}{4}$ oz. 75c., oz. \$2.00.

Strong Pot-grown Plants of Liberty ready May 1st. Doz. 75c. 100, \$5.00.

BURNETTS "RED ENSIGN"

Is an Ideal New Forcing Tomato

Order This When Ordering "Liberty"

The fruit is rich crimson color, delicious flavor, and free from hard core. One of the earliest and most prolific, the fruit hanging in broad, handsome sprays; medium size and remarkably even. Pkt. 25c.

NEW PARSLEY

Burnett's Emerald Isle

Densely curled, dwarf and very compact. Statistics received last season show that Emerald Isle, planted at the same time and under the same conditions, germinated quicker than any other variety. Pkt. 10c., oz. 25c., $\frac{1}{4}$ lb. 75c.

Burnett's New Cabbage "Bass Rock"

As a second early variety this Cabbage has no equal. It matures a few days later than Early Summer, is much larger and a sure header. The finest of the flat headed type grown either for Summer or Winter use. Pkt. 10c., oz. 40c., $\frac{1}{4}$ lb. \$1.25, lb. \$4.00.

ONION

Ailsa Craig (Dobbies' Genuine)

For exhibition universally recognized as the ideal Onion. The skin pale straw, flesh white, very mild and quality superb. The bulbs, which are oval-shaped, often attain the phenomenal size of from 3 to 4 lbs. Pkt. 15c., oz. 50c., $\frac{1}{4}$ lb. \$1.50

CAULIFLOWER

Snowball, "Burnett Selected Strain"

No other Cauliflower at the present time is so widely known as Snowball, having supplanted all other sorts for early and late planting. Heads pure snow white of the finest quality. Our strain of Snowball is recommended with the utmost confidence. Pkt. 25c., $\frac{1}{4}$ oz. \$1.25, oz. \$4.00.

NEW MUSKMELON

"Heytesbury King"

This Melon, introduced by us, is a seedling of English origin, for which we claim superiority over all other varieties. It is unsurpassed, both as a forcer and for growing in cold frames during the Summer. It is a very free setter, the fruit averaging in weight from eight to ten pounds each, with beautifully golden yellow finely netted skin, exceptionally thick, firm green flesh, the flavor and quality of which has never been equalled. We believe it will become one of the leading Melons for outdoor growing also. Pkt. 50c., $\frac{1}{4}$ oz. \$2.00.

ANTIRRHINUM NANUM GRANDIFLORUM

Six New Colors—In Original Packages

MAIZE QUEEN. Beautiful salmon maize, with yellow lip, dark green foliage. Pkt. 50c.

PINK QUEEN. A lovely pink, with yellow lip, large flower, very beautiful. Pkt. 50c.

DAINTY QUEEN. Beautiful salmon buff, with bright yellow lip; pleasing and attractive. Pkt. 35c.

ROSE QUEEN. Bright rosy pink, with citron lip, deepening at top. Pkt. 35c.

BUFF QUEEN. A lovely shade of rose, with deep canary lip, shaded orange. Pkt. 35c.

GOLDEN FAIRY. Beautiful shell pink, with delicate lemon-yellow blotched lip. Pkt. 35c.

Above collection of 6 varieties for \$2.00.

Sweet Peas of Recent English and American Introduction

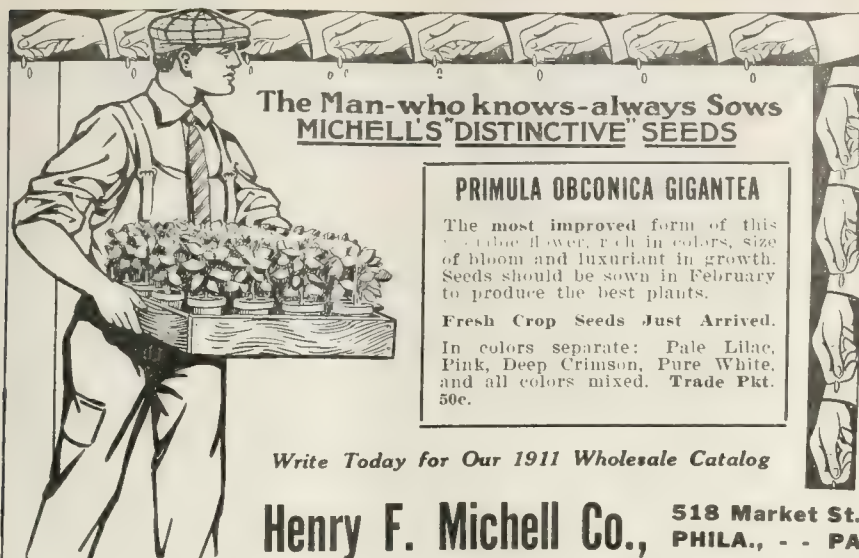

All the finest varieties including Colleen, Doris Burt, Earl Spencer, Ethel Roosevelt, Florence Nightingale, Martha Washington, Masterpiece, Mand Holmes, Mrs. Duncan, Picotee, Mrs. Hugh Dickson, Rose du Bon, Tuckwood, Giant-Flowered Hybrids, and all the lovely Spencers. Order from Catalogue.

ROSES FOR 1911

DARK PINK KILLARNEY. A sport of Killarney, similar in habit, but more highly colored than Killarney at its best. Grafted plants only, from 2 1/4-inch pots: \$20.00 per 100, \$180.00 per 1000.

LADY CROMWELL. A shell pink sport of My Maryland that for pleasing color is unsurpassed. A wonderful producer, and a color that sells. Grafted plants only, from 2 1/4-inch pots: \$30.00 per 100, \$250.00 per 1000.

PRINCE DE BULGAIRE. The best prices for cut flowers should be the standard for judging Roses, and this Rose has been the money getter. Strong and vigorous in growth, and with beautiful shell pink bloom. Grafted, \$20.00 per 100, \$180.00 per 1000. Own Root, \$15.00 per 100, \$120.00 per 1000.

DOUBLE PINK KILLARNEY. Originating with Robert Scott and Sons, who supply us the wood for grafting. Stronger in growth than Killarney, and with at least ten more petals. Grafted stock only: \$30.00 per 100, \$250.00 per 1000.

MRS. AARON WARD. By far the most pleasing of the yellow Roses now on the market. A general favorite. Grafted, \$25.00 per 100, \$200.00 per 1000. Own Root, \$12.00 per 100, \$100.00 per 1000.

MELODY. We have reserved for our orders own-root plants of this choice novelty. No grafted plants. From 2 1/4-inch pots, \$30.00 per 100, \$250.00 per 1000.

RADIANCE. Strong in growth and making plenty of stem. Cerise pink in color. Grafted plants, \$18.00 per 100, \$150.00 per 1000. Own Root, \$10.00 per 100, \$90.00 per 1000.

A BLUE ROSE

*The Greatest
Rose Novelty
of the Century*

It flowered with us this season and was greatly admired.

The New Rambler (Violet Blue), hailed by the German rose growers as the forerunner of a genuinely cornflower blue rose, is a seedling of Crimson Rambler, very vigorous and hardy, and free blooming.

Send for description and price.

ELLWANGER & BARRY

Mount Hope Nurseries

ROCHESTER, N. Y.

One day not so very long ago a man stood for fifteen minutes on a prominent corner in New York City, with a little stand, offering five-dollar gold pieces for sale, one to each buyer, at two dollars each. The crowd looked on with suspicious smiles, but did not buy. During the time there were three pieces sold. Five minutes after the sale was closed the crowd was enormous, for the report had spread that the coins were genuine. As a matter of fact, they were genuine and supplied by a rich man who was curious to know what faith the buying public had on an occasion of that kind. That's about the only instance we know of where a buyer was really offered in good faith, something for nothing, when something for nothing was not expected in return. Now there are a good many bulb buyers looking for just such snaps, something for nothing, but, gentlemen, they are very rare and when such opportunities do appear be sure the goods are genuine. **Horseshoe Brand Lily bulbs** are not cheap bulbs and are not offered at low prices because we can't afford it; but the bulbs are genuine and are well worth the money you pay.

Write far prices or catalog.

Seed Trade

About Sweet Corn.

In our issue of two weeks ago we stated that information had come to hand indicating that the sweet-corn crop was liable to be seriously damaged owing to a considerable percentage of the late varieties molding. Since that time we have confirmed these reports and learn that owing to the very unfavorable weather conditions of the past three months and the fact that much of the corn when husked and cribbed was soft, has caused considerable of it to spoil and it looks as if the germination of the best would be below the average. Just what percentage has been ruined, we, of course, have no means of knowing, but undoubtedly it is quite large as there has been a very strong advance in prices by most of the seed-corn growers during the past few weeks. Doubtless the exact situation will become known now very shortly.

Peas Present and Future.

As was to have been expected, there has been much complaint from market gardeners and farmers who use peas in considerable quantities. In the first place, they object strongly to the advanced prices which seedsmen are compelled to ask, and then they are indignant because they cannot buy the quantities they want, even at these high prices, but they are gradually becoming educated to the real situation, and will doubtless adjust themselves to conditions as they have in other years. Seedsmen and canners are contracting future peas and beans, particularly the former, more liberally than seemed probable two months ago. As a matter of fact, we are informed that several of the leading growers are very nearly contracted to their limit on the leading standard varieties, both of the so-called canner's peas as well as of large podded varieties, which are generally grown by market gardeners and farmers for the city markets. The temptation to over-sell on the part of the growers is great, but it is bad policy, and it is earnestly hoped that they will not do this the coming year. Those who came late may have to return empty-handed as it is definitely settled by a few, at least, of the leading growers that they will cease writing business for future deliveries when they have reached a certain limit. If the tardy ones are caught napping once or twice, it may be a useful lesson to them. We believe no one ever loses anything by being the early bird.

The Josiah Young Failure.

It is expected that the appraisers of

the Josiah Young stock of seeds, agricultural implements and other goods carried by this firm will make a report in a few days. We learn from one of the appraisers that the inventory will probably show good assets at from \$10,000 to \$12,000, while the total liabilities are \$22,000 to \$24,000. On the face of it, it would seem possible for Mr. Young to make some arrangement with his creditors and continue, but from information we have, it looks very much as if he were "down and out" so far as the seed business is concerned. Whether anyone else will take his stand and continue the same line has not yet developed, but it is not probable that such will be the case.

Next Seed Trade Convention, Where?

Since the Executive Committee of the American Seed Trade Association met in Detroit and decided upon Milwaukee as the place for the next annual convention of the Association, it has become known that the Milwaukee hotels cannot take care of the seedsmen during the week scheduled for their convention. It seems that some other large convention is to meet there the same week and it is now up to the Executive Committee to select another place. While other cities have extended a cordial invitation to the seedsmen to hold their convention in their midst the coming summer, and while all are entitled to consideration, it seemed as if good old Boston has the highest claims on the seedsmen for next year. So far as we can learn, there has never been but one seedsmen's convention held in Boston since the organization of this Association. There certainly is no city more interesting than Boston and few more accessible, while the hospitality of the "Hub" is proverbial. We extend our best wishes to all of the competitors for the next seedsmen's convention, but would certainly urge the claim of Boston over all others.

Canners' Convention.

Those who contemplate attending the forthcoming Canners' Convention, February 6th to 10th, should lose no time in securing rooms, as the hotel capacity of the city will be severely taxed to care for the crowd which will no doubt be present this year. Don't delay if you want comfortable accommodations.

Personal.

Mr. and Mrs. W. Frank Jones of Hartford are at Summerville, S. C., having left home about the middle of January.

Mr. and Mrs. Jerome B. Rice and Jerome B. Rice, Jr., are now enjoying the balmy breezes of Florida. Mr. Rice found it advisable to go South for his health this winter, taking Mrs. Rice and his son with him. The latter expects to return home about the 1st of February, but it is not known when Mr. and Mrs. Rice will be back in Cambridge. We earnestly hope that they will find the health and strength which Mr. Rice so greatly needs for the heavy responsibility he continually carries.

Philadelphia Visitors.

Among our distinguished visitors this week was John C. Bodger of John Bodger & Sons Co., Los Angeles, Cali-

fornia. This firm makes a specialty of growing for the seed trade such items as flower seeds, tomatoes, beans, etc., that do well in California. They are now placing their contracts for 1912.

Fred H. Hunter, representing Waldo Rhonert, Gilroy, Cal., was also with us. This firm has a seed ranch of 1600 acres in the Santa Clara Valley, and makes a specialty of seed growing for the trade on contract orders. They handle everything in seeds that are especially successful under the California climate, and are recognized as one of the foremost in their line.

C. Kimberlin of J. M. Kimberlin Sons was a visitor; also C. B. Coe of D. M. Ferry & Co., Detroit, Mich.

Notes.

Columbus, Ga.—Wills & Thomas is a new seed firm which will conduct business at 1210 Broad street.

Minneapolis, Minn.—The P. A. L. Ferguson Seed Co. have purchased 1600 acres of ground in Gilman, Wis.

Mitchell, S. D.—The Dakota Improved Seed Co. was reorganized recently. W. S. Hill of Alexandria is president.

Baltimore, Md.—Wm. E. Quinn succeeds the late John L. Turner as secretary and treasurer of the Griffith & Turner Co.

John G. Slater, formerly with Jos. Breck & Sons, Boston, Mass., has taken a position with S. D. Woodruff & Sons, New York.

Kansas City, Mo.—The J. G. Peppard Seed Co. has been incorporated with a capital stock of \$100,000. Incorporators, J. G. Peppard, Julia L. Peppard and J. G. Peppard, Jr.

A new show window with brilliant electric lighting and hardwood floor is evidence of up-to-date enterprise at the "Buds" seed store on Barclay street, New York. Carl Gloeckner, president and manager is very popular with the gardeners.

ISBELL'S SEEDS

Our Michigan Grown Seeds are winning their way into public favor with astonishing rapidity. Here under our own supervision, we grow all our Beans and Peas, Cucumbers, Muskmelons, Tomatoes, Radish, Sweet Corn, besides many other things of less importance. Don't you think we can honestly claim to know the seeds we sell? We invite you to Try our Seeds and Methods just once and it will not be long until you have formed the habit of using Isbell's Seeds.

Of Interest to Retail Florists

Kansas City, Kan.—Mrs. T. A. Moseley, 645 Minnesota avenue, has purchased the stock of J. H. Ephraimson.

New Brunswick, N. J.—Frank Clark, the Trenton florist, opened a new flower store here at 86 Church street, January 21st. His brother John who has been associated with Mr. Clark for the past 10 years in Trenton will have charge. There is an excellent opening in New Brunswick for a progressive and pushing concern and the new enterprise ought to prove a big success.

Dec. 27th, 1910.
The undersigned reads HORTICULTURE regularly, believing it well worth subscribing for and paying for. We feel the warmest interest in your paper, and a sincere admiration for its editorial department.

Yours truly, J. P. C.

ST. LOUIS NOTES.

Guy V. Reyburn, who represents the new firm of A. Henderson Co., of Chicago, of which he is a member, spent a few days in this city last week. He says the new firm was a big success from the start.

John Quinn, who for many years was in business on Grand avenue, St. Louis, closed his doors and turned the keys to the W. C. Smith Wholesale Floral Co., for them to sell the place. Mr. Quinn departed last week with his family for California where they will make their future home.

Grimm & Gorley have a novel way of advertising in their show windows at their Washington avenue store—two young ladies as bride and bridesmaid in full dress with bouquets of orchids. Large crowds congregated in front of their windows all day long and the affair was quite a big business success.

BEAUTIFUL EASTER NOVELTIES NOW ARRIVING

THE Florist Supply House of America

Without A Competitor

H. BAYERSDORFER & CO., 1129 Arch Street, PHILADELPHIA, PA.

PERSONAL.

We regret to learn that C. W. Ward of Queens, N. Y., is quite ill in New Orleans, La.

Phil. Kessler, the New York wholesale florist has just returned from a recreation trip to Bermuda.

Harry Bayersdorfer of Philadelphia is looking ahead with characteristic complacency to his silver wedding anniversary which will come on February 24 next. Although Mr. Bayersdorfer is still a young man he has been in

the florists' supply business for 38 years.

H. N. de Thestrup, foreman for A. M. Davenport, Watertown, Mass., has resigned his position and gives up his duties Feb. 4th.

Frank Millang, of New York, is doing jury duty, but his place at the salesroom in the Coogan building is efficiently filled by Frank, Jr.

Arthur E. Thatcher, of the Arnold Arboretum, returned on Wednesday, January 25 from his visit to Merrie England, well pleased with his six weeks' vacation.

Chales Plumb, who is in charge of the L. C. Weir estate at Locust Valley, N. Y., has been visiting his uncle, William Plumb, who is superintending the improvements at Dr. W. H. Baltzell's place in South Natick, Mass.

Cincinnati—Mrs. Henry Glins left Tuesday, Jan. 17th, for a two weeks' visit to her sister in Boston, Mass. Thos. Windram returned Saturday from Leesburg, Fla., where he has been spending the past two weeks.

Mr. Philip Breitmeyer, of Detroit, made one of his flying trips to New York. By the end of this week he in company with several local business men will return to New York and take a boat for Cuba next Saturday to inspect some plantations owned by them in that garden spot.

Visitor in New York: H. Cathcart, Newburgh, N. Y.

Visitors in Boston: Mr. and Mrs. A. C. Mather, Rockland, Me.

Visitors in Cincinnati: Lester F. Benson and family, Indianapolis, Ind.; Harry Nicholson, of The Chicago Carnation Co., Chicago, Ill.; Paul Berko-

witz, of H. Bayersdorfer & Co., Philadelphia, Pa.

Flower Market Reports

BOSTON Trade is booming. The week has been a lively one, satisfactory to everybody except the bargain hunter. In most places business is actually rushing. Roses are still scarce and not a few of the rose growers are debating with themselves as to the wisdom of concentrating all their efforts on getting their crop in on time for Christmas. And this is a good sign! Bulb stock is increasing in supply and improving in quality. Violets go reluctantly and seem to be losing caste. Gardenias sell well. Cattleyas overdone for the moment. Carnations elegant in quality and normal as to demand.

BUFFALO Weather conditions have been bad in this section, one day rain, then zero weather with a spring day following, which has caused cut flowers to come in in an undependable way. Carnations are not to plentiful and some days not enough can be had, especially the light colors which have been in heavy demand and have taken the place of roses, on which this market has been short, especially in the short grades of white and pink. Beauties have also shortened in supply and in many cases Richmond have filled out. Giganteum, Harrisii and magnificum lilies and callas have had a good call; also stevia, sweet peas, freesia, Roman hyacinths and narcissi. Yellow Prince and La Reine tulips, together with trumpet major and double Von

Sion have been coming in more plentiful each day and have sold out daily. Lily of the valley is a little more active than the week previous. In the violet line, one day there is a clean up and then a quantity carried over awaiting the bargain man.

CHICAGO A dearth of flowers is the keynote to the condition of the flower market today. The shortage is along all lines and those who have a good crop

of bulbous flowers to place on sale at this time will have something with which to balance accounts of former years in this line. The market has plenty of small and imperfect tulips but there are also many good-sized and perfect blooms, especially in white, which help out the carnation situation. Jonquils and narcissi are plentiful enough to help wherever their color will permit. Callas, mignonette, Ro-

Flower Market Reports

(Continued from page 117)

man hyacinths, freesia, lily of the valley and violets are all seen in splendid quality and do their full share in tiding the trade over the time when roses and carnations are at a premium. The retail trade is feeling the effect of the higher prices and especially is their trade lessened by the shortage in roses. Many of the largest stores handle very few carnations and the volume of business is greatly decreased when there is a general shortage in roses as at present. It is fortunate that plenty of green of good quality is being cut. A week of sunshine would be most welcome to the growers.

There has been a CINCINNATI complete reversal of conditions in the cut flower market the past week. Stock, while fairly plentiful the previous week, is now on the short side. This was particularly manifest in the rose market, receipts being steadily on the down grade. There was an active demand for short and medium grades and everything in the rose line moved off quickly. The market on Beauties is just the reverse, a liberal supply coming in and all orders for these are being filled in full. Carnations have felt the effects of the dark weather. A comparison with last season shows that ordinary grades are bringing from 50c. to \$1.00 per hundred more now than then, but the supply is far below what we usually have in the end of January. The supply of both single and double violets is abundant with prices very low for this season of the year. The shortage of roses and carnations has apparently helped the sale of both paper whites and Roman hyacinths, the glut of these being over for the present. Lily of the valley is abundant and moves slowly. There is a noticeable absence of tulips and jonquils in this market, with the call growing stronger as spring draws near. There is a slight let-up in the supply of sweet peas with no advance in price. Freesia has been in for the past couple of weeks, but not yet so abundant that it cuts much figure. There is moderate supply and a good demand for Easter lilies and callas.

This market shows a NEW YORK decided easing up from the stringent conditions which, in common with other markets, prevailed here a few days ago and made it impossible to fill urgent calls for roses, from all sides, including even Boston. Soft

spring-like weather has prevailed since Monday and an April haze is in the air but the punishment for all this is sure to come later. The market is well supplied with carnations, of which there are at times more than are needed. Violets are "blue" in more respects than mere color and selling at lower figures than heretofore so early in the season. Cattleyas have been coming in faster than needed, with the inevitable result of a serious break in values but little can be said in praise of the quality, blooms as a rule running very small. Of tulips there is an increasing supply, as of all other bulbous material, and the quality is growing better from day to day. Frezias are excellent but in very moderate supply as yet. A spring aspect already reigns in the florists' show windows, with forsythias, almonds, lilacs, crabapples and other forced spring-flowering shrubs in beautiful array.

The market last week ST. LOUIS was about as short as any we have had and it seemed as though every one in the retail business had plenty to do, judging by the rush for flowers each morning, and if they had no advance orders they got nothing. The wholesalers say they never saw such a scarcity in stock. Anything that looked half-way good was picked up and at stiff prices at that. Roses all went up in price and to get any quantities was out of the question. Short stock brought from \$6 to \$8 per 100, Carnations \$4 to \$6, supply good and demand cleans them up early each day. Other stock such as sweet peas, Roman hyacinths, paper whites and lily of the valley sold well all week. The wholesalers say they are looking for a larger supply this week as bright weather prevails.

FIRE RECORD.

The greenhouses of Joseph Fuller at Fitchburg, Mass., were damaged by fire last Thursday.

Manheim, Pa.—The Monroe Hostetter Greenhouse was damaged by fire recently; loss about \$500.

Minneapolis, Minn.—W. P. Eldridge, florist, 42 Fifth street, South, received damage recently in a fire which caused an aggregate loss of from \$15,000 to \$20,000.

Washington, D. C.—The store of F. H. Kramer, 916 F street, was damaged on Saturday last to the extent of \$1,000. The fire started under the stairway and spread quite rapidly in that portion of the store, owing to the fact that a large number of wax flowers were there and they, of course, ignited rapidly and served to feed the flames.

HELP WANTED

ORCHID GROWER WANTED—Must be a good potter and worker. Good situation for the right man. Send references to A. Pericat, Orchid Specialist, Collingdale, Pa.

WANTED—Experienced and hustling man to go on the road to sell florists' supplies. Apply to N., care HORTICULTURE, Boston.

SITUATIONS WANTED

GARDENER.

Florist, 36, married, no children; well versed in any kind of flowers, vegetables, greenhouse and landscape work; wish position in private place; capable to handle men; first class recommendations. Alexander Buteaux, gardener, Noroton, Conn.

FOREMAN wants position; at present employed by wholesale grower in Massachusetts. A No. 1 grower of Christmas, Easter and bedding plants, also small ferns and stove plants. Life experience in Europe and U. S.; only responsible position will be considered; correspondence confidential; can start thirty days after engagement. Large salary expected. T. T., care HORTICULTURE.

SUPERINTENDENT or head gardener wants position; open for engagement March 1st, 1911, or later; 20 years' experience in the growing of flowers, fruits and vegetables under glass, as well as out of doors. Married. Only first-class position will be considered. State salary and give full particulars in first letter. Private interview desired. T. D., care HORTICULTURE.

FOR SALE

SPLENDID OPPORTUNITY for a wide-awake party to acquire a well established retail florist business. Stock and good will to be sold, greenhouses to be let. One of the best places in Massachusetts for a progressive man. Present owner has too much business on hand. Moderate cash capital required. Apply HORTICULTURE, Editorial Dept.

FOR SALE—Account of sickness, old established greenhouses, 4,200 ft. glass, with or without dwelling, on line of two steam roads, and trolley line; three express companies; steam heat; only florist in town; sick; must sell cheap, easy terms. J. B. Griffiths, Jermyn, Pa., Box 1.

FOR SALE—Special 16 x 18 and 16 x 24 double thick glass in "A" and "B" qualities. Buy now and save money. Write FARSHELSKY BROTHERS, INC., 50 Montrose Ave., Brooklyn, N. Y.

FOR SALE—House Lots between Preston Street and Greenwood Avenue, also on Stiles Street; commanding view of ocean and forest scenery. Dawn Nurseries, West Lynn, Mass. P. O. Box 135.

MISCELLANEOUS

WANTED TO LEASE, with privilege of buying, 10,000 to 20,000 feet of glass, dwelling house, and some land. Wanted to take possession April or later. X, care HORTICULTURE, Boston.

valley. Easter lilies are rather scarce and are selling well. Callas are more plentiful, but these also are selling well. Roman hyacinths, paper whites and daffodils are plentiful and bringing better returns than usual. Freesia is now to be seen in spots, but no great quantity anywhere as yet. The quality is fair.

A round of the WASHINGTON stores at the latter part of the past week showed that trade has dropped considerably within the past two weeks. This is unquestionably due in a measure to the fact that there is a marked scarcity in the better grades of flowers. Especially is this so in the line of carnations and roses. There are more yellow flowers on the market now, some good Golden Spur narcissi, also tulips in both yellow and white. Freesias are beginning to come in in limited quantity.

Flower Market Reports

(Continued from page 1)

Were it not for the DETROIT many strenuous weeks we have just passed through last week's inactivity would have given many of us the blues. Unfortunately local wholesale houses do not carry enough stock and even with the general small demand of last week they could not fill all the orders on such staple articles as carnations, long-stemmed roses or short red roses. The more our goods are shown the more is a demand for them and it is very doubtful whether larger shipments from out of town would depreciate the price. As the local situation appears, the high mark for carnations is \$4 per 100 and you can not go above it. If you have not enough you simply lose sales and the retailer will place his orders with growers and wholesalers in other cities. Keeping the supply down to the product of the immediate neighborhood when such supply has proven inadequate for several seasons, as has been shown to be the case locally, is injurious to grower as well as retailer. Competition is and always will be the equalizing lever whether it is among growers, or wholesalers, or retailers.

There is no PHILADELPHIA marked change in conditions here

since last report. Roses are still very scarce—especially American Beauty, and the quality of the latter is also away below par. Demand continues good and steady, with satisfactory prices and clearances the order of the day in the general market. Violets are possibly an exception to this. The demand for these is not at all what it should be. We hear some complaint about the quality of the local violet crop, which is said to be in many cases much poorer than last year. This does not apply to all, however, as we hear of a number of growers whose product is all that can be desired. Sweet peas have gone back a little on account of the cloudy weather and there are a good many coming in that are quite inferior. Gardenias, lily of the valley and orchids all remain about on an even keel, although there may be a slightly better demand for lily of the

CAMBRIDGE, MASS.

NEWS NOTES.

Haverhill, Mass.—W. F. Eaton has purchased the interest of John E. Tabor in the Rosemont Greenhouse.

Los Angeles, Calif.—The Welfskill Greenhouse has been leased by George C. Watson.

Keene, N. H.—A strip of land adjacent to its white pine nursery has been purchased by the Keene Forestry Association.

Poughkeepsie, N. Y.—The Pental Greenhouses on Violet avenue have been leased by John Kluge who is growing violets.

Hinckley, Ill.—Owing to the bursting of a pipe which put out the fire, F. E. Graves suffered a loss of several hundred dollars in frozen stock.

Rapid City, S. D.—The Sunnyside Nursery and Gardens, owned by Reimers Bros., is a new concern which has started here, growing greenhouse vegetables, etc.

South Sudbury, Mass.—J. A. Bartlett has purchased the Anderson Greenhouses together with the dwelling house and an acre and a half of land on the state highway.

New York, N. Y.—The Wilson Plant Oil and Fertilizer Co., of Chatham, N. J., have located at 150 Nassau St., Room 1124. W. G. Badgley has disposed of his interests in the company.

Baltimore, Md.—The Baltimore Florists' Exchange elected the following at their annual election. Isaac H. Moss, president; F. C. Bauer, vice-president; P. B. Welch, secretary; C. E. Akehurst, treasurer; J. J. Perry, manager.

El Campo, Texas.—The city council has awarded to J. E. Wheeler, florist, the contract for improving and beautifying Herder's Park. This will probably be followed by another contract for planting shade and ornamental trees upon the principal streets of the city.

Santa Barbara, Calif.—The partnership of A. Verhelle and E. Lejeune, proprietors of the Exotic Nurseries, has been dissolved. Mr. Lejeune will conduct business in the same location under the same name. The Kentia Nurseries is a separate business established by Mr. Verhelle and he will carry a stock of other palms besides.

Forest City, Iowa.—The bursting of pipes in the boiler of the Hill City Greenhouses left them without heating of any kind on Monday, Jan. 2, but fifty oil heaters were gotten together and these, with smudges, kept the plants from freezing until the boiler could be temporarily repaired. Luckily this was accomplished by Monday evening, as Monday night the temperature dropped to 24 degrees below zero.

DREER'S "Riverton Special" Plant Tub

No.	Diam.	Each	Doz.	100
10	20 in.	\$1.45	\$16.00	\$130.00

GREENHOUSES BUILDING OR CON-
TEMPLATED.

Oakland, Cal.—E. E. Gill, one house.
St. John's, N. F.—J. McNeil, house
22 x 100 feet.

Indianapolis, Ind.—Alfred Brandt, conservatory.

Eau Claire, Wis.—Eau Claire Greenhouses, addition.

San Mateo, Cal.—MacRorie-McLaren Co., eight houses.

Lee, Mass.—W. B. O. Field Estate, house 30 x 41 feet.

Evansville, Ind.—Karl Seidler, rebuilding next year.

Woodstock, Ont., Can.—Woodstock Floral Co., two houses.

Warren, Ohio—Thomas Fletcher, two houses 9 x 25 feet.

Duluth, Minn.—Superior Floral Co., two houses 20 x 100 feet.

Toronto, Ont., Can.—Grobba & Wandrey, two houses 40 x 180 feet.

Birmingham, Ala.—Theodore Smith, eleven houses each 32 x 150 feet.

Beloit, Ohio—G. A. Barber, two houses 18 x 200, one 14 x 100, one 16 x 150.

Tuxedo, N. Y.—G. L. Mason, chrysanthemum house and range of fruit houses.

Philadelphia, Pa.—Jno. Stephenson's Sons, Oak Lane, Pa., will build a big rose house 72x400, iron frame, even span, concrete walls, on new lot of four acres, one block above their present location on the Old York Road. The boiler plan is formulated and founded with the idea of a further extension of this 28,000 initiatory move. The plant may be ten times 28,000 before they get through. The contract has been awarded, and operations will be commenced at once.

Stephen Mortensen, Southampton, Pa., has awarded contract for rebuilding rose house 36x175—operations to be commenced at once.

The two foregoing contracts have been secured after the keenest competition by the Lord & Burnham Co., through their local agent, D. T. Connor. Mr. Connor has also captured a good-sized contract from Baltimore recently—that of Stevenson Bros—43x 200—who will build at Towson, Md., and remove part of their plant from Govanstown to the new location.

INCORPORATED.

Bellevue, Pa.—Neff National Floral Co., capital stock \$75,000.

Geneva, N. Y.—The Universal Nurseries, capital stock \$5,000. Incorporators, Frank J. Conboy, T. J. Buckley and Thomas J. Bolger.

Lake Geneva, Wis.—Lake Geneva Horticultural Society, capital stock \$10,000. Incorporators, F. J. Tyrell, W. P. Longland and A. J. Smith.

Colorado Sends to New York for its Finest Greenhouses

That is to say, she has been sending to our New York factory at Irvington. But now with a new factory at Des Plaines, near Chicago, we will make all shipments direct from there and cut out the freight cost for that extra 1000 miles haul. That will be a decided advantage.

This particular group of houses we erected for Mr. A. Coor at Golden, near Denver. It is located at the very base of the Rocky Mountains. It was planned in ridge and furrow fashion so that it would fit as compactly as possible into the space between the building on the right, and another one, out of sight, at the left. The result is certainly very effective.

It is Iron Frame construction.

It is fully described and illustrated in our new catalogue. Before you do a thing about building you want to send for this catalogue.

WHAT THE USERS SAY

Test at 12° Below Zero with Heavy Wind

The No. 7 Kroeschell Greenhouse Boiler is heating 10,000 square feet of glass—it will take care of 15,000 square feet. We had no trouble to keep up temperatures when it was 12 below zero, with a heavy wind. The boiler has given entire satisfaction, and it is certainly an up-to-date affair and we would use no other

A GRAND NEW CARNATION—BRIGHT SPOT

Outclasses everything heretofore grown in the dark pink class.

Won first honors in the 100 class for best dark pink at the A. C. S. Meeting, Pittsburgh, January, 1910, also at the Chicago Flower Show, November, 1909.

It is a pure bright dark pink of even shade, size $3\frac{1}{2}$ inches, an early and continuous bloomer; brings fully 25 per cent. more flowers to the plant than Lawson at its best; flowers well shaped on long, wiry stems; calyx does not split. It is a good shipper, and the cuttings root easy.

Price per 100, \$12.00; price per 1000, \$100.00; price per 5000, \$400.00; 25 at 100, 250 at 1000 rates. Place your order now, to be in on early deliveries.

NIC. ZWEIFEL, North Milwaukee, Wisconsin

The Swan-Neck Orchids

CYCNOCHES VENTRICOSUM

The swan-neck orchids, represented by about eight species, are found only from Mexico to Guiana. They are known botanically as *Cycnoches*, which means "swan-neck," in reference to the resemblance of the column of the flowers to the neck and head of the swan. The genus belongs to that odd tribe of three genera, the *Catasetinae*, which includes also the equally remarkable *Mormodes* and *Catasetum*, both likewise American genera. The orchids of this tribe are rarely seen in cultivation, outside of botanical gardens or private collections. This assertion applies particularly to *Cycnoches*.

The swan-neck orchids are remarkable in having three kinds of flowers. The staminate and pistillate flowers are very dissimilar in appearance, the former, borne in short few-flowered racemes, differing widely, not only in color but in shape, from the smaller pistillate flowers which occur in long pendulous racemes. There is also a third intermediate form, usually perfect—that is, with both stamens and pistils. The three forms occur not only on the same plant, but sometimes in the same inflorescence.

The orchids belonging to the *Catasetinae* should be more generally grown, for, although not so showy as *Cattleyas*, they are far more interesting in their strange flowers and methods of pollen dissemination. Their culture is not difficult, if they are given a long period of rest at the proper time, with plenty of water at the growing and flowering seasons.

The accompanying illustration shows a plant of *Cycnoches ventricosum* Bateman, with staminate flowers. This was received by the New York Botanical Garden, among a lot of other orchids, from Tehuantepec, Mexico, through an exchange arranged with a gentleman living in southern Mexico. This species was described from living plants secured by Mr. Skinner in 1843 near Iztapa, Guatemala, about 300 miles to the eastward of Tehuantepec. The staminate flowers have the sepals, petals and column a yellowish green, and the lip pure white. The flowers exhale a strong sweet odor.

Seasonable Notes on Culture of Florists' Stock

ADIANTUMS

A short spell of rest is advisable after any heavy cut of the fronds. During the period of this inactivity, they should never be wholly denuded of mature fronds. Withhold water just enough to expel the acidity from the soil, but never suffer them to become at any time dust-dry at the roots. While drying out stir the surface to a reasonable depth so as to freely admit air and light. With the appearance of the young fronds starting, a top-dressing of two parts of rotten cow manure to one part of soil makes a good mulch. As the days get longer and brighter and the plants start into active growth some stimulant can be applied in the way of liquid manure water. Cow manure and soot is the best to use, half a bushel of the former and a peck of soot put into a bag and placed in 50 gallons of water. This if applied about once a week will stimulate growth. Repot adiantums that have had a rest, using a compost of three parts fibrous soil, one part well-decayed cow manure and one part leaf-mold with some sharp sand added. Increase your stock now by dividing clumps into pieces large enough to pot into 3-inch pots. Place in a frame on some damp sphagnum and maintain a temperature of from 60 to 65 degrees, and in two or three weeks they will have developed new roots when they can be placed on bench and grown on. *Adiantum Croweanum*, *cuneatum* and *decorum* give better and firmer fronds when grown in 55 degrees.

CALCEOLARIAS

These plants can now get their last shift into their flowering pots. Use a compost of three parts of turfy loam and one part each of cow manure and leaf-mold, with the addition of some sand. Like all quick-rooting plants of this nature they should not be potted too hard; nor yet too loosely, as the water will run away too quickly. Just use moderation. Give them a position as near the glass as available. Keep plenty of moisture around the plants and under the benches, and don't let temperature go above 50 degrees at night as they delight in a cool moist atmosphere. Later on when the roots are well through the soil liquid manure can be applied at regular and quite frequent intervals. Keep the aphid in check by mild fumigation every week. Give plenty of ventilation whenever possible.

FORCING SHRUBS

Bring into a house where the temperature stands at about 50 degrees, and use the syringe freely once or twice a day for the first four or five weeks. In about two weeks raise the temperature two or three degrees more as root action is becoming more active. It takes from seven to eight weeks to bring most spring-flowering shrubs into bloom. For rhododendrons and kalmia it is better to let them come along more slowly; they will be much better in foliage and color, while the flowers will last longer. More time should be allowed for snow ball and weigelas. Give them full light and sunshine now as it imparts vigor to the plant and gives a fine depth of color to the foliage. When in bloom give them a cool house for a week or ten days before wanted. Admit air at all times when the outside conditions of the atmosphere will permit. Forsythia, judas, almond, peach, cherry, pyrus, magnolia, spiræa, weigela and virburnum are good subjects.

GERANIUMS

- To have bushy plants with fine flowers for Memorial Day they should be in 2-inch pots now and when these are well rooted they should be shifted successively until 4-inch or 5-inch pots are reached. For these shifts use a good loam two parts and old manure one part. Keep

in a temperature of about 55 degrees until the plants have become well established, when 50 degrees will be sufficient. It is advisable to encourage a dry and airy atmosphere. To keep the plants from becoming tender and delicate pay attention to the ventilation. Avoid overcrowding on the benches. The tops of the strongest plants can be taken and propagated; they will make nice plants for bedding. Don't pinch any after the middle of February on your spring flowering stock.

RAMBLERS FOR EASTER

These roses that are for Easter should be put into a temperature of from 50 to 55 degrees at night, and every morning if the weather is at all clear give a good syringe to thoroughly dampen the wood. Raise the temperature to 58 degrees as soon as the buds begin to break, and this can be maintained until the flower buds appear. It takes about ten weeks to have these in flower, and about a month between the forming of the buds and their maturity. So the buds should appear by the 15th of March to be right for this year; if not, it will be necessary to apply more heat to have them ready for Easter. Ventilation and fumigation must go hand in hand in order to avoid attacks of mildew and green fly.

VIOLETS

As the days grow sunnier, fires may be lowered during the day so that the temperature will not run too high. It is much safer to run them too low than too high. If the day is bright and warm shut off part or all your heat and ventilate. This will keep your plants firm, dark colored and stocky. If they are vigorous and healthy the roots will be searching for some nutriment. A mulch or top dressing of old cow or mushroom manure will be of benefit to them. It is time now to propagate. In looking for cuttings choose only from such plants as are in first-class order. A good many growers mark such plants as have produced first-class bloom as to color and size, along with great health and vigor. The parent clump will be throwing thrifty shoots with fine little roots. Fill some flats with well rotted sod, with about one-fourth well-rotted cow manure, firming it well before pricking them out. For several days they will need careful watering and shading until well established, then give them full light and all the air the weather will permit. Syringe occasionally on bright days. Hold the temperature as near 40 degrees as possible. Fumigate to keep the plants clean of the fly.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: *Coelogyn cristata*; *Bougainvilleas* for Easter; *Gardenias*; *Lilies* for Easter; *Pandanus*; *Pelargoniums*.

Acidantha bicolor

This rather rare, hardy inmate of the garden resembles in leaf and habit the *Montbretia*; but has not the erect, stiff form of that bulbous plant. The ground tint of the flower is creamy white, and the markings at the base are reddish brown. They appear in a loose risp to the number of 8 or 10 on a stalk. The plant even when in bloom is not a striking one, and when planted in quantity it has no dazzling color effects. Its chief charms are the lily-like fragrance of the flower, the markings on the corolla, and its shape. As a flower for cutting it is very durable and readily finds purchasers. The florist will in *Acidantha bicolor* find a useful subject.

Frederick Moore

Fruit and Vegetables Under Glass

BUD DROPPING ON PEACHES AND NECTARINES

The dropping of flower buds on peaches and nectarines is one of the most lamentable things which a grower has to contend with. It has aptly been described as "being hit in the dark by an unknown hand," and so it is, for one is very much in the dark once they start to drop. It is not like one of the many troubles one can see and fight, knowing you are gaining ground and ultimately exterminating the pest. Once it commences the damage is soon done; one shake of the trellis is sufficient to bring a shower down and perhaps every flower bud has fallen to the ground in a few days—heartbreaking to the grower, as he is powerless to stop it; nothing can stop it.

The causes of this are to be found by looking back, probably, some time, and will be the result of either insufficient water during the growing or resting period, over-maturity, or excessive bud formation on weak wood. In the first case transpiration has been so rapid during the bright weather that there was not enough sap left to properly mature the bud, consequently it is weak and deformed and drops at the least irregularity of the root action. The second—dryness during the resting period—is the chief cause of buds dropping. Nine cases out of every ten can be traced to this, for it is the most critical time during the whole season for a peach or nectarine tree. Carelessness during potting, shifting or root pruning operations is often enough to cause disaster. Never allow the roots to become dry through exposure. Should it be necessary to leave any roots exposed for any length of time when pruning, etc., spray them over and cover up with old blankets or bags. After repotting pot-trees, thoroughly water in. This helps to settle the soil around the roots, after having a severe shaking up.

Trees in borders, while dormant, are apt to be neglected and get too dry. Peach trees will not stand for this as they require moisture right along. Over-maturity is sometimes common on very early forced trees. They make up their growth and later the bud. This is subject to so much sun it becomes hard and easily drops. Excessive bud formation occurs on some trees—*Elruge* nectarine, for instance—and with having so many to carry the least check brings some down.

A syringe over about three times a week, choosing bright days on which to do it, will be a great assistance, as it helps to keep the buds soft and plump. This is especially so where trees have been subject to severe root pruning. Avoid as much as possible excitement of the trees by fluctuations of the temperature and when starting into growth, do so gradually.

POT VINES

Pot vines will now be making nice growth and should have a night temperature of 55 to 60 degrees, rising to 60 degrees as soon as flower truss shows. Give air on all favorable occasions, which will strengthen the young growth and keep a good moist atmosphere. A light top-dressing of fibrous loam will be beneficial, as it will give the roots a little more room. Loam alone should be used, manure being too exciting at this stage. Rods

which have been bent over should be tied into permanent positions before there is danger of laterals being broken off while this is being done. Stop all laterals two leaves beyond the bunch.

MELONS

To have ripe melons in May, seed should be sown at once. Place one seed in a well-drained 3-in. pot which has been filled with good open soil. Water in and cover over to prevent evaporation. Give a temperature of 70 degrees night, with advance by day. When seedlings come through place on shelf near glass to encourage a sturdy growth. Transplant to bed before they become root-bound. Hero of Lockinge, Superlative, His Eminence and Invincible Scarlet will be found reliable varieties.

STRAWBERRIES

Strawberries which have set their fruit should have them thinned out to four or five, leaving the best-shaped fruits and those having the longest stem. With these very early lots shortness of stem is always a trouble, often not being long enough to reach over the pot. These fruits must be lifted off the soil and out of the water, otherwise they will decay before ripening. Bend a piece of wire to form three sides of a square and press the two ends into the soil. This will leave a bar on which to suspend the fruits. Give feed twice or three times a week using quick-acting manures.

ONIONS AND LEEKS

These will now be large enough to pot off. Use a 2½-in. pot and good, rich soil. Lift carefully and preserve all roots. Spray over three or four times a day during bright weather, taking care to have seedlings dry by night.

George H. Penon

Mr. Penon's next notes will be on the following: Fig House; Vines Bleeding; Disbudding Pot Peaches and Nectarines; Cabbage, Cauliflower and Beet; Cucumbers.

Dahlias

(See Cover Illustration.)

The number of fair debutantes of dahlias grows with every ensuing year, but so does the love and general public favor for this wonderful varied inhabitant of our gardens. My present notes will be confined to a few comparatively new semi-double and single sorts tried last season and found to be of decided merit. Riesen Edelweiss, to begin with, possesses a unique form. Visitors at the establishment of Otto Mann in Leipzig, Germany, its introducer, always first notice its close resemblance to the shape of the edelweiss flower. In consequence thereof the adoption of its name. It is a variety reaching a height from 5 to 6 feet, of free branching habit and is an early and continuous bloomer. The petals are of a pure snowy white, center yellow, buds borne on thin wiry stems well above the foliage. When planted against our dark New England evergreen background the contrasting effect of its masses of large swaying flowers is simply grand.

Equally tall and prolific in its floral produce proved Philadelphia, a semi-double variety, also of German

origin. The very large-sized flowers possess a conspicuous shading of rich reddish purple, with petals of lighter tints, their markings approaching a pure white, irregularly mixed in. Philadelphia is a dahlia for gay garden effects. Its gaudiness draws attention at the first glance.

Among the singles I cannot refrain from pointing out the excellent qualities of the variety Merry Widow. From early in July until the frost arrived the plants were covered with their large brilliant deep scarlet flowers. Merry Widow does not grow over 4 feet tall. Of very free-branching habit, the wealth of buds on long stems stands out boldly against the graceful dark green leafage. Of single scarlet varieties adapted for near and distant mass effects, I do not know an introduction approaching Merry Widow in size, substance and floriferousness.

Richard Rothe

Northeast Harbor, Maine.

Temperature for Mushrooms

Mr. John J. M. Farrell.

Dear Sir: I read with interest your articles in HORTICULTURE, and was specially interested in your article on mushrooms. I do not gather from your article your view as to what is the best temperature of the mushroom bed itself for fruiting. You say keep the temperature as near 50 degrees as possible. Do you mean the atmospheric temperature or the temperature of the bed itself. I have never seen any statement as to what the temperature of the bed should be after soiling. Presumably if the bed is at 70 degrees when soiled, it would remain that temperature for a time or average a little higher. Most writers say, keep the mushroom house temperature as near 57 degrees as possible. I am trying some experiments and would be glad of any information that will help me in my work.

Hoping to hear from you, I am

Yours very truly,

J. M. W. KITCHEN.

Replying to Dr. Kitchen's query I would say that good mushrooms can be grown in an atmospheric temperature of 50 degrees. This temperature produces fine, solid, shortstemmed mushrooms and the beds last longer in bearing when grown in this temperature. You say that most writers advise an atmospheric temperature of 57 degrees. That temperature will bring the crop in a little earlier, but exhausts the beds much sooner. Between the time of spawning and the first appearance of the mushrooms a temperature of 65 to 70 degrees can be maintained with beneficial effect in causing the spawn to run through the beds, but when the crop appears they should never be allowed to go higher than 50 to 55 degrees. As to the right temperature of the beds after soiling, it often happens after the surface of the beds has been covered with soil that the temperature of the beds rises to 75 degrees which will do no harm, but the bed should never exceed a temperature of 80 degrees. If the beds drop below 70 degrees you can often increase the heat by covering with some hay or litter, and sprinkling this with some water at 80 to 85 degrees, but not enough to cause the water to soak into the bed. However, when the beds get dry, do not hesitate to water them. The walls and pathways should be sprinkled with water, so that the atmosphere will not become dry.

A Canadian example

We hope our readers will not overlook the article which appears in our news columns this week in reference to the Canadian Express Company and the action taken by the Federal Railway Commission to put an end to their extortionate rates. Then turn the search-light on your own experiences and see whether there is not a need for a similar shaking up on this side of "the line."

A present need

The average of quality in flowers grown for the market at the present day is admittedly superior to that attained in the past. Better houses, improved varieties and more skillful growers in special lines have brought this about. But these flowers cost more to produce and with the average market value lower, the margin of profit for the grower has been narrowed down to such an extent that continued success is now only assured through watchful economy in operation and strict enforcement of modern business methods. Among the latter none are more important than the reasonable regulation of credits and the New England producers and wholesale dealers making Boston their center are doing the right thing in organizing for mutual protection in this respect. The "Old Farmers' Almanack" says "You cannot invest leather medals and expect a return in gold dollars." There was a period in the flower trade when that might have been done, but that time has gone.

Seed legislation

Representatives of the various seed trade organizations are in Washington this week, where, as mentioned in our issue of two weeks ago, they are attending a hearing on the Mann seed bill. We earnestly hope that the seedsmen will succeed in having the oppressive and impracticable features of this measure removed and modified so that should it finally become law it will answer its avowed purpose or else accomplish its defeat. Much of the unfavorable seed legislation which has been passed or sought to be passed in the various states has been undoubtedly due to the fact that legislators are unfamiliar with the complex conditions in the seed trade and even with the best of intentions are unqualified to frame statutes to properly fit the case. The seed trade has never been opposed to, but has been disposed to favor reasonable laws regarding seed purity and have always stood ready to give such information as would help towards legislation that would be fair for all. A uniform national regulation is greatly to be preferred to the incongruous, and often hostile, state enactments now in force, but let us have one that is reasonable and just and practicable in the standards demanded.

Flower Show schedule

In this issue will be found the full revised list of prizes offered in the cut flower department of the National Flower Show which is to open at Mechanic's Building, Boston, on March 25. The schedules of the various special societies which are co-operating with the S. A. F. in this big undertaking are included and ambitious flower growers can now begin to groom their most promising stock preparatory to producing blooms of prize-winning quality. The gentlemen who have had to shoulder the responsibility of making up this comprehensive schedule and look after the multitude of advance details required to get this affair properly under way have worked hard and conscientiously, meeting many unforeseen perplexities, and the trade in all parts of the country should rally to the support of this big National event with their floral contributions and their presence in large numbers in recognition of its all-important relationship to their industry. The happy merging of interests exemplified in the combined schedule of the various societies is further strengthened by the hearty co-operation of the Massachusetts Horticultural Society which has generously placed at the disposal of the National Committee its flower vases and other accessories for show uses. The complete schedule, including the plant section which was published about a year ago, and embodying all the rules, general and special, scales for judging, etc., will be ready for distribution within a day or two.

NEW AND INTERESTING PLANTS
AT RIVERTON.

The writer had the pleasure of a run through the Dreer conservatories at Riverton recently, in company with William J. Stewart, editor of *Horticulture*, and under the able ciceronage of J. D. Eisele and George A. Stroblein, a privilege greatly appreciated.

One of the most striking things in good shape at present is—

***Acanthus montanus*.**

which has leaves like a thistle and conspicuous spikes of white and pink flowers. This is probably the handsomest of all the *Acanthus* family—famous in painting and sculpture—and is distinguished not only for its handsome dark green, gold marbled spring foliage, but for its unique and beautiful inflorescence.

Fancy-Leaved Caladiums.

We got a glimpse of some of the new ones in the remarkable collection which the Dreer people have brought together. These are certainly most charming, and surprising in their wonderful variegation and delicacy or coloring. Crumarim, Faciero, McAdow, Tocatus, Pavuna and Rio de Janeiro were particularly conspicuous in this assembly of South American aristocrats.

***Polypodium glaucum cristatum*.**

Among the many fine new ferns this one strikes the visitor at once as one of the loveliest. The fronds are a unique blue, the edges of the pinnæ being gracefully waved.

***Sansevieria Zeylanica Laurentii*.**

An improvement on the well-known *zeylanica* having, in addition to the ordinary markings, a band of bright yellow along the margins of the leaves. A distinct acquisition and a splendid companion for the favorite house plant *Zeylanica*. We follow the Bailey spelling on this plant, which is a little different from Dreer's, but without pretending to assert which is the most correct.

***Phoenix Roebelinii* and *Cocos Weddelliana*.**

There is a doubt in the mind of the writer which is the most graceful of these two extremely graceful palms. Both Mr. Eisele and Mr. Stroblein refuse to commit themselves. They are like the old woman—first she thought yes, and then again, I dunno!

The 1911 Dreer Book.

We were presented with a copy of the 1911 catalogue. It is as big as a bible, and about as authoritative in its chosen field as human brains can make it. 288 big illustrated pages, colored plates galore, and a handsome cover. The book has few rivals in completeness and comprehensiveness in the world today, in seeds, plants and horticultural requisites, covering all departments except trees. A great feature is the cultural directions by experts such as William Falconer, Eben E. Rexford, Professor Bailey, T. Greiner, Mrs. Ely and many others—in addition to the unexcelled Dreer staff. This is a unique feature in a horticultural catalogue and is significant of the up-to-date enterprise and liberality of this leading American establishment. G. C. WATSON.

CARNATION BRIGHT SPOT.

The accompanying picture shows the new carnation that Nic Zweifel of North Milwaukee is introducing this season with signal success and we are glad to be informed that his advertisement in *HORTICULTURE* has al-

ready brought him a good many orders. Bright Spot is regarded in Milwaukee, where it is well-known, as the best dark pink on the cut-flower market. It had a big crop and a big run at top figures for Christmas.

A TRIP TO JOLIET, ILL.

The invitation given by Manager Pyfer to visit the greenhouses of the Chicago Carnation Co. at Joliet on Jan. 10th, met with a hearty response and notwithstanding the rainy weather, about fifty representative members of the trade made up the party. A bountiful repast was served upon arrival. Special interest was shown by all in the Washington carnation being introduced this year. Its delightful color, similar to a Lawson at its best, together with its size and freedom has made it a welcome addition. Two hundred seedlings were also of special interest and among them were several that give promise of value.

The Chicago Carnation Co. was organized in 1897 and to its efforts are due in a large degree the great strides made in the last decade in the development of the carnation. Visitors are always assured of a hearty welcome and an opportunity is here afforded at all times to see carnations of the best varieties properly grown.

**GEORGE A. STROBLEIN**

Assistant Manager, Henry A. Dreer Corp.,
Riverton, N. J.

NATIONAL FLOWER SHOW

Schedule of Prizes Offered in the Cut Flower Section

Full List of Prizes in the Plant Section Has Already Been Published in Horticulture, Feb. 5, 1910, Page 187.

ROSES.

Prizes Offered by the S. A. F. and O. H. and the American Rose Society.

For prize schedule for roses in pots and tubs see Plant Schedule. Div. A.

(To be staged Saturday, March 25th; judging at 3 P. M.)

Extract from rules and regulations of the American Rose Society.

All exhibits for competition must be in position by Saturday, March 25th, 1911, not any later than 3 o'clock P. M., except Roses shown in Division B and C, which are to be staged on Friday, March 31st, 1911, and to be in place not later than 1 o'clock on that day. The exhibits of all classes except Division B, to be open to public view Saturday, Sunday and Monday, the 25th, 26th and 27th days of March, 1911. Then on Friday, March 31st, Divisions B and C are to be staged.

Entries for all the Rose classes should be forwarded so as to reach the Secretary, Benjamin Hammond, Fishkill-on-Hudson, N. Y., not later than March 18th. An entrance fee of \$3.00 is required for all non-members. Any person paying dues is entitled to make entry without further fee.

Exhibits sent express prepaid will be taken care of, and arranged in the absence of the exhibitor, providing entry has been duly made, and the Secretary notified in advance. Express packages should be marked as follows:

Rose Exhibition	Boston, Mass.

DIVISION B.

(To be staged Friday, March 31st; judging at 1 P. M.)

Class 266.—Display covering 200 square feet of space, and not to contain less than 200 blooms, quality of blooms and effect to be considered and decorative green of any kind, including plants, permitted.

First prize, \$250.00; second prize, \$150.00; third prize, \$100.00.

DIVISION C.

(To be staged Friday, March 31st; judging at 1 P. M.)

Special Retailers' Prize.

Class 267. For the best and most artistic arrangement of 100 cut roses; any variety, or varieties may be used, and with such accessories as the exhibitor may desire.

First prize, \$100.00; second prize, \$50.00

DIVISION D.

(To be staged Saturday, March 25th; judging at 3 P. M.)

Classes 268 to 279.—For 50 American Beauty, Killarney, White Killarney, Richmond, My Maryland, Mrs. Jardine, Kaiserin Augusta Victoria, La Detroit, Mrs. Aaron Ward, Cardinal or Rhea Reid, Chateaufort or Mrs. Potter Palmer, any other disseminated variety.

First prize for each, \$30.00; second prize, \$20.00 for each, excepting American Beauty for which the prizes are, first \$50.00, second, \$30.00.

DIVISION E.

(To be staged Saturday, March 25th; judging at 3 P. M.)

Classes 280 to 290 inclusive.—For 25 American Beauty, Killarney, White Killarney, Richmond, My Maryland, Bride, Bridesmaid, Golden Gate or Uncle John, Sunrise or Sunset, Bon Silence, any other disseminated variety.

First prize for each, \$10.00; second prize, \$5.00, excepting American Beauty for which the prizes are, first \$25.00, second \$15.00.

DIVISION F.

(To be staged Saturday, March 25th; judging at 3 P. M.)

Hybrid Perpetuals.

Stems not less than 12 inches. Open to all. Class 291.—Largest and best collection, not less than six varieties or less than six of a kind.

First prize, \$20.00; second prize, \$10.00.

DIVISION G.

(To be staged Saturday, March 25th; judging at 3 P. M.)

Hybrid Perpetuals.

Stems not less than 12 inches. Open to Private Gardeners and Amateurs only.

Class 292.—Largest and best collection, not less than six varieties, or less than three of each kind.

First prize, \$10.00; second prize, \$5.00.

DIVISION H.

(To be staged Saturday, March 25th; judging at 3 P. M.)

American Rose Society's Medals and Certificates for Novelties.

Class 293.—Gold Medal for the best new rose not yet disseminated, whether of domestic or foreign origin. Exhibits to be judged by the official scale of the American Rose Society, and no gold medal to be awarded to any rose scoring less than 95 points.

Silver Medal is offered at the same time and under the same conditions for a novelty scoring not less than 85 points.

A Certificate of Merit is awarded to all novelties scoring 80 points, but neither Medal or Certificate will be issued until the variety is named and 12 blooms shown.

It is further ordered that the complete scores of all the entries in the competition be filed with the Secretary of the American Rose Society before the award of any medal is confirmed. No duplicate medal will be awarded. It is understood that though the award of the Gold or Silver Medal or Certificate may be made to the same variety from one exhibitor exhibited in different centers, only one medal will be delivered to the exhibitor.

The Executive Committee of the American Rose Society reserves to itself the right of selection of the judges who shall pass upon the exhibits in the competition for these medals.

CARNATIONS.

Prizes Offered by the S. A. F. & O. H. and American Carnation Society.

Extract from the rules and regulations governing exhibits.

All entries must be forwarded so as to reach the Secretary, A. F. J. Baur, Indianapolis, Ind., not later than March 18th. Exhibitors from a distance will please note the date, and mail accordingly. A charge of \$2.00 will be made for each entry made later than March 18th.

All exhibits for competition (except Section G and for Certificate of Merit) must be in position by 1 o'clock P. M., Tuesday, March 28th, at which time judging will begin. Section G will be staged Friday, March 30th. Exhibits not in position by the time specified will be debarred from competition. New varieties may be staged at any time beginning March 28th, for Certificates of Merit.

Exhibits sent express prepaid will be taken care of, and arranged in the absence of the exhibitor, providing entry has been duly made, and the Secretary notified in advance. Express packages should be marked as follows:

Carnation Exhibition	Boston, Mass.

All carnations except Section G

must be staged Tuesday, March 28th; judging at 1 p. m.

SECTION A.

Open to all varieties.

Class 294 to 302.—Vase 100 blooms each, white, flesh pink, etc., light pink, etc., dark pink, etc., red or scarlet, etc., crimson, etc., yellow or yellow variegated, white, variegated, any other color, etc. First prize, \$15.00; second prize, \$10.00; third prize, \$5.00; for each.

See Section H, Class 343, for Sweepstakes prize in Section A.

SECTION B.

Open to all varieties disseminated prior to July, 1910. 50 blooms to each vase.

Classes 303 to 326.—White Perfection, White Enchantress, any other white, Enchantress, Pink Delight, any other flesh pink, Rose pink Enchantress, Winsor, Winona, any other light pink, Mrs. Thos. Lawson, Afterglow, any other dark pink, Victory, Beacon, any other scarlet, Harry Fenn, any other crimson, Mrs. M. A. Patten, Variegated Lawson, any other white, variegated, any yellow, variegated, any other color, First prize, \$5.00; second prize, \$3.00; for each.

Three prizes may be awarded in Class 326.

SECTION C.

For Seedlings and Sports not disseminated prior to July, 1910. 25 blooms to each vase.

Class 327.—Sweepstake prizes for Classes 328 to 333 inclusive. First, \$25.00 and S. A. F. Silver Medal; second, \$15.00 and S. A. F. Bronze Medal; third, \$10.00.

Classes 328 to 333.—White, Pink, Red or Scarlet, Crimson or Maroon, Variegated, any other color. First prize, \$10.00; second prize, \$6.00; third prize, \$4.00; for each.

SECTION D.

American Carnation Society's Medals.

Class 334.—A Gold Medal will be awarded to the best vase of 100 blooms, any variety; must score not less than 90 points.

A Silver Medal will be awarded to the second best vase in this class; must score not less than 88 points.

A Bronze Medal will be awarded to the third best vase in this class; must score not less than 86 points.

SECTION E.

Class 335.—American Carnation Society Certificate of Merit. To be identical with our regular certificate class.

SECTION F.

Class 336.—Preliminary Certificate. To be identical with our regular certificate class.

SECTION G.

(To be staged Friday, March 31st; judging at 1 P. M.)

Class 337.—Exhibit of Carnation blooms, covering 50 to 100 square feet of space. Carnation or other foliage may be used if so desired. First prize, \$100.00; second prize, \$75.00; third prize, \$50.00; fourth prize, \$25.00.

Class 338.—Table Decoration, in which Carnations are the principal flower used. First prize, \$50.00; second prize, \$25.00; third prize, \$15.00.

Class 339.—Mantel Decoration, in which Carnations are the principal flower used. First prize, \$25.00; second prize, \$15.00; third prize, \$10.00.

Class 340.—Hamper of Carnations; other foliage permissible. First prize, \$15.00; second prize, \$10.00; third prize, \$5.00.

Class 341.—Basket of Carnations; other foliage permissible. First prize, \$15.00; second prize, \$10.00; third prize, \$5.00.

Class 342.—Bride's or Bridesmaid's Bouquet. First prize, \$15.00; second prize, \$10.00; third prize, \$5.00.

SECTION H.

Special Premiums.

Class 343.—Silver Cup, valued at \$30.00, is

offered by Hitchings & Co. as a Sweep-stake Prize in Section A.

Class 344.—\$25.00 in gold is offered by F. Dörner & Sons Co. for the best vase of 100 blooms Pink Delight.

Class 345.—A Gold Medal, or \$25.00 in gold is offered by Krieschell Bros. for the largest 12 blooms of Carnations, one or more varieties. Each bloom must measure not less than 5 inches.

Class 346.—Vase of 100 J. W. Riley, Rertermann Bros. offer. First prize, \$15.00; second prize, \$10.00.

Class 347.—A \$25.00 Silver Cup, or \$25.00 in gold, is offered by J. S. Heacock Co. for the best vase of 100 blooms Dorothy Gordon.

SECTION I.

For varieties disseminated season 1909-1910. 50 blooms to each vase. First prize, \$6.00; second prize, \$4.00.

Class 348.—Sangamo, prizes offered by A. C. Brown.

Class 349.—Conquest, prizes offered by Chicago Carnation Co.

Class 350.—Shasta, prizes offered by Baur & Smith.

Class 351.—Scarlet Glow, prizes offered by F. Dörner & Sons Co.

Class 352.—D. Gordon, prizes offered by Jos. Heacock Co.

Class 353.—J. W. Riley, prizes offered by The E. G. Hill Co.

Class 354.—Bon Ami, prizes offered by Geo. E. Buxton.

Class 355.—Mrs. C. W. Ward, prizes offered by Cottage Gardens.

Class 356.—Alma Ward, prizes offered by Cottage Gardens.

Prizes Offered by the S. A. F. & O. H. and the National Sweet Pea Society of America.

Extract from the rules for this exhibition.

Entries will be received up to 10 o'clock on the day previous to the exhibition. A great favor will be conferred, however, by earlier notification.

Entries must be made on the forms supplied by the Secretary, Harry A. Bunyard, 342 W. 14th St., N. Y. City.

All exhibits must be staged by 1 o'clock on Tuesday, March 28th.

Exhibits sent by express should be prepaid and marked as follows:

Perishable	For Exhibition	Perishable

Sweet Pea Exhibition Boston, Mass.		

SWEET PEAS.

Classes 357 to 364. 100 blooms each White, Pink, Pink and White, Light Pink or Salmon, Lavender, Red or Crimson, Waved or Variegated, any other color.

First prize, \$10.00; second prize, \$5.00; for each.

Classes 365 to 375.—50 blooms each of White, Pink, Pink and White, Light Pink or Salmon, Lavender, Red or Crimson, any waved variety, Variegated, Yellow or Primrose, Blue or Purple, any other color.

First prize, \$5.00; second prize, \$2.50; for each.

Class 376.—New Variety. 50 blooms. First prize, \$10.00; second prize, \$5.00.

Class 377.—New Variety. 25 blooms. First prize, \$6.00; second prize, \$4.00.

Retailers' Section.

Class 378.—Table Decoration. First prize, \$25.00; second prize, \$20.00.

Class 379.—Basket. First prize, \$10.00; second prize, \$5.00.

Class 380.—Bride's Bouquet. First prize, \$10.00; second prize, \$5.00.

Zvolanek Prize.

Class 381.—Eight or more distinct varieties, 100 in each vase. First prize, \$25.00; second prize, \$10.00.

Zvolanek Prize.

Class 382.—Ten or more distinct varieties, 25 in each vase. First prize, \$10.00; second prize, \$5.00.

These varieties must be named; renamed varieties excluded.

Arthur T. Boddington Prize.

Class 383.—Display of not less than ten varieties, 50 in each vase. Prize, \$25.00.

Lord & Burnham Prize.

Class 384.—Display of not less than 1000 blooms. Gold Medal.

R. & J. Farquhar & Co., Prize.

Class 385.—Bouquet of Sweet Peas with any green foliage—private gardeners or amateurs only. Prize, \$10.00.

Certificates of Merit will be awarded to exhibits of Sweet Peas, apart from the above classes, also for novelties superior to existing varieties.

ORCHIDS.

Class 400.—Best display and collection of Cut Orchids, each species or variety filling one vase, arranged for effect. Cut greens of any variety admissible in arranging of same. First prize, \$75.00; second prize, \$50.00.

Class 401.—Flowering stem of Cattleya, any species. First prize, \$3.00; second prize, \$2.00.

Class 402.—Flowering stem of Laelia, any species. First prize, \$3.00; second prize, \$2.00.

Class 403.—Flowering stem of Laello-Cattleya or Hybrid Cattleya. First prize, \$3.00; second prize, \$2.00.

Class 404.—Flower Cypripedium, any variety. First prize, \$2.00; second prize, \$1.00.

Class 405.—Flowering stem of Selenipedium. First prize, 2.00; second prize, \$1.00.

Class 406.—Six stems Calanthe, any variety. First prize, \$3.00; second prize, \$2.00.

Class 407.—Flowering stem Dendrobium. First prize, \$3.00; second prize, \$2.00.

Class 408.—Flowering spray Odontoglossum, any variety. First prize, \$3.00; second prize, \$2.00.

Class 409.—Flowering spray Oncidium, any variety. First prize, \$3.00; second prize, \$2.00.

Class 410.—Flowering spray Phalaenopsis, any variety. First prize, \$3.00; second prize, \$2.00.

Class 411.—Flowering spray Vanda, any variety. First prize, \$3.00; second prize, \$2.00.

Class 412.—Flowering spray of any Orchid other than above. First prize, \$3.00; second prize, \$2.00.

GLADIOLUS FORCED BLOOMS.

Open to All.

Class 420.—Dinner table, set for form decorated with Gladiolus blooms. First prize, \$10.00; second prize, \$5.00; third prize, \$3.00.

Class 421.—Artistically arranged Basket of Blooms. First prize, \$5.00; second prize, \$3.00; third prize, \$2.00.

Class 422.—Centre piece. First prize, \$10.00; second prize, \$5.00; third prize, \$3.00.

Class 423.—24 spikes not less than 4 large flowered varieties. First prize, \$5.00; second prize, \$3.00; third prize, \$2.00.

Class 424.—Display of named varieties of Gladioli to occupy 20 square feet. First prize, \$12.00; second prize, \$8.00; third prize, \$6.00.

Class 425.—Collection of Gladiolus Colvillei and Nanus types, 20 square feet. First prize, \$10.00; second prize, \$5.00; third prize, \$3.00.

Note:—Ferns, Asparagus, Smilax or foliage may be used for effect in all classes.

OTHER CUT FLOWERS.

Class 431.—Antirrhinum, 12 White Spikes. First prize, \$3.00; second prize, \$2.00.

Class 432.—Antirrhinum, 12 Yellow Spikes. First prize, \$3.00; second prize, \$2.00.

Class 433.—Antirrhinum, 12 Red Spikes. First prize, \$3.00; second prize, \$2.00.

Class 434.—Antirrhinum, 12 Pink Spikes. First prize, \$3.00; second prize, \$2.00.

Class 435.—Antirrhinum, largest display. First prize, \$15.00; second prize, \$10.00.

Class 436.—Freesia, 100 blooms. First prize, \$5.00; second prize, \$3.00.

Class 437.—Camellias, Display (blooms with foliage). First prize, \$10.00; second prize, \$5.00.

Class 438.—Display of Pansies. First prize, \$15.00; second prize, \$10.00.

Class 439.—Pansies, 100. First prize, \$3.00; second prize, \$2.00.

Class 440.—Display of miscellaneous bulbs or tuberous rooted plants excluding Hyacinths, Tulips and Narcissi. First prize, \$15.00; second prize, \$10.00.

Class 440.—Violets, bunch (100 Double). First prize, \$5.00; second prize, \$3.00; third prize, \$2.00.

Class 441.—Violets, bunch (100 Single). First prize, \$5.00; second prize, \$3.00; third prize, \$2.00.

Class 442.—Display of Violets. First prize, \$25.00; second prize, \$15.00.

Class 443.—Mignonette, 25 spikes. First prize, \$5.00; second prize, \$3.00; third prize, \$2.00.

Class 444.—Stocks, display of cut blooms,

not less than 6 vases. First prize, \$10.00; second prize, \$6.00; third prize, \$4.00.

Medals of the S. A. F. and O. H. will be awarded for meritorious exhibits.

The Massachusetts Horticultural Society will bestow Gold and Silver Medals on exhibits of exceptional merit.

THE TRADE EXHIBIT ANNEX.

This occasion being the first instance in which the experiment of a trade annex to a horticultural exhibition has been attempted, a few words of explanation may be desirable in order that the relationship of the two departments as constituted may be fully understood by exhibitors.

The exhibition as originally contemplated, was on the usual competitive and display lines of such horticultural enterprises. When, however, Mechanics' Building in Boston had been selected as the most eligible location, it became evident that there would be more room in this vast edifice than could possibly be utilized for show purposes. This surplus space included the entire area of the lower floor and the suggestion was made that this space might be advantageously devoted to the purpose of a trade exhibit annex on lines similar to the trade display at the S. A. F. summer conventions. The idea at once proved popular with the trade, who saw in the large attendance of trade visitors expected at the National Flower Show, a promising opportunity for spring business and space was rapidly contracted for. Later, on the urgent request of the plant exhibitors in this department, it was decided to move the plant section from the lower to the upper floor, adjoining but separated from the National Flower Show proper. Distinctive rules governing the management of the National Flower Show proper and the Trade Exhibit annex will be found in this schedule and exhibitors are urgently requested to read same carefully in order to avoid misunderstandings.

EXPRESS AND R. R. EXTORTIONS.

Canada has a Dominion Railway Commission much like an interstate commerce commission, but with wider powers. Telegraph and express companies are subject to it. The Canadian express companies are largely owned by the railroads, and have been charging extortionate rates. On complaint largely of fruit growers in the western part of Ontario, this Dominion Commission has been investigating the express business. Here is a sample of what they found. The Canadian Express Company when bought by the Grand Trunk Railroad in 1892 was valued at \$60,000. The railroad paid \$662,000—the \$600,000 being for the franchise. There are now over \$3,000,000 worth of stock outstanding, while the tangible assets are said to be \$212,719. During seven years this company paid nearly \$8,500,000 to the Grand Trunk Railroad—this being about 55 per cent. of its total revenue—taken from the Canadian people. As a result of its investigation the Dominion Commission has ordered the express companies to just about cut their rates in two. The robbery practiced all these years upon the Canadian people is no greater than that on this side of the line. The same conditions exist here. The money now being used to fight parcels post was stolen from the American people by the express robbers. We have all contributed to the fund now being used to deprive us of our rights.—Rural New Yorker.

The regular meeting of the Buffalo Florists Club will be held on Tuesday, February 8th, at which time nomination of officers for ensuing year will take place.

HERBERT H. BARNES, Prop.

Clubs and Societies

CONNECTICUT HORTICULTURAL SOCIETY.

Our first business meeting of the year was held on the 13th inst., at the County Building, Hartford. On the center table, President Huss had a handsome display of Chinese primroses, *Laelia anceps* and *Lycaste Skinnerii*.

George B. Baker, of New Britain, briefly outlined his method of primrose culture. President Huss recommended that the seed be sown in succession, in pans or boxes, in light soil, well firmed, up to a quarter-inch of the top of the receptacle; then put on glass, and prick off into other boxes when they show a few leaves. He said that a greenhouse is not necessary for the purpose; for they can be grown in frames. Keep them cool in the frames, and shade during the summer. Although generally grown from seed, they may be propagated by cuttings. Those plants exhibited were from seed sown in March.

At the chairman's request, the secretary read a pamphlet entitled, "A Visit to the Arnold Arboretum," by W. J. Bean, of the Royal Gardens, Kew, London. President Huss told of the great work of Professor C. S. Sargent, and of his own visit there some time ago, and of the genial personality of Jackson Dawson, a co-operator with the director.

HORTICULTURAL SOCIETY OF NEW YORK.

Monthly exhibitions will be held at the American Museum of Natural History, on the second Wednesday in February, March and April. A number of prizes will be offered at each. The first of these occurs on February 8th, and will be open to the public from 1 to 5. This will be devoted primarily to orchids and roses, for which the following premium list has been prepared:

Orchids: For Non-Commercial Growers; eight classes, as follows: *Cattleya*, *Laelia*, *Dendrobium*, *Oncidium*, *Cypripedium*, any other orchid and hybrid orchid, first prize, \$3.00, second \$2.00 respectively; collection of cut orchids, \$6.00 and \$4.00; col-

lection of cut cypripediums, \$3.00 and \$2.00.

Roses—Open to all. Best vase of a new rose not yet in commerce, silver medal.

For Non-Commercial Growers: 3 vases, 3 kinds, 12 flowers each, first \$6.00, second \$4.00; 12 Pink Killarney, 12 White Killarney, 12 Richmond, first \$3.00, second \$2.00 respectively; 25 roses, assorted, arranged for effect, first \$6.00, second \$4.00.

All are welcome to exhibit, whether members of the Society or not. For information and schedules apply to George V. Nash, secretary, Botanical Gardens, Bronx Park, New York City.

NEW JERSEY FLORICULTURAL SOCIETY.

The New Jersey Floricultural Society held their regular meeting, Friday, January 13th. Officers were installed by the Rev. L. H. Lightipe, the botanist of the Society, who said a few words of encouragement to each.

Competition for the silver cup closed with the following results:

Roses—1st, A. B. Jenkins, Albert F. Larson, gardener; 2nd, Thos. A. Edison, Frank Drews, gardener. Carnations—1st, S. M. & A. Colgate, William Reid, gardener; 2nd, Chas. Hathaway, Max Schneider, gardener. Seedling Carnations—1st, William Reid; 2nd, Albert F. Larson. Orchids—1st, Lager & Hurrell, Summit, N. J. Foliage Plants—1st, William Reid. Flowering Plants—1st, William Reid.

Competition for 1911 will commence at the February meeting and end at the December meeting. There will be two classes for orchids—one for the commercial growers, the other open to all except commercial growers. Two classes for roses, a separate class for American Beauties and a vegetable class. The Society will hold its annual smoker at the February meeting. WILLIAM REID, Sec'y.

NORTHERN INDIANA FLORISTS' ASSOCIATION.

The Northern Indiana Florists Association held their regular quarterly meeting at N. Manchester, Ind., Jan. 18. The local florists, Harry White and J. J. Martin, entertained the visiting members at the Young Hotel. After a sumptuous banquet, the meeting was called to order by the president, W. W. Dederick, in the parlors of the hotel. Many things were talked about to the mutual benefit of all present. Harry White of N. Manchester showed fine White Perfection and

Viceroy carnations; Johnson Flower Co. a collection of several varieties of carnations. Wagoner Flower Co., Columbia City, a rose-pink seedling of fine stiff stem, and Enchantress plants of *Sprengerii* and *plumosus* and ferns, also caladium bulbs.

A. J. WAGONER, Sec.

UNIVERSITY OF ILLINOIS.

The Illinois State Horticultural Society—R. O. Graham, Bloomington, president—in co-operation with the Illinois Florists' Association, the Cook County Truck Growers' Association, the Illinois Outdoor Improvement Association, the Lake Forest Horticultural Society, and the Horticultural Department, University of Illinois, began a ten-day institute on January 31 at the University of Illinois College of Agriculture. Dr. T. J. Burrill, vice-president, University of Illinois, speaking on the general subject, "Horticulture," gave the opening address. Mornings and afternoons will be devoted to lectures and instruction along horticultural lines. Illustrated lectures will be given during the evening sessions. J. F. Ammann, Edwardsville, has charge of the flower show and the exhibit of rare plants and cut flowers shown by the Horticultural Society of Lake Forest is under the supervision of the secretary, G. Geppert. August Geweke, Des Plaines, president of the Cook County Truck Growers' Association, is in charge of the display of vegetables.

Flowers are to be staged by noon, Feb'y 8. Ship in care of Geo. B. Franks, Champaign, Ill.

LADIES' SOCIETY OF AMERICAN FLORISTS.

The following committees have been appointed to act for the Ladies' Society of American Florists at the National Flower Show:

By order of Mrs. J. V. Phillips, Pres.
Prize Committee: Mrs. Chas. H. Maynard, Mrs. J. A. Peterson, Mrs. I. L. Powell, Mrs. R. Whitman.

Theatre Committee: Mrs. W. H. Elliott, Mrs. W. J. Stewart, Mrs. Peter Fisher, Mrs. B. Hammond Tracy.

Reception Committee: Mrs. Albert M. Herr, Mrs. Julius Roebis, Jr., Mrs. Chas. H. Totty, Mrs. J. C. Vaughan.

MRS. CHAS. H. MAYNARD, Sec.

PHILADELPHIA NOTES.

Henry F. Michell left on January 28 for a brief sojourn at Pinehurst, S. C. Between the catalog building and the rush is the right time for the seedsman to take a few days off. And there are worse places than Pinehurst!

Speaking of successful local violet growers W. C. Pray, Kinkora, N. J., deserves honorable mention in that connection. His Marie Louise are certainly very fine stock. They are handled by the S. S. Pennock-Meehan Co.

Visitors this week: S. J. Renter, Westerly, R. I.; W. C. Langbridge, representing Jerome B. Rice Co., Cambridge, N. Y.; H. H. DeGraaf, Leyden, Holland; C. W. Tabler, Martinsburg, W. Va.; Mr. Hogue, of Hogue-Kellogg Co., Ventura, Cal.

J. G. Slater, an experienced seedsman from the old sod, has secured an important position in the Dreer establishment in Philadelphia. He has already had about a year's American experience—with the great Boston house—Joseph Breck & Sons.

The daintiest calendar that has come to the Philadelphia office of Horticulture this year is that of the Conard & Jones Co. It has a beautiful color plate of their new pink canna, Mrs. Alfred F. Conard, which we commented on so favorably in our Dreer notes of last August. The calendar is an ornament to any office.

Our esteemed friend, James M. Thoires, the leading florist of Camden, N. J., visited Philadelphia recently. After a busy morning at Pennock-Meehan's, and other wholesale centers, he began to get reckless, and was nearly run over on Broad street by a sand sprinkling cart. Come again James. Come early and avoid the rush.

M. Rice & Co. are the meteoric florists' supply men! Last summer they put an extra story on their building at 1220 Race street. Now it is rumored that they have negotiations well underway for an entirely new property with twice the facilities. The rapid increase of business during the past two years is compelling them to still further extend.

On January 30th an interesting lecture on spraying was given at the Michell seed store by C. W. Tabler of Martinsburg, W. Va. This was well attended and was freely illustrated by all the latest devices and materials. The program for February in this series of lectures and discussions is as follows: Feb. 13th, "The Gladiolus and its Development," by I. S. Hendrickson, Floral Park, N. Y., president of the American Gladiolus Society; Feb. 27th, "Old Fashioned Flowers," by C. Townsend, Merchantville, N. J.

ST. LOUIS FLORIST CLUB.

The Florist Club will on next Thursday afternoon, Feb. 9, hold their annual carnation show in their club rooms in Odd Fellows' building. All new varieties will be shown and discussion on carnations will be the order of business that day. A large attendance is looked for.

John K. M. L. Farquhar of Boston is to lecture before the Gardeners' and Florists Club of Baltimore on Feb. 13th. Subject, "Gardens of Italy."

Dreer's Double Petunias

Our **DOUBLE PETUNIAS** for more than half a century have been the acknowledged standard. The strain this season is equal in high quality to its predecessors and is well known to the trade.

We offer fifteen distinct varieties, in strong 3-in. pots, which will quickly furnish an abundance of cuttings.

Strong 3 in. pots, 75 cts. per doz., \$6.00 per 100. The set of 15 for \$1.00.

SEED OF OUR

Superb Strain of Fringed Petunias

DOUBLE, 75 cts. per 500 seeds, \$1.50 per 1000 seeds.

SINGLE, 50 cts. per trade pkt., \$1.00 per 1-16 oz., \$1.50 per 1-8 oz.

These prices are for the trade only.

OUR CURRENT QUARTERLY WHOLESALE PRICE LIST offers a full line of seasonable Plants, Seeds, Bulbs, etc.

THOMAS J. OBERLIN, Sinking Spring, Pa.

During Recess

Dinner at Glen Cove.

The fifth annual dinner of the Nassau County Horticultural Society, which took place Wednesday evening, January 25 at Schleicker's Hall, Glen Cove, N. Y., was a most glorious and hilarious success. J. Austin Shaw officiated for the third time as toastmaster over a crowded house. There were fully a dozen New York visitors. The dinner was good, the speakers eloquent, the music exhilarating, especially the bag pipes, and it was not far from morning light when the affair broke up. Among the speakers were: Rev. J. W. Gammack, F. E. Conine, B. G. Davis and S. S. Butterfield, who spoke for the Press; W. H. Waite for the Yankers Society, Robt. Angus for the Tarrytown Society, Wm. Duckham for Morris Co. Society, H. A. Bunyard for the S. A. F., W. Rickards a song, C. H. Totty for The Queen of Flowers, R. F. Bowne for Glen Cove, W. A. Sperling for the Seedsmen, Arnold Koehler for the Nurserymen (also a song), W. E. Maynard for the Asso. of Gardeners, Senator Lenker for the Common People, Charles Plumb for the Ladies, and President Trepass for the Nassau County Horticultural Society. Andrew Wilson gave a vaudeville performance ably assisted by Robert M. Schultz. James Tough played the pipes, W. R. Kinnear gave a recitation and "there were others."

President Trepass took occasion before the toasts were started, to present to Mr. Duthie, the retiring presi-

dent, with a token of appreciation on behalf of the members. Mr. Duthie in accepting thanked them all very heartily. Mr. Duthie then also made a presentation which consisted of \$10 in gold which he had offered as a prize for the largest winner of first prizes at the monthly competition. President S. J. Trepass was the winner. There was also a second prize of \$5 which was won by G. Wilson, but to the regret of all he was unable to be present. C. H. Totty in the course of his remarks made mention of a new single chrysanthemum of his which he had named "Jack Everitt" after J. W. Everitt, ex-president of this society, also that he offered a gold and silver medal for the best exhibit of this variety at the fall exhibition.

Chicago Bowlers.

The Florists' Bowling Club made the following scores Jan. 25th:

CARNATIONS.		VIOLETS.	
Ayres	157 152 175	Stuppy	170 163 158
Krauss	156 136 145	Liebman	128 130 169
Goersch	154 114 133	Fr'dman	164 157 176
Schultz	144 200 139	Lorman	131 209 150
A. Zeck	211 178 182	Yarnall	192 164 168
ORCHIDS.		ROSES.	
Huebner	202 148 154	Win'son	141 147 153
Farley	200 140 177	Wolf	150 149 133
J. Zeck	157 166 145	Byers	135 155 106
Degnan	137 168 172	D'sm'nd	128 112 98
Graff	159 160 139	Foster	175 182 200

New York Bowlers.

Scores last Friday night were as follows:

Manda	122 128 194	Berry	120 115 129
F'r'ch	117 146 —	K'sler	139 110 117
R'ck'nds	109 155 211	Scott	163 142 136
Shaw	110 104 105	Ch'dw'ck	189 186 186
Nugent	64 61 83	Watkins	85 92 103

A special prize is promised for high

score on the afternoon of Monday, February 13. A match game between New York and Rutherford bowlers is contemplated.

St. Louis Bowlers.

Quite a few local florist bowlers took part in the national bowling tournament in the big Coliseum, St. Louis. Among them were: C. A. Kuehn, J. J. Beneke, George Schriefer, J. Meinhart, Carl Beyer and A. Y. Ellison. All made good scores but were hardly in it for prizes.

INCORPORATED.

Geneva, N. Y.—H. E. Merrel Nursery Co.; to conduct a general nursery and fruit business. Capital stock \$40,000. H. E. and E. H. Merrel of New York and H. L. King of Geneva, incorporators.

New York, N. Y.—The Old Dominion Industrial Co., capital stock \$300,000; to engage in forestry, agriculture and horticulture. Incorporators, W. J. Robertson, Stephen S. Anderson, W. R. Graham, all of New York City.

The North Shore (Manchester, Mass.) Horticultural Society's Show Schedule for 1911 has been issued. Three shows—Rose, Summer and Chrysanthemum—are to be held. The schedule has many new features as regards its general make-up, rules, scales of points and the various prizes offered. Copies will be sent on application to J. D. Morrison, secretary.

POTASH PRICES PLEASE FARMERS AND DEALERS

Sales to Them Increase.

The long published statement regarding the potash situation, signed by Mr. Bradley and others, contains some near truths, much argument and some opinions of attorneys, the latter being evidently influenced by their clients' presentation of their troubles. All of these need to be considered in connection with the following facts:

Mr. Robert Bradley did not sign the contract July 1, 1909, but according to Mr. Schmidtman it was signed by Mr. Peter Bradley in New York, August 18.

The statement of the Prussian Minister of Commerce in the German Parliament on July 7th contained the following:

"Being a man of caution, I have already drawn up a prospective law, which naturally I have not yet placed before the Bundesrat. Now everybody knows where he stands and can arrange the business accordingly. Whether the potash syndicate will be formed is not material. The question rather is, whether it will be possible to counteract the consequences detrimental to the general welfare."

It is quite inconceivable that Mr. Bradley should not know of this on August 18th, when the contract provided that "any export or import duties or other governmental charges which may hereafter become effective within the life of the contract shall also be paid by the buyer," was signed.

Under the circumstances the signing was a speculation which so far

has not been successful, but he made a bad guess on what was going to happen and Mr. Schmidtman out-traded him.

The other 68 buyers who see fit to cast their lot in with Mr. Bradley had contracts with the Sollstedt mine, which did not expire until 1917. These contracts guaranteed the average price paid by the two greatest American fertilizer corporations, and had they not consented to change them the mine (which had been purchased by another American corporation, the International Agricultural, of which Mr. Schmidtman is president), would have been obliged to pay the tax.

However, in September or October they saw fit to sign supplemental contracts in which they assumed all taxes and other governmental charges, German or American. They, too, made a bad guess and were outwitted by Mr. Schmidtman.

The trade lists show about 600 fertilizer manufacturers in the United States, so that only about one-tenth of them are represented in the present contention. Among those who are not asking the government for help in trying to get an advantage over their competitors is the Virginia-Carolina Chemical Co., the largest fertilizer corporation in America. On the contrary, the German mine Einigkeit, controlled by the Virginia-Carolina Co., recently joined the potash syndicate.

Mr. Bradley's ideas on conservation seem to consist mainly of "filler." The fact that the law requires an increase of at least five per cent yearly in the quantity mined proves that there is no

intention of limiting production. The conservation policy of the law is that the mining shall be so regulated that mines more favorably situated shall not export their products at a price lower than the average cost of mining and lower than that for which the Germans themselves can secure the same products.

We have every reason to believe that the German Foreign Minister did not assure Ambassador Hill that "it would not invalidate or impair the American contracts," but that the assurance was given that a provision would be made so that the American buyers need not pay more for their potash than had been paid in previous years. This promise was faithfully carried out and this provision stands in the law, but the buyers have never asked for the liberal reductions which it permits.

Mr. Bradley dramatically inquires: "How, therefore, can Germany afford to start a tariff war with the United States?" Germany has no such intention. A small but noisy fraction of the American fertilizer manufacturers is trying to convince the American Government that it ought to start a tariff war in order to get them out of a bad bargain.

In the meantime, the potash business is getting lots of effective advertising. Farmers and dealers are buying direct in greatly increased amounts at reduced prices, and are quite satisfied with the situation since it permits them to mix their fertilizers at home at much less cost than they can secure them in ready mixed form.

GERMAN KALI WORKS,
By H. A. Huston, Secretary.

HARDY RHODODENDRONS

When we say **Hardy** we mean Hardy in American Gardens where climatic conditions are no more severe than in Massachusetts. **We have them, the finest stock in the world of brilliant hybrid varieties which have stood the test of years in American Gardens for hardiness and vigor.**

Bagshot, England.

DUTY ON ROSA RUGOSA.

McHutchison & Co., of New York, who recently had two protests before the general appraisers, on the assessment of duties on certain imports of nursery stock, write us as follows in regard to the questions raised and the attitude taken by the Custom House authorities, which may be of interest to some of our readers:

"Protest No. 458973 was on French-grown, 1-year seedlings. We invoiced them at \$1.00 per 1000, but the duty was raised to 4c. each—as roses. Our protests on these items were sustained.

"Protest No. 458972 covered Rosa Rugosa seedlings from Holland, which were sold as 18-24 in. plants, entered at 25 per cent. ad valorem as shrubs, and raised to 4c. each—as roses. Our protest was overruled, so the duty of 4c. each remains.

"The treasury decision was to the effect that because the plants were three years old or more the duty on roses would prevail. You will see they decide on wrong premises. First, because we didn't ask for a duty of \$1.00 per 1000 on Holland seedlings but for a 25 per cent. ad valorem duty; second, because they decide that the Holland grown plants are three or more years old. As a matter of fact, they are 2 or 3-year seedlings—never more.

"We could, no doubt, win our case by proving that the Holland seedlings were not more than three years old, but this would mean a duty of \$1.00 per 1000. This would not be fair to the Government and the decision, we fear, would not hold. The right decision would make them dutiable at 25 per cent. as shrubs. They are used only as shrubs—not roses.

"It would be an easy matter to decide our case before some competent horticultural commission, but most difficult before Custom House authorities; first, because they do not know the stock under discussion; second, because they do not accept the evidence of authorities, and third, because their rules prevent them from considering evidence, which would decide our case beyond question."

NEWS NOTES.

Smith's Ferry, Mass.—Gallivan Bros., florists, of Holyoke, have purchased the Smith farm and will use it as a flower farm to supply their city store.

Monticello, Ind.—The steam heating apparatus for the Delphi Greenhouse blew up on Jan. 13th. Three of the employees were more or less injured, and the greenhouse badly damaged.

Aurora, Iowa.—R. R. Davis of Morrison has purchased an interest in the greenhouse of W. B. Davis & Co. L. S. Stocking and James Davis, former members of the company, have retired.

Freeport, Ill.—Directors of the Freeport Floral Co. were elected on Jan. 19th as follows: Dr. D. C. L. Mease, Judge W. N. Cronkrite, C. H. Little, Louis Bauscher and Adolph Pitterle. The range consists of from 40,000 to 50,000 square feet of glass.

ROSES FOR 1911

DARK PINK KILLARNEY. A sport of Killarney, similar in habit, but more highly colored than Killarney at its best. Grafted plants only, from 2¼-inch pots: \$20.00 per 100, \$180.00 per 1000.

LADY CROMWELL. A shell pink sport of My Maryland that for pleasing color is unsurpassed. A wonderful producer, and a color that sells. Grafted plants only, from 2¼-inch pots: \$30.00 per 100, \$250.00 per 1000.

PRINCE DE BULGAIRE. The best prices for cut flowers should be the standard for judging Roses, and this Rose has been the money getter. Strong and vigorous in growth, and with beautiful shell pink bloom. Grafted, \$20.00 per 100, \$180.00 per 1000. Own Root, \$15.00 per 100, \$120.00 per 1000.

DOUBLE PINK KILLARNEY. Originating with Robert Scott and Sons, who supply us the wood for grafting. Stronger in growth than Killarney, and with at least ten more petals. Grafted stock only: \$30.00 per 100, \$250.00 per 1000.

MRS. AARON WARD. By far the most pleasing of the yellow Roses now on the market. A general favorite. Grafted, \$25.00 per 100, \$200.00 per 1000. Own Root, \$12.00 per 100, \$100.00 per 1000.

MELODY. We have reserved for our orders own-root plants of this choice novelty. No grafted plants. From 2¼-inch pots, \$30.00 per 100, \$250.00 per 1000.

RADIANCE. Strong in growth and making plenty of stem. Cerise pink in color. Grafted plants, \$18.00 per 100, \$150.00 per 1000. Own Root, \$10.00 per 100, \$90.00 per 1000.

FINE FERNS

Ready For Immediate Retail Sale

We have an exceptionally fine and large stock of ferns in the following varieties,—first-class plants of exceedingly good value—plants that will please the most critical buyers, both in regard to quality and value.

NEPHROLEPIS ELEGANTISSIMA (Improved). The finest of this type—never showing a Boston frond; has not reverted in the last four years. Fine plants, 6-in., \$6.00 per dozen; 8-in., \$12.00 per dozen; large specimens in 12-in. pans, \$3.00 to \$5.00 each.

NEPHROLEPIS ELEGANTISSIMA COMPACTA. This bears the same relation to elegantissima compacta that Scottii does to Bostoniensis. It is a dwarf, compact plant, especially fine in the small sizes. Fine plants, 6-in., \$6.00 per dozen.

NEPHROLEPIS SCHOLZII. Fine plants, 3½-in. pots, \$2.50 per dozen; 6-in. pans, \$6.00 per dozen; 8-in. pans, \$12.00 per dozen.

NEPHROLEPIS BOSTONIENSIS. Extra strong plants, 8-in. pans, \$12.00 per dozen.

NEPHROLEPIS SCOTTII. 8-in. pans, \$12.00 per dozen.
SMALL FERNS FOR FERN PANS. Best and hardiest varieties assorted: Pteris Mayli, Wimsettii, Adiantoides, Aspidium Tsussimense, Crytomium falcatum, etc. Strong plants, 2½-in. pots, \$3.50 per 100.

CROTONS. Nice assortment, well colored, 5-inch, \$9.00 per dozen.

F. R. PIERSON CO., Tarrytown-on-Hudson, New York

CHICAGO NOTES.

About Town.

Anton Then's greenhouses is one of the busiest places in Chicago and his family are all in the trade. Together they represent the growers, the wholesalers and the retailers, the only family in this vicinity that covers all branches of the business, and each one successful.

Hoerber Bros., though among the newest in the trade, held back their crop at the holidays and now are selling roses and carnations to better advantage than they could have at that time. Their firm have under consideration the erection of a third range the coming spring.

An especially pleasing calendar with thermometer attached is being sent out by the Globe Greenhouses, Madison street and 53rd avenue. Another attractive calendar is that of the Chicago Carnation Co., showing the Washington carnation in colors, and it is in much demand.

Ed. Amerpohl of the Janesville Floral Co., Janesville, Wis., is in Chicago exhibiting his new invention, which promises to be of value to retail florists. It is a frostproof box of specially prepared paper composition and is used for the safe delivery of plants, especially in cold weather. The top and bottom are removable and the plants can be telescoped without any injury to foliage or bloom. A double box with air space is used in extreme weather.

You may depend on it for positive results, without fear of failure or dissatisfaction.

\$2.50 PER GALLON; \$1.00 PER QT.

"FUNGINE"

An infallible remedy for mildew and other fungus diseases. A clean, safe and easily applied spraying material, particularly adapted for the greenhouse.

\$2.00 PER GALLON; 75c. PER QT.

For sale by seedsmen.

Manufactured by

APHINE MANUFACTURING COMPANY
MADISON, N. J.

An unusual number of large floral offerings was sent to the Medina Temple, Jan. 31st, where the funeral of Mr. and Mrs. John G. Neumeister, who died with pneumonia upon their arrival in Pasadena, was held. One of the largest was an eight-foot spray of full-blown American Beauties, put up by A. Lang. The emblems of the order were particularly well executed and the whole was a good lesson to the florists who availed themselves of the opportunity to visit the Temple.

Personal.

H. C. Blewitt of Desplaines is still confined to his room. Clifford Pruner is back at his post after a week's experience with the grip.

Tom McAllister of A. Lang's is taking his vacation this week. Mr. Lang is showing his appreciation of the way his clerks took hold of the extra work during the holidays by giving them each a three days' vacation.

J. J. Stuppy of the Stuppy Floral Co., St. Joseph, Mo., who has been here for the past two weeks, says the florists' business in the southwest is developing rapidly. This firm will build four new houses 27x400 ft. in the spring to take care of their trade.

C. Philip, now private gardener for E. T. Swift of Lake Geneva, Wis., is going to Pittsburgh to take charge of the Greenlawn Conservatories at the home of H. J. Heinz. Mr. Philip is well known in Chicago, where he formerly lived. Robt. Simpson, formerly with Dr. Isham, will take charge of Mr. Swift's place.

Visitor: Wm. F. Kasting, Buffalo Park Commissioner.

NEWS NOTES.

It is stated that the largest commercial greenhouse on the Pacific Coast is planned by F. S. Stimson millionaire lumberman of Seattle. One large greenhouse is to be erected at once as the initial unit of a system that is to ultimately cover 10 acres of land situated near the head of Lake Washington.

Argus Haerens, Somergem, Belgium, reports under date of January 12th, 1911, that on the previous Sunday several of his azalea novelties were exhibited at the monthly meeting in Ghent Casino. "Winfried Haerens" obtained the most success. Everyone admired the variety for its large, vigorous, deep red flowers. "Sokvenir William Edgar" is almost like a double Mme. Van der Cruyssen, a little smaller, slightly fringed, with

NEW ALYSSUM VARIEGATED LITTLE GEM

This new Alyssum sported from the green little Gem has a white band around every leaf and is very dwarf growing, only 3 inches in height, and has a profusion of white flowers all summer. It certainly is a gem of all Sweet Alyssums and a wonderful plant. In a mass it looks like the glittering frost; as a single plant it is a Jewel among all other bedding plants. It will be indispensable for carpet bedding and will fill the long felt want of a dwarf white border, or for outlines between Alternanthera and all other plants for that purpose. I received honorable mention by the S. A. F. and O. H. at their convention in Rochester, Aug., 1910, and a Certificate of Merit from the Albany Florist Club at their Annual Flower Show, 1910.

Plants, 2 1/4 inch pots, \$1.00 per doz.; \$6.00 per hundred; \$50.00 per thousand. Sample plants will be mailed on receipt of 15 cents.

Orders filled in rotation, beginning, March 1, 1911.

JOSEPH TRAUDT

FIRE RECORD.

Bellingham, Wash.—The greenhouse and residence of Stuart Wile, 2427 Kulshan street, were totally destroyed by fire Jan. 12th.

Philadelphia, Pa.—The greenhouses of Christian Fresch at Richmond street and Erie avenue were damaged by fire recently to the amount of \$2500.

NEW BEGONIAS.

Among the plant novelties arousing the greatest sensation in Europe at the present time are the hybrids between the tuberous rooted begonias and Gloire de Lorraine. According to description and photographs the plants are covered with flowers as abundantly as in the Lorraine, but the blooms are several times larger and in all variations of color.

¶ The most profitless occupation in the world is to sit idly thinking of what you would do if you had another chance. Forget what you have done badly and do better in the future. Suppose you have had a bad lot of lily bulbs—that's no reason you can't do better. Perhaps if you reason it out, it was your own fault. Be reasonable. Get the best bulbs you can buy—the t's Horseshoe Brand Giganteum—take reasonable care of them, and you will have lilies you can depend upon. The reason why Horseshoe Brand are better than the average is the most simple thing in the world, and that is primarily that they cost more money. It takes money to get the best, but when the first cost of lily bulbs is small compared with the value of a good plant, what's the use in trying to get an eight cent bulb for six cents. Pay the price and get an article worth while and you will profit by it. Cold Storage Giganteum of Horseshoe Brand should be ordered now for delivery during 1911—you need them in your business—there is nothing better for funeral work and nothing more appropriate.

¶ Write for prices which are reasonable. Catalog free.

Not How Cheap
But How Good

Ralph M. Ward & Co.

Seed Trade

Mail Order Business Light

The mail order houses report business not quite up to last year's January. At the same time it cannot be said to be dull, and doubtless the balance of the season will show a sufficient increase to bring the grand total fully abreast of last year's volume. Considering everything, it can be said that the trade is reasonably busy.

The Cannery Convention.

We assume it is generally understood by those members of the trade who usually attend the Cannery Convention, that it is to be held at Milwaukee, February 6th to 10th, next. Those who have not already secured rooms should get busy without delay. The Hotel Pfister has been named as headquarters, but as all exhibits and business will be transacted at the Auditorium, where the machinery exhibits will be held, there seems no real need of a hotel headquarters. The members of the Canning Machinery and Supplies Association, and their employees, we understand are to receive free badges this year on registering. The association has entered into an agreement with the National Cannery Association, whereby they have paid the latter a lump sum, estimated sufficient to cover the number of badges to be issued to the members of the association and their employees. Notice has been given by the president of the C. M. & S. Association that a full list of members and their employees should be sent to Secretary J. A. Hanna at Cadiz, Ohio, for badges, and members should be careful to restrict their requirements to actual employees, and not abuse the privileges of free badges, which all are doubtless welcome to who are entitled to same.

About Seed Corn.

The situation affecting seed corn is still rather clouded and information which comes to us is more or less conflicting, still there is no doubt that a large percentage of the late varieties has been seriously damaged, and the extent of this damage will only be discovered when deliveries are actually made. By the way, it seems that shipments are very late this year, which is doubtless largely due to the fact that the corn has cured very slowly. We understand that one grower says he will not be able to ship his late varieties before March. This will doubtless cause considerable inconvenience and dissatisfaction, but perhaps it is unavoidable.

The Noll Reorganization.

We referred some weeks ago to changes which had taken place in the firm of J. F. Noll & Co., and expressed the opinion that the business would be continued under the management of Mrs. Noll, and her brother-in-law, Mr. R. C. Noll. There have been some intimations that the business was to be sold, or that important changes were

impending but we are reliably informed that these rumors are without foundation, that the business is in a very prosperous condition and has shown a marked gain in volume for December and January over the same months of last season. As we understand, there is ample capital behind the business, we can see no reason why it should not continue to grow and prosper.

A Sensible View of the Seedsmen's Position.

We present for the edification of Mr. Fullerton and the foolish children generally who beat the alarm gong so loudly about the seedsmen's disclaimer which has borne the brunt of assault by the greatest lawyers of both the old world and the new, for fifty years, and come through the fire as a fundamental expression of justice and equity, and is seldom questioned now-a-days except by people who have a twist of some kind in their heads, the following clipping from a contemporary, written by a market gardener of New York State:

It seems an innate trait of human nature to blame the other fellow when we fail. Under no circumstances must we blame ourselves. When we fail in growing a crop it is usually the seedsman who gets the hot end of it. If a grower makes a big bill of hot manure for cucumbers and the cucumbers are not long and smooth for want of water, the seedsman is blamed for selling a poor variety.

It is quite impossible to make some gardeners understand that they have made any mistake in plowing, preparing and fertilizing the soil or in locating the crop on the poorer soil for the variety. When failures come the seedsman must be blamed.

I have known Self-Blanching celery seed taken from the same bag and sold one pound to each man on Long Island, the plants planted on adjoining land, to produce celery on one side of the fence as fine as one ever saw, while on the other side of the fence the celery was pithy and good for nothing.

I have known cauliflower to head finely with one gardener and to be a failure with another. In fact, for a number of years I tried to grow cauliflower successfully but gave up in disgust. But I did not blame the seedsman from whom I obtained the seed.

I have known one gardener to get a fine crop of peppers from seed raised by himself, while a neighbor who bought plants from him failed entirely and questioned whether or not the plants were grown from the same seed.

I have known one gardener to grow forty-eight barrels of peas from a bushel of seed and another gardener to grow from the other bushel, out of the same two-bushel bag, but twenty-four barrels.

One gardener asked me why his onions this year were not as good as last year when the seed came out of the same bag and came up equally as well. Another asked why his Earliana tomatoes were rough and flat in one field and as fine and perfect as could be in another field when the plants were from the same seed bed. So that after all it is not always the seedsman who is to blame for our failures.

GEO. C. WATSON

The "Thoughtful Congressman."

The following clipping from the San Jose Mercury shows a lovely public sentiment in that part of California which draws much of its revenue from the seed trade:

Editor Will F. Blake of the Gazette (Gilroy, Cal.) has received a consignment of seed from our thoughtful Congressman, Hon. E. A. Hayes, and these will soon be distributed in both town and country.

Editor Will F. Blake, and the "thoughtful congressman" evidently think themselves in the Lydia Pinkham class—"benefactors of the hu-

man race"! If they paid for it out of their own pockets, we would probably put them in jail for leze majesty!

A Valuable Cabbage.

One of the vegetable novelties given unstinted praise in Burpee's Annual for 1911 is the New Early Cabbage "Copenhagen Market" introduced by Hjalmar Hartmann & Co., of Copenhagen, Denmark. Another introduction by this firm which received a very fine reception here was Red Cabbage "Danish Stronghold," sent out in 1906. Of Copenhagen Market, Mr. Burpee says:

"It is undoubtedly without a rival as the finest large, round-headed early cabbage in cultivation. The type is thoroughly fixed, the heads maturing all at the same time. The heads average about ten pounds each in weight, are very solid, with small core and of fine quality. It matures as early as Charleston Wakefield, and will give a much heavier yield per acre than that popular variety."

Notes.

Utica, N. Y.—The Davis Nursery and Seed Co. is in its new location at 55 Blandina street.

Columbus, Ohio—Mier-Shoemaker Seed Co., capital stock \$50,000. Andrew Shoemaker, incorporator.

Chickasha, Okla.—J. E. Farrington has opened a seed store in the Ben Johnson Building on Chickasha avenue.

Boston—Messrs. Chas. H. Breck and J. K. M. L. Farquhar have gone to Washington to attend the hearing on the Mann seed bill.

Sturgeon Bay, Wis.—The John B. Davis Seed Co. has been incorporated by John B. Davis, August Reiboldt, Joseph Schauer and Joseph Wolter.

St. Joseph, Mo.—Faber Seed Co., incorporated, capital stock \$15,000. Incorporators, Jas. B. Faber, Wm. P. Graham, Thos. P. Graham and Horace Stringfellow.

Asbury Park, N. J.—The R. V. Crine Seed Co., incorporated with a capital stock of \$400,000; to deal in seeds, food products, etc. Incorporators, R. V. Crine, J. H. Becker and J. N. Grant.

Turney, Mo.—J. F. Althouse is to open a seed store in the Turney Mercantile Co. building. His business has previously been conducted at his farm near here. A line of farm implements and hardware will be carried.

Lompoc, Calif.—The Lompoc Seed Growers' Association, a selling organization composed of California farmers, has been organized. This association will control about 75 per cent. of the California mustard crop and nearly the whole of the California seed beans. John Houck, A. G. Baalam and F. O. Harris are organizers and officers.

Full particulars of the damage done in New York City by the great dynamite explosion of February 1, have not reached us. It is reported that the entire front of Peter Henderson & Co.'s new building was blown to pieces. The majority of the seed houses are located down town within the limits where the greatest general damage was done and we can hardly expect that others exposed equally with Henderson have escaped. We hope, however, that later accounts will show the injury to have been light and in no case personal.

THE "SPENCER" TYPE OF SWEET PEAS

Burpee's Special Re-selected Stocks for 1911.

"SPENCER" SWEET PEAS are a great specialty with us! We were the first to grow the seed in America—the stock having been entrusted to us before introduction, even in England, of the original Countess Spencer. We have grown "the original Beauty" and its many "sportive" children with painstaking care each season since. These are but few other growers who can supply an equal assortment of True RE-SELECTED "SPENCERS" that are uniformly of such choice quality. Seedsmen and Florists can see how superior our stocks now are by the trials at FORDHOOK FARMS next June or July, while those who may be in California are invited also to inspect the growing crops at our FLORADALE FARM in the beautiful Lompoc Valley. Every planter's garden, however, is really a trial ground and we shall be quite content if any "Doubting Thomas" will send us only a portion of his order and note the difference in character of flowers produced!

 You can buy so-called "Spencer" Sweet Peas at half our prices—but the result will be only disappointment—and when in flower you will surely admit that you would gladly have paid even double our prices to have had the BURPEE-QUALITY of the TRUE SPENCER TYPE!

	Per pkt	Per oz	Per ¼ lb	Per lb

BURPEE'S BLUE LIST FOR 1911

A complete catalog of 146 pages, for Florists and Market Gardeners,—will be mailed upon application, but only to those entitled to receive it. Our Retail Catalog is free to everyone.

W. ATLEE BURPEE CO., Philadelphia

SEED TRADE NOTES.

Another pure seed bill, known as No. 10, has been introduced in the Ohio legislature by Representative Huber. The measure is practically the same as a number of other proposed measures that have come up in the last few years. Ohio seed interests are opposed to any bill that involves a penalty for marketing a small percentage of impure stock, on the ground that it is impossible to consistently grow absolutely pure seed.

For many years the headquarters of Messrs. Carter & Co. have been located in High Holborn, London, but increasing business has necessitated a move into the country. The whole of the staff is now comfortably ensconced in the new buildings at Raynes Park. In the midst of a twenty-five-acre plot a handsome and commodious building has been erected. The new workshop is undoubtedly a model of its kind; it will be a standing advertisement for the firm for years to come.

CATALOGUES RECEIVED.

E. E. Stewart, Rives Junction, Mich.—Wholesale Trade List of Gladioli for 1911.

Geo. Wittbold Co., Chicago—Blotter and 4-page list of florists' plants, roots, bulbs, etc.

George Stevens, Peterboro, Ont.—Folder Canadian Unleached Hardwood Ashes. Good stuff.

George R. Pedrick & Son., Pedricktown, N. J.—Surplus Price List of Vegetable Seeds, for the trade only.

Good & Reese Co., Springfield, O.—Spring Trade List. Roses and general collection of plants, bulbs, etc., hardy and tender.

Vick & Hill Company, Rochester, N. Y.—High Grade Aster Seeds. This is a special offer for spring of 1911 and worthy of perusal by the trade.

W. Atlee Burpee & Co., Philadelphia, Pa.—"Wholesale Catalog for Seedsmen" and Dealers only who buy to sell again." You can't beat it. Send for a copy.

L. E. Williams, Exeter, N. H.—Price List of Collected Native Trees, Shrubs and Plants, 1911. Native material is coming to its own and this is a good list.

J. K. Alexander, East Bridgewater, Mass.—Catalogue of Dahlias. Mr. Alexander claims to be the "Eastern Dahlia King." It is a pretty fine catalogue and we see no reason to "insurge."

Daniel A. Clarke, Fiskeville, R. I.—Clarke's Hardy Flowers for Spring, 1911. As usual, a neat and comprehensive pocket guide to the really good things in hardy shrubs and perennial border plants.

Johnson Seed Co., Philadelphia, Pa.—Wholesale Price List of Vegetables and Flower Seeds—principally the former. Cover shows a hilarious old gentleman—stage farmer—balancing on his hand a tomato nearly as big as his head. It must be a crackerjack. Contents normal.

C. C. Morse & Co., San Francisco, Cal.—Garden Guide for 1911. A splendid list of plants, trees and vegetable and flower seeds; 132 pages, profusely illustrated. Covers in colors—Golden Cream corn and Tom Watson melon on front, and sweet peas Marie Corelli, Ethel Roosevelt and W. T. Hutchins on back.

Weeber & Don, New York City—Catalogue of Garden, Farm and Flower

**The Man-who knows-always Sows
MICHELL'S "DISTINCTIVE" SEEDS**

PRIMULA OBCONICA GIGANTEA

Fresh Crop Seeds Just Arrived.

In colors separate: Pale Lilac, Pink, Deep Crimson, Pure White, and all colors mixed. Trade Pkt. 50c.

Write Today for Our 1911 Wholesale Catalog

Henry F. Michell Co., 518 Market St., PHILA., - - PA.

Seeds for 1911. A complete and attractive publication, worthily representing this well-known house. Cover in pale pea green with lettering in red and white, quite distinctive in appearance. Portrait of the Don tomato on back cover page.

Arthur T. Boddington, New York, N. Y.—Florists' Winter and Spring Catalogue of Seeds and Bulbs for Forcing and Planting. A business publication from a popular business house. The "Seal of Quality" adorns the title page and crowns the product sent out to those who properly read and assimilate the facts communicated between its covers.

Conard & Jones Co., West Grove, Pa.—New Floral Guide, 1911. Rose My Maryland in natural colors occupies the place of honor on the title page of this interesting catalogue. The reproduction is very true to nature as is that of American Pillar rose which is the subject of an insert plate. The contents are of a character to interest and enthrall the amateur rose lover.

McHutchison & Co., New York—"Just Bays." This is an album of 37 fine half-tone illustrations of bay trees singly and by the acre—standards, pyramids and columns—bound in purple covers and should be in the hands of every wholesale house, with whom this firm deals exclusively, selling nothing to retail dealers. This book should be an incentive to the wholesale houses to push the sale of Bays more than they have done, through their salesmen, travelers and catalogues. The demand is increasing enormously.

Henry A. Dreer, Philadelphia, Pa.—Dreer's Garden Book, 73rd Annual Edition, 1911. This is a work of nearly 300 pages and is an excellent exponent of the methods and business of this noted establishment. The cover is simple and dignified, gold letters and green plaque on pale gray background with no attempt at display, but there are a number of inserts showing flowers and vegetables in natural colors. The arrangement of illustrations and text is beyond criticism and an immense amount of valuable information for the garden lover is given in concise and readable style. Many new things of sterling promise are listed. The plant department will be found especially interesting.

The Blue Book.

Howard M. Earl and W. Atlee Burpee are to be congratulated. We place Mr. Earl first in this instance, as we have reason to believe the whole book is a child of his brain—with the exception of the introductory page, which is in Mr. Burpee's own inimitable style. This is certainly one of the achievements of the year, in seed trade circles. Over forty pages are devoted to florists' specialties—and no florist can afford to overlook this splendid compendium of all the latest and best. We hasten to accord our small tribute of merited esteem and admiration for this admirable publication.

NEW CROP FLORIST FLOWER SEEDS

Vinca separate colors and mixed, per ounce 50c.; Verbena Mammoth in colors or mixed, per ounce 60c.; Salvia Splendens, per ounce \$1.25; Bonfire, per ounce \$2.00; Cobaea Scandens, Stocks, Lobelia, etc. Write for wholesale catalogue.

ST. LOUIS NOTES.

Mr. and Mrs. M. Mitchell, late of
Little Rock, Ark., have bought from
W. C. Smith the store lately vacated
by John Quinn at 1000 N. Grand Ave.
and will open a first class floral es-
tablishment there this week.

A. S. Halsted is out for the nomina-
tion of mayor of Belleville. Mr. Hal-
sted has had some experience as
mayor and should receive the nomina-
tion and then be elected. He is a
prominent member of the Florist Club
and the members wish him success.

Visitors in town the past week were:
Ed. Winterson and James Stevens, of
Chicago florists' bowlers, attending
the annual session of the American
Bowling Congress; W. W. Randall, of
A. L. Randall & Co., Chicago; Mr. and
Mrs. Paul Berkowitz, Phila., Pa.; A. C.
Canfield, Springfield, Ill.; E. W. Guy,
Belleville, Ill.; G. Ford Ferwerda, rep-
resenting Van Meerbeek & Co., Hille-
gom, Holland.

Flower Market Reports

BOSTON

There has not been any very noticeable change in market conditions here as seen in a general way for the past two or three weeks. But the extreme scarcity of roses which still exists practically unabated fixes the conviction on the wise observer that when the pendulum swings the other way, as it is liable to do under certain weather movements, the situation from a surplus standpoint will be just as acute as it is just now from a famine standpoint. Of carnations this is undoubtedly more true as an actuality due almost any day. Already the carnations are quite abundant, and as a rule amply sufficient for all needs; but prices hold their ground unchanged thus far. Violets, which were beginning to move nicely, are held up just now by the keen wintry weather. There is a marked increase in quality and quantity of tulips, daffodils and other spring bulb flowers. Gardenias are scarce and high. Cattleyas abundant and inferior. Welch Bros., who are a good barometer of New England's wholesale flower trade movements, report the best January business in their history.

BUFFALO

Trade busy. Spring-like weather the past week and very little scarcity in the cut-flower line except on roses. Roses of all colors and grades are still on the short side. Spring flowers come in more plentiful and have sold well, especially Trumpet Major daffodils. Lilies were a good help out, also the light varieties of carnations and prices have held firm. Violets, lily of the valley and peas were in better demand than a week previous. Very few Beauties are seen and those are of poor quality. Richmonds are fine and not enough can be had at times. Too much smilax and not enough other greens.

CHICAGO

There is slight change in the condition of the market from that reported last week and what little there is, is not in the way of improvement. The shortage of stock is a universal cry here, the growers having brought everything possible into bloom for the holidays and finding their plants off crop. The cloudy weather during December had made it necessary to use all helps possible to bring out the blooms and the reaction is now following. One of the largest rose growers has not cut any Killarneys for weeks and does not expect to before March 1st. The carnation situation is almost as bad and there is no probability of any immediate change. Beauties are in short supply also though some growers are cutting a fair quantity, especially in the medium lengths.

Miscellaneous stock, while not especially abundant in any one line, aggregates sufficient to help out. A couple of weeks of sunshine would be more than appreciated by the growers in and about Chicago.

Sweet pea growers are pleased so far with the season's business. The scarcity of other flowers is in their favor and also the fact that the stock is excellent.

CINCINNATI

Business the past week lacked the snap and tone that is usual for this season. Receipts of

New Forcing Irish Rose "MELODY"

The very best yellow rose today, a splendid introduction, a beautiful color, good sized buds and long stems, an exceptionally free bloomer, as free in winter as Maryland is in summer. To appreciate and know its value one should see it growing. A visit to our growers (R. Scott & Son) will convince everyone of its wonderful future.

roses and carnations were very light, but sufficient for requirements. A few days of warm sunny weather helped to increase the supply a fraction, the latter part of the week. Beauties are cleaning up nicely with the shorter and medium grades having the preference. In other roses white are most plentiful. Carnations are producing more freely than roses. There is an excellent call for white and Enchantress, so that it is not always possible to supply these. The market is well supplied in all other lines except daffodils and tulips of which there is

only a limited quantity. Paper whites and Roman hyacinths are cleaning up nicely at fair prices. Sweet peas meet with a ready sale. Receipts of both single and double violets are sufficient, and while clearance are made price is lower than it should be. Callas and longiflorums are in moderate supply and active demand. Lily of the valley is abundant and finds a poor market. The supply of asparagus is ample and the call for smilax is improving.

Flower Market Reports

(Continued from page 153)

Unfavorable weather conditions for counter sales and an increased supply of so-called spring flowers has eased up the stringent situation previously reported. Your editorial comparison of market reports was read here with great appreciation and pointed out two very much needed reforms growers and wholesalers should adopt. First, a careful study of these reports as they appear in the various trade papers. Second, the establishment of some system which brings about a quick interchange of goods, avoiding thereby glut in one place and shortage in another. It is a difficult problem at first sight but can be mastered nevertheless after a little study.

NEW YORK Tendencies in this market are decidedly downward on most cut flower staples, roses alone excepted, and even these are no longer in the famine class as they were two weeks ago. Teas are gradually coming back again into crop, but American Beauties are not abundant and there are many inferior buds. Violets are the main reliance of the street man on all mild days and per contra the street man are the main reliance of the violet for the store demand would not absorb one-tenth of the daily product, which is now rapidly augmenting. Carnations are increasing right along and prices are dropping. Almost nothing was heard of "McKinley Day" here. The cattleya market is stocked full and the quality of the blooms averages inferior, especially on Trianaes which run very small in a majority of receipts. Gardenias are again scarce, bulbous flowers and other spring blooming material abundant and moving rather sluggishly.

PHILADELPHIA The scarcity which has been so pronounced recently, has been relieved a little the past week by the lengthening of the days and improved tone in production after the crop exhaustion of the holidays, and the market is now in pretty fair shape. Demand keeps up satisfactorily. American Beauty roses are a little more plentiful. Killarney is of very good quality and the supply is good. Maryland comes in as a good second in this class. White roses are still in strong demand, but the supply is not over abundant. McKinley Day caused a small flutter in the carnation market, but this event coming as it

did, on a Sunday, the dealers did not profit from the observance of the day as they otherwise might. The quality of carnations is excellent and they are if anything a little more abundant. Gardenias continue scarce and the prices remain rather stiff, with the demand good. Orchids are scarce. The principal subjects at present are Cattleya Mossiae, Oncidiums, Vandas and Dendrobiums. Violets are plentiful and demand improves, but there is likely to be some dearth for Easter as it comes rather late for this crop (April 16). Easter lilies remain scarce and the short supply of these helps the demand for callas. Most of the minor items remain unchanged. There is no dearth of greens, all the staples being in good supply. There is much complaint about the "Mexican Ivy" proving a poor shipper and some of the dealers declare they intend crossing it off their list (promising and novel as it has been), on account of the losses and dissatisfaction.

ST. LOUIS Everything in the market had a splendid run last week, the scarcity of the week previous still continuing in roses and carnations and prices remaining high on these. Roses have been so scarce that nothing in teas are sold under \$10 to \$12.50 for fancies and \$5 to \$6 for poor stock. Carnations are still up, although McKinley Day, coming on a Sunday did not bring much extra business. The mid-season school graduating caused quite a demand for stock of all kinds. Violets are having their time just now. More than the demand can eat up are coming in daily and the market has an over supply. All bulb stock sells well. Lilies and callas bring \$15 per 100.

Indianapolis, Ind.—Edwin E. Temperley, 5306 College avenue, may erect additional glass near Broad Ripple.

OBITUARY.

J. N. Bailey.

J. N. Bailey, formerly manager of the Buffalo Cut Flower Co., died on Sunday, Jan'y 29, after a year's sickness. He was popular with the craft and many floral remembrances were sent to the bereaved family by members of the trade.

Mrs. John Young.

Mrs. Minnie E. Young, wife of the late John Young who was president of the C. Young & Sons Co., St. Louis, Mo., died on Sunday Jan. 29, after an illness of two months. Mrs. Young was not actively engaged in the business but retained her husband's interest. Mrs. Young was well-known among the local trade as she was head of the outflower department before her husband's death six years ago. She leaves four children and a host of friends in the trade to mourn her loss.

The funeral took place from her late residence, 4928 Forest Park boulevard, St. Louis, on Jan. 31st. The floral display was large and most beautiful.

NEW ORLEANS NOTES.

Abele Bros. are busy preparing for the spring rush of shipping orders of plants and shrubbery, of which they have a large stock.

An unusual sight for New Orleans was the simultaneous window display of four of our leading downtown stores which consisted of quantities of Cattleya Trianae plants in full bloom and of splendid quality.

There is a treat in store for one who visits J. A. Newsham's house of Liliun longiflorum, 100 per cent healthy plants from Louisiana-grown bulbs; these bulbs have been grown so successfully by our city florists the past four years, that it will not be long before the imported article will be discarded altogether.

An ordinance now before our city council known as the "Fly Ordinance" requiring the placing of all manure in air tight receptacles and forbidding the open use of same, promises to work quite a hardship on our city florists and truckers, unless amended considerably before its final adoption. For the purpose of having the ordinance modified a committee composed of P. A. Chopin, J. C. Quinette, and Herman Doerscher were appointed to appear before the council committee having this matter in charge.

Landscape Gardening

PROF. CRAIG

A course for Home-makers and Gardeners taught by Prof. Craig and Prof. Batchelor, of Cornell University.

Gardeners who understand up-to-date methods and practice are in demand for the best positions.

A knowledge of Landscape Gardening is indispensable to those who would have the pleasantest homes.

Cocoanut Fibre Soil

Fertilizer, tonic, moisture and everything necessary for bulbs, seeds, plants, lawns and especially your fruit trees, young and old. Nature's grower, not forcer.

20th Century Plant Food Co., Beverly, Mass.

HELP WANTED

A YOUNG MAN of good habits, with some knowledge of greenhouse work, can get a job at \$25.00 a month with board and room, in vicinity of Boston, by applying to S. S., care HORTICULTURE.

ORCHID GROWER WANTED—Must be a good potter and worker. Good situation for the right man. Send references to A. Pericat, Orchid Specialist, Collingdale, Pa.

SITUATIONS WANTED

GARDENER.

Florist, 36, married, no children; well versed in any kind of flowers, vegetables, greenhouse and landscape work; wish position in private place; capable to handle men; first class recommendations. Alexander Buteaux, gardener, Noroton, Conn.

FOREMAN wants position; at present employed by wholesale grower in Massachusetts. A No. 1 grower of Christmas, Easter and bedding plants, also small ferns and stove plants. Life experience in Europe and U. S.; only responsible position will be considered; correspondence confidential; can start thirty days after engagement. Large salary expected. T. T., care HORTICULTURE.

SUPERINTENDENT or head gardener wants position; open for engagement March 1st, 1911, or later; 20 years' experience in the growing of flowers, fruits and vegetables under glass, as well as out of doors. Married. Only first-class position will be considered. State salary and give full particulars in first letter. Private interview desired. T. D., care HORTICULTURE.

Greenhouse assistant, good man in rose house; other experience; understands fires; best references. Y. T., care HORTICULTURE, Boston.

FOR SALE

SPLENDID OPPORTUNITY for a wide-awake party to acquire a well established retail florist business. Stock and good will to be sold, greenhouses to be let. One of the best places in Massachusetts for a progressive man. Present owner has too much business on hand. Moderate cash capital required. Apply HORTICULTURE, Editorial Dept.

FOR SALE—Special 16 x 18 and 16 x 24 double thick glass in "A" and "B" qualities. Buy now and save money. Write FARSELSKY BROTHERS, INC., 50 Montrose Ave., Brooklyn, N. Y.

MISCELLANEOUS

WANTED TO LEASE, with privilege of buying, 10,000 to 20,000 feet of glass, dwelling house, and some land. Wanted to take possession April or later. X, care HORTICULTURE, Boston.

Chicago, Ill.—The American Horticultural Co. will increase their capital stock from \$5,000 to \$25,000.

WHAT THE USERS SAY

Test at 14° Below Zero with Heavy Wind Blowing

FERGUSON BROS., Omaha, Neb., write as follows: It might interest you to know the results obtained with the Kroeschell Greenhouse Boiler and Kroeschell Piping system.

We have just had a night of 14 deg. below with a stiff wind blowing and we carried the house at 52 deg. with the boiler at 170 deg. The house is piped for 50 deg. and as we are using a cheap grade of slack, the result speaks for itself.

We were told by the dealer when we ordered the coal that we could not burn it, so we bought a car of good coal to help along if the slack would not give results, but it was not necessary. The Kroeschell Generator certainly helps the circulation and the new method of piping for hot water is a surprise to some of the greenhouse men in this vicinity.

THE PRACTICAL GREENHOUSE

By practical we mean **every way practical** — practical plan — practical heating, practical ventilating, practical benching, but above all a practical construction.

To be a thoroughly practical construction, it must be lighter than any other, more durable than any other, more attractive than any other. The U-Bar meets and beats them all. It is the **greenhouse practical**. The catalogue makes it very plain just why.

Manufacturers — Importers — Originators

ROSES FOR 1911

DARK PINK KILLARNEY. A sport of Killarney, similar in habit, but more highly colored than Killarney at its best. Grafted plants only, from 2¼-inch pots: \$20.00 per 100, \$180.00 per 1000.

LADY CROMWELL. A shell pink sport of My Maryland that for pleasing color is unsurpassed. A wonderful producer, and a color that sells. Grafted plants only, from 2¼-inch pots: \$30.00 per 100, \$250.00 per 1000.

PRINCE DE BULGAIRE. The best prices for cut flowers should be the standard for judging Roses, and this Rose has been the money getter. Strong and vigorous in growth, and with beautiful shell pink bloom. Grafted, \$20.00 per 100, \$180.00 per 1000. Own Root, \$15.00 per 100, \$120.00 per 1000.

DOUBLE PINK KILLARNEY. Originating with Robert Scott and Sons, who supply us the wood for grafting. Stronger in growth than Killarney, and with at least ten more petals. Grafted stock only: \$30.00 per 100, \$250.00 per 1000.

MRS. AARON WARD. By far the most pleasing of the yellow Roses now on the market. A general favorite. Grafted, \$25.00 per 100, \$200.00 per 1000. Own Root, \$12.00 per 100, \$100.00 per 1000.

MELODY. We have reserved for our orders own-root plants of this choice novelty. No grafted plants. From 2¼-inch pots, \$30.00 per 100, \$250.00 per 1000.

RADIANCE. Strong in growth and making plenty of stem. Cerise pink in color. Grafted plants, \$18.00 per 100, \$150.00 per 1000. Own Root, \$10.00 per 100, \$90.00 per 1000.

WASHINGTON

Dark Pink Sport of
ENCHANTRESS

DO not get this variety confused with the Lawson-Enchantress which we discarded some years ago. Washington-Enchantress differs from Rose Pink Enchantress as night from day. Washington is a sport from Enchantress with the best cerise or beautiful dark pink color—the Lawson shade—with stem, habit and productiveness same as Enchantress, and keeping qualities of the best. Stock is clean, healthy and well rooted. Guaranteed satisfactory in every respect.

\$10 per 100; \$20 per 250; \$75 per 1000 C. O. D.

Flower Shops as Seen by an American Horticulturist in Europe

Flowers appeal to all of us. Poets have sung their praises, writers and painters have idealized them. In love they convey their message of hope and desire; in pleasure, they inspire us with their beauty; in sorrow they silently express the feelings of the bereaved parent, relative or friend. So it is not surprising that the most beautiful, attractive and prosperous shops, seen in all the cities of the world are the flower shops. When looking in the windows of these shops, one is impressed with the fact that floriculture the world over has made great advancement during the past decade. The writer, having visited nearly every country in Europe, during that period, finds it very interesting and instructive to note the great improvement in culture shown by the growers, and in displaying and selling their products by the flower shops.

The public demand and appreciation of quality in the flower; the taste, skill and artistic boxing, etc., by the retail dealers; rapid transportation for long distances in cool receptacles; the influence of trade papers, leading to closer business relationship; the plan of telegraphic exchange of orders by retailers; the large houses which supply every accessory required by the retailer—these all contribute to the general improvement. Thus the retailer in all large cities, such as London, Paris, Berlin, Vienna and New York have equally beautiful stores, and, practically the same grade of flowers, and the same modes of dressing them in and out of season.

As to product—our American carnationists have given Europe a splendid flower, and they grow it well. Elegant specimens of Enchantress, white and pink, Winsor, Mrs. Patten, Mrs. Bradt and others can be seen and bought all over Europe. Roses such as Richmond, Bridesmaid, Bride, Mme. Cusin, Killarney, Chatenay, Mme. Testout (very fine) and Augusta Victoria are also well grown. Besides these, in mid-winter and towards spring roses are shipped from Italy and the South of France from out of doors. But these show lack of finish in foliage and flower owing to distance and having to be cut as buds and opened in water.

Towards spring and during most of the summer the retailers have a splendid supply of hybrid and hybrid tea roses, grown in cold house, and from out of doors. Grown in this way they are much finer than anything we can produce in America. They also excel us in bulb forcing in every way. Lilacs also, as grown here in Dresden are simply grand—fine long stems, splendid flowers just ready to open and evidently grown cool. Charles X leads in favor but their whites and lilacs are also fine and show the same careful culture. These keep a week in the house after purchasing. This is something our growers should follow, as the buyer wants something that will last a few days for his money. In addition there is an abundance of all the various flowering plants, such as cyclamen, orchids, daisies, azaleas, rhododendrons, bulbs of all kinds, and palms and ferns. The retailer has beautiful flowers and plants in abundance to supply his customers at reasonable prices, and in quality and quantity to satisfy the most fastidious.

John H. Taylor

Dresden.

Angraecum sesquipedale

The illustration shows *Angraecum sesquipedale* flowering in the collection at Duke's Park, Somerville, N. J. (A. A. McDonald, Supt.)

The plant carried eight flowers in all. Seven are seen in the picture and one bud opened later. Flowers are ivory white and have a "spur" twelve to fifteen inches long. Its native country is Madagascar.

The orchid houses at Duke's contain many specimens in good shape, being ably grown by William Garden.

Phalaenopsis

This very fine orchid species is perhaps not as extensively grown as it should be. One of its varieties—*Phalaenopsis amabilis*, has been known for over 150 years, first under the name of *Angraecum album*, later Linnaeus called it *Epidendrum amabile*. It was not until 1825 that Dr. Blume established the new genus and, owing to its resemblance to the moth, called it *Phalaenopsis amabilis*.

Until this time the only plants imported into Europe came from Java and not until some time did any arrive from the Philippines. The first collectors of *Phalaenopsis* not knowing how to pack the plants correctly had great difficulty in getting them to Europe alive. This has now been largely overcome by establishing the collected plants on pieces of wood before shipping.

The culture of the various species is similar. They like a moist atmosphere of from 70-80 degrees by day during the growing season with a few degrees less during the winter. The plants are best grown in shallow pans or baskets, in a mixture of fibrous peat and sphagnum moss. Care must be taken to give them lots of drainage consisting of pieces of charcoal and broken crocks. They are shade-loving plants and are easily injured by the sun's rays. Position has a lot to do with growing *Phalaenopsis* successfully. Often changing them from one end of the same house to the other will

show a marked difference. When you find a place that suits them, keep them there. Where no special house is available for them, they can be grown in the stove-house.

Phalænopses are profuse bloomers and can be kept in flower 6 to 7 months in the year by cutting the flower-stems below the lowest blossom. They will speedily emit side branches which will produce flowers shortly after. The best varieties to grow are: *Phalænopsis amabilis* and *Phalænopsis Schilleriana*. During the last few years a variety has been imported from Java under the name of *Phalænopsis Rimestadiana*. The flowers are like those of *Phalænopsis amabilis* only larger and the foliage a light green. The writer's attention has been called by a large grower of *Phalænopsis* to the fact that this variety will do much better in a little cooler temperature than that required for the other varieties.

Rutherford, N. J.

J. Muller

Fruit and Vegetables Under Glass

FIG HOUSE

To get the maximum crop—or I might say crops—from fig trees they should be started this month or first week in March. The fig is one of the most remarkable trees we have, fruiting on both old and young wood. Being deciduous and the main crop coming from the young wood many neglect the first crop, which is borne on last year's wood. These small fruits can be seen during the resting period, and as soon as a warmer temperature is given them, they begin to swell as the young growth appears.

Another peculiarity of the fig is its flowering period, the fruit being half matured before the hidden flowers open. It is essential that figs have plenty of room on the trellis or, if bush form trees are used, pruning must be done to such an extent as to allow light to penetrate among the massive foliage. When starting keep a temperature of 40 to 45 degrees with usual advance by day and sun heat. Syringe every morning and again after noon if there is sun heat.

VINES BLEEDING

As the sap commences to flow again through the vine and pressure is put on to the cells bleeding at some point which has been cut is not uncommon unless the necessary precautions have been taken. It is obvious to any one what this bleeding means to the vine. It is similar to a cut on a human being; the life blood or sustaining properties are getting away, consequently weakening the growth coming from the spur which is bleeding or if there are several on one rod the whole vine will be weakened. The chief cause of this is late pruning. Probably the sap has commenced to flow again and the cut does not get a chance to heal over. In the case of very early vineries, pruning is better done as soon as the leaves commence to fall, which not only helps the vines to rest but gives time for the cut to seal over. Late vineries should be pruned as soon as the crop is cleared off.

Preventive methods are best adopted for it often proves a fruitless task to try and stop a cut bleeding after it once commences. A special preparation known as Styptic is on the market (manufactured by Thompson & Son, The Vineyards, Edinburgh, Scotland), for applying to the cuts soon after they are made. This seals them over, thus preventing bleeding. Shellac and varnish have also been used, being less effective. It is useless to apply these unless the surface be dry. They

are useless in a case where bleeding has already commenced. Burning the wet surface with a red-hot iron has been called barbarous by some and will injure an eye if used carelessly, but will sometimes dry up a wound so that Styptic can be applied. A small potato pushed over the cut has been known to answer the purpose. Several other remedies have been tried at various times, but when once the mischief is started the chances of stopping it are few, until the leaf expands and uses the sap by transpiration, assimilation, etc.

DISBUDDING POT PEACHES AND NECTARINES

Trees which have set their fruit will now be making growth and some of the growth buds must be removed to prevent overcrowding. Trees should be gone over about three times removing a few fruits each time. Select those buds which have room to grow, keep the center open and keep an eye to the shape of the tree. This is when shape should be made, not by using the knife in winter.

CABBAGE, CAULIFLOWER AND BEET

A flat or two of the above can be sown now and will come in before those grown in the garden. Seedlings can be grown in flats or pots until they are a good size and later transferred to frames to finish. Good results can be obtained from First and Best and Early Snowball cauliflowers, Early Jersey Wakefield and Early of Earlies cabbage, Early Egyptian and Edmand's Early beets. The short-rooted varieties of beet should be grown in preference to the longer ones, being better to handle.

CUCUMBERS

Cucumbers planted the first of the year will now be showing surface roots and will need a top dressing. Give a covering of about two inches, keep young growths tied in and stopped at three or four leaves. Fumigate on very first appearance of fly, which will be making itself known now.

George H. Benson

Mr. Benson's next notes will be on the following: Late Houses; Tomatoes; Mushrooms; Parsley; Peppers. Also we expect shortly to present an article by Mr. Benson on Bees and Their Uses.

Temperature for Mushrooms

Mr. Farrell is right in saying that a temperature near 50 degrees at night is about right for the successful culture of this crop.

One might go further and say that the conditions in a carnation house in winter are ideal for a good crop. Many times we see fine mushrooms coming spontaneously in the benches, and the most wonderful results it has been my good fortune to have, were raised under the benches in a house devoted to carnations. A higher temperature will bring the crop a little quicker if it ever comes, but the chances are against it; a more suitable temperature which might in this case also be called atmosphere, will bring longer crops of better quality.

An employer who has a fine estate in Massachusetts once wrote me in regard to the many failures his gardener had with this crop, and he was told that there was nothing more certain than the uncertainty of a mushroom crop, and it was a pleasure to find afterwards that this did some good. Very many people think that all we have to do is "to sow the seed" as it were and all else will follow.

Dr. Kitchen is a student well known in horticultural pursuits and we are glad to note that he takes up the difficult cases. Let us hope that in future he will give us the benefit of his experience—experiments rather.

There is a suspicion in the mind of the writer that the proposition is akin to that of the good wife when she sets bread to raise, sometimes it doesn't.

E. Cooper

Illinois.

Seasonable Notes on Culture of Florists' Stock

COELOGYNE CRISTATA

This orchid is at its best during February and March and is one of the most useful as a florists' cut flower. Its culture is comparatively simple. A common error is in trying to force it in too warm a temperature. A house where the temperature stands at from 50 to 55 degrees at night will give flowers of a finer quality than when grown warmer. Keep the plants that are in flower rather dry at the roots, for the bulbs have enough of stored up energy to keep the flowers in a fresh state for some time. When these orchids are through flowering any necessary repotting should then be done, but they do better when left undisturbed until the compost has become exhausted, or when they become too dense, and have outgrown their pans or baskets. The best compost is fibrous peat and fresh sphagnum in equal parts. Use plenty of drainage so the compost will not become sour. After repotting place them where they can be kept shaded and rather moist until new roots push into the compost. They should have a free cool atmosphere, with syringing overhead once or twice a day, never allowing them to become dry at the roots in their growing season. Give manure in a weak form about once a week during the season of growth. Don't shade too heavily.

BOUGAINVILLEA FOR EASTER

Plants that are to be in bloom for Easter should now be in a sunny house with a night temperature of about 50 degrees, until they have developed some root action. As the new growth appears the temperature should be slowly raised to 60 or up to 65 degrees if necessary. While under this forcing they will need water in ample quantities both at the roots and in overhead sprinkling. When they get into fairly good growth they will need careful watching so that they do not dry out too quick, a condition which is very liable to produce a few flowers prematurely instead of a full set of bloom. When they are in bloom they will be better if removed to a house several degrees cooler. A gradually hardening off will keep them in order. After the plants have made a fair start weekly doses of liquid manure will be very beneficial.

GARDENIAS

To make these plants bloom freely from now on be careful not to have the roots in too wet or dry condition and guard against all extremes in temperature, which will surely result in the loss of buds and foliage turning yellow. It is indispensable to keep the atmosphere in a fairly moist condition with a night temperature of from 65 to 70 degrees. Now with the increasing sunshine, and if the plants are in a vigorous condition, they should have a top dressing. There is nothing better than cow manure one part, new soil two parts, but don't be too generous in applying this mulch. A half-inch at a time, and then every now and then as they may need it will be better than to indulge in one heavy application. Insects such as greenfly and mealy bug should never be allowed to get a headway. Careful syringing with a good pressure will help to keep them in check. Give frequent fumigation for greenfly. While fire heat is at its maxi-

mum, if stock is needed, propagate now. Insert where there is a bottom heat of 80 degrees and by daily sprayings and keeping close with shade in about 3 or 4 weeks they will have sufficient root to pot off. When potting them use a light sandy soil, and with about a week of nursing in the way of a moist atmosphere with some shade you will have good stock well started.

LILIES FOR EASTER

On all bright days syringe often—say two or three times. Lilies, when making rapid growth in a strong heat, will consume water in great quantities and should never be allowed to suffer for the want of it, while on the other hand they must never be kept in a soggy condition, for no plant will more quickly resent an over supply of water at the roots. As the buds are swelling liquid manure will prove a benefit if applied with caution. Lilies that are just showing their clusters of buds will need but very little forcing to be right for Easter, a temperature of 60 degrees being high enough for the present, but if the buds don't appear by the first days in March they will need a brisk forcing temperature, 70 or 75 degrees. Buds that are in sight the last of February will give time enough for a few days' sojourn in a cool house which always gives gratifying results. It takes about six weeks from the time buds first show until they are fully developed, but of course the weather conditions either help or hinder. Fumigate once or twice a week so as to keep that ever-persisting aphid in check.

PANDANUS

For the filling of baskets and other receptacles, and for other uses too numerable to mention, small and medium sized Pandanus Veitchii are always in demand. We are at the season now when this plant can be most successfully propagated. Where there is bottom heat available the small suckers can be severed from the old plants and placed in sand where they will root quickly. When rooted they can be potted in a mixture of fibrous loam three parts, and well rotted cow manure one part. Grow on in a temperature of from 65 to 70 degrees at night. The best color effect is obtained by judicious exposure to the light, when it is apparent that the plants will stand it.

PELARGONIUMS

Give these plants a situation with sufficient space to enable the air and light to reach all the foliage. Water can be more freely applied from this time on. Until they come into flower they will be helped materially by the use of manure water. Give a night temperature of 50 to 55 degrees. Avoid keeping them too wet, and see that the atmosphere is not kept too close and humid. Never let greenfly get troublesome; fumigate often so as to keep them in check.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: Carnations; Ardisias; Ficus elastica; Gladiolus; Hybrid Perpetual Roses; Lily of the Valley in Pots and Pans for Easter.

Cover Illustration

The view presented on our cover page this week furnishes, we think, an excellent suggestion as to the arrangement of blooming orchids for decorative effect. We have frequently inspected orchid houses, well-stocked with beautiful material but, with no attempt at arrangement, the individual plants and flowers were all there was to admire and splendid opportunities for the display of taste and ability to make a fitting setting were neglected. The view shows an orchid corridor in the Royal Nurseries of Stuart Low & Co. at Enfield, near London, England.

not help towards lasting popularity for the custom. After all the best interests of the carnation growers lie in the steady and regular use of their favorite every day in the year and the more the people come to love the carnation for its own sake the nearer we shall come to this realization.

The mid-winter rose crop

Mention has been made in some of our recent flower market reports of the good fortune coming to certain rose growers whose crop of bloom had matured too late for the holidays but struck it just right for the subsequent weeks of scarcity and continuous good market prices. It would not do, of course, to recommend that all rose growers should bear this in mind and act accordingly next year although it is much to be desired that the crop should be divided—a condition which we all realize would be difficult to bring about. However, it is safe to assume that, as this peculiar scarcity of roses in late January has been experienced with fair regularity for many years, any grower who can without jeopardizing his earlier or later crops so time his midwinter cut as to come in from January 15th on, can safely count on finding a strong market.

United States Standard seeds

The Sixth Section of the Mann Pure Seed Bill provides that whenever the Secretary of Agriculture shall have made public any standards of seed and bulbs, it shall be lawful for seed and bulbs complying in all respects with the standards so published by the Secretary of Agriculture to bear upon the label, together with the name of the article, the inscription "United States Standard." Then follows the penalty clause of fine not exceeding \$1,000 for using such inscription, or words of similar import in any way as descriptive of any seed or bulb, subject to the provisions of this Act which does not comply with the standards so published by the Secretary of Agriculture. The possibility of such legislation being enacted at once raises numerous questions. What shall the standards be? How shall the seedsman know when it is really safe for him to use the inscription "United States Standard"? Shall he maintain a laboratory for the scientific examination and testing of the three or four thousand varieties of seeds passing through his hands, or take the alternative of having the stocks he sells set down as being inferior to government standards? Would the short interval between the time of harvesting seeds and the sowing season be sufficient for cleaning, drying, so that they will not mould when bagged for shipment,—most of our flower seeds now being imported, and for testing as to germination and other qualities demanded by the government standard? Would not the expense of such testing add materially to the actual cost of the seeds to the user, and would he feel any more sure of the "United States Standard" seeds than those he now buys from his pet seedsman? The questions are inexhaustible, but we would not weary you. We will rest for the present by asking only one more. Would the fact that the cultivator had the assurance of the government that his seeds were free from the adulteration of weed or other untrue seeds, of a high standard of vitality and true as to variety prove of prime importance to him? It is common knowledge that the most ordinary strains of both flowers and vegetables are usually of the strongest germination and possess the greatest vigor. Garden seeds are almost always free from weeds and true to their kind. What the cultivator values far more is excellence of type or strain, which is quite beyond the reach of the proposed Mann Bill. Every intelligent florist knows that the finer strains of pansy, stock, primula, cyclamen, petunia, etc., are much more delicate than the common strains, and the same is true of most of the vegetables.

McKinley Day and the carnation
McKinley carnation day seems to be "dying a natural death." This was to be expected as the inspiration back of the movement in its inception was largely local and the popular spontaneity required to make a permanent success of so sentimental a project has never been strongly in evidence. Activity on the part of the florists to create a demand and a supposed readiness to take advantage of the opportunity to increase carnation prices for the occasion certainly did

After Adjournment

"The lack of prompt payments is the canker-worm of the flower business." This remark was made by an observant wholesale dealer recently and it struck us as being worthy of repetition. What do you think?

"I started out the other day to see if I could make some collections," quoth a prominent retail flower dealer. "Took a list of bills aggregating thousands. Collected less than \$60." Flower buyers should be educated up to better habits in the settlement of florists' accounts

We overheard a remark yesterday by one of our observant philosophers which set us a-thinking. He said: "Here's the Rose Society hollering about 'A Rose for Every Garden, a Bush for Every Home,' and then they go to work and advocate 4 cents duty on every rose we import. What do you know about that?"

If those congressmen who resent the seedsmen's opposition to the free seed distribution and consequently sit up late nights concocting retaliatory legislation could only forget their huff, something reasonable might be done in the way of seed laws. There has been entirely too much ill-temper displayed in the discussions on this subject.

We read in the Philadelphia Inquirer that one of the assistants of the Bureau of Botany of the Department of Agriculture at Washington has been conducting a search around Philadelphia, during the past two weeks, for a black rose reputed to have been developed in that neighborhood. Business must be rather slack in the Bureau of Botany?

BRITISH HORTICULTURE.

Preparing for the International Exhibition.

Further details are now available of the International Horticultural Exhibition which will be held in the grounds of the Royal Hospital, Chelsea, in May, 1912. It is announced that the chief horticulturists of the Continent, the Colonies, the United States, Japan and Great Britain, have notified their intention of exhibiting. "Every endeavor will be made," a leading official recently stated, "to render this unique collection as instructive as possible to the general public as well as to the cultivator. The improvements which have been effected in plants of late years will be demonstrated so that it may be generally understood how these improvements have been attained. We shall also draw attention to the best methods of training young horticulturists in this country, on the Continent, and in America. I have seen exhibitions in various parts of Europe, and I believe we shall be able to surpass them all. The most wonderful and brilliant flowers gathered together from all parts of the world and carefully cultivated will be shown; but of course I cannot even hint at the novelties which will be staged. These must remain the secrets of the growers until the time for

This beautiful token was presented to Sam Murray of Kansas City by the employees in his store at the opening

of his new place. It is a model of good taste and charming simplicity in arrangement.

revelation comes. A gentleman in Cornwall promises to show eighteen plants which are entirely new to this country. As showing the increased interest taken in the growing of flowers, it may be stated that at the last international exhibition in 1866, there were 3,389 members of the Royal Horticultural Society; now there are over 12,000."

A New Organization.

There has lately been established the North of England Horticultural Society for furthering the gardening interest in the northern part of this country, with headquarters at Leeds. The object of the new association will be to promote and encourage every branch of horticulture in the North of England, by the arrangement of periodical meetings, shows and lectures, and by any other means approved by the Council. It is not intended that the work shall begin and end with some attractive shows, but that the operations shall be of an educational character. The services of the Rev. J. Bernard Hall, who organized a successful fruit congress at Hexham last October, have been secured as secretary. Mr. J. Hastings Duncan, M. P., who presided at the inaugural meeting, said that to place the society on a firm basis required a great deal of

work, energy and enthusiasm, and he was glad to say that they had found those who were willing to give their time and energy in building up the society. The society extended from Trent to Tweed. The secretary announced that it was intended to issue a monthly circular in order to keep the members in touch with the society's activities.

W. H. A.

ACIDANTHERA BICOLOR.

Editor HORTICULTURE:

I see in HORTICULTURE Frederick Moore writes of *Acidantha bicolor* as a hardy inmate of the garden. It comes from the Cape, I believe, and with me it doesn't stand any cold. The first frost kills the foliage and flowers. It sounds as if he was writing for England where it may be hardy.

Yours truly,

E. S. MILLER.

(Mr. Moore did write of English conditions and we should have qualified his statement before giving it dissemination here but overlooked it.—Ed.)

Illinois, Feb. 6, 1911.

I could hardly think of doing without this splendid horticultural magazine; it fills a long felt want on this subject.

J. S. F

CLUBS AND SOCIETIES

FLORISTS' CLUB OF PHILADELPHIA.

The February meeting of this club was well attended and there was an excellent display of new and meritorious carnations. W. H. Taplin was the speaker of the evening. His paper on "Carnations of Today," we hope to find room for at an early date. It is well worth reading, as Mr. Taplin is a close and intelligent observer and has had special opportunities for giving us the latest on this timely subject—being at the helm in the Dailedouze establishment—a noted place for carnations. The Joseph Heacock Co. showed a vase of Pink Killarney roses very well colored with strong stems, very fine foliage and large flowers. Richard E. Lange sent a vase of White Enchantress, Pink Enchantress, and Pink Imperial carnations, showing fine culture. Peyton M. DeWitt showed three vases of his new carnation Pennsylvania—a cerise which was favorably reported on by the committee and characterized as a good commercial variety. He also exhibited seedling number 17, a white tinted with pink, seedling number 13, a dark cerise, both of which look very promising. Evenden Bros., Williamsport, Pa., exhibited four new seedlings: No. 1 crimson, No. 2 white, No. 3 red, and No. 4 variegated. Florex Gardens sent a seedling of a rather odd color which the committee said they were unable to describe, and which is appropriately named "Mikado"—so our readers can do their best to imagine what a Japanese color is. E. C. Marshall exhibited two vases of Pink Delight, which were very fine. Henry Eichholz showed Princess Charming. E. A. Stroud sent Pink Delight and White Perfection, both very well grown. William Kleinheinz brought a splendid vase of his new seedling Miss Dimple Widener, scarlet, 3½ inches across, cross between Lawson and Lady Bountiful. S. M. Merwarth & Bros. showed a red seedling (also two plants of same), apparently a strong grower and free producer. John Kuhn showed a scarlet seedling, very promising; also some elegant catleyas.

Henry A. Dreer Co. sent an invitation to the club to visit their range of new greenhouses above Riverton, on March 8th, with the privilege of including also the members of our sister clubs—Washington, Baltimore, Boston and New York. The feature for the March meeting will be an illustrated lecture by Mr. King, of the King Construction Co., on "Greenhouse Building." Mr. Thilow, on behalf of Mrs. Colflesh, presented the club with a large framed portrait of her late husband, J. Wm. Colflesh, who was a charter member and for many years the club's treasurer.

CHICAGO FLORISTS' CLUB.

At the regular meeting Feb. 2, there was a large attendance. C. L. Sherer, Max Cohen, W. F. Kroeschell, E. F. Winterson, Jr., and J. Wolniewiez, all of Chicago were elected to member-

ship and five new names were proposed. A. Zeck gave an interesting report of the bowling games played between Chicago and Joliet. P. J. Foley, chairman of transportation committee, reported on arrangements for the trip to the National Flower Show at Boston, March 25 to April 2, as being well under way. The club had as guests from out of town, W. F. Kasting, of Buffalo; C. W. Scott, of New York; Nic Zweifel, of N. Milwaukee, Wis.

There was a very fine exhibit of carnations by the Chicago Carnation Co., consisting of Washington which scored 89 points, scarlet seedling 186-07, 86 points; Princess Charming, 85 points. Nic Zweifel showed a large bunch of Bright Spot, which scored 88 points, while a white seedling No. 274, was given 80 points.

Appropriate resolutions on the death of J. W. Klimmer were read. A special meeting will be held on Feb. 16th to further the plans for the Boston trip.

WESTERN NEW YORK HORTICULTURAL SOCIETY.

The Western New York Horticultural Society opened its 56th annual convention on January 25 at Convention Hall with over two thousand in attendance. The features of the opening programme were President William C. Barry's address, the speech of Dr. Liberty H. Bailey, dean of New York State College of Agriculture at Cornell University, on "The Forward Movement in Country Life," and a remarkable extemporaneous talk by Charles D. Barton of Marlton, N. J. who in 1909 raised a \$20,000 peach crop. All interest in the second day's session was centered in a debate on the question of top-working nursery stock, with Associate Editor Kains of the American Agriculturist on one side and George T. Powell of Ghent on the other side.

President Barry's address was punctuated with practical suggestion and hopeful advice. Referring to the fruit industry he said that veritable gold mines were open to those eastern growers who, impressed with the importance of their work lay a foundation for success, first by giving proper attention to underdraining and fertilization, then to varieties, modern and proved methods of spraying and pruning and thinning, coupled with good business judgment in the selling of crops.

SOUTHAMPTON HORTICULTURAL SOCIETY.

The annual meeting of the Southampton, N. Y., Horticultural Society was held on Thursday evening, Jan. 5. Officers were elected as follows: President, U. G. Agar; vice-president, Julius W. King; secretary, Benj. C. Palmer; treasurer, A. W. McIntosh; financial secretary, Frank H. Smith; executive committee, William Fitzpatrick, John Rennex, Martin McLaughlin, William McLeod. The treasurer's report shows a balance on hand of \$65.55, \$500 of which has for some time past been on deposit in the Sag Harbor Savings Bank. Unpaid dues,

the greater portion of which will be paid bring the balance up \$283 more, while as a valuable asset the society owns at a low valuation some \$259.19 worth of property available and useful when they hold their annual exhibit.

The annual exhibit is one of the leading features of this celebrated summer watering place, and the cottage contingent turn out en masse to see the beautiful that is produced in the gardens in our grand old town.

With this annual meeting we close our fourth year, ending the business duties with an oyster supper. The show committee have decided on an annual exhibit to be held the latter part of July next.

BENJ. C. PALMER,
Secretary.

AMERICAN ROSE SOCIETY.

One of the most important positions in a public exhibition is that of manager, and Mr. Eber Holmes of Montrose, Mass., the well-known rosarian, has been appointed to that position for the coming Spring Exhibition at Boston. There will be appointed two sets of judges, because, owing to the week duration of the show, there will be two separate exhibits, Division B being separate from the rest of the Exhibition. Exhibits in all classes except Division B. are to be staged not later than 2 p. m., Saturday, March 25th. The exhibition of these classes will continue Saturday, Sunday and Monday. Division B. will be staged on Friday, March 31st, not later than 1 p. m., and will continue until the end of the exhibition. On Tuesday, Wednesday and Thursday, the space used by the Rose Society will be occupied by the Carnation Society.

Rev. Dr. Spencer S. Sulliger, of Vancouver, Wash., President of the Society known as the Rosarians of the State of Washington, who visited last year's National Exhibition in London, will read a paper at our coming annual meeting. Richard Vincent, Jr., of White Marsh, Md., was at the International Exhibition of Horticulture at Brussels, Belgium, and he also will furnish a paper upon the "Roses of Europe."

BENJAMIN HAMMOND, Sec'y.

MASSACHUSETTS HORTICULTURAL SOCIETY.

At Horticultural Hall, Boston, on Saturday, February 4, E. B. Dane, gard. Donald McKenzie, showed fine healthy plants in bloom of *Cypripedium* *Minos Youngii* (*Arthurianum pulchellum* X *Spicerianum*) and *C. Olivia* (*tonsum* X *niveum*) and a first-class certificate was awarded for each. He also showed blooms of two very fine forms of *Cattleya Trianae*. A fine portrait of *Cypripedium Olivia* was published in HORTICULTURE, Dec. 31, 1910.

Eleven silver medals, seven bronze medals and over \$400 in cash prizes are offered for the midwinter flower show of the Massachusetts Horticultural Society, to be held in Horticultural Hall, Boston, on Friday, Saturday and Sunday, Feb. 24, 25 and 26. Schedules, entry blanks, etc., can be procured from the secretary, W. P. Rich, Horticultural Hall, Boston.

CHAS. W. JOHNSON, Secy.

YONKERS HORTICULTURAL SOCIETY.

At the meeting of this society on Friday, Feb. 3rd, the dinner committee reported that all arrangements were made for a good time on Tuesday, Feb. 7th. H. Scott received first prize for some very fine callas, H. I. Dells was second with excellent Californian violets. It was decided to hold a social session every second month, members donating good things for the one to be held in March. A sick committee was appointed to visit all members who are ill, reporting to the society at regular meetings.

H. M. BLANCHE.

CLEVELAND FLORISTS' CLUB.

The Cleveland (O.) Florists' Club will hold a Flower Show at their rooms 2610 Detroit Ave. on the regular meeting night, Monday, Feb. 13, 1911. All florists whether members or not are invited to attend this meeting and bring stock which they wish to exhibit. Vases will be provided for all. The novelties of 1911 in roses and carnations will be there, as the introducers have all promised to exhibit. The refreshment committee has been ordered to get busy. Nuf Ced.

Frank A. Friedley, Sec.

CONNECTICUT HORTICULTURAL SOCIETY.

The following is an outline of this society's events for several months:

February 24th, Carnation Night and Ladies' Night; paper by Secretary Smith on the intrinsic value of the pear. March 10th, Cineraria Night; papers by Mr. Huss and George B. Baker. March 24th, Greenhouse Rose Night; lecture by George A. Parker on the improvement of small homes. April 28th, exhibition of hardy primulas and Alpine plants, with a lecture on the latter subject by Mr. Huss. May 12th, Pansy Night, and exhibition of narcissi; paper by John Gerard on the rules of judging pansies. May 26th, Tulip Night, with flowers from the city park department. June 9th, Hardy Rose Night. June 23rd, collection of early perennials, and a paper by George B. Baker.

DETROIT FLORISTS' CLUB.

The last club meeting was to bring out a paper on the Christmas business by Mr. Ponchelon, but unfortunately he did not prepare anything. Still, he absolved himself very well of his obligation and the only fault to be found with it was that he only remembered the hard work and the heavy extra expenses. He even thought of the twine and wrapping paper bill, but he never said a word about profits. The discussion following his interesting narration was more of an optimistic strain and perhaps more just.

CLUB AND SOCIETY NOTES.

At a special meeting of the Lenox (Mass.) Horticulture Society A. H. Wingett was elected a delegate from the society to the Massachusetts State Board of Agriculture for three years.

The Retail Florists' Association of St. Louis held its monthly meeting on February 6th. President Sanders opened the meeting to a good attendance and much important business was transacted.

The New Orleans Horticultural Society will hold an exhibition early in April, when it is intended to make a public display of Easter stock; and it is expected that a fine exhibit will be made that will interest the public and stimulate Easter trade.

The Arkansas State Horticultural Society, on Jan. 18th, at Little Rock, Ark., elected D. A. Rogers of Gravette president, D. E. Eichker vice-president, Ernest Walker of Fayetteville secretary and H. Vestal of Little Rock treasurer.

The State Horticultural Society closed its annual session with a banquet, Jan. 19th, at Pierre, S. D. The officers elected for the next year are

A. W. Krueger of Afton president, John Robertson of Hot Springs vice-president, H. A. Glidden of Hitchcock treasurer. Brookings was selected for the place of meeting next year.

Officers of the New Bedford (Mass.) Horticultural Society elected January 9, were as follows:

President, Frank C. Barrows; vice-president, John P. Rooney; secretary, Jeremiah M. Taber; Treasurer, Walter A. Luce; executive committee, James H. McVicker, Richard Parkinson, W. D. Hathaway, H. A. Jahn, Edward E. Shaw. The following additional members will be appointed on the committee, by the president, to act in the interest of the annual flower show: John P. Rooney, Edward E. Pierce, Andrew J. Fish.

At the regular meeting of the North Shore Horticultural Society, Feb. 2, Joseph Clarke, formerly gardener to Henry L. Higginson, was presented with a gold mounted cane by the gardeners of Manchester and vicinity as a token of their esteem of him as a friend, fellow-worker in the society, and brother horticulturist. The stick was presented by President Alfred Parsons. The remarks following showed Mr. Clarke to be the grand old man of Manchester horticulture.

Horticulture and the Boston fraternity all enthusiastically endorse the foregoing. Few men enjoy the universal love and respect of the craft as does this "grand old man."—Ed.

Fifteen of the leading nurserymen of Nebraska met January 25 at Lincoln and effected a temporary organization by naming Peter Youngers of Geneva, president, and Clyde Barnard of Table Rock secretary. The association will be known as "The Nebraska State Nurserymen's Association." It was declared that about March 1 the organization would be made a permanent one. The legislative committee of the state horticultural society, composed of Peter Youngers of Geneva, L. C. Chapin of Lincoln, and Clyde Barnard of Table Rock, were named to draft a bill to present to the legislature for the compulsory inspection of nursery stock shipped into Nebraska and shipped out.

The State Florists' Association of Indiana have elected the following officers for 1911: President, George R. Gause, Richmond; vice-president, H. Junge, Cumberland; secretary, A. F. J. Baur, Indianapolis; treasurer, H. S. Wiegand, Indianapolis.

Plans were also adopted whereby the association may improve the floral exhibits given at the State Fair. A committee was appointed to confer with the State Board of Agriculture, and to act as the board may suggest in obtaining better results in the exhibit of cut flowers and floral designs. It is believed by members of the organization that florists from all portions of Indiana will be urged to exhibit plants and flowers at the next fair.

At the last meeting of the Minnesota State Florists' Association, Jan. 26, we had a very interesting discussion on flower show score cards. It was found that for certain displays, such as cut blooms arranged for effect, etc., the scale used did not work satisfactorily and a committee was appointed to submit a new card at the next meeting. Mr. Schaefer, from La Crosse, was present. He commended the

FLORISTS' ICE BOX.

The accompanying illustration shows the new ice box in Sam Murray's modern flower store recently opened in Kansas City, Mo. The workrooms are located behind this structure and there another ice box of

equal capacity has been installed. At the left of the box is a private telephone booth for the use of customers, an excellent idea, copied, says Mr. Murray from a similar arrangement in Will Smyth's store in Chicago.

DURING RECESS.

Chicago Bowlers.

The following scores were recorded at the meeting February 1:

CARNATIONS.			ROSES.		
	1st	2nd 3rd		1st	2nd 3rd
Ayres,	130	171 184	Foster,	144	149 161
Wint'rs'n,	137	197 131	Ryers,	154	114 116
Go'risch,	110	134 185	Cohen,	123	74 117
Schultz,	140	159 136	Krause,	131	109 158
A. Zeck,	166	164 153	Wolf,	161	166 156
ORCHIDS.			VIOLETS.		
	1st	2nd 3rd		1st	2nd 3rd
Ho'n'b'r,	165	164 173	Va'gh'n,	151	131 189
Zeck,	157	145 144	Li'b'm'n,	159	128 170
Graff,	151	149 160	Fri'dm'n,	167	142 140
Begnan,	165	136 134	Laz,	96	124 90
Farley,	176	134 150	Loman,	145	166 141

On Sunday last the Joliet team came to Chicago according to agreement and an enthusiastic game was played. It was a close one and for the first half Chicago was in the lead. Then the tables turned and Joliet came off victorious. There were many rooters and the alleys were so well filled that standing room was at a premium. The Joliet victors left for home at six o'clock after expressing their pleasure at their reception and requesting another opportunity to meet the Chicago bowlers.

Cincinnati Bowlers.

The following were the scores bowled Monday, February 6:

C. Critchell,	134	187	L. Wit's't'r,	142	144
A. S'derbr'h,	159	159	L. Fritz,	106	128
R. Murphy,	205	165	Ben George,	115	132

R. A. M'phy,	139	130	D. Rusconi,	69	102
A. Horning,	151	168			

The seventh annual banquet of the Monmouth County Horticultural Society was held at Red Bank, N. J. on Wednesday evening, January 25. The attendance was large. A. Herrington, of Madison officiated as toastmaster. The speakers included public men of prominence as well as gardeners and florists.

Professor H. M. Whetzell, of the New York State College of Agriculture, Ithaca, N. Y., was the lecturer in the free course of the Massachusetts Horticultural Society at Horticultural Hall, Saturday, January 21. The changing of the lecture hour from forenoon to afternoon has proved a successful innovation, leading to a larger attendance. Professor Whetzell's topic was "The Local Plant Doctor."

He said that the primary object of the plant pathologist is to prevent diseases, not cure them. The plant doctor should be a public servant supported in part, at least, by the local growers. In short, the growers must meet the State at least half way in the training and support of experts for the solution of this plant disease problem. The grower will never learn the technique of plant pathology any more than he will that of veterinary medicine, and he will soon learn that it is not only necessary but highly profitable to pay for the services of expert plant doctors. There will be a constantly increasing demand for the professional plant pathologists in the conservation of our crop production.

The lecture was exceedingly interesting throughout.

CARNATION WHITE HOUSE

The QUALITY White

Easily the largest white in cultivation, and considering its size, it is wonderfully free. Is absolutely a non-burster and has a clean, kind growth, without any faults. The production of this variety is limited to 50,000 cuttings; so, if you want it, give us your order at once.

PRINCESS CHARMING, splendid Enchantress-colored carnation; WASHINGTON, the Lawson-colored sport of Enchantress; CHRISTMAS CHEER and BONFIRE, scarlets; all above varieties, \$12.00 per 100, \$100.00 per 1000.

WHITE PERFECTION, WHITE ENCHANTRESS, WINSOR, VICTORY, WINONA, ENCHANTRESS, QUEEN LOUISE and IMPERIAL, \$3.00 per 100, \$25.00 per 1000.

LADY HILLINGDON

A BEAUTIFUL YELLOW ROSE

That will make a name for itself either as an indoor or outdoor rose.

March Delivery
Own Root or Grafted Stock
\$7.50 per dozen
\$60.00 per 100

ROSE QUEEN, the pink you will eventually grow, \$35.00 per 100.
DOUBLE PINK KILLARNEY and MELODY, \$35.00 per 100.
RADIANCE and MRS. AARON WARD, \$15.00 per 100.

CHRYSANTHEMUMS

We carry over 500 varieties, and have already some 100,000 young plants in 2 ½-inch pots ready for immediate distribution.

Bagshot, England.

SUMMER FLOWERING BULBS.

I. S. Hendrickson of Floral Park, N. Y., president of the American Gladiolus Society, was the lecturer before the Massachusetts Horticultural Society on Saturday, Feb. 4. Considering that the day was one of the most unpropitious of the season the audience was a very creditable one in numbers and interest. Mr. Hendrickson naturally had most to say about gladioli, lilies having been well covered in the special lecture on this topic last season by E. S. Miller. He took occasion, however, to say a few words of high commendation for *Liliums Hansonii* and *Henryi*. Of the latter, he said:

"Perhaps the hardy garden lily with the greatest future is *Henryi*, the 'Yellow Speciosum.' This lily has been brought to us from the mountains of China, and it is indeed a gem, as it will thrive without any special care, producing strong panicles of yellow flowers, resembling very strongly the much-admired *speciosum* form."

He gave much valuable information concerning the forms and culture of gladioli, of which he remarked that probably no other class of plants had been blessed with so many descendants, he having in his possession an indexed book containing names and descriptions of nearly 3000 varieties, most of them from foreign catalogues. Among the other desirable summer flowering bulbs mentioned were *Amaryllis formosissima*, arums, *Besera elegans*, *Cyclobothera flava*, *Milla biflora*, *Cooperia pedunculata*, *Eucomis punctata*, *montbretias*, *zephyranthes* and *richardias*. Of the *richardias* he spoke as follows:

"Several new and valuable varieties have been produced, and introduced during the past few years, among them I will mention the following: *Aurata*, called the lemon calla, has a light lemon yellow flower with a chocolate patch in the throat, which brings out a conspicuous contrast of color; the foliage is spotted white. Mrs. Roosevelt is a late introduction and sometimes comes very fine; the flowers are white, tinged with lemon, not very free flowering. *Rehmanni*, largely advertised as the pink calla sensation, is a dainty little flower much smaller than most of the other callas, and I am inclined to think it is useful as a novelty only.

"*Pentlandi* certainly produces a very beautiful flower of a rich golden yellow, but the bulb appears to be weak and not very prolific, so it appears that if a yellow calla is wanted (and I believe it is) we have everything that can be desired in the variety *Elliotiana* 'the peer of them all,' not a new one by any means, but one that is not known as it should be. I have seen quantities of this calla on a commercial place grown and treated just about the same as one would treat potatoes, and the sight when in flower is indescribable; you can get some idea of it when I tell you the flower is nearly, if not quite, as

large as the ordinary white calla of the greenhouse, and the color a beautiful deep golden yellow, not simply tinted yellow or lemon, but actually golden yellow, and every bulb will produce a bloom; its time

ISAAC S. HENDRICKSON

of flowering is July. It must be taken up in the fall, and cared for about the same as a gladiolus bulb.

An interesting general discussion followed Mr. Hendrickson's lecture.

F. C. Cadett, formerly with Gude Bros., Washington, is now in charge of the greenhouses of Dr. W. W. Evans, Hamilton, Va.

PERSONAL.

B. Eschner, of M. Rice & Co., Philadelphia, was in St. Louis last week and reports a nice business there.

E. R. Buschee, who was formerly manager of the Norwood Floral Co. is now with Tromey's Flower Shop, Cincinnati.

John Aggen, Jr., Fulton, Ill., has gone to Portland, Ore., where he has accepted a position as florist with Martin & Forbes.

We are sorry to learn that John G. Esler of Saddle River, N. J., secretary of the Florists' Hail Association, was struck and quite severely injured by a trolley car when on his way home from the dinner of the N. Y. & N. J. Plant Growers' Association at New York last week, Thursday. He is at the hospital and reported as "doing nicely."

A pleasant letter from John Westcott tells us that he is enjoying the balmy breezes of Bermuda and enjoying the beauties of the tropical plants which thrive there as well as many other things such as heliotrope, geraniums, verbenas, etc., which are only to be seen in summer time, around Philadelphia. Sixty-five degrees at noon with a drop of 10 to 15 degrees at night is the prevailing temperature in Bermuda during the winter season. We hope Mr. Westcott will gain needed health and nerve force from his vacation trip.

Boston visitor—James Meiklejohn, representing H. Frank Darrow, New York.

HERBERT H. BARNES, Prop.

CHICAGO NOTES.

Trade Jottings.

A new retail flower store has been opened at 1357 Milwaukee Ave., with Wm. Macks, proprietor.

It is understood that Henry Van Gilder has sublet one-third of the floor he recently rented, the old stand of the Flower Growers' Market, N. E. corner Randolph and Wabash.

E. F. Winterson Co.'s catalogue is now in the hands of the printer. J. Degnan says there is a strong demand for American gladiolus for forcing but that the bulbs are scarce.

J. Mangel is having the windows of his store at the corner of Monroe and Wabash streets enclosed. This store though half below the sidewalk has the finest display windows, level with the walk and with white marble floor three feet wide. A second window will now make an inside partition and in these windows flowers and blooming plants will keep in perfect condition.

A number of meetings have been held by the wholesalers and many localities considered, but at this writing no decision has been reached. Many still cling to the old center, corner of Randolph and Wabash, and think if all held together as good terms might be obtained in that vicinity as farther west. Some very good inducements, however, are offered and no doubt a decision will be reached in a few days.

Improvements are under way at Harry Rowe's retail store 42 E. Monroe, which when completed will transform the place into quite possibly the finest flower store in the down town district. The Palmer House reading room with handsome glass roof has been thrown into the store and gives a floor space of about 30 x 80 feet, very large for the location, just off State street. The counters will all be replaced with diamond-shaped marble tables and the office will be placed in a less prominent place. The ice box will also be moved and a clear view from the front of the store to the fountain in the rear room be afforded. The front window has been lowered to the level of the walk and new handsome lights have been installed. The new room will also answer the practical purpose of showing customers how a mantle, wedding or other decoration will look and its fireplace and deep windows will lend themselves admirably to decorative schemes.

Personal.

A report of those suffering with severe colds would include most of the trade this week. Nearly all are able to keep to their posts, but N. Wietor is confined to the house. Sam Pearce is still suffering with rheumatism and unable to attend to business. H. C. Blewitt also is missed from his usual place in the market.

Visitors: I. M. Hoffman, La Porte, Ind.; F. H. Berndt and P. Benkt, both with Holton & Hunkel, Milwaukee, Wis.; C. W. Scott, of Yokohama Nursery Co.; W. F. Kasting, Buffalo, N. Y.; Nic Zweifel, Milwaukee, Wis.; Harry Philpott, Manitoba; Chas. Schwake, with C. F. Meyer, N. Y.; J. E. Meredith, Libertyville, Ill.; J. F. Burk, St. Louis, Mo.; Paul Berkowitz, of H. Bayersdorfer & Co., Phila.; B. Eschner, of M. Rice & Co., Phila.; C. B. Knickman, of McHutchison & Co., New York; A. B. Coe, of D. M. Ferry, Detroit.

Dreer's Double Petunias

Our **DOUBLE PETUNIAS** for more than half a century have been the acknowledged standard. The strain this season is equal in high quality to its predecessors and is well known to the trade.

We offer fifteen distinct varieties, in strong 3-in. pots, which will quickly furnish an abundance of cuttings.

Strong 3-in. pots, 75 cts. per doz., \$6.00 per 100. The set of 15 for \$1.00.

SEED OF OUR

Superb Strain of Fringed Petunias

IMPORTED DENDROBIUMS

We are now receiving our usual importations of Dendrobiums, and can offer the following in excellent value. Many of these plants with early cultivation and careful storing can be had in flower at periods extending from Xmas on the one hand to the end of May on the other.

Dendrobium Wardianum Lowianum—The true large-flowering type.

Crassinode—Specially fine plants of this lovely and distinct variety. Very useful for basket work.

Nobile—From district where specially fine forms have been received.

Dalhousianum—This noble species has seldom been imported in such condition.

Jamesianum—Pearly white large-flowering variety, lasting long in flower.

Chrysotoxum, Fimbriatum, Clavatum—Three of the most lovely free flowering yellow varieties.

Devonianum—Very free and beautiful fringed-lip variety, delicately scented.

FINE FERNS

Ready For Immediate Retail Sale

We have an exceptionally fine and large stock of ferns in the following varieties,—first-class plants of exceedingly good value—plants that will please the most critical buyers, both in regard to quality and value.

NEPHROLEPIS ELEGANTISSIMA (Improved). The finest of this type—never showing a Boston frond; has not reverted in the last four years. Fine plants, 6-in., \$6.00 per dozen; 8-in., \$12.00 per dozen; large specimens in 12-in. pans, \$3.00 to \$5.00 each.

NEPHROLEPIS ELEGANTISSIMA COMPACTA. This bears the same relation to elegantissima compacta that Scottii does to Bostoniensis. It is a dwarf, compact plant, especially fine in the small sizes. Fine plants, 6-in., \$6.00 per dozen.

NEPHROLEPIS SCHOLZELI. Fine plants, 3½-in. pots, \$2.50 per dozen; 6-in. pans, \$6.00 per dozen; 8-in. pans, \$12.00 per dozen.

NEPHROLEPIS BOSTONIENSIS. Extra strong plants, 8-in. pans, \$12.00 per dozen.

NEPHROLEPIS SCOTTII. 8-in. pans, \$12.00 per dozen.

SMALL FERNS FOR FERN PANS. Best and hardest varieties assorted: Pteris Mayii, Wimaetti, Adiantoides, Aspidium Tsussimense, Crytomium falcatum, etc. Strong plants, 2½-in. pots, \$3.50 per 100.

CROTONS. Nice assortment, well colored, 5-inch, \$8.00 per dozen.

F. R. PIERSON CO., Tarrytown-on-Hudson, New York

CINERARIA HYBRIDA

Remember this is the
BEST PAYER FOR EASTER.

We offer our superior strain in 4 in. pots (medium height), latest improvement in size and color, \$10.00 per 100. Now is the proper time to plant them into 5½ and 6 in. pots for Easter blooming.

NEWS NOTES.

Maspeth, N. Y.—Herman Maenner, florist, Collins and Mt. Olivet avenues, expects to retire from business about July 1st.

Red Hook, N. Y.—The partnership between Pells & Van Steinburgh has been dissolved. Walter Van Steinburgh is now conducting the business.

Goldbar, Wash.—J. L. Kreider has purchased land in Everett and will move his establishment there. He intends to grow cut flowers, plants and vegetables and carry a full line of nursery stock, making a specialty of roses, shrubs and ornamentals.

Fitchburg, Mass.—Nine acres of land are to be secured for the establishment of a playground and agricultural quarters for the State Normal School, the city co-operating with the state. The Mayor has authorized a draft for Fitchburg to pay for the grading, erection of hot houses, etc., the price not to exceed \$5,000.

Some men do business on the principle that the world owes them a living. That's a mistake. The world owes you nothing. If you have health you are lucky and that's all you deserve without working for it. Some growers work on about the same principle in handling lily bulbs. They buy good bulbs, stick them in the dirt and expect good results. You have to take care of good lily bulbs just as you do everything for the best results. Give them as good attention as you would a pet horse anyway. Don't drown them with water when they don't need it, and don't blame bulbs for rotting when poor soil and drainage is the cause. Take care of your bulbs, keep them free from greenfly, feed them manure water, and give them careful attention; that's the way to produce the best average.

There are no better lily bulbs imported than Horse-shoe Brand—from the finest fields of Japan.

Write for prices.

Not How Cheap
But How Good

Cold Storage Giganteum on hand ready for delivery at any time during 1911.

Obituary.

George Hobday.

It is with sincere regret that we learn of the death of this distinguished horticulturist, who passed away at his residence, Havering Road, Romford, Essex, on Jan. 18th. Although a business man, Mr. Hobday made gardening his one hobby, and so faithfully did he pursue it that his name became well known as a successful exhibitor and a competent judge. He grew flowers and fruits of all kinds well but vegetables were his chief concern and he was responsible for many sterling introductions, especially rhubarb Hobday's Giant and Essex Wonder and the Clipper peas. Mr. Hobday was keenly interested in all that appertained to the advancement of horticulture and was closely connected with the leading societies, being a member for several years of the Royal Horticultural Society's vegetable committee and was also a prominent member of the National Vegetable Society. Horticulture can ill afford to lose such men as George Hobday. He was a straightforward, upright, honest man, a true friend and a perfect gentleman, and all who knew him will deplore his loss.

Gus Van Velsen.

Many of our readers will be interested and no doubt sorry to read that Gus Van Velsen died at the Nyack, N. Y. hospital Friday night after an illness of six weeks contracted from exposure developing inflammatory rheumatism.

He was a native of Holland, son of the well known bulb grower of Haarlem, Peter Van Velsen. He came to this country in the early nineties and was employed by Pitcher & Manda, Bobbink & Atkins and other firms near New York. He located in the vicinity of Nyack several years ago and was employed lately by the Palisades Nurseries at Sparkill, up to within a few weeks of his taking sick.

Henry Mundt.

Henry Mundt, florist, Forest Park, Ill., died Jan. 25th, at his home, age 52 years.

FRUIT GROWERS TO ORGANIZE A SELLING AGENCY.

Fruit growers of the Pacific Northwest met in Portland, January 24 and 25 to take the first steps to organize a central selling agency that will handle the product of northwest orchards. It is expected this organization will handle practically the entire boxed apple output of the country, Western Colorado being the only other section marketing its fruits in this form of package.

The convention did not result in an organization being formed, although it was well attended by fruit growers from the northwest states, but considerable progress was made and another meeting will be held at Walla Walla, Wash., February 28, when it is expected the final steps in the organization will be accomplished.

VACANCIES IN BUREAU OF PLANT INDUSTRY.

The Civil Service Commission announces an examination for laboratory aid (male) to fill vacancies in the Bureau of Plant Industry, Department of Agriculture, Washington, D. C., to be held on February 23. Applicants must be over seventeen and under twenty-five years of age. The examination will consist of spelling, arithmetic, penmanship, report writing, copying and correcting manuscript, copying mechanical drawing, tabulating, and elementary chemistry.

The duties of the position will include the cleaning and care of laboratory apparatus and glassware, the preparation of culture media, the media, the mounting and classifying of photographic prints, and the preparation of tables and charts.

Competitors must supply themselves with drawing boards not less than 15 inches square, and such drawing materials, except paper and tracing linen, as they deem necessary. Applicants should apply at once to the Civil Service Commission, Washington, D. C., or to the local secretary of the board of examiners for application Form 304. Further information can be had from

NURSERY COMPANY GETS JUDGMENT.

The Van Holderbecke Nursery Company has been given judgment for \$252 the full amount sued for, against E. W. Conrad, by a jury in Judge W. A. Huneke's court. The bill, a balance which the defendant refused the nursery company claimed, was to pay on a shipment of 2100 trees to the defendant's orchard in Okanogan county.

The defendant claimed that some of the trees, on account of not being in good condition, died, and he put in a cross bill of \$626 for one year's use of the ground and the expense of removing the dead trees. He failed, however, to convince the jury of the merit of his counter claim.—*Spokane Chronicle*.

NEWS NOTES.

Beverly, Mass.—Ralph W. Ward succeeds George E. Ward & Son in conducting the Beverly Cove Greenhouses.

Nevada, Mo.—The Weltmar Greenhouses have been purchased by F. R. Rowe and they will be conducted under the name of the Volcano Greenhouses.

Delphi, Ind.—The greenhouses of Ben Hendrickson were damaged by a boiler explosion recently; three men were more or less injured and the property loss will be about \$400.

Ventura, Cal.—Ten forest rangers of the Santa Barbara reserve are engaged in planting pine seed in the San Guilmas district, Ventura county. These are the native yellow pine and there are 500 pounds of the seed to be planted.

Heretofore reforestation experiments have been made along nursery lines. That is, the seed were planted in nurseries, and when the young trees were well started they were transplanted to the reserve. The new plan is to plant the seed where the trees are wanted, thereby saving much labor, and, it is hoped, securing better results.

CATALOGUES RECEIVED.

Fraser Nursery Co., Huntsville, Ala.—Surplus List for Nurserymen and Dealers only.

W. E. Marshall & Co., New York.—Marshall's Seeds, 1911. Covers in white and soft green, attractively simple. Contents comprehensive and creditable.

H. F. Michell Co., Phila., Pa.—Wholesale Price-List for Florists and Market Gardeners. Colored plate of new tomato "Michell's Crackerjack" is inclosed with this very comprehensive trade catalogue a copy of which can be had on application by any one in the trade but nobody else.

Stumpp & Walter Co., New York.—General Catalogue, Spring 1911. This book is a very fine production throughout. The covers are handsome, one displaying a rich group of Spencer sweet peas and the other a cluster of blooms of Hardy Mallow Marvels. Practically everything timely in seeds, bulbs, plants and tools is included in the list.

Wm. Elliott & Sons, New York, N. Y.—Seeds, 1911. For "Lo, these many years" this house has been selling seeds and everything else that contributes to make a lovable garden, and no more pleasant duty comes to us than to acknowledge receipt of their annual catalogue of good things for spring planting. This year the spring catalogue is sparkling in cover beauty. It is all right, exterior and interior, and will sell the goods.

Peter Henderson & Co., New York.—Everything for the Garden, 1911. This widely-known annual visitor is one of the best of the year's publications. It has the Henderson individuality and business enterprise in its make-up and is unique in many features that cannot fail to make the book a business-puller with the American public. Garden scenes in natural colors framed in silver and cream on a white background form the cover adornment and there are several richly colored plates of sweet peas, stocks, roses, etc.

E. G. Hill Co., Richmond, Ind.—The 1911 Catalogue of this well-known leader in American floriculture is all that one could wish. "Rose Queen" rose occupies the place of honor on the title page and we think it is worthy of the position. Inside we find a list of "The Best Things of the Year," and lots of other news and good instruction worth giving close attention to. If you want to know what's going on in new roses, carnations, chrysanthemums, heliotropes, geraniums and alternantheras send at once to E. G. Hill Co. for a copy of this book.

J. M. Thorburn & Co., 33 Barclay street, New York—Thorburn's High Class Seeds, 1911. As we noted a year ago J. M. Thorburn & Co. date back to 1802. Their annual publications never take a retrogressive course—each seems a "vade mecum," up-to-date, which outclasses its predecessor. Two catalogues have reached us—the general catalogue, 144 pages densely filled with horticultural lore, and the "Trade List," compressing between its brown covers a treasury of good information as to how and where to buy garden, field, tree and flower seeds.

POTASH

All Plants Require the Same
Foods but in Different
Proportions

Most plants require more
Potash than manures or com-
plete fertilizers contain. Clover,
Corn, Tobacco, Fruit and Po-
tatoes, for instance, take up
large amounts of Potash.

We have prepared valuable books on this
all-important subject of fertilizers; what they
are and how to mix them, filler free.

Potash Pays, whether used to supplement ma-
nures and commercial fertilizers, by itself, or in a
home-mixed fertilizer. Your dealer can get it for
you, or you can write to us for prices on any quantity
from one bag (200 pounds) up.

Seed Trade

A Danger Signal.

Referring to the remarks in last week's issue of HORTICULTURE, in regard to Dreer's 1911 Catalogue, a book that might appropriately be termed "An encyclopedia of what's what in American horticulture," we deem it well to add emphasis to one important point, namely, the cultural notes therein, by the best American authorities. No other American catalogue has this important feature so well carried out, and as for the European catalogues which give directions for European conditions, these, as was pointed out to us recently by a leading horticulturist, are not only inapplicable to American conditions, but often positively dangerous and likely to end in disaster for any one following them. This point should be given prominence by all horticultural journals, whose very reason for existence is to educate and improve along such correct lines as have been found by experience to be best for the varying climatic conditions of this great continent. Each of these journals should have a danger signal flying high and constantly warning against the implicit following of instructions emanating from sources where different climatic conditions prevail. One of our most valued correspondents urges the great importance of the foregoing facts. He states that he served an apprenticeship of nine years in the old country and thought he knew something of the business, but found when he came to America 27 years ago that he had to start in and learn all over again. "What's what" in Europe isn't "what's what" in America, and vice versa is equally true.

Ohio's "Pure Seed" Bill.

"If the Huber seed bill passes the Ohio legislature, it will put the field seed merchant out of business. Kill the Toledo clover seed market, which is now the largest in the world," said John Smith, of the S. W. Flower Co. "The main objection is in what the bill terms noxious seeds. This includes quack grass, Canadian thistle, clover and alfalfa dodder, field dodder, oxeye daisy, buckhorn and plantain. The bill specifies that only one noxious seed berry can be allowed out of every 2,000. The peculiar thing about the bill is that it permits growers to sell seed without restriction as to quality."—*Toledo Blade*.

Notes.

Delaware, Ohio.—Miss Jennie C. Cox expects to move her seed store from North Sandusky street to West Winter street.

Ossining, N. Y.—A store in the Wolf Building has been taken by E. T. Haines & Co., florists and seedsmen of Bedford Mills.

Chickasha, Okla.—A seed store has been opened by Edward Bitchie at 111 North 4th street. Mr. Bitchie was formerly with the Farrington Seed Co.

Withee, Wis.—Sixteen hundred acres of land near here have been purchased by the Ferguson Seed Co. of Minneapolis upon which they intend to establish a seed farm.

Garden Grove, Cal.—J. J. Swartzbaugh has just finished the shipment of three tons of cucumber seed, of several different varieties. They were bought by the Musser Seed Company

of Los Angeles for eighteen cents per pound.—*Los Angeles Times*.

The seventh annual convention of the Canadian Seed Growers' Association will be held at the Canadian Building, Ottawa, Ont., on Thursday and Friday, February 16th and 17th.

All the St. Louis seed houses have issued handsome spring catalogues. St. Louis Seed Co., Schuler Corneli Seed Co., C. Young & Sons, and Schester Grain Co. all say they expect a big spring business this year.

PHILADELPHIA NOTES.

We had a brief visit on January 30 from Ex-Mayor Philip Breitmeyer of Detroit, who passed through our city en route for the West Indies.

Owen Parry, the popular salesman at the Phila. Cut Flower Co.'s had to go to the Hahneman Hospital on the 1st inst. with a broken wrist—compound fracture. The accident happened from a slip on a calla stem on the store floor. Progressing favorably—the other wing and the good head—for a deal as efficient as ever.

Dr. L. H. Bailey will give a lecture on "The Country Life Situation," at the University of Pennsylvania, on Friday, March 3rd. All members of the P. H. S. and Florists' Club are given a cordial invitation by the Pennsylvania Chapter of the Society of Sigma Xi. Further particulars can be had by addressing T. J. Schwatt, president of the Chapter.

Charles B. Herr of Strasburg leads the procession with exhibition quality carnations. On being asked what peculiar methods he used, what soil, what management, or what other means in getting such results, Mr. Herr modestly replied that he had done nothing out of the ordinary but had treated his soil as always recommended by HORTICULTURE and other reliable authorities—giving the plants the best possible care, and being exceedingly vigilant in regard to temperature, etc. Anyone wishing to see for himself is welcome to pay Mr. Herr a visit, and see and hear all about it. "Seeing is believing."

Visitors: this week Mr. Radcliffe of Radcliffe & Tanner, Richmond, Va.; Mrs. John Barrows, Toledo, O.; W. G. Foster, Palm Beach, Fla.; Philip Breitmeyer, Detroit, Mich.; M. C. Ebel,

Aphine Mfg. Co., Madison, N. J.; O. V. Zanger, Hoboken, N. J.; J. A. Peterson, Cincinnati, O.; O. A. C. Oehmler, secretary Washington Florists' Club, Washington, D. C.; Henry Eichholz, Waynesboro, Pa.

Of Interest to Retail Florists

THE GOULD-DECIES WEDDING.

Alexander McConnell had the decorations for this notable affair. In the church they were principally of growing flowering shrubs, Liliun longiflorum, Liliun lancifolium roseum and the ancient calla. Also festoons of Asparagus plumosus and stately palms in large quantities. As there was no specified price on decorations—same were as elaborate as money could make them, consistent with good taste. The house was decorated in the same manner—with the exception of the lilies—entirely of spring flowers and growing shrubs, palms, etc.

The bridal party received their guests on a raised platform or dais. The background was a beautiful piece of tapestry, valued, we are told at \$100,000. This platform was flanked on each side by an immense Dicksonia antartica. Interspersed in the foliage were Coelogyne cristata, Phalaenopsis

NEWS NOTES.

Henderson, Ky.—Jacob Hoffman and Mrs. Ellen Shouley were married Jan. 20th.

Brockton, Mass.—H. E. Barker, 75 Myrtle street has gone out of the florist business.

New Haven, Conn.—Herman Trisch, Lilac street, intends to retire from the florist business.

New York, N. Y.—Ordonez Bros. have moved to more commodious quarters, 900 Sixth avenue.

Atlantic City, N. J.—The store and greenhouses of Mrs. Fleming have been leased by George W. Berke.

St. Louis.—The Burnes Floral Co. closed its place at Grand and Finney aves. Miss Burnes reports that they will open up this month on Easton ave., just west of Taylor ave.

Brooklyn, N. Y.—A store for the sale of hardy ferns, etc., has been opened at 93 Broadway by A. L. Fortunes. He was for years collector and dealer in florists' greens at New Haven, Conn.

Detroit.—W. B. Brown, who dominates upper Woodward avenue, has had a series of misfortunes. One week ago an ice cart broke his delivery wagon in a collision and while going for the wrecked car in a buggy, the horse ran away and broke the buggy. This week an auto amputated two wheels from his other delivery wagon and as the first wagon is able to be around again, he expects to report another accident next week.

Detroit.—Business and weather went hand in hand, one was busy, another

idle, but the average seems to have been satisfactory and compares favorably with last year, while supply was about equal to the demand, but much lower than one year ago. Local retailers report having many calls for luncheon and dinner decorations at the same time disposing of a great quantity of flowering plants, nothing big, but always something doing.

Flower Market Reports

BOSTON Squally weather and heavy snow have cut down flower buying for the past few days. Business has not been brisk on any line yet there is sufficient call for some things to make a little stir—particularly for white roses and white carnations both of which hold well up to highest quoted values. All roses are scarce, in fact. American Beauty is especially in short supply and also averages low in quality. Bulbous flowers are plentiful and inclined to accumulate, with prices low and still dropping. Violets suffer from the inclemency of the weather which interferes with their use for street wear. On the other hand, gardenias are very scarce and are sold as soon as they appear. The general run of market prices does not vary materially from last week's quotations.

The shortage of stock continues as during the past weeks, the slight reduction in price being caused by the decrease in demand, rather than because of increase in supply. It is a condition deplored alike by all in the trade and if there is any lesson to be learned from it or any way to prevent this annual occurrence Chicago growers are ready to learn it. The shortage is felt most in roses and with the heavy snow fall of Sunday night there is little probability of any immediate change. Shipping orders have been delayed by the storm which has been general and incoming flowers have likewise suffered in being long on the way. Trains are now coming through on time and no more trouble is expected in that direction. Carnations do not vary much from previous quotations but plenty of "splits" can be purchased when these will answer. Ferns are now bringing \$2.50 per 1000. Asparagus plumosus is scarce and smilax is about equal to demand. Lilies are plentiful enough but differ much in size and quality. Bulb stock is unusually good and selling well at a fair price.

CINCINNATI Dark and cloudy weather for the past two months. Since December 1st we have had approximately one week of sunshine; as a result roses and carnations are naturally on the short side of the market. The supply of Beauties is not large, and with a moderate demand the receipts suffice to satisfy the buyers. The rose market is easier but with no great increase in supplies. White roses are in fairly good supply. Killarney and other pink sorts are decidedly scarce. Of carnations, the demand is far in excess of the supply. Narcissi are coming in less freely and with a very good request there has been a slight advance in price. The receipts of both jonquils and tulips is very limited. Miniature Dutch hyacinths have made their appearance and clean up nicely. Roman hyacinths find a fair request. Marguerites meet with a ready market. Longiflorum lilies are being received in goodly numbers and move to advantage as do callas. There seems to be no let up in the supply of double violets. While the price at present is exceedingly low it should advance as St. Valentine's Day approaches. Singles are less abundant and move freely. The supply of lily of the valley is fair with a very light call. Asparagus

PUSSY WILLOW

A few of those soft, furry, tufted sprays artistically tied on each St. Valentine's box of flowers, gives it a touch of originality and distinctiveness, bringing trade which your less progressive neighbor wonders how you get.

**\$3.00 per dozen
bunches;
very choice**

SOME SPLENDID NEW ROSES

New Forcing Irish Rose "**Melody**" the very best yellow rose today. Also the "**Double Pink Killarney**." Heavy orders already booked. Stock limited. Orders filled strictly in rotation. Delivery in March. Two other good ones of this season, "**Prince de Bulgarie**" and "**Rose Queen**" are also on our list. Send for prices and particulars.

ST. LOUIS

The St. Louis cut flower market was in much better condition

last week than any time since the first of the year. There was plenty of stock excepting roses, which have been off crop for some time and are so still. Good

Flower Market Reports

(Continued from page 153)

roses are hard to get and prices remain away up. Carnations are quite plentiful and this is the first week since the first of the year that any carnations were left over after morning sales. Same may be said of violets, of which thousands were dumped as low as \$1.00 per 1000. Bulb stock, too, could be bought cheap any day during the week. Good lilies sell well at \$15 per 100. Sweet peas have also been a glut and hard to dispose of. Wild smilax has sold well. We all expect a good business for St. Valentine's Day and plenty of stock on hand for orders placed early.

Last week's report on **NEW YORK** this market might well suffice for the present. No change of any sort worth noting has taken place. The very stormy weather has not helped to improve what was a very light demand, considering the season, nor to increase the very limited supply of roses, gardenias and cattleyas. Neither does it improve the quality of the bulb stock which is coming along as rapidly as wanted, if not more so. Violets are happy, of course, under the circumstances, but their owners find little comfort as the weather conditions which favor their growth do not favor their sale. Carnations are in fair supply and good quality, whites having the best of it for the present. St. Valentine's Day should count for something next week, if pleasant skies attend it.

Stock continues **PHILADELPHIA** scarce here. Usually at this season the lengthening days should bring in supplies in increasing quantities; but this year is an exception. Not in the memory of the oldest trader have we had such a dark fifty days in mid-winter. A few bright days now would bring things along with a rush. According to the U. S. Weather Bureau at Philadelphia we have had only one clear day since New Year and that was on Feb. 5th. There is a fairly good line of general trade, but the volume is probably below that of previous years, else we would have seen ere now an unprecedented scramble for stock, considering the weather conditions. It is said that public entertainments, such as the mid-winter ball and so forth, have been as numerous as usual, but that the number of strictly private affairs have been fewer. American Beauty roses are a trifle more plentiful and of better quality.

" " & Spreng. (100 bchs).....	15.00	to 25.00	15.00	to 25.00

These do not seem to be such good sellers, however, and prices have eased up in spite of the stringency and other factors noted above. Richmonds are not selling quite so well either, for some reason not easily defined. Killarneys are the favorites at present in pinks and are of extra good quality, we seldom see them so well colored as they are now. The white rose market feels the shortage about as much as anything. While the supplies have increased the demand has more than kept pace. Good judges looked for quite a tumble in carnations about the end of the week, but these have held their own and are at this writing as high and firm as at last report. Orchids, gardenias, lily of the valley, lilac and violets all continue in good demand with prices unchanged. A spurt is expected on the latter for St. Valentine's day. For the same occasion there will doubtless be a good demand for spring flowers, such as daffodils, sweet peas, freesias, tulips, Roman hyacinths and other moderate-priced subjects. These like most everything else are cleaning up at better figures than usual.

FIRE RECORD.

Kennett Square, Pa.—Fire destroyed a grafting house at the Willowbrook Nurseries, Jan. 19th.

W. Springfield, Mass.—The west wing of the greenhouse owned by Hans Madson, New Bridge street, was damaged by fire Jan. 31st to the extent of several hundred dollars. The greater portion of this loss is in stock. It will be necessary to erect an entire new section.

Adams, Mass.—During the gale of January 27th the storm played havoc with the greenhouse at the Brown residence on Commercial street, considerable glass being broken.

PLENTY OF CHEAP POTASH.

A misapprehension evidently exists regarding the danger of a shortage of potash for the American farmer. This has arisen through a misunderstanding of the purpose of the new German potash law. This law does not aim to restrict the production of potash, but on the contrary expressly seeks to increase it. The commission that fixes the probable yearly demand of the world must provide each year for an increase over the consumption of the previous year. The mines have spent millions of dollars in trying to increase sales, and this policy will continue.

The commission is required to annually estimate the domestic (German) requirement and the amount needed for export. Because it happens that the present German requirement is equal to the export needs, some have understood that the law forbids an export quantity greater than the German consumption. This is by no means true. The Germans are only too glad to have the foreign demand increase.

The law in this respect is flexible; thus, if the commission should find that the German and export amounts for 1910 were practically equal, they

would fix the same proportion for 1911, increasing each in the same amount. However, should it appear at any time, say in February or March 1911, that the foreign orders were likely to be in excess of the amount estimated, the commission has the power to at once make the foreign allowance greater than the domestic, and would undoubtedly do so.

This is quite in line with the purpose of the mines in organizing their own company in America, the object of this American company (German Kali Works) being to sell as much potash as possible to everyone, farmer or dealer, at reasonable prices and to aid all willing manufacturers and dealers in their efforts to supply the farmers' potash requirements. To this end they carry extensive stocks of potash, especially in South Atlantic ports, and take orders for direct importation in single carload lots. Any farmer can import direct through South Atlantic ports a car of kainit and have it put on board the cars, bagged, tagged, and all taxes paid, for nine dollars per ton cash. Prices to jobbers and mixers are lower by the usual margin fixed by the manufacturers in the past.

AN UP-TO-DATE CHICAGO RANGE.

The term up-to-date as applied to many of the more or less modern greenhouses about Chicago, unquestionably is often a misnomer. In the new block of houses at the Morton Grove establishment of Poehlmann Bros., thirteen of which are now being enclosed for early planting, there are features that cannot be found in any other plant in the west. The thirteen houses are built 27 x 250 ft., and when the succeeding sections of the same size shall be completed will make a block of twenty-six, each 27 x 1400 ft., a pretty good-sized plant of itself.

The section now nearing completion is fitted with Garland gutters and Poehlmann Bros' own plan of truss construction. Gutters are sufficiently high to allow a free circulation of air and an unobstructed view. All will be fitted with sectional cement benches, so practically all the wood used is the sashbars.

A special feature of this new range is its boiler room and service shed with its wonderful facilities for handling the coal for the twelve large self-feeding boilers. A track is laid outside the shed for ordinary cars, but most of the coal will be run over a track through the shed and over the coal bins into which the cars will dump their contents, entirely eliminating all labor of handling.

A large machine shop with power machines is a very busy part of the establishment. Here are finished all the angle iron and truss construction used in the erection of the houses. Huge vats for manure water are housed in a service shed just east of the power house which also contains the work done for the manufacture of cement benches which are turned out to the building contractor all ready for erection. Cement benches of various kinds have been carefully tested by this company for the past four seasons and that they are using them exclusively in the erection of their new houses proves that the test has been satisfactory.

FOR SALE

GREENHOUSE FOR SALE.

17,000 feet of glass, up-to-date, thoroughly built, prime condition; 7-room dwelling, 2 acres land, half-mile from University, 100 yards from stop on Cleveland and Wooster Electric railway. Established trade. Fine opportunity for any line of greenhouse business. Terms easy. Death of owner reason for selling. Mrs. Nina M. Thorne, Adm., Wooster, Ohio.

SPLENDID OPPORTUNITY for a wide-awake party to acquire a well established retail florist business. Stock and good will to be sold, greenhouses to be let. One of the best places in Massachusetts for a progressive man. Present owner has too much business on hand. Moderate cash capital required. Apply HORTICULTURE, Editorial Dept.

FOR SALE—Special 16 x 18 and 16 x 24 double thick glass in "A" and "B" qualities. Buy now and save money. Write PARSHESKY BROTHERS, INC., 50 Montrose Ave., Brooklyn, N. Y.

WHAT THE USERS SAY

Test at 8° Below Zero No. 8 Kroeschell Boiler Carries 20 500 Square Feet Glass.

MUELLER & SCHROEDER CO., Milwaukee, Wis.

Our heating system works to perfection. To our surprise the new No. 8 Kroeschell boiler mastered the whole plant, consisting of five houses 20 x 150. We only deemed it necessary to start our second boiler when the temperature went down to 8 degrees below zero.

We had expected to use both boilers in cold weather, but the one boiler did such excellent work that we did not run the two boilers until the very cold weather set in.

It was a very easy matter to keep the temperature up in the very coldest weather and stormiest nights. The five houses have 20,500 square feet of glass; the No. 8 boiler is rated at 16,500 square feet of glass.

IMPORTANT ROSES

We are offering to commercial rose growers, who are alive to the possibilities of increasing their profits, stock of the best there is in the new varieties. These roses represent the nearest to the ideal that exists in roses today and the quality of stock sent out by us is above question.

DARK PINK KILLARNEY. With a Killarney habit and a color that can be equalled only by the lobe of a Cattleya, it sells on sight.

DOUBLE PINK KILLARNEY. Stronger in growth than the parent and with a large, perfect flower, it stands alone in its class as the representative of the highest type of forcing roses.

PRINCE DE BULGARIE. As a twelve months rose this variety is good, while for a spring, summer and fall bloomer it has

no equal in its color. And in its color, there is the character that is called life. It is hard to describe the color. "Rosy flesh" is near, but it does not describe the impression the color makes. For a money-getter the rose has been a wonder.

LADY CROMWELL, MELODY, MRS. AARON WARD, RADIANCE and the older varieties are described in our catalogue.

If you are progressive, write us for your young stock and get the best that can be produced.

WASHINGTON

Dark Pink Sport of
ENCHANTRESS

DO not get this variety confused with the Lawson-Enchantress which we discarded some years ago. Washington-Enchantress differs from Rose Pink Enchantress as night from day. Washington is a sport from Enchantress with the best cerise or beautiful dark pink color—the Lawson shade—with stem, habit and productiveness same as Enchantress, and keeping qualities of the best. Stock is clean, healthy and well rooted. Guaranteed satisfactory in every respect.

\$10 per 100; \$20 per 250; \$75 per 1000 C. O. D.

Fruit and Vegetables Under-Glass

LATE HOUSES

All pruning, cleaning, top dressing, etc., should be pushed along now and completed before the end of the month, so that all houses shall be finished before the buds commence to swell. All houses should have a thorough wash down—glass, woodwork, walls, etc.; this is the first step towards eradicating last year's pests. Remove any loose bark from vine rods and give one or two washings with Gishurst's Compound. The main stems of peach trees can also be washed and the trees sprayed over with X. L. ALL, or Aphine, or other approved insecticide if red spider or other pests were troublesome last year.

Houses intended for late work should be kept as cool as possible. Keep a night temperature of 35 to 38 degrees and give all the air possible through the day after 40 degrees has been reached. Peach and nectarine trees should be tied in before the buds commence to swell or they will be easily broken off.

TOMATOES

Tomatoes sown the first of the year will now be rooting through the soil in the benches. If the latter were only half filled a little top dressing will be beneficial giving just enough soil to cover the roots. Feeding should be withheld for a time. Wait until the plants have four or five trusses of fruit set, with the first one half grown. Keep a drier atmosphere about noon and give the plants a sharp shake to distribute the pollen. Any showing a shyness to set should be fertilized with a soft hair brush or piece of fur. Remove all side shoots when tying. Do not syringe the plants overhead; sufficient moisture can be maintained by damping the walks, walls, etc., two or three times a day, according to the atmospheric conditions outside.

MUSHROOMS

Beds made up last fall will now be running out and can be replenished by making up new beds at once. A quantity of manure should be got together as quickly as possible from the stables and placed in a shed or cellar where it will have a chance to dry and also to keep it from the frost. If it is allowed to freeze the ammoniated properties are impaired. By getting manure together quickly it is nearly the same age and prepares with a more even tenor than if only a little is got each day. Another point to be guarded against is getting manure from any stable where horses have been having physic. Certain chemicals are imparted to such manure which is detrimental to the growth of the mycelium. Beds have proved a failure, and the fault has been laid to bad spawn or other defects in their culture, but, were the truth known, this bad manure has caused all the trouble.

When a sufficient quantity of manure has been secured turn it twice a day and pick out most of the long straw until it heats to an even temperature each day and has become slightly dryer. Make the beds up by ramming the manure quite firm into the benches. The harder the manure is made the better it is, for a loose bed never retains its heat as it should. Spawn, when the heat is on the decline, at 75 degrees to 80 degrees and cover over with an inch of virgin loam a week or ten days later when the bed has dropped to 70. Watch that the bed does not rise again over 80 degrees after spawning or the tender mycelium will be injured. Keep an atmospheric temperature of 50 to 55 degrees. Damp the

walls, floors and surface of the beds to keep the latter from drying out.

There is much that is edifying as well as interesting, which has appeared in HORTICULTURE in the letters by Mr. Farrell and later by Mr. Orpet and my experience has taught me that what has been said by these gentlemen is correct. I should like to endorse Mr. Orpet's statement wherein he says "Many people think that all we have to do is to 'sow' the seed" and the rest follows. I would like to add a rider—there is nothing so uncertain as a mushroom bed. Even bread is more certain to raise than mushrooms. The one thing that is sure is plenty of hard work. As I have written before the whole secret is in the curing of the manure and here is another point—temperature at spawning. In previous notes I have advocated spawning when the heat is declining from 80 to 75. This I consider the best and safest temperature but looking back to when I was a beginner, I can well remember an old kitchen garden hand who had been raising mushrooms for years and may still be doing so who always waited until his bed had receded to 65 to 69 and he raised more mushrooms from one bed than it has fallen to my lot to see since. I watched all the preparations and, conversing with him on the subject, he told me that they might take a week or so longer to come, but that when once here the mycelium had come to stay. There was much in what he said and it serves to demonstrate the lasting abilities of a bed when growing cool.

Speaking of temperatures again, I once saw mushrooms grown very successfully in a disused mansion-house cellar, having no heat whatever. This naturally was cool in the summer and the bed kept on bearing until the temperature dropped to 40 degrees but the best results were obtained with the temperature about 50.

PARSLEY

Parsley will now be getting scarce and a sowing can be made to help out the fast diminishing old stock. Sow in flats and prick off as soon as ready, using either flats or small pots. By using small pots and potting on into 4-inch pots before planting out in the bench or frame, quicker results are obtained than by using flats. Parsley can also be sown in drills on the bench, 18 in. apart.

PEPPERS

A sowing of peppers can be made now and grown on cool. An early batch can either be finished in pots or half-grown and planted out in the spring, thus securing an early crop.

George H. Benson

Rose Silver Moon

We had the pleasure of illustrating this sterling novelty some months ago, but the photograph used did not do justice to the subject and we think our readers will all agree that the picture presented on our title page this week is well worthy of the honor. This rose, introduced by Peter Henderson & Co., is a hybrid between R. Wichuraiana and the "Cherokee" rose (R. sinica). The petals are waxy white and the stamens bright yellow, the blooms measuring 4½ inches in diameter and delicately fragrant. The foliage is bronzy green and glossy, and there is no question that in Silver Moon we have a worthy candidate for the hardy rose garden.

"Something
doing"

We are glad to learn from the annual address of President C. L. Washburn of the Illinois State Florists' Association, at Urbana, the other day, that this body had joined in a successful protest to the Illinois Board of Railway and Warehouse Commissioners against the exorbitant rates charged by the express companies. This is practical work with a tangible, direct advantage to the horticulturists of the State and any man who, participating in the benefits thus gained, still withholds his moral and financial support from such an Association can hardly expect to retain the respect of his fellows.

Costly
inaction

A correspondent writes to us strongly condemning the apathy of the flower trade as a whole as compared with the concerted activity in other lines of commercial industry in holding up their products in their most attractive form before the public eye. He is everlastingly right when he suggests that much of the money now spent for valentines and birthday gifts of one kind or another might, by the use of modern publicity methods, be diverted to the florist's pocket. It is said that the furniture men's appropriation for such purposes is no less than a quarter of a million dollars annually. Our efforts are confined to a few flower shows and in these, in the majority of cases, suggestion and education in the use of flowers is the last thing thought of. We hope the day is not far off when the flower and plant trade will wake up to their deplorable remissness and, putting aside individual interests for the time being, get together to make a noise on behalf of their business as other people do.

A pernicious
bill

The proposition to raise the postage rates on magazines and certain classes of periodicals, which include the trade papers, is one which naturally causes much uneasiness in the publication offices. Its full import is, however, not generally realized by the people among whom these papers circulate and thus the tremendous restraining influence which might be brought to bear upon members of Congress is lost to those who are fighting this battle on behalf of their subscribers as well as for themselves. For, be it known, that if this law should be enacted the extra cost must eventually be met by an increase in subscription rates all along the line. No man who expects to succeed in his business can now think of getting along without his trade paper. To it he looks for that technical instruction and guidance, that broad-gauge knowledge which is indispensable under the business conditions which prevail today. Its advertising pages are fully as useful to him in this respect as its reading columns. In its every department the trade journal is the foremost medium in the dissemination of practical knowledge and every attempt to hamper and embarrass it should be promptly combatted by the thousands who are its beneficiaries, whose willing servant it is, and who should now in its hour of persecution rally to its support by appealing to their representatives and senators to oppose this uncalled-for discrimination against one of our most efficient agencies for the spread of useful knowledge.

Seasonable Notes on Culture of Florists' Stock

CARNATIONS

Now that we are emerging from the dark and short days, feeding material can be applied in stronger doses and with more frequency. When using a mulch it is better to apply it thinly and often than to take any risks in heavy application. A mulch of pulverized cow manure is a very assimilable element to reach the feeding roots. It is better to give a top dressing of bone meal and stir the surface before applying the mulch. When the weather is clear an application of liquid manure will now be of great benefit as it is immediate in its action. Examine your beds carefully and see that the soil is kept evenly moist. Disbudding, keeping the plants within their wire space and fumigation require constant attention. Give ventilation when possible, if only for a short time every day. Pot or flat up young stock as soon as the roots are about three-quarters of an inch long and keep in the same temperature as they were rooted in for about ten days, when they can be removed to a cool light house with an abundance of air. Give careful watering and light and frequent syringing.

CARE OF ARDISIAS

These plants that were left over from Christmas should be looked over and if any require repotting, do it now. Shift into a size larger pot, using a compost of perfectly fresh loam three parts, well decomposed cow manure one part, adding just a little sand to make the soil rather porous. Good drainage is of utmost importance. Grow in a temperature anywhere from 50 to 55 degrees with plenty of air during any mild weather. Keep the plants from now on where they can be syringed at least once on all bright days, but discontinue when they are in flower and until the fruit has set. The foliage at all times should be kept clean from scale which is so prevalent on these plants. Give frequent syringings with some scale remedy.

Plants that lose their bottom foliage or any that have a naked or leggy appearance can be propagated by top working. Make an incision in the stem, place a little moss in the cut to keep it open, then cover with moss and keep moist. In about four or five weeks there will be sufficient roots in the moss to allow them to be cut off and potted.

Seed can be sown now in pans in a temperature of about 60 degrees. Shade from the sun and keep the soil moderately moist. Pot off when large enough to handle into 2-inch pots and then keep them moving right along.

FICUS ELASTICA

Where you want to work a stock of rubbers fill some 2½-inch pots with sand and chopped sphagnum, take the cuttings from your old plants, placing one in each pot. Tie up the leaves and then plunge the pots up to the brim in sand or other material with a bottom heat of from 75 to 80 degrees. No sun should be allowed to strike them while rooting. The "mossing" system is to be preferred after the middle of March and can be continued up to and through May with success. The operation is briefly as follows: Make an incision about four or five leaves from the top, cutting with upward slant half way through; place something in the cut to keep it open, then bind a lump of moss about two inches in diameter around the incision. With a temperature of 60 to 65 degrees, in four to six weeks they should be well enough rooted to sever from the parent plant. Pot in soil three parts and sand one part. Keep rather humid and shaded from the sun until they take hold,

when they should be given a bench in a light house and kept at 60 degrees. Spray overhead once a day and see that they don't become dry at the roots. Shift into larger pots before they become matted with roots.

GLADIOLUS

From now until the end of the month will be right to plant a batch of some large-bulbed gladioli so as to be in for Memorial Day. As a rule they sell well at that date. Augusta, May, America and Blanche make a good variety. Where there is a good trade for these flowers plant once a week for the next fifteen weeks. They can be grown in flats and are not exacting as to soil; any good soil enriched with some well-rotted manure will grow them. Give them plenty of light with ventilation on all good days. Use water sparingly until they start to grow, when they will take water at frequent intervals. For a succession use Colvillei, The Bride, Blushing Bride, and some of the Nanus section. The best temperature is about 50 degrees at night, as they don't like any hard forcing.

HYBRID PERPETUAL ROSES

Roses that were started in a cool house in January and are now making a good start will easily bear a temperature of 55 to 58 degrees and a little higher later on, should you entertain any doubts as to their being in time for Easter. These roses can stand a deal of heat as they fill their pots with active roots and begin to make headway in new growth and will willingly respond to a considerable amount of forcing. As the pots get filled with roots they will stand some feed in the way of liquid manure. Give them a place where they will be fully exposed to the sun and give a daily syringe to make the wood firm and the foliage leathery. Use care in ventilation to prevent too humid atmosphere which is conducive to mildew. Attacks from green fly are likely to happen so give careful attention to fumigating.

LILY OF THE VALLEY IN POTS AND PANS FOR EASTER

Lily of the valley that is needed for Easter should be put in pans or pots within the next three weeks. They can be potted in either sand, moss or loam. It takes from four to five weeks to bring them into flower. Find some place which you can inclose so as to keep it up to 65 to 70 degrees. Anywhere over the hot water pipes will do. From 15 to 20 pips can be put into a 6-inch pan. Plunge these in sand or other material, cover with heavy paper and keep dark until the stems are well up. Then they should be gradually exposed to the light. When they are in flower give full light, but keep away from direct sun. When grown in pans or pots the foliage should be good. Some growers start them in full light and hold the temperature from 55 to 58 degrees. While these will be somewhat dwarfer than case-grown stock they have better foliage and more substance. By this method five to seven weeks are required to have them in flower. Be very careful when the bells show white that they do not get wet.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: Aspidistras; Ferns; Jerusalem Cherties; Palms, Phalaenopsis; Young Lorraine Begonias.

We have in type a number of very interesting papers delivered before various societies and clubs by E. G. Hill, Irwin Bertermann, H. B. Dorner, W. H. Taplin and others, all of which will appear in these columns from time to time and will be found well-filled with valuable experience and suggestion.

CLUBS AND SOCIETIES

HORTICULTURAL SOCIETY OF
NEW YORK.

A meeting of the society was held in the American Museum of Natural History on Wednesday, February 8. There was a good attendance and those present listened to a lecture by George V. Nash on "Some Common Orchids and Roses," illustrated with colored lantern slides. The especial feature of this meeting was the inauguration of the monthly exhibitions, to be held in the future in conjunction with the meetings. A decided success was scored, and it is expected this will lead to still more successful exhibitions during the coming months.

The schedule was planned to give non-commercial growers, gardeners and others interested in the growing of plants and flowers for pleasure, an opportunity to exhibit where they would meet in competition only those of their own class. That this was appreciated by the gardeners was attested by their attendance. It was not without its effect upon the commercial element also, for some of them, realizing that here was the place to come into contact with the gardener and amateur, made exhibits, although no premiums were provided for them in the schedule.

The society is desirous of impressing upon gardeners and other plant-lovers, that here is an opportunity, in these monthly meetings, that has never before been theirs in this vicinity—an opportunity each month to exhibit plants and flowers. While the schedules will be so planned each month that some particular flower or flowers shall be the principal feature, exhibits not provided for in the schedule are welcome, and if worthy may be recognized by the exhibition committee. The air of informality and comradeship which pervaded the exhibition just passed was most encouraging and gratifying.

The next exhibition and meeting of the society will occur on Wednesday, March 8, at the same place. All are welcome. Announcement of the schedule for this exhibition will be made shortly.

The following is a list of the prize winners on February 8:

Dendrobium C. C. Moore, Hackensack. N. J., gardener John P. Mossman. *Cypripedium* Miss M. T. Cockerott, gardener Adam Paterson. Hybrid orchid—C. C. Moore. Collection of cut orchids—C. C. Moore. Vase of new rose, not yet in commerce The F. R. Pierson Co., silver medal. Three vases of roses, 3 kinds, 12 flowers of each—R. Delafield, gard. Wm. Brook. Pink Killbuckey Mrs. F. A. Constable, gard. James Stuart. White Killbuckey—Miss C. A. Bliss, gard. J. T. Burns, first; Mrs. F. A. Constable, second. Richmond Mrs. F. A. Constable. American Beauty Chas Stuart Smith, Jr., gard. Arthur Pederson. Collection of orchids. Lager & Hurrell, silver medal. *Mushrooms*—Miss C. A. Bliss. Carnations Miss C. A. Bliss. Lily of the valley—Miss C. A. Bliss. *Aspidistra longifolia* Mrs. F. A. Constable. Collection of cut orchids. Julius Roehrs Co., bronze medal.

NASSAU COUNTY HORTICULTURAL
SOCIETY.

The monthly meeting of the Nassau County Horticultural Society was held in Pembroke Hall on Tuesday afternoon Feb. 7th. President Trepress was

in the chair and there was a good number present. A very hearty vote of thanks was accorded the dinner committee for the admirable way in which they performed their duties. A letter was read from the New York Florists' Club asking the support of this society in their endeavor to procure an appropriation of \$50,000 from the legislation to erect greenhouses at Cornell for the advancement of horticulture. M. C. Ebel was elected an honorary member. Awards for the monthly exhibits were as follows:

Certificate of Culture—H. Matz, *Cyclamen*, Roman Hyacinths; T. Ingram, *Rose Pink Enchantress*. Honorable Mention—T. Ingram, also vase of mixed Carnations.

For the Society's prize—1st, Mr. V. Cleres for 12 Pink and 12 White Carnations. Book on Carnations by C. W. Ward, for 25 Carnations Alma Ward, Mr. Wm. Eccles. Certificate of Merit—Cottage Garden Nursery Co., for Carnation Seedling Howard Gould, color light red.

A euchre and dance will be held in Pembroke Hall on Feb. 27th. The society's prize for the March meeting will be for cinerarias, cyclamen and stocks, one pot of each. The "Buds" Company, of New York, will present a silver cup for the best collection of spring flowering bulbs, which will also be competed for at this meeting. The collection to consist of 6 varieties, 12 of each, lily of the valley to be excluded.

ERNEST WESTLAKE, Cor. Sec.

GARDENERS' AND FLORISTS' CLUB
OF BALTIMORE.

The Gardeners' and Florists' Club held the regular semi-monthly meeting and the feature of the evening was an illustrated lecture, "The Gardens of Italy," by John K. M. L. Farquhar, of Boston. It being ladies' night a large and appreciative audience was present. A hearty vote of thanks was accorded the speaker at the close to which Mr. Farquhar responded in an appropriate manner, and in closing invited the club to visit the National Flower Show to be held in Boston, end of March, promising to be the finest show of the kind ever held in this country. A letter was read from the Florists' Club of Philadelphia, extending a cordial invitation to the members to visit the new establishment of Henry A. Dreer, Inc., at Riverton, N. J., on Wednesday, March 8th.

ORNAMENTAL GROWERS' ASSO-
CIATION.

At the annual meeting of this Association, held January 12th, 1911, the following resolution was adopted:

Resolved, That the Ornamental Growers' Association protests against the practice of so-called trade or other periodicals accepting and printing advertisements of nursery stock with wholesale prices attached, and that the Secretary of this Association is hereby instructed to forward a copy of this resolution to the following periodicals: Florists' Exchange, Florists Review, American Florist, HORTICULTURE, National Nurseryman, American Fruits, Western Fruit Grower, and any others that carry nursery advertisements.

NEW JERSEY FLORICULTURAL
SOCIETY.

The regular meeting and annual smoker of the N. J. F. S. was held Friday evening, Feb. 10th, at Orange, N. J., and was very largely attended by members and visitors. A pleasing feature of the affair was the presentation of the silver cups awarded at the end of the year to those winning the highest number of points at the monthly competitions. The presentation speeches were made by George Smith who strongly complimented the winners on the fine display made by them. The cup winners were as follows:

Lager & Hurrell, for orchids; A. B. Jenkins, gard. Albert F. Larson, first, and Thos. A. Edison, gard. Frank Drews, second, for roses; S. M. & A. Colgate, gard. William Reid, first, and Chas. Hathaway, gard. Max Schneider, second, for carnations; William Reid, first, and A. F. Larson, second, for seedling carnations; William Reid, for foliage plants, for flowering plants and for chrysanthemums; Walter M. Gray, first, and William Reid, second, for dahlias; A. F. Larson, for single dahlias.

The program included selections by Randall's orchestra, solos by Chas. Vanderhoof, stories and comic songs by Joseph Burke, songs by Joseph Marsden, and addresses by Rev. L. H. Lightipe, J. Austin Shaw who gave one of his original poems and spoke for the Press; Wm. J. Stewart of Boston spoke on the forthcoming National Flower Show to be held in Boston in March. He said it would be the greatest show of its kind ever held in this country. He also complimented us on our exhibits and especially our carnations. He said the Enchantress carnation originated in the vicinity of Boston but he had never seen such Enchantress exhibited anywhere as those shown by Mr. Reid. Robt. Shultz and W. Tricker, representing the Morris County Gardeners' and Florists' Society, spoke in regard to their fall show and hoped that our Society would participate. The prizes will be equal if not better than last year. F. L. Atkins, of Rutherford, told stories.

Competition for this year commenced at this meeting, the decision being as follows:

American Beauty roses—Albert F. Larson, 85 points; Frank Drews, 75; mixed roses—William Reid, 90; A. F. Larson, 80; Frank Drews, 80; carnations—Wm. Reid, 95; A. F. Larson, 90; Frank Drews, 80; orchids—Thomas Jones, 95; Joseph A. Manda, 90; Lager & Hurrell, 85; William Reid, 95; A. F. Larson, 85; Camellias—Fritz Bergland, 90; freesias—Max Schneider, 90.

Following are the awards for the exhibits not in competition for points:

Narcissus—Max Schneider, cultural certificate; hyacinths—Max Schneider, cert. of merit; *Epidendrum Kewensis*—J. A. Manda, first class cert.; *Laelia cinnabarina* and *flava*—Thos. Jones, cert. of merit; *Phalaenopsis Schilleriana*—Julius Roehrs Co., first class cert.

Peter Duff, gardener for Mrs. J. C. Brown, who has a national reputation as a chrysanthemum grower, will read a paper before the Society at the March meeting, on chrysanthemums.

WILLIAM REID, Sec'y.

JOINT MEETING OF ILLINOIS SO-
CITIES.

The joint meeting of the four most important Illinois horticultural societies at Urbana which attracted statewide attention throughout the week closed on February 10. The Illinois

State Horticultural Society elected the following officers: President, F. D. Voris, Neoga; vice-president, Col. J. Mack Tanner, Springfield; secretary, W. B. Loyd, Kinnmundy; treasurer; J. W. Stanton, Richview. The retiring president and vice-president were R. O. Graham, Bloomington, and F. D. Voris, Neoga, respectively, and the secretary and treasurer were reelected.

The Illinois State Florists' Association reelected its old officers; president, C. L. Washburn, Chicago; vice-president, Charles Loveridge, Peoria; secretary, F. L. Washburn, Bloomington, and treasurer, J. F. Ammann, Edwardsville. The other two societies, the Cook County Truck Growers' Association and the Lake Forest Horticultural Society, did not elect officers, as it was not an annual meeting for them.

The meeting was a distinct success in every way. The speakers were made up of practical horticulturists, including members of the University of Illinois Horticultural Department and professionals from other states. The attendance was large at every session and on every hand there was expression of extreme satisfaction over the good derived. The beautiful silver cup, donated by the B. G. Pratt Company, insecticide manufacturers, to be given for one year to the exhibitor of the best three boxes of apples, was won by J. C. B. Heaton & Son, New Burnside. The cup is worth about \$150, and will become the personal property of the man who wins it the second time.

At the session of the Illinois State Florists' Association J. C. Vaughan, Chicago, addressed them on "Live Issues of the Florists." E. G. Hill, Richmond, Indiana, followed on "Some New Things." The closing speech was by H. B. Dörner of the University of Illinois on "Work at the Experimental Greenhouses." He explained the work in progress at the Experimental greenhouses and drew conclusions where possible, thus giving the florists much valuable information.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The meeting of this club on Tuesday evening, February 14, was a "rouser" in numbers, fervency and in the ability of the address by Edwin Jenkins of Lenox, Mass., on Science in Horticulture. The lecturer recommended that a young gardener, before taking up the courses at the Agricultural Colleges, should have two or three years' practical experience. This subject of scientific versus practical education is always a fertile one in provoking argument and this occasion was no exception to the rule. The gladiators of the organization were ready and primed for the fray and it was well along toward the midnight hour when adjournment came. Peter Fisher, Ed. MacMullin, F. E. Palmer, M. A. Patten, Thos. J. Grey, George Stewart and many others participated and the Massachusetts Agricultural and other colleges were handled without gloves.

Peter Fisher and John Barr showed handsome seedling carnations. From A. Leuthy and the W. W. Edgar Co. came several new and promising azaleas. Especially fine was Lady Roosevelt, introduced by Aug. Haerens, an entirely new tint of pink with large double flowers.

PITTSBURGH FLORISTS' AND GARDENERS' CLUB.

The meeting on the evening of Tuesday, Feb. 7, was well attended, 80 members present. Officers were elected as follows: President, John W. Jones; vice-president, P. S. Randolph; secretary, H. P. Joslin; assistant secretary, C. S. Crall; treasurer, H. L. Blind; executive committee, E. C. Reineman, Jno. Bader, Neil McCallum.

The entertainment committee reported that they had secured R. Vincent, Jr., of White Marsh, Md., for the evening of Feb. 28, who will speak on his travels through Holland and the bulb fields, illustrated by beautiful colored slides. After the lecture refreshments will be served and a musical programme rendered.

The auditing committee reported the books of the club correct. A resolution was carried that members whose unpaid dues amount to \$4 and over, not including 1911, should receive final notice from the secretary that if their arrears are not paid by March 7, 1911,

JOHN W. JONES

President-elect Pittsburgh Florists' and Gardeners' Club.

the date of the next meeting, their names will be brought before the club for expulsion.

On retiring from the chair President Burki thanked the club for the cordial support given him. During Mr. Burki's three years of office the club has grown in its membership and resources, has taken a prominent part in the sesqui-centennial celebration of Pittsburgh, entertained the Carnation Convention and changed its meeting place to the Fort Pitt Hotel.

It was Carnation night, with a choice display of blooms as follows: Baur & Smith, Indianapolis, Ind., Pocahontas, a very high-grade crimson; Nic. Zweifel, North Milwaukee, Wis., Bright Spot, a fine dark pink; A. T. Lorch, Allison Park, De Haven, Pa., a remarkable fine lot of several varieties. Baur & Smith received a certificate of merit for Pocahontas and Nic Zweifel, special mention for Bright Spot. Very charming orchids were shown by Dr. Sheaffer of Pittsburgh and Primula Forbesii rubra by Carl Bechner of Dumont, Pa.

Subject for next meeting, Roses.

H. P. JOSLIN, Sec'y.

NEW YORK FLORISTS' CLUB.

A highly intelligent audience of nearly one hundred members of this club gathered at the February meeting last Monday evening to greet Richard Vincent, of White Marsh, Md., and listen to his entertaining talk on the bulb fields of Holland and other horticultural observations on his recent European visit.

Routine business was put through before the lecture. Officers' and committees' reports were duly disposed of. Among the latter was a verbal report by H. A. Bunyard on behalf of the transportation committee, which was followed by a vote selecting the Fall River line as the official route to and from the National Flower Show at Boston. A round trip rate of one and three-fifths fare has been granted on the certificate plan. This is available on any and all routes between the two cities, but those who wish to join the club party should make arrangements to take the boat leaving New York at 5 p. m., Friday, March 24. An invitation to join with the Florists' Club of Philadelphia on March 8, in a trip to Riverton, N. J., as guest of H. A. Dreer, Inc., was accepted with thanks.

Mr. Vincent's lecture was illustrated profusely with a series of handsome lantern slides, many of which were colored. They showed all phases of bulb propagation, growing, flowering and shipping. Views in the Ghent Exposition, in Belgium horticultural establishments, in Kew Gardens, in Edinboro, and other centers of interest were included. In closing Mr. Vincent gave an enthusiastic outline of the preparations being made towards the S. A. F. Convention in Baltimore next August and for the entertainment of the large number of visitors expected there from all parts of the country. A hearty rising vote of thanks was extended for his interesting address.

A vase of blooms of new and promising red carnations was exhibited by Wm. Kleinheinz, of Ogontz, Pa. The judges awarded 87 points which entitles it to the Club certificate. Mr. Kleinheinz being called upon made a brief speech.

SPRINGFIELD FLORISTS' CLUB.

The regular monthly meeting of the Springfield, O., Florists' Club, held February 13, was one of the most enjoyable and most profitable ever held by that band of enterprising florists. A three-course supper was served at 7 o'clock by the new entertainment committee, and for a first effort, the consensus of opinion was that they "made good."

The paper of the evening immediately followed the supper and was read by Wm. H. Reeser, on "Greenhouse Appliances." Mr. Reeser is considered an authority on greenhouse conveniences and short cut methods and his papers took a wide scope, describing and recommending up-to-date means of easier and more economical accomplishment of work, both in greenhouse and office. His plans for the easier handling of soil, elevating and disposing of ashes from boiler cellar, transportation of heavy flats and economy in use of fuel were received with interest and brought out an interesting and profitable discussion.

The club made another move in the direction of their idea of civic beauty. The latest plan, and one that seems as-

sured of success, is a rose garden, of from three to five acres, to be located in Snyder Park and to be cared for and maintained by the florists, who will ask only that the land be prepared and equipped with trellis work and whatever else is found necessary. This equipment would entail but slight expense while the result would be a bower of beauty such as is seen in the botanical gardens of cities in the old world. The project was thoroughly discussed and a committee composed of John M. Good, Christian Binnig, Arthur Leedle, Pearl Bethard and Wm. H. Reeser was instructed to bring the proposition to the attention of the park board as early as possible and report results.

It is the idea of the florists to construct a rose garden in which every variety of this beautiful flower grown by Springfield florists may find a place. They believe that the proposed garden would add materially to the beauty of the park and it would, in addition be an excellent illustration of how to care for roses, and of the results it is possible for any householder to obtain; the establishment of a rose garden of this extent in the park would inspire many residents to beautify their properties with this most fragrant and beautiful flower.

The committee to whom was referred the matter of furnishing plants and seeds for a large garden to be established in the park and divided among the schools of the city reported that the park board favored the proposition and pledged the necessary ground for carrying out the plan. The school authorities are also in favor of it and the matter will no doubt soon take definite shape.

C. W. Unglaub exhibited three beautiful plants of *Primula obconica*. The florets on all the plants were larger than a silver dollar and the plants reflected great credit on Mr. Unglaub as a successful grower.

All the Springfield mail order florists report extraordinarily good business for February and the outlook is for a record-breaking spring trade.

ST. LOUIS FLORIST CLUB.

The florist club held a very interesting carnation meeting last Thursday afternoon. The attendance was very large, numbering nearly forty including visitors. There were a lot of new carnation blooms on exhibition. The Chicago Carnation Co. sent Washington, Nic Zweifel staged Brightspot, Henry Eichholz sent Princess Charming and Christmas Cheer, P. M. De Witt, Bridgewater, Pa., sent Pennsylvania—the pink Boston Market. The Oakland Floral Co. showed a fine lot of well-grown carnations and extra fine sweet peas. The judges, Messrs. Schinder, Grossart and Held, made the following report: Brightspot, 90 points; Washington, 84; Pennsylvania and Princess Charming, 80 points; they also recommended a certificate of merit for Brightspot.

The trustees reported on their plan of entertainment. The matter of the celebration of the club's twentieth anniversary was left over for the March meeting.

There were members present of the Retail Florists' Association asking support on their war on "crepe pullers," which was freely given. They are now preparing a bill to be intro-

duced in the city council to prohibit this practice and the club will lend a helping hand.

The next meeting will take place Thursday afternoon, March 9th, at 2 o'clock.

TUXEDO HORTICULTURAL SOCIETY.

This prosperous society held a meeting on Feb. 8th. The newly elected president took the opportunity to thank the members for the honor in electing him and assured them that he would do everything in his power for the welfare of the society.

The alteration in the By-Laws admitting assistant gardeners free of initiation was passed. Twelve new candidates were elected to membership.

James Scott of Elmsford, N. Y., will deliver an address on Wednesday, March 1st. An exhibition of seasonable flowers will be made at the same meeting.

An enjoyable evening was spent after the meeting in bowling in which George Thomson made the highest score.

ALBERT FISCHER, Sec'y.

FLORISTS' CLUB OF WASHINGTON.

The regular monthly meeting of the Club was held at Gude's Hall on the night of Feb. 7. There was an unusually large attendance. Nominations of officers were made as follows: President, E. C. Mayberry; vice-president David G. Grillbortzer; secretary, O. A. C. Oehmler; treasurer, Wm. F. Gude; directors, Geo. H. Cooke, W. A. Ballinger, C. A. Shaffer, J. Milton Thomas and J. J. Bickings.

Sec. Oehmler moved that the Florists' Clubs of Baltimore and Philadelphia be invited to join the Washington florists in a trip on March 8th to the place of Henry A. Dreer. Motion was carried.

DETROIT FLORIST CLUB.

Although a genuine old time blizzard had been raging all day still a couple of dozen members appeared at the last meeting encouraged by the prospect of listening to a paper on "Retail Store Management," by Mr. Bertermann of Indianapolis. Unfortunately the writer of the paper could not come himself and Mr. Sullivan, our local literary star, read the paper in a very apt manner.

The next meeting of this club, February 20, promises to be not less entertaining as Mr. Skidelsky who has favored this club in previous years will again favor us with one of his very valuable essays.

AMERICAN ROSE SOCIETY.

The time is drawing near when the big Flower Show in Boston will become a fact. The Toronto Horticultural Society has sent word that they offer the American Rose Society, their silver and bronze medals as first and second prizes for best specimen of hardy climbing rose, exhibited at this exhibition. In judging, fragrance to count 33 points.

Eber Holmes of Montrose, Mass., is manager in charge of the Rose section, and any inquiry for information regarding the same addressed to him or to the secretary at Fishkill-on-Hudson, N. Y., will meet with prompt attention.

BENJAMIN HAMMOND, Sec'y.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Department of Registration.

As no objections have been filed, public notice is hereby given that the registration of the Rose, "Yellow Baby Rambler," by Jackson & Perkins Company, Newark, Wayne County, New York, becomes complete.

Registration of Zonal Pelargoniums.

Public notice is hereby given that Robert Dukelou, of Rochester, N. Y., offers for registration the Geraniums described below. Any person objecting to the registration or to the use of the proposed names, is requested to communicate with the Secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

Raiser's Descriptions.

Dr. E. M. Moore—Cross between a large, soft pink, single flowered variety, name unknown, and a small dark red, single flowered variety, name unknown. Habit strong and vigorous. Leaves dark green, $3\frac{1}{2}$ to $4\frac{1}{2}$ inches long, and 4 to 5 inches wide, with prominent dark bronze zone. Flower clusters on stout spikes 10-12 inches long, prominently surmounting the leaves, with 75 to 100 flowers in cluster. Individual flowers single, $1\frac{1}{4}$ to $2\frac{1}{4}$ inches across. Color, bright vermilion with white eye.

A. B. Lamberton—Parentage same as above. Habit medium strong. Leaves light green with faintly marked inconspicuous zone, 3 to $3\frac{1}{2}$ inches long, and $3\frac{1}{2}$ to 4 inches wide. Flower clusters on very stout spikes 10 to 12 inches long, and prominently surmounting the leaves with 35 to 40 flowers in a cluster. Individual flowers single, $1\frac{1}{4}$ to 2 inches across. Color, bright orange pink with conspicuous white eye.

H. B. DORNER, Sec'y.

February 9, 1911.

CLUB AND SOCIETY NOTES.

The Albany, N. Y., Florists' Club will have a banquet on the evening of Thursday, March 2.

The Dayton, O., Florists' Club will have its annual banquet at the Philips Hotel March 1. Horace Frank will be toastmaster.

The New Haven (Conn.) Horticultural Society will hold a grand dahlia show some time next September. John H. Slocombe is chairman of the committee on preparations.

The King Construction Company have given a silver cup to be competed for at the National Flower Show in Boston, for the best 30 blooms of any rose introduced since 1900.

Miss Laura B. Dawson of Jamaica Plain, Mass., delivered a lecture on Horticulture for Women before the Worcester County Horticultural Society on February 9. A large audience listened and some interesting discussion followed.

The Rochester, N. Y., Florists' Association have rented new quarters over 95 Main street, East. We hope to soon hear that this thriving organization has secured a site for a perma-

nent building of their own, with exhibition hall, etc.

The Engelman Botanical Club, St. Louis, has elected Dr. R. R. Gates, president; G. H. Pring, secretary and treasurer. The Club met Feb. 3, at Shaw's Garden and J. H. Harris presented a paper on "Natural Selection." The meeting was well attended.

The Schedule of Premiums for the carnation section of the National Flower Show, Boston, in March, has been issued in separate form by the American Carnation Society. Carnations are to be staged March 28. The list of prizes offers the largest amount of money ever given for carnation exhibits anywhere and will, no doubt, bring out an unprecedented display.

The next in the winter course of lectures will be given in Horticultural Hall, Boston, on Saturday, February 18, at 2 o'clock. The lecturer will be Mr. John K. M. L. Farquhar of Boston and the subject "Where Seeds Come From," illustrated by the stereopticon. The lecture previously announced for this date by J. H. Hale of Connecticut has been necessarily postponed to a later date.

A good attendance was had at the regular meeting of the Buffalo Florists' Club on Tuesday evening last and the following were nominated as officers: President, Geo. McClure, Jr.; vice-president, Chas. Guenther and Jos. Sangster; secretary, Wm. Legg; financial secretary, Jerome Deutscher. On March 7th the regular meeting will be held and election of officers will be in order, a carnation exhibit and banquet to follow.

IOWA'S PROPOSED NURSERY LAW.

The man who canvassed the Sioux City territory last spring and sold "sticks" which were represented to be embryonic fruit trees, will have harder sledding if a bill introduced into the legislature by Senator Chapman becomes a law.

The proposed statute takes a fine little rap at alleged nurserymen who are not "on the square," and requires nurserymen to sell fruit trees in accordance with the name and variety. It makes it imperative that the salesman shall specify in the bill of sale whether the tree is a graft, seedling or is budded.

The author of the bill declares the liberal nursery laws of Iowa have made the state a dumping ground for every kind of tree bearing any kind of name.

—*Sioux City Journal*

A MUNICIPAL NURSERY.

A municipal nursery for the rearing of young trees is a recommendation in the annual report of the East Orange (N. J.) Shade Tree Commission. The difficulty of getting the right kind of trees for planting and the long period required between getting them from the nurseries and setting them out are given as the reasons for establishing such an institution. The White Oak Ridge Farm lands surrounding the pumping station are suggested as a good place to locate the nursery.

Obituary.

Timothy McCarthy.

It was with the deepest sorrow that we learned of the death on Friday, February 10, of this gifted gardener, for many years superintendent of Swan Point Cemetery, Providence, R. I. Mr. McCarthy had been seriously ill for several weeks but we believed his recovery was assured and the news of his death came as a great shock. Beautiful Swan Point Cemetery stands as a permanent monument to the great ability of Mr. McCarthy. To his many qualities, his cheery companionship and great heart everyone who ever knew him can testify. To his widow, who is a daughter of the late William Doogue of Boston, and his children our sympathy and condolence is extended.

Mr. McCarthy was born in Ireland, coming to this country with his parents when a child. As a boy and young man he worked at the Pratt estate in Watertown near Boston, the Hovey establishment, Anthony McLaren's, W. C. Harding's,

TIMOTHY MCCARTHY

Wm. Doogue's, Forest Hills Cemetery and 35 years ago became superintendent of Swan Point Cemetery, Providence, R. I.

The funeral was attended by a vast gathering of friends, among whom were M. H. Norton, P. Welch, D. H. Sullivan and L. J. Doogue of Boston, and twenty-three members of the Association of American Cemetery Superintendents, of which Mr. McCarthy was an ex-president.

We gladly give space to the following eloquent and loving tribute by J. A. Pettigrew, of Boston Parks, to the memory of his friend:

"Everyone who knew Timothy McCarthy of Providence will regret the passing away, in the prime of life, of a noble man. The writer first met him thirteen years ago and was impressed at once with his remarkable personality, and the striking individuality which shone in a charming manner from each facet of his character. The tone of his enthusiasm struck with a true sound and inspired everyone with whom he came in contact.

Nature was one of the gods at whose

shrine he worshipped, and he applied her teachings in the work of his life. With true artistic taste, into the soft, turfy glades of God's acre in his own city, rich with wild herbaceous plants and grasses, he introduced spring blooming bulbs and plants from other climes, yet selected with such care for appropriateness that they blended perfectly with their setting, or mingled without a jarring note.

The rock-work boundary wall of rough boulders, built by him, was another example of his knowledge of Nature's ways. By many, myself among the number, it was deemed at that time, from a landscape point of view, of doubtful value. I had the pleasure of seeing it again, after a few years; it was indeed a surprise: the great rock pile, seen here and there through a wealth of vines and shrubbery, was softened into a charming feature. Timothy McCarthy, in the interval between my visits, had called upon his genie and the call had been responded to. Every nook of the halcyon ground, which was his pride, shows the result of his handiwork and the closeness of his association with Nature.

Mr. McCarthy, although a very practical man, was the essence of modesty: he assumed little credit for the work he did. This characteristic, combined with his great sense of humor, his friendly interest, his bright smile, his hearty laugh and merry face, made him a most charming companion. There are too few of his kind and he will be long remembered by all who knew him."

Benjamin Hoyt.

Benjamin Hoyt, nurseryman, died at his home in Monticello, Iowa, Feb. 7th, age about forty years. Mr. Hoyt was interested with his brothers in the Hoyt Nursery.

NATIONAL FARM SCHOOL, DOYLESTOWN, PA.

The annual report of the horticultural department of this useful institution has been issued by Prof. W. F. Fancourt. Botany, forestry, the principles of greenhouse construction and management, vegetable gardening, packing for market, etc., are all taught in an efficient and practicable manner. The cash sales from the product of greenhouses and grounds last year amounted to \$723.66. The grounds about the institution have been improved from year to year by planting of rhododendrons, privet hedges, etc., and present a most attractive appearance.

PRIZES FOR JEROME JONES.

Mr. Jerome Jones of Boston has contributed cash, first and second prizes of \$15 and \$10, respectively, to be awarded at the St. Louis exhibition of the Chrysanthemum Society of America next November, for vase of blooms of Mrs. Jerome Jones. Named for a most estimable lady whose father, H. A. Gane, was one of the first and best of the American seedling raisers, this variety has other claims upon the chrysanthemum raisers for its perpetuation, besides its sterling qualities as an exhibition flower. In some respects, particularly that of foliage, its equal has not yet appeared. No doubt there will be some grand entries for this prize at St. Louis.

CHICAGO NOTES.**The Wholesale Market.**

The subject of moving the wholesale market from its present center, Randolph and Wabash avenue, has resulted in nothing but talk so far. It received a sudden impetus Tuesday just after the morning rush when a large piece of marble and plaster fell in the entrance to the Atlas Block causing much excitement. No one was hurt. The J. A. Budlong Co. have decided to give up their store in the Atlas Block and the Batavia Greenhouse Co. has rented it. No suitable location has yet been found for the Budlong business.

Scarcity of Roses.

A trip about the city this week showed the large greenhouse establishments to be almost without roses. Though a scarcity of roses at this time is not unusual, the growers all say it is more general and of longer duration than they have known before. Carnations are also scarce, but not to such an extent as roses. At J. A. Budlong's the plants were in excellent condition and this place led in the quantity of carnations being cut. Lilies everywhere are in good condition, though the usual percentage of diseased plants have been thrown out, especially multiflorums.

The State Association.

The meeting of the Illinois State Florists' Association last week at Champaign-Urbana was attended by rather a small delegation from here. The party left over the Illinois Central, February 8, and returned February 10th. They report a fine exhibit of new roses and carnations. The Chicago Carnation Co. as usual led in number of excellent varieties shown.

Valentine Windows.

J. Mangel had two tables filled with tasty floral Valentine offerings in his windows and they included several novel effects. Among them was a cupid nestling among the petals of a very large red rose.

Fleischman had a very attractive window in violets and violet boxes tied with gold ribbon for Valentine's Day.

Auto Trucks.

Much interest was shown by Chicago florists in the auto truck exhibit at the Coliseum last week and no doubt many sales will be made to the trade. Many are already supplied with one or more and others are thinking of getting in line with the newer method of delivery.

Building Notes.

Sol. Garland has ordered a carload of glass and will build a range of violet houses at Desplaines where he now has a greenhouse plant. J. B. Deamud will have an interest in the business and market the stock.

Jos. Brooks of Morton Grove is preparing to add three greenhouses in the spring. They will be 27 x 100 ft., with Garland gutters and Moninger truss. The latter are very strong and simple of construction and full description will be given by the Moninger Co., whose card will be found on another page. Moninger has just erected a range of houses for the State Experiment Station at San Antonio, Texas.

Trade Notes.

O. J. Friedman will remove from his present location at 185 Michigan ave-

nue to the store one door north, on May 1st.

E. H. Hunt's supply house has just filled orders for Wittbold Spraying Nozzles from the West Indies and from the Philippine Islands. They were sent in small lots by parcels post.

The Pansy Flower Store has increased its business and added another room and a very ornamental as well as useful balcony has been constructed. It is partly hidden by a vine covered lattice and makes a good place for supplies. A. A. Sawyer, father of Miss Sawyer, the proprietor, is well-known for his excellent asters and says he is prepared to plant the first seeds February 20th as usual.

Personal.

H. Hunt, of the A. E. Hunt Co., was in Michael Reese Hospital for several days last week with an eye trouble.

The sympathy of the trade is extended to Mrs. F. C. Morris of Hinsdale, Ill., in the recent loss of her brother, John McDonald, and sister-in-law, Mrs. Wm. McDonald.

Visitors: J. L. Johnson, De Kalb, Ill.; Chas. Mueller, Wichita, Kans.; and son, Harry Mueller, of Urbana, Ill.; F. V. Craigh, with Wm. Hagemann & Co., New York; Irwin Bertermann, Indianapolis, Ind.

A DETROIT GENTLEMAN.

E. A. Scribner, whose portrait appears herewith, for many years in the florist business at 604 East Fort street,

**E. A. SCRIBNER**

Detroit, has sold out to his faithful employee Robt. W. Jean. Mr. Scribner's untiring efforts to make the discussions of the Florist Club interesting, his reports when returning from the annual S. A. F. conventions, his modest and engaging personality, have all contributed to make him very popular. His "monument" is Waterworks Park, a piece of marsh when he was put in charge, but a beauty spot today visited by everybody who goes to Detroit. Verily, we all wish that he and his wife may enjoy many years in well-earned rest and comfort and the Florist Club be still given the benefit of his valuable experience.

FRANK DANZER.

DOCTORS OF PLANT DISEASES.

Some agricultural college which makes it a point to keep in touch with commercial development on lines parallel to the growth of scientific agriculture can make a distinct hit by strengthening its course in the line of plant pathology. For several years past there has been an insistent demand for men versed in the knowledge of tree and plant diseases, men who know how to determine the nature, causes, and remedies of more or less mysterious ailments such as that which has wiped out the chestnut forests around New York City, and others which affect the commercial value of the native timber on large areas of the public domain. The field for the plant pathologist is widening tremendously as it is learned that the ravages of disease among the plants on which we depend for our agricultural supremacy can in many cases be prevented or materially modified, and only two colleges seem to be paying any special attention to this feature of scientific agriculture. The Department of Agriculture has repeatedly announced that it is in the market to purchase the services of plant pathologists, and now it makes another appeal for those who are qualified to come forward and submit to the test of a Civil Service examination to demonstrate their fitness for the work.

An examination will be held for assistant plant pathologist (male) on March 15, 1911, to secure eligibles to fill a vacancy in the Bureau of Plant Industry, at an entrance salary of from \$1,600 to \$1,800 per year. The applicant must be 28 years of age, and under 40, and must be skilled in sugar-beet work, as it is intended to assign the person appointed to work in breeding beets. The subjects of the examination are: General education and training, training and experience in plant breeding and plant pathology, and a thesis of not less than 1,000 words on plant breeding or plant pathology on which the applicant has done original investigation. Persons who may wish to take this examination should apply to the Civil Service Commission, Washington, D. C., for further information.

THE FREAK SEASON IS OPEN.

Washington. Surpassing Luther Burbank's wildest flight of horticultural fancy and leaving at the post the whole confraternity of "back to the soil" enthusiasts, Wilfrid Barron, of Washington, has produced a lemon plant which he can boast as literally his own handiwork. He grew it from a seed embedded in a cut in his thumb.

Barron was preparing lemons six weeks ago in a cafe where he practices his profession as a blender of beverages and juggler of sleep-inducing juices when the knife slipped and made an exploratory incision in the ball of the Bar-onial thumb. Doing a little quiet slipping on its own account, a lemon seed coyly concealed itself in the cut.

After the surface of the wound had healed, Barron's thumb burgeoned like a bud in springtime, and three sprouts appeared. Then the animated experiment station called in Dr. C. A. Snow, who "cut back" the luxuriant foliage. This pruning resulted naturally in a sturdier growth, which was cut out, rootlets and all, and transferred to a flower pot. To confound the incredulous and amaze the arboricultural, Barron has the cut thumb and the thriving lemon plant as evidence.

—Phila. Telegraph.

TO GROW CHADWICK SUCCESSFULLY.

Among the late-flowering chrysanthemums, W. H. Chadwick and Yellow Chadwick have more than held their place this season in both the New York and Boston flower markets. There is no better seller and many more could be regularly disposed of if the growers would only produce them. The reason so few are grown is, presumably, the susceptibility of this fine old variety to disease. It will, no doubt, be of much interest, therefore, to chrysanthemum growers to learn that one Boston grower of high repute keeps Chadwick and in fact all the chrysanthemums he grows in perfect health by limiting them to three inches of soil on the bench. He calls attention to the fact that the chrysanthemum is a surface feeder and when given deep soil for the roots to wander in is very liable to disease. He says that if the grower will plant on the bench with not over three inches of soil and feed liberally with stimulants from the surface he can grow Chadwick to perfection. Try it.

ROSE GEORGE ARENDS.

Horticulturists are promised a novelty in roses this year, which if it comes up to the published description should prove a desirable addition to its class. It bears the name of George Arends, and is further called a pinl Druschski, from the close resemblance of the bloom in regard to shape to that of the white Frau Karl Druschki. The stems are long and the flowers form singly and not in cluster as with that variety, which as the raiser suggests is an improvement, and it is very fragrant. It is said to be very suitable for forcing. It is being distributed by a London house. F. M.

POCAHONTAS.

This is one of Baur & Smith's productions, the result of a cross between two home seedlings in the pedigree of which the best of the crimsons and scarlets are represented. The color is a lively deep crimson and the flowers borne on strong, upright stems often measure four inches under ordinary culture. Free blooming, a good keeper

and a good seller is the record of Pocahontas to date.

Mr. Baur recommends this carnation as making a beautiful combination with Enchantress, being much larger than any of its crimson predecessors which were too small to use in association with the larger light pink varieties.

CARNATION BONFIRE.

This is one of E. G. Hill Co.'s prime novelties for 1911. Color intense scarlet, recommended as a good companion for Beacon, coming into bloom before that popular variety. It won first prize at Chicago as best red seedling for 1910 and at Indianapolis in open class for fifty red. It is a strong, healthy and vigorous grower.

CONTINENTAL NOTES.

Freudenstadt.—The creation of an Alpium on a hilly terrain, on which will be planted all the indigenous plants of the entire Schwarzwald (Black Forest); the Swabian Alps, and the Voralpen, in groups according to color, was discussed by the club for beautifying the locality at its last meeting. The proposal met with a favorable reception, and it is hoped that it will be soon undertaken.

Zabern.—The Alsace and Lorraine rose amateurs in the township who number 1100 members intend to have a rose show in 1911. The amateur raisers of roses, Dr. Kruger, Walters and Jacobs, will participate with roses only of their own raising. As this association of growers of roses possesses a very admirable rosery the exhibition should offer wide interest to rose growers. Information regarding the show may be obtained on application to Herr L. Walter, ober post assistant, Zabern Alsace. F. M.

CARNATION BONFIRE

HARDY RHODODENDRONS

When we say **Hardy** we mean **Hardy** in American Gardens where climatic conditions are no more severe than in Massachusetts. **We have them, the finest stock in the world of brilliant hybrid varieties which have stood the test of years in American Gardens for hardiness and vigor.**

Bagshot, England.

During Recess

Prospectus for New York Florists' Club Dinner.

Do you know anything about Saturday night, March 18th? Well! That is the night the Dinner Committee of the New York Florists' Club has selected for our Regular Grand Annual Dinner.

All those who were present at the dinner held in the Roman Banquet Hall, at Shanley's, Broadway, 42nd and 43rd streets, year before last, were loud in their praise of the beautiful surroundings, and the dinner that Shanley served—and Shanley knows how to serve a dinner. For these reasons your committee goes to Shanley again.

In connection with the dinner your committee has engaged entertaining talent, that mirth and gaiety shall lend zest to the appetites for the good things that will be partaken of.

Tickets will be four dollars (\$4.00) for gentlemen, and three dollars (\$3.00) for the ladies, and these prices will only half pay for the good time you will have on this occasion. Your committee is trying its best to make this dinner and entertainment surpass anything of its kind held before, and trusts that each member of the club will make it his duty and pleasure to come, and bring a lady with him, for no social gathering can be complete without the ladies.

Members can engage tables to entertain their guests for this dinner, such tables accommodating six to eight persons, or more if required. Prompt notification is earnestly requested.

C. B. Weathered, Chairman; A. L. Miller, J. Austin Shaw, Robert Koehne, Chas. Schenck, Dinner Committee.

Yonkers Horticultural Society.

A most enjoyable evening was spent at the Park Hill Inn, where this society held its second annual dinner on the 7th inst. About one hundred and thirty members, visitors and friends were present. Arthur Herrington very ably filled the post of toastmaster. Mayor Lennon of Yonkers spoke of the beauty of our city, due in no slight degree to the gardeners' craft. He also presented the charter of incorporation granted to the society.

W. Duckham, who with several other gentlemen represented the Morris County Gardeners' and Florists' So-

ciety spoke, as did also J. F. Johnston of the Nassau County Horticultural Society, Mr. Lee of Dobb's Ferry, J. Austin Shaw, who rose to the toast of "The Press," Mr. Maynard of The Gardeners' Chronicle of America, L. Melliott for the florists, Mr. Sperling for the seedsmen and Mr. Rennison for the nurserymen. W. MacDonald contributed songs, admirably rendered.

H. M. BLANCHE.

A Hot Time at St. Louis.

There was a hot time at Smith's wholesale house on Saturday night, Feb. 11. The firm having just completed improvements which gives them a model wholesale house decided to give a house warming and invited their Kirkwood consignors to come in and enjoy the fun, and they did. They brought their own band headed by C. A. Dietzman. There were refreshments of all kinds. Sixty persons enjoyed the fun, which included speech making, singing, dancing and a general good time.

New York Bowlers.

There was a very companionable meeting and practice bowling at the Albion Alleys on Monday afternoon, February 13, preceding the regular Florists' Club meeting in the evening. John Donaldson was the fortunate winner of the prize bottle of Dry Monopole. Scores were as follows:

Manda	165	156	135	D'Id'son	154	177	191
Handel	220	119	172	Miesem	127	118	133
Rick'rds	179	142	151	McArdle	134	118	121
Siebr'lt	135	145	162	Berry	...	105	198
Shaw	148	118	166	Schultz	...	81	96

Chicago Bowlers.

Scores on February 8 were as follows:

CARNATIONS				VIOLETS			
Artes	171	161	190	Chen	107	133	152
Win'son	192	127	146	Fried'n	159	136	194
Geer'ch	109	121	104	Sweeney	110	126	145
Schultz	173	165	159	Lerman	157	146	157
A. Zeck	165	149	191	Yarnall	162	224	184
ORCHIDS				ROSES			
Huebner	150	114	157	John'n	134	109	197
Zeck	170	170	178	Crige	108	159	151
Graff	154	154	170	Daley	182	119	154
Sweeney	146	171	151	Welsh	107	104	96
Farley	143	190	137	Wolf	155	163	146

Philadelphia Bowlers.

Scores were recorded at the match game February 13, as follows:

REGULARS				ASSOCIATES			
Connor	169	180	156	Elm	185	244	204
Adel	163	142	189	Moore	173	177	166
Dodds	187	168	163	Rowley	133	129	173
Graham	169	166	177	Dumb'm	106	153	176

Concerning foregoing our correspondent writes: "I only publish these

scores when the champions lose; which is seldom."

Buffalo vs. Rochester.

The Rochester Club bowlers will meet in Buffalo the latter part of this month in a match game with Buffalo. The members are in hard training and an exceptionally good game is promised.

CATALOGUES RECEIVED.

MacNiff Horticultural Co., New York.—Condensed Garden Seed Catalogue, Spring, 1911.

Green's Nursery Co., Rochester, N. Y.—Catalogue for 1911, of Plants, Vines and Trees. Quite a unique production. Covers brilliantly adorned with cherries, currants and raspberries.

Chicago Carnation Co., Chicago and Joliet, Ill.—Folder and Price List of Carnations, with portraits in natural colors, of Princess Charming, light pink, and Washington, Lawson Enchantress.

S. M. Isbell & Co., Jackson, Mich.—Isbell's Seed Annual, 1911. This a catalogue of the "Michigan Grown Seeds" so enthusiastically advertised in our columns by this well-known house. It runs especially strong on vegetables, the colored illustrations on cover showing Perfected Davis Perfect cucumber, Colossal tomato, New Saxonia pea and other meritorious novelties.

Fottler, Fiske, Rawson Co., Boston.—General Seed, Plant and Implement Catalogue for 1911. This is the first issue since the merging of the Schlegel & Fottler Co., W. W. Rawson & Co., and H. E. Fiske Co. into one corporation and it is highly creditable in every particular. The cover is exceedingly neat and attractive, embossed gold letters on pale grey panel and monogram in coral red.

"Buds," New York.—General Catalogue of Seeds, Plants, Bulbs, Fertilizers, Insecticides and Implements, Spring, 1911. This is the first annual catalogue of this youngest of the New York seed houses but it bears all the marks of an old-established business, being very complete and particularly well arranged as to reading matter and placing of illustrations. Paper and typography excellent. A special Wholesale List of High Grade Florists' Seeds, Bulbs and Plants has also been issued for trade circulation.

LADY HILLINGDON

A BEAUTIFUL YELLOW ROSE

That will make a name for itself either as an indoor or outdoor rose.

March Delivery
Own Root or Grafted Stock
\$7.50 per dozen
\$60.00 per 100

ROSE QUEEN, the pink you will eventually grow, \$35.00 per 100.

DOUBLE PINK KILLARNEY and MELODY, \$35.00 per 100.

RADIANCE and MRS. AARON WARD, \$15.00 per 100.

CARNATION WHITE HOUSE

The QUALITY White

Easily the largest white in cultivation, and considering its size, it is wonderfully free. Is absolutely a non-burster and has a clean, kind growth, without any faults. The production of this variety is limited to 50,000 cuttings; so, if you want it, give us your order at once.

PRINCESS CHARMING, splendid Enchantress-colored carnation; WASHINGTON, the Lawson-colored sport of Enchantress; CHRISTMAS CHEER and BONFIRE, scarlets; all above varieties, \$12.00 per 100, \$100.00 per 1000.

CHRYSANTHEMUMS

We carry over 500 varieties, and have already some 100,000 young plants in 2½-inch pots ready for immediate distribution.

DID YOU GET OUR CATALOGUE? IF NOT, WRITE FOR IT

KILLARNEY IMPROVED.

The new deep pink Killarney rose being placed on the market this season by A. N. Pierson is identical with the original Killarney in all respects except that it holds its deep pink color uniformly through all the seasons—a very desirable quality. The rose originated at the Montrose Greenhouses of N. F. McCarthy & Co., of Boston, and had two years' severe test before it was sold to A. N. Pierson, who is now introducing it to the trade and controls the stock. It will undoubtedly supercede the original pale and irregular type in the same manner as Bridesmaid superceded Catherine Mermet years ago.

THERE'S MONEY IN THIS ROSE.

Among the sterling novelties advertised in this paper by that level-headed plantsman, C. H. Totty, keep your eye on Lady Hillingdon rose. Mr. Totty is fortunate in being able to offer stock of it as the demand is such that there is very little of it lying around for this season. Nothing lovelier in bud form or more vigorous and healthy in growth can be found, while the brilliant orange-copper color and heavy foliage give it a standing at once with rose lovers. Its qualities as a forcing rose are vouched for by the most prominent rose growers in the country.

GREENHOUSES BUILDING OR CONTEMPLATED.

Norwalk, Ohio.—E. J. Peat, addition.
Guthrie, Okla.—Furrow & Co., range of houses.

Red Wing, Minn.—John Nordine, one house.

Woodstock, Conn.—Frank H. Miller, one house.

St. Louis, Mo.—Charles Bleekert, range of houses.

Streator, Ill.—O. A. Fanning, cucumber house 40 x 200 feet.

Dows, Iowa.—The Dows Management Houses, one house.

St. Bruno, Que. Can.—St. Bruno Floral Co., four houses 50 x 50, with four lean-tos.

Dennis Connor reports the aggregate of one day's orders received at the office of the Lord & Burnham Company in Philadelphia amounted to over fifty thousand dollars. This included the following: Alban Harvey & Son, Brandywine Summit, Pa., house 53x250 ft. for carnations and sweet peas; John Burton, Chestnut Hill, Phila., 43x150 ft. and 28x150 ft. (rebuilding); Joseph Hand, carpenter and contractor, for private parties at Holmesburg, Phila., conservatories aggregating \$46,500; William H. Westcott, newly-established florist at Roxboro, Phila., two more houses, aggregating \$4,250.

A GERMAN HEATING EXPERT.

George Hoentsch, one of the most successful boiler makers and greenhouse builders in Germany, proprietor of Hoentsch & Co., Niedersedlitz, Dresden, has come over to study conditions of his line in this country.

Mr. Hoentsch is a self-made man, who started business sixteen years ago with two men. Today he employs over 600 men and has built up a trade that covers the whole European continent. He is a very keen observer and is most enthusiastic about what he has observed in the United States. This week he is visiting in Chicago and next week expects to return home.

Dreer's Double Petunias

Our **DOUBLE PETUNIAS** for more than half a century have been the acknowledged standard. The strain this season is equal in high quality to its predecessors and is well known to the trade.

IMPORTED DENDROBIUMS

We are now receiving our usual importations of Dendrobiums, and can offer the following in excellent value. Many of these plants with early cultivation and careful storing can be had in flower at periods extending from Xmas on the one hand to the end of May on the other.

Dendrobium Wardianum Lowianum—The true large-flowering type.

Crassinode—Specially fine plants of this lovely and distinct variety. Very useful for basket work.

Nobile—From district where specially fine forms have been received.

Dalhousianum—This noble species has seldom been imported in such condition.

Jamesianum—Pearly white large-flowering variety, lasting long in flower.

Chrysotoxum, Fimbriatum, Clavatum—Three of the most lovely free flowering yellow varieties.

Devonianum—Very free and beautiful fringed-lip variety, delicately scented.

FINE FERNS

Ready For Immediate Retail Sale

We have an exceptionally fine and large stock of ferns in the following varieties,—first-class plants of exceedingly good value—plants that will please the most critical buyers, both in regard to quality and value.

NEPHROLEPIS ELEGANTISSIMA (Improved). The finest of this type—never showing a Boston frond; has not reverted in the last four years. Fine plants, 6-in., \$6.00 per dozen; 8-in., \$12.00 per dozen; large specimens in 12-in. pans, \$3.00 to \$5.00 each.

NEPHROLEPIS ELEGANTISSIMA COMPACTA. This bears the same relation to elegantissima compacta that Scottii does to Bostoniensis. It is a dwarf, compact plant, especially fine in the small sizes. Fine plants, 6-in., \$6.00 per dozen.

NEPHROLEPIS SCHOLZELI. Fine plants, 3½-in. pots, \$2.50 per dozen; 6-in. pans, \$6.00 per dozen; 8-in. pans, \$12.00 per dozen.

NEPHROLEPIS BOSTONIENSIS. Extra strong plants, 8-in. pans, \$12.00 per dozen.

NEPHROLEPIS SCOTTII. 8-in. pans, \$12.00 per dozen.

SMALL FERNS FOR FERN PANS. Best and hardiest varieties assorted: Pteris Mayli, Wimsetti, Adiantoides, Aspidium Tauasimense, Crytomium falcatum, etc. Strong plants, 2½-in. pots, \$3.50 per 100.

CROTONS. Nice assortment, well colored, 5-inch, \$9.00 per dozen.

F. R. PIERSON CO., Tarrytown-on-Hudson, New York

CINERARIA HYBRIDA

Remember this is the

BEST PAYER FOR EASTER.

We offer our superior strain in 4 in. pots (medium height), latest improvement in size and color, \$10.00 per 100. Now is the proper time to plant them into 5½ and 6 in. pots for Easter blooming.

¶ There are two kinds of friends in business—those who buy for friendship sake and those who buy for business sake. Those who are friends for business sake generally last longer because the other friends go to your competitors when they want to beat down the price, or they are jealous of your success. When the writer started in business he had many friends in the trade. Some of them promised him their business if he started out himself; but when he did start there were very few who kept their promises. It was one of life's lessons however and now he is thankful the tide turned that way for he is under no obligations whatever to these so-called friends. Business is business and that ends it.

¶ In buying bulbs buy from those who have the best to offer. Make it a business transaction. In lily bulbs and in french bulbs the Horseshoe Brand is superior to anything on the market. Try them for comparison.

¶ Ask for catalog.

Seed Trade

Canners' Convention.

Another Canners' Convention has passed into history and it is only fair to say that in all essentials it has excelled any previous one. The attendance was undoubtedly the largest in the history of the Canners' Association, while the volume of business transacted by the Machinery and Supply men was probably greater than ever before. All are pretty well agreed on these facts. The seed growers were liberally represented as usual, only one of the prominent pea and bean growers being absent.

Canners' Peas Sold Up to Limit.

Before the close of the convention the fact developed that most of the pea and bean growers were very nearly booked up to their capacity. We are informed that the largest concern in this line of business is now sold up for future delivery on almost all varieties of so-called canners' peas and as previously stated, the others are in very much the same situation. A large number of the canners, following their usual habit, are reluctant to place their orders and are looking for prices to weaken. These people are certainly doomed to suffer disappointment and will well deserve it. The idea which possesses many men to always be looking for something a little better than their competitors can get, not infrequently causes them much trouble and extra expense. It has been stated in these columns at different times that spot peas of the sweet wrinkled varieties were practically out of the market, and this fact was certainly brought out forcibly during the convention, when numerous inquiries were made for different varieties which were not procurable at any price. One canner was looking for a thousand bushels of one variety, while many others wanted quantities ranging from one hundred to five and six hundred bushels, and it is safe to say that the aggregate must have been at least ten thousand bushels. It is absolutely impossible for the canners to secure any considerable quantity of these peas and they will be compelled to substitute Alaskas or reduce their acreage.

Rochester's Prospects.

No selection was made of a place for the next annual convention, but if one may express an opinion from information received, it looks as if Rochester would be the favorite town. This city was represented by the proprietors of its two leading hotels and a delegation of wide-awake, able supporters who presented their case with both logic and eloquence, and it is almost a thousand to one shot that they have won their case. Among the other competitors may be mentioned New Orleans and St. Paul. The latter has no chance whatever, while New Orleans has very little more. As the convention is due to go east next year, there is certainly no town more capable of taking care of it and meeting all the requirements, than Rochester. This city has been seeking the convention for the past three seasons and has accepted defeat philosophically and its representatives have shown themselves to be good losers. We wish them success.

The Machinery and Supplies Exhibits.

Two years ago it was voted by the Machinery and Supplies Association to exhibit only every other year. Last year was the first when no exhibits were held for quite a number of years and the attendance was not over one-third of this year's or one-half of the year before, and those canners who have been insisting that the exhibits were a detriment have doubtless seen a light, although a few of them are such natural born reactionaries they very much resemble the Scotch dominie who thanked God his mind was not open to conviction on a certain point.

At the business session of the Association held during the past week, the resolution of two years ago was rescinded and it was voted to hold an exhibit next year unless the site chosen for the convention should make it too expensive to be profitable. It is safe to say in this connection that if Rochester is chosen, it seems quite certain that the machinery exhibits will be on even a larger scale than here this year.

Unreliable Seed Trade Information.

The value of the information furnished by some trade journals is illustrated by a quotation from one of them as follows: "The packers of peas, corn, tomatoes, etc., are reported to have sold at this early date, all the 1911 pack they care to pledge of the pack." Those familiar in the slightest degree with the business, know this to be absolutely misleading and incorrect. Another quotation is as follows: "The annual gathering of the canning trades will take place at Milwaukee next week. There will be no machinery display. Some of the seedsmen who have been regular attendants, will pass it up this year, having no peas and little else for sale." As a matter of fact, the machinery exhibits this year were the largest in the history of the canning industry and it was known two years ago that this was the year for a display by the Machinery and Supplies Association. As to the statement that most of the seedsmen would pass up the convention, it is a fact as already stated that but one prominent seed grower was absent. All of the others who generally attend these conventions were there with both feet and industriously canvassing for business.

Personal.

Jerome B. Rice, Jr., was married to a young lady of Cambridge, N. Y., Feb. 1st, and the couple are now on their honeymoon, intending to visit Europe and the Holy Land and expect to be gone several months.

Mr. and Mrs. Jerome B. Rice are at Miami, Florida, and have been for several weeks. It is reported that the climate being somewhat damp, has not benefited Mr. Rice's rheumatic condition as much as he expected and that it is very likely they will seek another part of Florida where the air is drier.

Notes.

The customary spring season "night work" began at Thorburn's, N. Y., on Thursday, February 9, this being the earliest date for some years.

Burnett Bros.' window on Cortlandt street, New York, was wrecked by the dynamite explosion which did so great damage in the downtown district in New York city two weeks ago.

S. D. Woodruff & Sons have made substantial improvements in their place at 82 Dey street, New York, and now have a well-appointed wholesale and retail store on the ground floor.

Roses and Carnations Our Specialty

Flower Market Reports

Up to the present time **BOSTON** the short supply of roses and carnations noted in our recent weekly reports continues unabated but weather conditions are now propitious and in all probability the product will increase in volume shortly. Still the next two weeks are the height of the gaiety season and the demand may be relied upon to consume the goods all right up to March 1st when Lent sets in and in the meantime very little change in market values of really first quality goods can be expected. Last week's prices prevail unchanged thus far. Valentine's day brought an increase in trade generally but was a failure so far as violets are concerned. The stormy weather interfered with the big street outlet and the regular trade could not handle the surplus. Some carnation growers are showing bad judgment in rushing undeveloped flowers to market, expecting to profit by the present stringing but the buyers are entirely too wise to be fooled that way and so the stuff which, properly handled might have amounted to something is discarded and lost. Bulbous stock, such as Narcissus Von Lion and Golden Spur, is very abundant, as is also lily of the valley, and on this material bed-rock prices are unavoidable.

Trade continues good **BUFFALO** and stock not too plentiful. The only shortage is on roses. The medium and short grades are most in demand, although selects have moved freely. Beauties are improving daily. The weekly calendar is well filled with social gaieties which makes a good call for flowers in general. Spring flowers are coming in more plentifully and sales are satisfactory. Lilies are of good quality and find ready sale. A couple of days sunshine have brought on carnations, although prices have held firm. Plenty of smilax to be had, but demand light.

There is little new to be **CHICAGO** said in reference to the market here. The passing of each week brings us one nearer to a supply of roses once more, but the situation is not without its good features, which the bulb men will profit by, very probably, next season. Without the bulbous stock, which is excellent in quality now that the first cut is past, the loss of roses and the scarcity of carnations in January would have been felt much more severely. On the other hand, had there been as many other flowers to draw from, bulbous flowers would not have found so ready a sale and so it is a chance, which this year was in favor of the bulbous stock. There is also a good supply of miscellaneous stock, including mignonette, freesia, violets, daisies, Roman hyacinths, paper whites, callas and lilies. The sunshine so much needed came for a few hours, but gave way to rain and at this writing (February 14th), clouds and fog give little hope of encouragement from that direction. Among the retailers nothing new was noted among the Valentine favors though some found the sale of potted plants to be more than usual. Window boxes of red tulips and others of yellow narcissus were popular, while lily of the valley

Flower Market Reports

(Continued from page 225)

good quality sold well and bulbous stock competed strong against carnations, crowding them to a lower price. Roses are still scarce. Some shippers of bulbous stock seem to be careless in cutting; quite a quantity of narcissi arrived in bad condition and is consequently unsalable.

NEW YORK

The rose market has eased up very noticeably within the past

week and as the crop gathers volume the prices slacken and the buyer gets better values for a stipulated sum. The outlook is for a heavy crop in the near future, from all growing sections, and the coming of a few warm days would doubtless create havoc generally. Carnations are also showing indications of impending disturbance of values, but just at present this applies only to the white sorts as the call for reds for Valentine Day use has been brisk enough to hold prices very firm on the bright colored stock. Violets are very fine as a rule. Many more singles are seen than in previous seasons in this market, so noted for the high quality of its double violets. Quite a proportion of the dark Gov. Herrick is noted but the inferiority in size of flower and length of stem places this variety in second grade, regardless of its advantage in color. Daffodils are arriving in large quantities and extra good quality. The Poeticus Ornatus is now among the staples and a good many Campernelles are also in. Roman hyacinths and paper whites are in very light supply. Lilies are nicely balanced as to supply and bring a good price, as do also callas. There are still a good many small cattleyas about and they are disposed of with difficulty, but the supply of really fine blooms is on the wane and prices have made a sharp advance. Gardenias continue scarce. A good many dendrobiums of several species are being received and Acacia pubescens has made its appearance, but most of it has been cut too young. A good many dwarf pyruses and prunuses in bloom add a distinct charm to the florists' windows.

Business last week

PHILADELPHIA pretty good; not a whole lot of stock

to do business with, but they managed to do fairly well considering. Gardenias and short white roses were the items particularly in demand and emphatically on the scarce list. American Beauties were not as plentiful as expected, and proved also on the short side. Pink roses were not in

so large quantity either; and on the whole it may be said that all roses were scarce—all along the line. Being near to St. Valentine's week gave quite a little flip to the violet market. All grades of these sold well, as did also lily of the valley, sweet peas, and other medium-priced subjects. Carnations came in more freely and no advance in prices took place on these, although they sold up pretty clean. Orchids were not very much in demand, and quite some surplus developed towards the end of the week.

PHILADELPHIA NOTES.

John Westcott has arrived home from his trip to the Bermudas and received a royal welcome from his old friends in Philadelphia.

His many warm friends in Philadelphia hear with deep regret of the serious illness of L. G. Blick, Norfolk, Va. Mr. Blick is held in the highest esteem everywhere and the whole craft sends up its prayers for his speedy recovery.

In addition to the regular stocks listed in this issue the Philadelphia market is offering, among other things: Perle roses, \$6 to \$8; Melody, \$8, \$10, \$12; freesia, \$3 to \$4; callas, \$15; swainsona, 15c. per bunch; acacia, \$2.50 per bunch.

I. S. Hendrickson of Flowerfield, N. Y., gave an interesting lecture on "Gladioli" in the Michell series on the 13th inst. This was held in the new auditorium which is quieter, more commodious, and more comfortable than the old room adjoining.

Visitors: Harry Schroyer, Lancaster, Pa.; W. F. Gude, Washington, D. C.; Miss Lou Dundas, Lancaster, Pa.

Clinton, Conn.—A water tank is being built at the greenhouses of Brooks Bros. to supply their greenhouse.

EUROPEAN NOVELTIES.

E. Neubert, nurseryman, of Wandsbek, Hamburg, sends us an interesting list of novelties which he is putting on the market this year.

Nephrolepis Neuberti is a sport from Whitmanii, was exhibited last May at the International Spring show in Paris and got the first prize against all other nephrolepis of recent origin.

Adiantum Matador is recommended as the finest adiantum for vase and table decorations. Another good variety for cutting is Adiantum Triumph, introduced by E. Neubert in 1908.

Among Hortensia novelties are the following:

Mme. E. Mouillere, giant well formed umbels, flowers pure white and beautifully fringed.

Mlle. Rene Gaillard, pure white, giant umbels, flowers with irregularly denticulated borders.

Generale Vicomtesse de Vibraye, a first-rate forcing variety, large umbels of bright rose.

Souvenir de Mme. Chautard, short and bushy, large umbels of medium sized pink flowers.

Souvenir de Mme. Raoul, bright pink.

Mme. Riverain, deep pink.

Avalanche, pure white, medium size umbels, short growth.

Fraicheur, very large umbels of medium tall flowers, pale rose with mauve center.

La Lorraine, giant umbels of large, regular formed pink flowers, with denticulated borders.

Bouquet Rose, flowers rose.

Dentelle, short growth, regular denticulated flowers of cream white passing to tender rose.

Landscape Gardening

PROF. CRAIG

A course for Home-makers and Gardeners taught by Prof. Craig and Prof. Batchelor, of Cornell University.

Gardeners who understand up-to-date methods and practice are in demand for the best positions.

A knowledge of Landscape Gardening is indispensable to those who would have the pleasantest homes.

WHAT THE USERS SAY

A Boiler You Can Recommend to Your Friends

The No. 4 Kroeschell boiler is heating 7,500 square feet of glass—it would take care of 10,000.

Have no trouble to keep up temperature of 60 degrees in coldest weather. A fire every six hours.

The boiler works satisfactory in every way, and I recommend it to all my friends.

Your Generator is a great help and a splendid care-taker of the hot water system. The pipes being more than ordinary hot. It has saved me a lot of coal.

FOR GREENHOUSES AT CORNELL.

There is a bill now before the New York State Legislature, calling for the appropriation of \$50,000, or as much thereof as may be required, to erect a suitable range of greenhouse structures at Cornell University, for the purpose of carrying on experiments in the interests of commercial floriculture. The bill is No. 83 and introduced by Mr. Neupert.

The New York Florists' Club has taken the matter up and a committee has been appointed to use every effort to secure its passage. New York floriculturists are urged to use their influence with Assemblymen and Senators, either by personal effort or through friends and neighbors on behalf of this project which is of so great importance to commercial floriculture. Patrick O'Mara is chairman and J. Austin Shaw, secretary, of the committee.

Louisiana Experiment Station Send North for Their Greenhouse

It is a good many hundred miles from Irvington, N. Y. to Baton Rouge, to ship materials for an iron frame palm house and wings. It costs money. But if California, Colorado, Texas and such far Western States think our materials are worth paying the freight on, it is only logical that the nearer-by States do not hesitate to do it. The truth is, freight charges don't prevent people from buying the best greenhouse there is, when it is the best they want. After April first, all Western orders will be filled direct from the Chicago factory. That means a thousand miles cut off the freight charges. Send to our nearest office for a catalogue. It shows houses we have erected from coast to coast.

THE ROSE FOR YOU! Dark Pink Killarney

Deeper, brighter color than the original Killarney. Does not lose its color in winter. We shall plant 5000 ourselves and many large growers in New England have already placed orders for it. We are agents for the introducer, A. N. Pierson, Cromwell, Conn.

Grafted Plants, 2 1-4 in. Pots, \$20 per 100; \$180 per 1000

N. F. McCARTHY & CO., 84 Hawley St., Boston

IMPORTANT ROSES

We are offering to commercial rose growers, who are alive to the possibilities of increasing their profits, stock of the best there is in the new varieties. These roses represent the nearest to the ideal that exists in roses today and the quality of stock sent out by us is above question.

DARK PINK KILLARNEY. With a Killarney habit and a color that can be equalled only by the lobe of a Cattleya, it sells on sight.

DOUBLE PINK KILLARNEY. Stronger in growth than the parent and with a large, perfect flower, it stands alone in its class as the representative of the highest type of forcing roses.

PRINCE DE BULGARIE. As a twelve months rose this variety is good, while for a spring, summer and fall bloomer it has

no equal in its color. And in its color, there is the character that is called life. It is hard to describe the color. "Rosy flesh" is near, but it does not describe the impression the color makes. For a money-getter the rose has been a wonder.

LADY CROMWELL, MELODY, MRS. AARON WARD, RADIANCE and the older varieties are described in our catalogue.

If you are progressive, write us for your young stock and get the best that can be produced.

Eryngium

Of the hardy ornamental thistles—*Carlina*, *Cirsium*, *Echinops* and *Eryngium*—the last two named merit consideration of every landscape gardener and garden owner. It is first the foliage of many of the *eryngiums*, both in their radical and cauline form, here deeply cordate, their spiny cut, or serrate toothed, which at once appeals to our vision. More so still does the abundance of flower heads of oblong shape, surrounded at the base by an involucre of long spiny bracts, add to their handsome appearance. *Eryngiums* may be employed to good effect on the perennial border. They will even sometimes thrive well when naturalized on sunny slopes in rough sandy soil, in parks, where few other hardy perennials are apt to make any showing. What is justly prized in most of the cultivated *eryngiums* is their long period of blooming and the great resistance of their flowers. Cut, they represent a very useful and frequently favored material for filling vases. They may also be dried and in this state retain their ornamental value for an indefinite time.

The best known species, and one of the prettiest, is *Eryngium alpinum*, a native of the Alps, with flower heads and bracts of a steel-blue color, attaining a height of about two feet. Slightly taller is *Eryngium giganteum*, a freely branching variety from the Caucasus Mountains, with ivory white flowers. For the reason of its color it is often called the ivory-thistle. Decidedly the handsomest of all is *Eryngium amethystinum*, syn. *E. Oliverianum* hailing from the Orient. Habit of growth is shown by our illustration, a reproduction of a photograph taken in the Mt. Desert Nurseries. The plant is from 2 to 2½ feet tall, with cones and bracts of a remarkably vivid and lasting blue. The hardiest and, therefore, the one best suited for northern planting is *Eryngium planum*, a native of eastern Europe, with rather flat, pale blue heads. The species mentioned so far are midsummer perennials, in bloom from July to September. As an exception I finally name the garden variety *Zabeli*, a pale blue cross between *E. alpinum* and *E. Bourgati*, producing flowers until late in the fall.

Eryngiums are best raised from seed sown right after

ripening. The blue color of their bracts and cones is sometimes intensified by adding lime to the soil. Being inhabitants of mountain regions they require a high sunny location.

Richard Roth

Northeast Harbor, Maine.

Chrysanthemum Polypheme

This magnificent yellow flowered variety is one of the best we possess at the present day for decorative purposes and for cutting. Owing to the tall growth it is, however, unsuited for pot culture. The flower is of ideal beauty and in form a gigantic ball, and every bud is absolutely certain, so that the waste with this variety is very small, provided the buds are not taken too early. It may be classed with the late flowering section; and should not come into bloom before the 15th of October. Therefore the first crown buds should not be allowed to remain, although they may look so promising, the blooms coming from these being of a flat form, and of a greenish sulphur tint, and of abnormal length. The second crown buds are grand. The foliage of *Polypheme* is entirely healthy and yet not too large, which is always an advantage.

Frederick Moore

Oncidium splendidum

This is a fine decorative orchid, where its color allows it to be used. Long stems and a branching habit make it one of the best for vase work. Its peculiar shape and attractive markings make it very noticeable. Sander's

Orchid Guide describes it thus: "Sepals and petals yellowish-green, barred and blotched with rich brown, recurved at the tips, lip large, flat, and yellow in color."

The plants above figured carried spikes from four to six feet high, as can be seen by comparison with the door used as a background.

G. H. PENSON.

The Honey Bee and Its Uses

Bees are often to be found near the home of the farmer and horticulturist and are one of nature's greatest assets—far more so than the casual observer would credit, helping her along in her great work, apparently unnoticed. We have men in business today who rely on the honey flow and the manufacture of bee-keeping appliances for a livelihood. This shows what strides—I was going to say—the bees have made, but I guess they stepped just as lively in Biblical days.

Bees seem to have been part of the world ever since its beginning. Biblical allusions to them are many—the promised land was said to flow with milk and honey. Bees abound in Palestine and other parts of the world in a wild state and it was from these the Jews of old obtained their supplies. Works of ancient writers speak of the honey bee and its golden harvest. Savages hunted their nests and devastated them of all their luscious wealth. Savages who could not build a permanent home for themselves, whose sport was wiping a neighborhood tribe out of existence, could not be expected to make a home for the bee, but with the advance of civilization bee keeping has become an art and an industry. See the many appliances of any up-to-date apiary, the knowledge of a bee's requirements, their diseases, etc., and the complete control an experienced hand will have over an army of workers, gently driving them like so many sheep.

Bees are kept for both pleasure and profit. The pleasure of getting stung would be a poor recreation to many, yet a bee sting has its good point (always good and sharp, admitted). Members of the medical profession tell us that the poison from one of these little fellows has a power for good on rheumatism. If managed in a proper manner, however, stings will be few and far between—in fact a friend of mine, an old expert, on seeing a slight addition to hand or face would tell me I deserved all I got for only bad management brought it on. I found this out to my sorrow more than once. Nervousness often causes a lot of trouble this way and only by constantly working amongst them can this be overcome. They are as harmless as a fly when treated right, but resent any "dirty tricks" in no uncertain manner.

I chanced to be passing by some hives last summer, and suddenly saw what proved to be the owner fighting with both hands and making a speedy retreat. On inquiring found he was trying to put on some supers—perforce jarring the top off any old way and giving them a general shaking up, then wondered why they stung. You hear the argument advanced by some "they won't sting 'so and so' but they always do me." Why? Because "so and so" knows how to handle them and can take a frame out and look at the brood without thinking of meeting any resistance.

Speaking of brood brings me to one of the most interesting parts of bee keeping. Special "observatory hives" are made so that any one can watch these most wonderful changes taking place. They are made in various shapes

and sizes having interior walls of glass. Queen raising is another novelty in itself. Much could be said about this interesting part, but more anon. To turn to the question of profit. As a hobby or sideline I know of no better paying proposition. Speaking from experience—I started when eleven years old and kept "tab" of every cent. Each year I put my savings into new hives and appliances and the fourth year I had six stocks and a balance in hand. I got the bee fever early and never wholly forgot it. As stated above bee keeping on a commercial basis is a paying business, but no novice wants to take it up without acquiring some knowledge beforehand.

A mistake often made by many is that they consider it necessary to have a large flower garden and produce the flowers for the bees. This is all unnecessary—ridiculous in fact, for bees will travel three miles or more wherever they can find a honey or pollen producing flower. Instinct of bees is of a high order for, should a crop of anything come into flower, whole colonies will work on it, providing there is work for all. No unemployed are kept here. The loafers or drones are turned out before the winter sets in. Three or four workers can be seen hauling one of these great fellows out and after this he is an exile.

The most important part bees play, looking at it from a gardener's point of view, is that of hybridization. As they flit from flower to flower, seeking the honey which is secreted down in the segments, the head and legs are forced to brush past the anthers laden with their open pollen sacks. These are partly emptied on the bee as it enters and quite probably as it comes out some grains of pollen are either knocked directly on to the stigma or carried there via bees' legs. Thus some flowers are fertilized with their own pollen, others have it carried to them from neighbors. It is essential for all fruit trees to have blooms properly fertilized. Many evenings can be profitably spent by the gardener who handles fifteen or twenty hives. There is always a good demand for pure honey and beeswax. Although there are thousands of bee keepers in this great country producing hundreds of tons of honey yearly great quantities are imported. Great Britain imports as much as she can produce herself. For beeswax made from old combs, cappings, etc., there is also a good demand.

George H. Benson

Mr. Benson's next notes will be on Thinning Early Peaches; Vines in Flower; Setting Peaches in Dull Weather; Hot Beds; Forcing Rhubarb.

H. T. Rose Mme. Segond Weber

Our cover illustration, for which we are indebted to H. A. Dreer, Riverton, N. J., shows one of the most promising of the recent rose novelties. This is the introduction of Soupert & Notting, 1908, and is recognized by rosarians as one of the grandest novelties of recent years. Color yellow ochre suffused with carmine, bud long and pointed opening into an enormous bloom, delightfully fragrant. Rose fanciers will do well to look it up.

Seasonable Notes on Culture of Florists' Stock

ASPIDISTRAS

The demand for these plants is always good. By their great constitution they are able to stand more abuse than most plants, especially where there is dry air, dust, and lack of light. Now is a good time, before they start active growth, to propagate whatever stock you may need. Break up large plants so as to go into 3 or 4-inch pots saving a good piece of the rhizome to each division. Use any good soil and keep close until new roots have started. Another way is to wash the rhizomes clean of soil and cut up into small pieces, leaving some roots attached and place in a cool propagating bed where they will make fresh roots which can be potted up and grown on. These plants like a temperature of 50 to 55 degrees at night with a day temperature of 65 to 75 degrees, according to the intensity of sunshine.

FERNS

A good many fern trays will now need attention. A good compost for the little ferns is fresh loam, two parts, leaf mold and sandy peat, one part. For 4-inch pots a heavier soil should be used. Ferns do not like to be potted too firm. After potting a reasonable amount of atmospheric humidity should be kept up, but never to the extent to cause dripping moisture on the plants. While ventilation is necessary to counteract stagnant atmosphere, all drafts should be guarded against now and during the spring months; in fact, at any season it is not good for ferns. Now is a good time to multiply your stock by division of the many species of commercial value. Select plants that are in active growth or beginning to show new life, divide them up into pieces large enough for 3 or 4-inch pots and keep rather moist and shaded during the brightest hours of sunshine. Water with the greatest care until new growth starts. Most ferns should have some shade from now until next October. For a mixed house of ferns a temperature as near as possible to 60 degrees with a slight rise through the mid-day hours will do, but, of course, to have them good the treatment as regards temperature, moisture and soil must differ as to varieties. Sow spores now of any kind needed, in a soil that is somewhat porous coupled with good drainage. Cover with a glass and keep shaded until the growth appears. Keep the soil moist by sinking the pans up to the rim in a tub of water when they need water.

JERUSALEM CHERRIES

When these seedlings are sufficiently large to handle they should be pricked off into flats, and when well established in these flats they should be potted into small pots and later into larger, so as to keep them growing. In their early stages they should be frequently pinched to make bushy plants. When danger from frost is over they can be planted out into the open ground where they will thrive in any soil even under apparently adverse circumstances.

PALMS

Diminished light, and artificially maintained temperature during winter has offered every opportunity for mealy bug, scale, and red spider. Now is a good time to undertake their eradication before the hustle of spring starts. Give all a good sponging with some good insecticide, or use one ounce of whale oil soap to one gallon of water and combine with forceful syringing and repeat several times if necessary. Before they are set up and

rearranged the benches should receive a good cleaning and, if possible, replace the old material with fresh. If old material is left on, drench with boiling water. The palms should now be looked over and potted, where needed, using a rather heavy soil liberally enriched with about one-fourth of well decayed cow manure, adding two pounds of bone meal to each barrow of soil. All palms that have reached a certain height and spread should be encouraged by giving more root room, but don't overpot them. See that the soil is made firm all around the old ball. Those that do not need potting will be better to have as much of the old surface soil removed without an undue sacrifice of roots. Make this surface material richer than the potting soil. Palms after repotting should be kept rather close with a temperature of from 60 to 65 degrees. Young stock that is grown on should be kept in a higher temperature, say, from 65 to 70 degrees.

PHALAENOPSIS

As these orchids pass out of flower they are always better for a short rest. They should be kept comparatively dry but not allowed to remain dry for any length of time as they have no pseudo-bulbs in which to store up nourishment. When the compost assumes a slight crispness to the touch it is time to give them some water. Before they send forth their new roots they should be repotted or fresh material given. Where the compost is good it is not necessary to remove it all every year. Just pick out some of the old compost and renew with chopped live sphagnum and fern fibre in equal parts. They grow very well in a night temperature of 62 to 68 degrees and from 70 to 75 by day, but with solar heat give a few more degrees. Light syringing occasionally is essential at all seasons except when they are in flower when it should be discontinued. Give fresh air but avoid all sudden drops in the temperature and cold draughts, as they require considerable care to maintain an even temperature while ventilating. In their growing seasons, the walks, walls and under the benches should be kept well saturated with water as these orchids come from a very hot and humid climate. They should be shaded from now until November, but not heavy enough to shut out the indirect rays. *Phalaenopsis amabilis*, *Schilleriana* and *Rimestadtiana* are good kinds.

YOUNG LORRAINE BEGONIAS

Cuttings that were placed in the sand after the middle of January should all be nearly ready to be potted off. Use no manure for the first potting, but make the soil porous by adding sand and leaf mold. For later shifts use some old well-rotted manure intermixed through soil. Give them an average temperature of about 65 degrees for newly-potted stock. When they get well established 5 degrees lower will do. Shade against bright sun and water with care, especially during periods of prolonged rainy, misty or gloomy weather. To insure plants of symmetrical shape judicious pinching should be resorted to. Keep the plants close to the glass especially during their early stage of growth. This begonia is exacting in its requirements as regards light, ventilation, moisture and watering. If these are made right it will respond and make rapid growth.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: Bedding Plants; Boronias; English Ivy; Fancy Leaved Caladiums; Pansies; Plants for Vases, Boxes and Baskets

Fragrance an essential

We should infer from the frequent reference by foreign writers to fragrance as a desirable attribute in a new rose that this point is likely to be given more prominence in future judging than has been the case heretofore. We can well afford to follow suit in this country, not only in the case of roses but also of carnations. An odorless rose or carnation is deficient in one of the chief factors for popularity and even exceptional productiveness should not be regarded by the grower as offsetting the absence of fragrance.

A glorious victory

The passage by both houses of Congress of the long-fought White Mountain and Appalachian reservation bill is an achievement which will be hailed with delight by millions of patriotic lovers of Nature. At last the ruthless waste of our forest growth is to be stopped and the natural resources upon which so much of our comfort and prosperity depend, protected and conserved. All honor to those senators and representatives who have valiantly and persistently fought out this struggle to so happy a conclusion. Gradually the people of this country are coming to their senses. The circuit court in Colorado recently granted an injunction against the impairment of the beauty of Cascade Canon by the establishment of works and diversion of the water for the generation of electricity, holding that complainants who had constructed roads and trails and stopping places for tourists to enjoy the exceptional beauty of its floral and arboreal scenery had shown a "beneficial use" of the water and were entitled to protection. When the courts rule that natural beauty is an element of value it is evident that the world does move and that the unrestrained plundering of our best possessions and reckless unbalancing of Nature which has already impoverished our great country to the extent of untold billions of value is to be no longer permitted.

A reasonable proposition

The third section of the Mann Seed Bill H. R. 29163 provides "That the term 'seed,' as used in this Act, shall include vegetable, flower, cereal, grass, clover, forage plant, and other agricultural and horticultural seeds intended for seeding purposes." At the hearing on this Bill in Washington, we understand the American Seed Trade Association presented a "Suggested Revision" for the Bill, in which Section 3 was changed to read "That the term 'seed' as used in this Act, shall include grass, clover, forage plant, and other agricultural seeds intended for seeding purposes." Such change would do much to put the proposition upon a fair basis. It would limit the operation of the proposed Act to grass, clover, forage plant and other agricultural seeds intended for seeding purposes, and would exclude vegetable, flower and other horticultural seeds. It is conceded that these last three classes of seeds, as now sold, are generally of a high standard of excellence, higher really than the specifications of Mr. Mann's Bill require. In fact the testimony at the hearing on the Bill brought out the fact that there is apparently no need for any legislation to regulate the sale of vegetable and flower seeds. The evidence tended to show that these, as sold, are pure and that adulteration had occurred only in grasses, clovers and farm seeds. We think that the revised form of Section 3 should be adopted, as it gives protection where protection is required, and works no hardship on those who have given no offense.

PHILADELPHIA NOTES.

Albert Jones of the Pennock-Meehan Co., is back on duty again after a week's illness resulting from a heavy cold caught on a recent western trip.

Henry F. Michell has just returned from a well-earned vacation at Summerville, S. C. Between the catalogue and the rush is the ideal time for the seedsman to take a rest. By this method better work and more of it.

A feature of the Easter preparations at Craig's is a magnificent collection of Rambler roses trained in new and captivating shapes; baskets, bells, umbrellas, and many other unique forms—most of them designed by the fertile genius of young Robert. This will captivate the retailer and will sell on sight. There are three or four big houses devoted to this one item alone.

John Farquhar, of Boston, paid the trade of Philadelphia a brief visit on the 14th and 15th, on his way home from Washington. We are proud to hear that he was one of the foremost champions at the recent hearings in the capital for common sense and fair play for the seed trade. The new Burpee buildings were one of the chief objects of his inspection, and proved an eye-opener for what can be done by an organizing genius with a warm and generous desire for the comfort of his help, as well as for the prompt and accurate despatch of orders.

A serious fire occurred at Stephen Mortensen's rose growing establishment at South Hampton on Sunday night. Eight houses, 20x150, comprising some 24,000 feet area in roses were nearly destroyed, and the contents ruined. The range was worked in two wings with shed between, underneath which were the boilers and gasoline pumping engine. Four houses on each wing went with the shed which was completely destroyed. The smoke flues from the boiler pass underneath the shed to a brick stack situated at some distance outside and it is thought that some shavings must have got near one of these flues and when the firemen started up the extra boiler, when the storm came on Sunday night, the fire started. Fortunately the gasoline tank was empty else the whole establishment would have been obliterated. Willing neighbors did their utmost in helping the proprietor and his forces to board up the damaged houses and save the stock as much as possible. It is thought that the plants for about 6 inches above the root are safe and can be used for a future crop when the houses are repaired. One of the most unfortunate of the losses was a house containing the winter's work in young grafted roses on Manetti stock for which this place is famous. It will be very hard to replace these. The loss is estimated at \$5000 on the buildings and \$3000 on stock and crop. No insurance. The boilers were unharmed. The trade here deeply sympathizes with Mr. Mortensen, who is a young grower who has in a very few years made a great reputation for himself and is highly esteemed, both personally and professionally, by all. He started, it seems but yesterday, with very little and has by his own efforts and industry built up one of the model places of the vicinity which was rapidly expanding from year to year, and

ROCK GARDEN AT H. A. DREER'S, RIVERTON.

this blow to a most deserving and estimable boy makes us all sorrowful and sympathetic.

Visitors: F. R. Pierson, Tarrytown, N. Y.; J. K. M. L. Farquhar, Boston, Mass.; H. L. Holmes, Harrisburg, Pa.

DISTINGUISHED VISITORS COMING.

We learn from our British exchanges that the proposed American trip of horticulturists is now an assured success, fourteen gentlemen being booked and others may be added. The party will sail from Liverpool on the Lusitania, March 11th, and the return will be made on April 5th, on the Mauretania. Philadelphia, Washington, Richmond (Ind.), Chicago, Niagara Falls, New York, etc., will be visited, in addition to the National Flower Show at Boston which is the principal object of the visit. The party will be escorted by the Editor of the Horticultural Trade Journal, Burnley.

MASSACHUSETTS AGRICULTURAL COLLEGE.

Professors Waugh and White, of the Division of Horticulture, returned last week from a trip to Urbana, Ill., where Professor Waugh delivered two lectures, one on his recent European trip and the other on pruning, before the Ill. State Horticultural Association, Professor White attending the meetings of the Ill. State Florists Association at that place. On the return trip Prof. White visited Cornell University. Mr. Charles H. Totty delivered a very interesting lecture on chrysanthemums before the classes in floriculture last Friday morning, Feb. 18.

ROLAND H. PATCH.

New Orleans, La.—We have been having spring weather for the past month and nature is putting on her best attire; the mocking birds are singing and all the spring flowers are in bloom. With ideal weather this is the place for visitors to spend their winter months.

Obituary.

Martin Trautman.

This old-time florist died at his home in Dorchester district, Boston, on February 15, in his 92nd year. Few in the trade now alive remember Martin Trautman. It is twenty years since he retired from business. Along in the fifties he built the greenhouses on Warren street which he occupied for over thirty years. Previous to this he did business on the Williams place, also on Warren street. His establishment was considered a large one for his time and, as was the custom in those days, all business was all done at the greenhouses. The houses contained many large camellias, azaleas, etc., everything being grown in pots on stagings. Mr. Trautman was a well-trained German gardener of the old-fashioned school, reserved and dignified in manner but held in high respect by his fellow-gardeners and florists.

Aaron H. Green.

Aaron H. Green, senior member of the firm of Kerr & Green, florists, Baltimore, Md., was stricken with heart failure and died almost instantly on Feb. 8th. Mr. Green was born in Washington County, Maryland, and after graduating from the schools took up farming. This in turn he gave up for a position in the Poole Iron Foundry, which he held for thirty years, and then entered the florist business with Mr. Kerr. He is survived by a widow, two brothers and six sisters.

James McConnell.

James McConnell of the New York Cut Flower Co. died on February 17. The funeral took place on Sunday, the 19th, and interment on 20th at Woodlawn Cemetery.

Hastings, Nebr.—Charles Winkler has now completed his new greenhouse. It is said to be one of the largest and most up-to-date in the West.

CLUBS AND SOCIETIES

NEWPORT HORTICULTURAL SOCIETY.

The main feature of the evening of February 14 was a lecture on "Orchids and Their Culture," by Walter Eglinton, a Veitch graduate who has for the past few years been in charge of the orchid department at the Oscar Schultz establishment in this city and has improved the collection under his care to such an extent that he is now admitted to be an expert of the front rank.

Mr. Eglinton said the orchid is justly entitled to be called the queen of all flowers, and that their value as a commercial flower has not yet been fully realized in this country. The odontoglossums he said deserved much more recognition on account of their value in producing graceful decorative effects and the cool treatment they require in summer can easily be provided in a properly shaded house with some arrangement to distribute water over it to help keep the glass cool. Potting should be done only at the time when new roots make a start, and the ordinary orchid pots are better than baskets or boards as plants can be kept under better control in the pots and can be shifted when necessary with less damage. The regular orchid peat is the best material for potting. Speaking of feeding, he said his method is to dampen the paths in the houses about closing time with manure water, the vapor of which is inhaled by the leaves of the plants, but great care should be taken not to overfeed as very vigorous growths do not produce as good flowers as do the medium sized ones. In raising seedlings great patience is needed to nurse them through their small stage. Damping off is one of the greatest troubles. Slugs and other pests are also to be guarded against. Six years is about the average time

required to bring seedlings to the flowering stage but some have been known to take seventeen years.

Mr. Eglinton talked without notes and was aided in his lecture by a collection of cut orchids grown by himself. Among them was a cattleya of unnamed variety which had been in its open state for ten weeks, and was in perfect condition, and on being examined by a committee was awarded a certificate of merit. The lecturer, after answering many questions, was tendered a unanimous rising vote of thanks.

A business meeting followed, when the adoption of a premium schedule for the June show was the chief business. Several new features are included in this, the main one being a table decoration by gardeners' assistants; climbing roses in pots is also added and the usual collection of vegetables is replaced by a class for each of the main vegetables in season at that time.

J. R.

DETROIT FLORIST CLUB.

Members of the Detroit Club turned out well to listen to S. S. Skidelsky on "The Drummer as a Factor in Horticulture." In the absence of the essayist, M. Bloy read the paper. We hope to publish it in full in a later issue.

Mr. Bloy said that he felt especially pleased with the essayist's reference to the drummers' assistance in selecting novelties which is far superior to the system of choosing from highly colored prints of the olden times. Mr. Sullivan dwelt on the value of the drummer as a disseminator of knowledge but felt like condemning that drummer most vigorously who refuses to attend the meeting of any club just because such meeting is a poor place to take orders. J. J. Karins of Dreer's, who was present, gave a very interesting talk on the florist business on the Pacific Coast. FRANK DANZER.

WESTCHESTER AND FAIRFIELD HORTICULTURE SOCIETY.

The regular monthly meeting of the Westchester and Fairfield Horticulture Society was held February 10th with an attendance of 60 members, giving ample proof that the Society will flourish into a well-known horticulture society within a short time. Scott Bros., of Elmsford, N. Y., were awarded a certificate of merit for scarlet carnation William Eccles, a cross between Victory and Beacon; fully as large as Beacon, and much fuller in the center than Victory, rich glowing scarlet, with the perfume of the clove carnation. Scott Bros. are to be congratulated in securing this sterling novelty, which will easily out-class anything we have today in this special color. A. Bieschke, gardener to Wm. Ziegler, of Noroton, was also awarded a certificate of merit for *Oncidium splendidum*.

A vote of thanks was accorded to James Aitchison, gardener to M. J. Borg, of Stamford, who showed three plants of *Cineraria hybrida*, also a vote of thanks to James Stuart, gardener to Mrs. F. A. Constable, Mamaroneck, N. Y., for carnation May Day.

The next meeting will be Friday evening at 8 p. m., March 10th, in the Royal Arcanum Hall, Stamford, Conn.

MARTIN M. BENEDEK, Sec'y.
Mamaroneck, N. Y.

CLUB AND SOCIETY NOTES.

R. G. Salter, Geo. B. Hart, W. L. Keller and Chas. H. Vick have been appointed to represent the Rochester Florists' Association before the New York legislature in advocacy of the bill providing suitable greenhouses at Cornell for horticultural experiment and instruction.

Indications are for a very large and showy display of pot plants, forced spring bulbs, orchids, roses, carnations, sweet peas, etc., at the mid-winter show to be held in Horticultural Hall, Boston, on Friday, Saturday and Sunday, February 24, 25 and 26.

Group at the Annual Smoker, New Jersey Floricultural Society. Exhibits and Trophies in Foreground.

AMOS H. WHIPPLE, Proprietor

CHICAGO NOTES.

The Wholesale District.

Removals are still the one topic throughout the wholesale market, but the hope of getting all the florists together on any one project is growing less each week. Several good propositions have been discussed at the meetings but have been lost because of delay in action. At this writing the J. A. Budlong Co. are still without a location though having several under consideration. The Chicago Carnation Co. has taken advantage of the option on rooms 201 and 222 which they secured when they took possession of their present small quarters on Jan. 1st. These rooms have a floor space of 1500 square feet and one half is for rent. Manager Pyfer says no sub leases have been made yet but he has several applications. The rooms are in the Atlas Block and are very light, facing on Wabash Ave.

A Disappointment.

The Chicago Florists' effort to reduce the high express rates met with disappointment when C. C. Kohlsaat, judge of the U. S. Federal District Court, decided that the State Board of Railway and Warehouse Commissioners did not have jurisdiction over express companies and that further legislation would be necessary to include them.

The Association of Commerce has taken the matter in hand and with the florists will try to do something more to secure lower rates.

Outdoor Conditions.

The park superintendents state that

the mild weather has started the soft wooded shrubs, but so far they are in no great danger. Prof. Cox of the U. S. weather bureau stated in Sunday's Tribune that there had been an unusual weather record made last week, there being but 3½ hours of sunshine.

Trade Items.

The Chicago Car. Co. has decided to make an exhibit at the coming show at Boston. They are also preparing to erect one or more new houses this spring.

T. C. Yarnall and George Peiser are trying to organize a stock company to open a commission house in the old Amling stand. No arrangements are completed so far.

Harry Rowe's store is nearing completion. Both sides of the front will be covered with mirrors, in front of which are white enameled shelves two feet wide for display. They are finished with brass rods. Two tall mirrors with gold frames have been placed farther back and the lighting completed, fountain in place and floors

laid. When completed it will be one of the most artistic places in the city.

The Chicago Carnation Co. last week received two orders for their new Washington carnation from England. They also shipped some to Germany. Though the stock of this beautiful sport of Enchantress is very large all orders are now taken that can be delivered before March 15th.

There is not much choice in blooming plants at present. Azaleas have become an all winter plant and a few at least are seen in all the retail stores. Cyclamens are nearing the end of their season and primroses have reached their zenith. Boston ferns are meeting with their usual favor and in the long stretch between now and Easter will play an important part.

A large wedding bell was made by A. Lang for the Plaza Hotel. It was 27 inches across, was covered with white lilac, lily of the valley and roses, and inside the bell was concealed a quantity of rose petals which were made to fall in a shower at just the

HOTEL WESTMINSTER

Copley Square, Boston.

C. A. GLEASON

The Thorndike Hotel

Boylston St., opp. Public Garden, Boston

Recognized as one of Boston's Best Hotels. Suited to the requirements of tourists — and the best class of Business men and their families.

Rates Per Day

Single Rooms \$1.50, \$2.00, \$2.50; with Bath \$2.00 to \$4.00
Double Rooms \$2.50 to \$4.00; with Bath \$3.50 to \$6.00
Parlor, Chamber and Bath \$6.00 to \$10.00

"Ye Old English Room"

**Visitors to the National Flower Show Should Book at the Thorndike,
Five Minutes From Mechanics Building**

right moment. A connecting wire running to an adjoining room opened the compartment when gently pulled.

Personal.

Miss Elsie Schnapp has returned to the Alpha after a few days wrestle with the grip.

E. C. Amling, with his family, is spending the winter months at Orange near Los Angeles.

H. S. Morton, who has been in the west for the past two years has returned greatly improved in health. He expects to leave for the south soon.

The best wishes of the trade are extended to Harry Garland of Des Plaines, Ill., and Miss Helen Yeager of Crete, Ill., who were married Feb. 18th. Harry is the son of Geo. M. Garland.

Theron V. Brown of A. Lang's leaves soon to go into business in the south. He will make a trip through the east and south and settle eventually in Florida where he will be associated with O. A. Oldfield of California.

Visitors—F. H. Henry of Henry & Lee, N. Y.; Alois Frey, Crown Point, Ind.; W. S. Coggin, Battle Creek, Mich.; T. C. Joy, Nashville, Tenn.; Fred Manke, Milwaukee, Wis.; C. E. Schaefer, La Crosse, Wis.; C. B. Knickman, of McHutchison & Co., N. Y.

NEWS NOTES.

Boonville, Mo.—On April 1st John A. Peyton becomes partner in the Boonville Nursery.

Eureka Springs, Ark.—C. I. Poor is planning to move his greenhouses to Prospect avenue opposite The Thach.

Chicago, Ill.—The Raske Floral Co. has leased the store at 177 Jackson Boulevard for five years from May 1st, 1911; rental, \$15,000 for the term.

DURING RECESS.

Bowling at New York.

New York won the match with Rutherford, Feb. 17th, at the New York alleys, and with it the five valuable knives presented by M. C. Ebel. The totals of the two games were: Rutherford, 669, 660; New York, 716, 721.

The return match will be bowled at Rutherford alleys, on the 1st of March. The best scores of the evening were as follows:

RUTHERFORD.		NEW YORK.	
Teller,	163 165	Rickards,	181 115
Richter,	125 118	Shaw,	118 131
Roehrs, J.,	124 103	Fenrich,	146 188
Clark,	178 152	Manda,	132 162
Roehrs, E.,	142 177	Chadwick,	225 182
Vermeulen,	105 130	Nugent,	108 162
Latham,	146 136	Ebel,	101 114

Chicago Bowlers.

The Chicago Florists' Bowling Club played according to schedule February 15th, and made the following score:

ROSES.		ORCHIDS.	
Craig,	130 149 157	Hueb'n'r,	178 147 147
W's'n, Jr.	63 89 80	Zeck,	153 131 148
Sweeney,	110 123 113	Graff,	164 140 159
Wolf,	181 155 147	Degnan,	168 153 179
Foster,	167 181 142	Farley,	169 148 189
CARNATIONS.		VIOLETS.	
Krauss,	146 159 144	L'b'm'n,	165 169 127
Ayers,	153 138 172	F'd'm'n,	211 165 188
Schultz,	144 167 153	Lorman,	133 174 194
Zeck,	145 193 155	Yarnall,	147 155 173

Cincinnati Bowlers.

The following were the scores bowled Monday, February 20th:

Murphy,	166 188	Horning,	140 138
Heckman,	180 159	Fritz,	127 135
Witterst't'r,	108 157	Allen,	118 153
C. Hoffm's'r,	151 193	O. Hoffm's'r,	109 135

Ray Murphy won the box of Silka-

line offered by E. G. Gillett for the highest average score of the evening.

A meeting of the Yonkers Horticultural Society was held on Friday, the 17th inst. The dinner committee reported a balance to the good, and was discharged, being accorded a standing vote of thanks. L. Melliott was appointed a delegate to represent the Society, on a committee organized to push the legislation now under discussion, to establish a Horticultural Experimental Station for New York State.

FINE FERNS

Ready For Immediate Retail Sale

We have an exceptionally fine and large stock of ferns in the following varieties,—first-class plants of exceedingly good value—plants that will please the most critical buyers, both in regard to quality and value.

NEPHROLEPIS ELEGANTISSIMA (Improved). The finest of this type—never showing a Boston frond; has not reverted in the last four years. Fine plants, 6-in., \$6.00 per dozen; 8-in., \$12.00 per dozen; large specimens in 12-in. pans, \$3.00 to \$5.00 each.

NEPHROLEPIS ELEGANTISSIMA COMPACTA. This bears the same relation to elegantissima compacta that Scottii does to Bostoniensis. It is a dwarf, compact plant, especially fine in the small sizes. Fine plants, 6-in., \$6.00 per dozen.

NEPHROLEPIS SCHOLZELI. Fine plants, 3½-in. pots, \$2.50 per dozen; 6-in. pans, \$6.00 per dozen; 8-in. pans, \$12.00 per dozen.

NEPHROLEPIS BOSTONIENSIS. Extra strong plants, 8-in. pans, \$12.00 per dozen.

NEPHROLEPIS SCOTTII. 8-in. pans, \$12.00 per dozen.

SMALL FERNS FOR FERN PANS. Best and hardiest varieties assorted: Pteris Mayli, Wimssetti, Adiantoides, Aspidium Tauusimense, Crytomium falcatum, etc. Strong plants, 2½-in. pots, \$3.50 per 100.

CROTONS. Nice assortment, well colored, 5-inch, \$9.00 per dozen.

PERSONAL.

Gust Taepke of Detroit is laid up with a serious attack of erysipelas.

George Tromey of Cincinnati, O., left Tuesday, Feb. 21, for New Orleans to take in the Mardi Gras carnival.

Frank Sonnenberg of the Hyde Park Rose Co., Cincinnati, and Miss Marion Layton were married, Wednesday, Feb. 22.

Charles Fick, for many years a market gardener at San Mateo, Cal., has taken a position as head gardener to Captain Kohl, Hillsborough, Cal.

H. F. de Thestrup has taken the position as grower at the carnation houses of F. P. Putnam, North Tewksbury, Mass. He will assume charge on March 1.

Wm. McKay, head gardener at "Seaverge," Commodore E. T. Gerry's estate, Newport, R. I., has resigned his position and will give up his duties March 1st.

Robt. Fulton, representing Henry & Lee Co., of N. Y., was taken ill while on his way from Yokohama and was obliged to stop at the Warner Hot Springs in California.

"Barrett the Bee King" has started out from his home in Hyde Park on a lecturing tour, Philadelphia and southward and Canada, on the topic of plants, flowers and bees.

Cincinnati visitors—J. T. Herdegen, Aurora, Ind.; Wm. Lodder, Hamilton,

O.; Simon J. Hider, Hillsboro, Ohio; Jos. R. Goldman, Middletown.

Boston visitors—Maurice Fuld, Philadelphia, Pa.; Mr. Peterson, Cincinnati, O.; Winfried Rolker, New York.

New York visitor—P. Welch, Boston.

NEWS NOTES.

Pittsfield, Mass.—The greenhouses and gardens connected with Miss Hall's School on Holmes road have been leased by Rudolph Mauersberger and they will be conducted as a commercial plant.

Bettendorf, Iowa—J. W. Davis is to erect greenhouses in the suburbs of Bettendorf for the purpose of raising cucumbers, tomatoes and ferns, providing that the Bettendorf Booster Club can dispose of \$35,000 worth of 7 per cent bonds.

New Westminster, B. C.—The Surrey Nurseries have been sold to a syndicate for \$52,000 and it is probable that the \$20,000 worth of nursery stock on the plant will be transferred to Chilliwack as negotiations are being made for purchase of land near that city.

Chase Bros. Co., of Rochester have been sustained by the Board of Appraisers in their protest against the assessment of duty on a shipment of evergreens as "nursery stock." They come in free as "evergreen seedlings."

¶ You have heard about the idle rich—well, in the writer's opinion the rich are the busiest people on earth. Of course, as to what some of them are doing, the less said the better, but don't put them all in the same class until you know what the facts are. Some of the rich are doing better work than the poor because they think. One of the hardest things to do is to make people think—to reason out a point and consider matters.

¶ If the buyers of lily bulbs knew all the circumstances connected with the direct importation of the Horseshoe Brand bulbs, they would buy no other brand. There are no lily bulbs produced which will flower 100% every year, Horseshoe Brand bulbs will average higher in the course of time than any other brand marketed. There are reasons why and good ones—ask us.

Seed Trade

Where Seeds Come From.

"Where Seeds Come From," was the subject of an unusually valuable lecture by John K. M. L. Farquhar in Horticultural Hall, Boston, last Saturday, with lantern slides.

Mr. Farquhar said, in beginning, that the United States is entirely dependent on foreign countries for its supply of flower seeds, and largely so for its better varieties of garden seeds and also for agricultural seeds. The supply of seeds from Germany alone aggregates from eight to ten tons. Numerous forage seeds are also imported each year to supply the needs of farmers. Of vegetable seeds this country is now producing in northern New York and Michigan, nearly all the garden peas required. A generation ago these, too, were imported. California produces practically all the lettuce seeds needed and California growers are now supplying large quantities for export to France and Great Britain. Lima beans and onion seeds for the most part come from the Pacific Coast, while vine seeds such as squash, cucumbers and melons, are now largely grown in Colorado and northern New York. The best sweet corn is produced in Connecticut and large supplies come from the West.

The speaker proceeded to tell about the famous places in Europe where seed growing has been carried on for generations. In the south of France entire families engage in the work which their ancestors were brought there to do by the Romans, who gave them grants of land that they might raise choice vegetables and herbs for their tables. On these farmers this country depends largely for the finest egg plant, peppers, various salad seeds and herbs. The growing of zinnias, asters, gilliflowers and others has recently been taken up by these French people with success.

Perhaps the most painstaking seed-growers, said the speaker, are those of Germany. The growth of seeds on a large basis was first established at Erfurt. Up to the time of Napoleon's campaigns the fields had been devoted to vine culture and the wines were justly celebrated. The business has now spread to the Hartz Mountains, including the town of Quedlenberg, where one of the large seed farms covers an area of nine thousand acres.

Mr. Farquhar showed slides giving an excellent idea of the methods employed in growing forage grasses. In closing he said that it will be many a generation before the United States is able to produce anything like the amount of seeds required for its farms, gardens and pleasure grounds, to say nothing of those required for planting under glass.

Onion-Seed Industry in the Canaries.
(From Vice-Consul Ross J. Hazeltine, Tenerife.)

The exports of onion seed from the Canary Islands to the United States during the year 1910 declined approximately 35 per cent. as compared with the quality exported in 1909.

The exportation of onion seed from the Canary Islands to the United States began about 15 years ago, when a trial shipment of 30 pounds was con-

SCHILDER BROS., CHILLICOTHE, OHIO

signed to a Philadelphia seed dealer. Since then the exports have steadily increased, and with the decline of the drawn-work industry the trade in onion seed has become the most valuable item of export from these islands to the United States. Practically the entire crop is sold to the agriculturists and seed dealers in the southwestern part of the United States.

The year 1909 was the banner year as regards the quantity exported. The prevailing prices, however, were slightly lower than those of the preceding and present years. The American importers purchased larger quantities than they could dispose of, with the result that the opening of the present

ISELL'S SEEDS

Our Michigan Grown Seeds are winning their way into public favor with astonishing rapidity. Here under our own supervision, we grow all our Beans and Peas, Cucumbers, Muskmelons, Tomatoes, Radish, Sweet Corn, besides many other things of less importance. Don't you think we can honestly claim to know the seeds we sell? We invite you to Try our Seeds and Methods just once and it will not be long until you have formed the habit of using Isbell's Seeds.

season—July and August—found them with considerable quantities of old seed on hand. Consequently, contract orders for this season's crop were canceled and the export figures show a remarkable decrease. The exports for the coming year should show an increase unless the reputation of the Canary onion seed has been injured in the United States by the mixture of old and new seed.

The quality of the Canary onion seed is unexcelled and the exporters maintain a high percentage of germination which is usually guaranteed. In order to protect the planter in the United States, as well as the reputation of seed, it has been suggested that the local exporters inclose in or stamp on the case a written guaranty or statement as to the age of the seed contained therein, together with a certified statement as to the percentage of germination ascertained by actual test where this is possible. This course has been considered advisable for protecting the industry, owing to the fact that onion seed one year old shows only a small percentage of fertility.

The chief varieties exported from Teneriffe are known as the Red Bermuda, White Bermuda, Crystal White Wax, and a few special varieties bearing the name of the exporter. The onions grown from these seeds in the United States are known in the market as large Bermudas. The average price of the seed per pound varies between 75 cents and \$1 f. o. b. Teneriffe. [The names of the principal growers and exporters are filed at the Bureau of Manufactures.]

Seeds for All.

One tidy little item which the Clerk of the House of Representatives dished out the other day, in the course of the consideration of the agricultural appropriation bill, was \$237,160 for the annual seed grant. Just to convey an accurate notion of how this handsome sum is to roll out of the United States Treasury, we quote this language from the bill verbatim:

"For purchase, propagation, testing and distribution of valuable seeds, bulbs, trees, shrubs, vines, cuttings and plants; all necessary office fixtures and supplies, fuel, transportation, paper, twine, gum, postal cards, gas, electric current, official traveling expenses and all necessary material and repairs for putting up and distributing the same; for rent and repairs and the employment of local and special agents, clerks, assistants and other labor required, in the city of Washington and elsewhere, \$289,680, of which amount not less than \$237,160 shall be allotted for Congressional distribution."

Of course the item went through with a rush, the few faint voices of protest being drowned in the happy yells of delight from the cheerful distributors. The Hon. Michael E. Driscoll of Syracuse, the great monument expert of Congress, was one of those who spoke loudest for this governmental bounty, and he incidentally saw fit to clutter up the Congressional Record with a page of letters from his grateful city constituents who had grown radishes, nasturtiums, morning glories and lettuce at the expense of Uncle Sam. A fine thing to encourage urban interest in out of doors, he declared. But why the national Government should hand out seeds any more than it should hand out ploughs or skates or alpenstocks he failed to indicate.

As a last typical word upon the subject the Hon. Ezekiel Samuel Candler, Jr., of Corinth, Miss., thus declaimed in defence of the much criticised quality of the governmental seeds and of the whole system:

"No longer ago than this morning I had a letter from a splendid, good lady in my district, who said that the seed she received last year was the best she ever had, and wanted more, which I gladly sent her. Nothing gives me greater pleasure than to respond to the many requests I receive from my district for the seed which is sent out

on my request by the Government. Many letters I receive express thanks for the seed and I am glad to respond to the wishes of my constituents. I want to represent my people, and if I do so I shall be glad and happy. I intend to represent fully their views and shall do so in every instance." (Loud applause.)

We close with the remark that the \$237,160 does not represent the total cost by a long shot. All the several packages must be shipped to the splendid, good constituents of Syracuse, Corinth and elsewhere by the poor groaning Post Office Department under the indefatigable Congressional frank. As for the crop of Congressmen raised from these seeds, we simply observe that they are just about what might be expected.

—New York Sun.

A Popular Seed Representative.

William C. Langbridge first saw the light of day some time during the year of 1860 on the island of Jamaica, West Indies, and as the climate later was found not suited to his state of health, he, together with his father and younger brother emigrated to New York. Mr. Langbridge was eleven years old when he came to New York and a few years after his arrival there became a member of the Shaker Community

WILLIAM C. LANGBRIDGE

founded at Mt. Lebanon, N. Y., where he remained until 1888, filling many positions of trust. During the last four or five years of his career among the Shakers he was sole manager and the traveler for what was then known as the Shaker Seed Company, and besides had complete charge of the seed gardens and trial grounds carried on by that concern. It was here that Mr. Langbridge gained his first knowledge of the seed business and on leaving the Shaker Community associated himself with the Jerome B. Rice Seed Company of Cambridge, New York, and for whom he is now the leading traveler. There is no one in the seed trade more popular than Mr. Langbridge and as a salesman it is hard to find his equal.

HOWARD M. EARL.

Twenty years ago, when W. C. Langbridge first called on me, trying to sell a bill of goods, I thought he was a curly-headed, red-haired youngster—like the thousands that loom up and disappear—and that that was the end of it. I never thought to see him again. But lo, and behold if here he

wasn't back again—next year—and the year after. And so it kept on, until even a hardened cynic like myself had finally to sit up and take notice. Of course, during all this time he had a good house behind him. Our beloved old invalid, Jerome B. Rice, had brains enough to recognize brawn wedded to brains in W. C. Langbridge long before W. C. L. or anybody else recognized it. Today, however, there are few in the seed business who are better known the country over or who have cut a larger figure in the seed trade of America during the past twenty years than W. C. Langbridge.

GEORGE C. WATSON.

Notes.

Cairo, Ga.—Mauldin Bros. are planning to go into the wholesale and retail seed business.

ST. LOUIS NOTES.

Mr. Joe Rolker, of August Rolker & Sons, New York, spent a few days here last week with the growers, interesting them in the importation of plants and bulbs.

Mrs. John Steidel, president of the Ladies' Home Circle gave the members a rare treat at the meeting on Monday, Feb. 13th, in the shape of a fine spread which was much enjoyed. The meeting was interesting and the attendance large.

Many friends in the trade at large will be surprised to learn that J. F. Ammann is about to dispose of his greenhouse plant at Edwardsville, Ill., and retire from business. It is stated that Mr. Ammann has had a good offer for his plant and that he would accept it and retire. The names of the parties making the offer have as yet not been announced.

It was estimated by one of the leading growers of Kirkwood that on Monday and Tuesday of the last week the combined growers in Kirkwood sent over 500,000 California violets to this market. The bulk of these consignments were handled by the W. C. Smith Wholesale Floral Co. Retailers say that Valentine's Day business was far ahead of any past year's and is coming along as one of the best holidays in the year for the florist.

INCORPORATED.

Flower Market Reports

BOSTON Trade has been satisfactory of late, but values are tending downward on many staples and with brighter skies and resultant crop increases lower prices are undoubtedly on the way. The famine cannot be said to exist any longer even on roses, although there have been none too many good roses and no surplus of white carnations up to the present moment. Roses are good in quality and there is a noticeable increase in number received. This is also the fact as to carnations, the colored varieties suffering most in the accumulation that is now beginning. Sweet peas are in heavy supply. Yellow narcissi are much too abundant, selling at prices that will not reimburse the growers. Lily of the valley is also stagnant. Tulips sell moderately well, especially La Reine, well colored. There is a good supply of lilies and enough gardenias and cattleyas for the present demand. Violets are good generally and selling a trifle better than they were.

BUFFALO For a week past stock has been on the short side, especially in white material. As for spring material there is enough for all; in fact, it is too plentiful at times, especially in the daffodil line. Lilies have had a good call, also lily of the valley, peas, violets, mignonette, daisies and poet's narcissus. In the rose line the shortage is in the short grades. Killarney, both pink and white, are fine, also Maryland, Richmond, Bride and Bridesmaid—Killarney and Richmond being in preference. Valentine's Day, also Washington's Birthday, helped the demand for both cut blooms and plants. Together with regular floral work, the trade has had a busy week.

CHICAGO With three and one-half hours of sunshine stock did not advance much in quality during the past week. Some of the largest growers with an average daily cut of carnations numbering into the thousands have everything taken by advance orders and anything out of the ordinary in size causes a quick skirmish. With roses, the situation is about the same. Quality suffers some with the continued dark days and medium Beauties are among the worst. Bulb stock is coming up from the south and is more welcome than in former years. Sweet peas are too numerous and the poorer ones are left over. Window boxes of tulips of various colors are very attractively arranged in the downtown windows. Some very attractive novelties in the shape of fancy baskets were offered for February 22nd, accompanied by a tiny hatchet and flag. One window had heart-shaped violet colored baskets filled with violets and tied with ribbon to match. Frequently windows show bouquets and baskets made of artificial flowers; the florist thereby gives his customers a hint which he lives to regret. Nor is this confined to the small stores. Shamrock seems likely to be good both in demand and supply and the little plants in thumb pots will be popular as ever.

CINCINNATI Business the past week has been very good. Receipts, owing

A Pennock-Meehan Suggestion

PATENT ROLL TINFOIL AND HOLDER

THE NEW method of handling foil as illustrated here is a great improvement over the old style. Not only is it handier and more economical in using; but it saves space and worry and is always in place.

Flower Market Reports

(Continued from page 261)

exceptionally good while the shortage on these is very apparent. Carnations were in better supply than at any time during the past fortnight. White and lavender Dutch hyacinths are of exceptionally good quality and sell readily, as do tulips of all colors. Violets moved consistently the early part of the past week, but the warm weather during the later part of the week brought in more than the market could consume. Longiflorums and callas find a good market.

Judging from the various reports Valentine's day put a much larger balance on the right side of the ledger than last year. This was the more surprising because the weather was so extremely bad. Roses were very scarce owing to off crop conditions of local growers. It was only towards the end of the week that wholesalers were able to stock up with roses of good quality. Carnations are plentiful, the bulk selling at \$3.00 per 100, with a few choice red ones at \$4.00. Violets are offered in all kinds of shapes and quality. Lily of the valley is very scarce at present and will be so for a while to come; the same may be said of Lilium longiflorum. A heavy call for hardy ferns indicates a general shortage of this indispensable article.

Ever since I reported some weeks back that the existing high price of carnations was caused by the dry weather of last summer I nursed the belief that the steady price and the absence of gluts might recompense the grower for the loss in quantity. While talking with a prominent local carnation grower, who said that my report was the only one that hit the nail on the head, he gave me a rude awakening to the fact that even the constancy of good prices is not able to make up the loss in number of blooms. This grower contends that, while probably working under less favorable conditions than others, he is satisfied that neither he nor any other carnation grower will come any where near the results made a year ago when prices were fluctuating and gluts were frequent.

FRANK DANZER.

General conditions of NEW YORK supply and demand are showing very little fluctuation, the only noticeable tendency being in the direction of more liberal receipts at the wholesale centers with a corresponding easing up of

the price list on preferred grades of some specialties which are now past the famine stage. Roses are rapidly gaining ground and whoever wants roses can be accommodated in the various wholesale marts using HORTICULTURE'S columns to advertise their business. As to the others, readers can take their chances. It takes all kinds of people to make up the world. Carnations, lily of the valley, cattleyas, acacia, lilacs, gardenias, violets, and a host of other good things are in full supply and prices are simply normal. The goods are worth all that is asked for them and that should be enough.

St. Valentine
PHILADELPHIA proved a real friend of the florists last week and they feel like adopting him as their patron saint. Monday and Tuesday were hummers in this market, and the business done far exceeded all previous records for the same occasion. Wednesday and Thursday were dull, but Friday and Saturday were all right. American Beauty roses and violets were the leaders.

There was also a good demand for sweet peas, daffodils, daisies and forget-me-nots. In the carnation market white varieties dragged a little, but good Enchantress and the fancies in other colors cleaned up well. On the average, however, the prices on carnations have receded. This is mainly on account of the larger supply. The violet supply is much larger also, but the demand keeps pace so that there is as yet no surplus to complain of. Singles were the sufferers if anything. Sweet peas are now coming in in large quantity and have ceased to be a scarce item. In fact, there are almost too many of them. White lilac, gardenias, cattleyas and acacia are among the choicer items and all find

HOT WATER HEATING SIMPLIFIED.

As will be noted in our advertising pages, the American Auxiliary Heating Company is now prepared to supply the celebrated Castle Automatic Circulator, the simplest and most effectual device ever invented to overcome the sluggishness of hot water in greenhouse heating. The failure of water to circulate freely and quickly through the heating pipes is due to a variety of causes—improper piping being the most common—but, whatever the cause may be, the remedy is complete and rapid when this wonderful little appliance is set to work. Hot water is regarded by many experienced greenhouse men as superior to steam, but whatever its other objections may be, is quicker in its action than water unless the latter is aided by some propulsive power. The Automatic Circulator supplies that and now you can have all the well-known advantages of hot water and, by simply touching a button, at once get heat circulation as rapid and as thoroughly distributed as is possible with steam.

The Castle Automatic Circulator is not unknown to greenhouse men for it has been installed in many places of considerable extent and has made a good record wherever given a chance. The manufacturers have plenty of written testimony to this fact. They are issuing now a descriptive booklet telling what the Circulator will do and how it does it and we recommend that every one of our readers who is in any way interested in or dependent upon hot-water heating should apply to the American Auxiliary Heating Co., 6 Beacon street, Boston, for a copy.

GREENHOUSES BUILDING OR CONTEMPLATED.

Flower Market Reports

(Continued from page 263)

ready buyers. Mignonette has improved in quality and is now a factor of more importance, commanding quick sales at good figures. The spell of dark weather which we have had since the middle of December still continues—the worst in many years. American Beauty roses are among the scarcest things on the list. A few good specials coming in and that is about all worth speaking of. The medium and lower grade Beauties as usually seen are conspicuous by their absence.

St. Valentine's day was an exceptionally good business day for both retailer and wholesaler. All through the week the commission men had a splendid market in both business and consignment. There was plenty of stock and it seemed that all in the trade were busy at the same time. Roses are coming in better than for the past four weeks and price is down to \$8 per 100 for choice. Carnations, too, took a drop and \$2 is about the average price for the best. Violets were so plentiful all week that \$2 to \$2.50 per 1000 was asked for good Californias. Sweet peas also dropped to \$2 in 1000 lots for good stock. All bulbous stock is in plenty and down in price, averaging \$3 per 100 for the best

FIRE RECORD.

Hagerstown, Md.—The greenhouses of Frederick Happel were destroyed by fire the night of February 11th; loss about \$1500.

New York, N. Y.—The Fernery, 14 West 33rd street, Miss S. M. Tucker, proprietor, was damaged by fire, February 9th. The damage is covered by insurance.

Union City, Pa.—A barn and warehouse at the Union City Greenhouses, with contents, were destroyed by fire February 11th. One small greenhouse near the warehouse was also destroyed. The loss was about \$1500, insurance \$400.

What The Users Say—GET STARTED RIGHT

Your No. 14 boiler is heating my house 30 ft. wide x 200 ft. long, and I think it would take care of six houses the size of mine.

Have no trouble to keep up temperatures in coldest weather.

The boiler has given perfect satisfaction and more too, I never saw such a heater. This is the first boiler I ever owned and I am thankful I got the right kind in the start, for I know I will never have any other kind now. I do not know how you could improve on it, for it is a "Daisy."

I have put in your piping system according to our plans and also the Generator. Well, the Generator is the best thing anyone can have around a greenhouse or any other hot water system. It is the best thing I ever spent my money for, and I would not do without one now for five times the cost.

The Greenhouse Unusual

If the U-Bar had not have been unusual, Mr. George Eastman of Kodak fame, would not have made the greenhouses a direct part of his magnificent residence layout at Rochester, N. Y.

The usual greenhouse would not answer, it was too heavy looking, too un-attractive, too "hot housey."

But a greenhouse cannot win out solely on its appearance—it must be productive and must be durable. Just because of these things the U-Bar wins. Send for catalog.

99 Tons of coal last winter
73 Tons of coal this winter
26 Tons saved

Castle Automatic Circulators

saved over 25 per cent of the coal. A motor driven propeller in the return pipe did it. It not only saved coal, it heated quickly the greenhouses farthest away from the heater.

With the Castle Circulator, the right temperature is maintained day and night. One greenhouse man says, "I am not obliged to fire as early nor as much as before, and parts of the piping which were never heated previously are now well heated."

CARNATIONS

☞ **WHITE HOUSE**, The Quality White. Won the Silver Cup at Morristown for best undisseminated variety; Bronze Medal at Pittsburgh, and five other certificates. Absolutely non-bursting, clean and kind in growth, and a variety that will make good. We have 10,000 for March delivery and that is all we will be in a position to supply of this variety.

☞ **PRINCESS CHARMING**, the finest thing in sight in the Enchantress shade of pink. Every bud a perfect flower and your net returns per square foot will surprise you.

Our stock is limited but we are still in a position to supply first-class rooted cuttings of both these varieties at **\$12.00 per Hundred; \$100.00 per Thousand.**

CHRYSANTHEMUMS.—We catalogue over 500 varieties and surely we have the kind you want.

CHARLES H. TOTTY, Madison, N. J.

THE ROSE FOR YOU! Dark Pink Killarney

Deeper, brighter color than the original Killarney. Does not lose its color in winter. We shall plant 5000 ourselves and many large growers in New England have already placed orders for it. We are agents for the introducer, A. N. Pierson, Cromwell, Conn.

Grafted Plants, 2 1-4 in. Pots, \$20 per 100; \$180 per 1000

WASHINGTON

Dark Pink Sport of
ENCHANTRESS

DO not get this variety confused with the Lawson-Enchantress which we discarded some years ago. Washington-Enchantress differs from Rose Pink Enchantress as night from day. Washington is a sport from Enchantress with the best cerise or beautiful dark pink color—the Lawson shade—with stem, habit and productiveness same as Enchantress, and keeping qualities of the best. Stock is clean, healthy and well rooted. Guaranteed satisfactory in every respect.

\$10 per 100; \$20 per 250; \$75 per 1000 C. O. D.

In writing to Advertisers kindly mention Horticulture

Cactus Dahlias

Judging by the attitude of northern summer-resort society toward the dahlia the predominance in popular favor of the cactus class is evident. There is apparently no lack of admiration for the decorative, show, and single varieties. Nevertheless, their import is limited to out-

CACTUS DAHLIA VULKAN

door effects. The noble grace of the cactus form, aside from its ornamental value in the garden, gives it also supremacy as a cutflower. In consequence, we see the energy of a majority of leading growers directed to the improvement of this class as the foremost commercial dahlia of the future. The standard qualities called for at present consist of low and medium height and strong sturdy growth, requiring a minimum of support; early and free blooming; long erect stems to carry buds well above the foliage; singular flowers perfect in shape and resistant; medium and large sizes and clear shades and tints preferred.

How many of our old standard varieties possess all those qualities and if really here and there they do, how about their action under different climatic conditions?

Ruth Forbes has done splendidly in New England but is reported to behave badly in Pennsylvania and New Jersey. On the trial grounds of the German Dahlia Society in Frank-furt-on-the-Main last year this same variety was the source of general admiration. As another instance I mention Koenigin Luise, the best German pink variety. Here in Maine it comes fully up to what is expected of the ideal commercial type; in Boston the flowers show open center and in New York and Philadelphia the same variety is perhaps well-nigh worthless. Without at least a half a dozen trial grounds in different parts of our country, the American grower in most cases faces the necessity of finding out for himself what is best suited and from the commercial viewpoint, profitable for his location. According to my observation New England, and especially the northern part thereof, can safely accept British and German introductions at their face value. The difference in climatic conditions is so insignificant that we may reasonably expect the full development of the qualities ascribed to a novelty by its originators. A feature worth studying is the fact that, in illustrating star-debutantes abroad, the picture of the

typical plant is frequently given the preference. A cut of the single flower may be more beautiful, but it leaves us utterly at sea as to habit of growth and carriage of buds. For the northern summer resort early flowering is the paramount issue. We depend entirely on the July and August crops both for cut flower sale and garden effect. By the middle of September the social season is at its end and our market opportunities have vanished.

Of the new varieties tried last year Mauve Queen, one of the very best English introductions of recent date, proved highly satisfactory. The clear mauve-pink and perfect shape of its large flowers caused much favorable comment. Height four to five feet. Vulkan, recommended by German growers as one of the earliest orange scarlets, turned out a marvel in the production of flowers. From July until frost the plants remained literally covered with buds. Vulkan, if it acts in the middle states as here in the North, represents a true type of an ideal commercial cactus dahlia. In height scarcely exceeding four feet, it is a splendid variety for mass effects and its value as a cut flower cannot be questioned. Not less enthusiasm was created by Wolfgang von Goethe, a very large and free variety of rich apricot-red, with light carmine shadings. The extra large and perfect form of the substantial flowers, borne on long stiff stems drew attention at the first glance. The Goethe dahlia is without the least doubt bound to meet with the same public favor in this country as it has abroad. Average height 5 feet. In yellow I have tried Goldkind, a medium-sized early and free canary-colored variety of decided merit; and Goldland, a vivid primrose yellow of perfect form. Both, I believe, will soon be listed among our selected standards.

The whites were more or less disappointing. This increases the interest for Rheinkoenig, heralded on both sides of the Atlantic as the best pure white so far brought

CACTUS DAHLIA MAUVE QUEEN

out. We are in need of a perfect white cactus dahlia. For this reason let us hope that Mr. Dreer's representative is correct in announcing it to be the most desirable acquisition in dahlias offered in many years. As a rule the German trade paper correspondents are very dis-

criminative, but in regard to the excellent qualities of Rheinkoenig they have been unanimous. Rheinkoenig will be disseminated this coming season.

Northeast Harbor, Maine.

Fruit and Vegetables Under Glass

PEACHES AND NECTARINES

Early peaches and nectarines will now be swelling their fruit and if a good set has been obtained it will be necessary to thin out some of the weaker and deformed ones. If the set is light no good fruits need be removed at this stage. Take off any that may have had two pistils (a frequent occurrence) to the flower—which will look like two fruits joined. If these are left the chances are they will not finish, failing to stone altogether or having split stones. Two fruits resulting from flowers being on either side of one growth bud should not be left together, as there is not room for fruit to swell to a good size without deforming each other, even if the growth is strong enough to carry them. Fruit set on wood without a growth in front of it must not be relied on as these, in all probability, will drop through lack of sap.

Use care and judgment in thinning at this early stage. A few can always be taken off, where a "vis-a-vis" is impossible. Trees should always carry a double crop up to and through stoning period as this is a critical time, when many fruits may drop, apparently without a cause.

Disbudding of growth buds should be completed, leaving each shoot room to grow without over-crowding. Maintain a night temperature of 55 degrees to 58 degrees in mild weather, dropping a few degrees should the night be frosty. Give the usual advance by day. Syringe every bright morning and dampen around thoroughly when closing up. This should be done early enough to allow the temperature to run up to 70 degrees to 75 degrees which will cause a good sweat.

Later houses will now be coming into flower. Give as much air as possible up to noon. With the sun to bring the flowers to a fit state to receive the pollen, there is no difficulty to get a good set, but with such a sunless time as we had here in Jersey during the early part of February, it is no easy task. One good day is enough to get a set if it is at the right time, but when this is not forthcoming for weeks we find the only course is to turn on a little more heat and admit a crack of air during the morning hours, raising the temperature to 65 degrees by noon and going over the flowers in the usual way. There is no advantage in getting a few pipes hot; instead more pipes should be used, making a nice buoyant atmosphere. Even this is no guarantee; sunshine is the thing.

VINES IN FLOWER

What has been said in the preceding notes is applicable to vines in flower. Black Hamburgs are easy setters—a great point at this time of year. This, combined with its other qualities makes it what it is—the *best* for early work. Give a night temperature of 65 degrees to 70 degrees, raising with sun heat to 80 degrees to 85 degrees. Admit air enough to keep a dry atmosphere even though it is necessary to keep the pipes warm, but avoid draughts. Fertilize as soon as pollen can be seen on the stamens. Now that pot vines have fully expanded foliage, a sharp look-out must be maintained to keep the roots properly moist, for dryness at the root from now on spells disaster.

HOT BEDS

From now on, according to locality, hot beds can be

made and used to great advantage. Get good fresh horse manure, straw included, just as it is turned out of the stables and mix in clean oak leaves, using three parts of manure to two of leaves. This should be thrown together, turned, and mixed up once a day for a week or ten days, before placing in the sash. When filling in, tread down firmly and leave it for two or three days before covering with soil. The temperature can be gauged by pushing a sharp-pointed stick into the bed after making up and feeling with the hand as it is withdrawn.

The earliest and best vegetables are obtained when grown on a mild bottom heat as is afforded by such a hot bed. Hot water pipes have been employed to furnish this but are not so satisfactory, for, in spite of careful watching they are liable to get hot and consequently dry out anything above them. Heated pits or sash with a sufficiently thick wall or side are a great acquisition to any establishment where early vegetables are looked for; even where a vegetable house is at command, better results can be obtained along in the spring from a heated frame. Seedlings are near the glass all the time, lots of air can be admitted when weather permits and, as the season advances, sash can be lifted off altogether during the day. Should cold nights set in a little heat can be turned on to keep a good growing temperature. One 2-inch pipe run around the frame is all that is necessary. Where heat cannot be given material should be piled up around the sides and blankets used for covering over the sash.

Cauliflower, cabbage, lettuce, endive, etc., can be sown in drills or flats and planted out later on, or early sown-plants now in pots and flats can be planted at once. Beans, spinach, radishes, parsley, potatoes, etc., etc., can also be put in in the usual way and good crops obtained.

RHUBARB

This will now force easily if large pots, barrels or boxes are inverted over each root and sufficient fermenting material placed around them. This will warm the soil below and also the limited space above. A whole block can be forced on this way, by covering over a few each week.

ONIONS AND LEEKS

Onions and leeks will now be ready for a shift into fours. Use a well enriched soil, clean pots, and give good drainage. Keep near the glass if possible; this helps to keep the plants sturdy.

George H. Benson

Cropping Pear and Apple Trees

These trees are often weakened and ruined by over cropping while in the young stage. The soil and situation may be all that can be desired, but if the trees are not treated carefully when young, good results cannot be expected. Some varieties may need root-pruning to check rank growth and induce fruitfulness, but the early, free-bearing sorts often get crippled at the start. Sometimes fruit buds will form on the ends of the leading shoots and if allowed to bloom and produce fruit, cripple the trees and prevent any progress being made. These fruit buds should be removed at pruning time, also any that may be near the ends of the leading shoots as they, too, have a crippling tendency. Some people are naturally anxious to secure

fruit as soon as possible, but with the permanent welfare of the young trees in view, it is best to crop sparingly. With older established trees the case is different; when over-cropped they will usually take a rest, and they also have the power to recoup. Young, newly planted trees should go unpruned the first summer and have a liberal supply of water applied to the roots.

JOSEPH TILLSON.

Seasonable Notes on Culture of Florists' Stock

BEDDING PLANTS

The many species of bedding plants largely handled by the commercial growers are often overlooked until the last minute. Now is a good time to make memoranda of what and how many plants you may need. The propagation of such plants as *achyranthes*, *ageratum*, *alternantheras*, *coleus*, *geraniums*, *heliotrope*, German ivy, double *petunias*, *lobelia* Kathleen Mallard, double *alyssum*, *pyrethrum*, *vincas*, etc., should have attention. Sow seed of Marguerite carnation, bedding *begonias*, *celosias*, hybrid *impatiens*, *cosmos*, *candytuft*, *mignonette* in pots, sweet *alyssum*, *asters*, *stocks*, *snapdragons*, *salvias*, *verbenas*, *dianthus*, *ageratum*, *torenia*, *centaurea*, *Phlox Drummondii*, etc., so to have them in salable size when the time comes. As soon as seeds have germinated give them abundant light and air, and when they get well established keep as free a circulation of air through the house as possible without causing too sudden changes of temperature. Keep them free of aphids with fumigation and do not use any more water than is absolutely necessary on dull days.

BORONIAS

These fragrant plants are worthy of being more generally grown. As they go out of flower they should receive a repotting, using fibrous loam three parts, fibrous peat two parts, and enough sand to keep the soil porous, as this family does not do well in a too retentive soil. After potting place them in a night temperature of 50° and keep the walks and benches well sprinkled in bright weather. The house should be kept a little closer than usual for a few weeks, but when well established they should have plenty of air, as they are air-loving subjects. When the plants take freely to the new soil they should have the leading shoots pinched. When the summer comes they are better for a few months' exposure in the open air in some sheltered position until September. *Boronias* can be grown from cuttings taken during March and put in a compost of leaf mold, peat and sand, covered with glass and kept shaded from the sun.

ENGLISH IVY

Propagated at any time with ease. Plants that have become too old, bulky or bare can be cut up into pieces, put into the cool end of a propagating bed, kept sprinkled and guarded against sunshine and they will soon be in condition for potting. By the end of May they can be planted out about six inches apart.

FANCY-LEAVED CALADIUMS

These attractive decorative plants are increasing in demand. First, sort all the available tubers into sizes, keeping each size by themselves, planting each batch separately in a box. Put some moss in the bottom of box and then lay the tubers close to one another, as their stay in these boxes should be short. Place about three-quarters of an inch of moss over the tubers and then set in a frame over the pipes where a temperature of from 70° to 75° can be maintained. When they have made a nice lot of roots they should be potted into the smallest-sized pots that will hold the tubers and roots comfortably. Use a compost of two parts of leaf-mold with the other part in equal proportions of peat and sand. Until the roots have made some progress in growth, watering should be done very carefully. They should be placed where they will get full light, and a thin shade when the sun is powerful, with a moderate amount of ventilation on all favorable opportunity. During the latter part of spring and during the summer they will bear as much heat as most stove plants—from 70° to 78° by night with a day temperature of from 80° to 85°. Whenever they show signs of needing potting shift into larger pots. For these subsequent shifts give a compost of fibrous loam peat and leaf-mold in equal parts, with the addition of some well-rotted cow manure and sand. A rather humid atmosphere is absolutely essential, with a liberal supply of water when growing vigorously.

PANSIES

Pansies that have gone through the winter in frames should now claim special attention. The advantage of a nice day should be taken to give them a thorough cleaning up. Air should be freely admitted on all bright days, and later on the sashes should be opened wide or entirely removed on all fine sunny days so as to expose them fully to the invigorating air of early spring, but always try to maintain an even cool temperature as a high temperature diminishes the size of the flower. Give them a weekly application of liquid manure and see how wonderfully it will help the size of the flower. As the sun gets strong a partial shade at midday will help the texture of the bloom.

PLANTS FOR VASES, BOXES AND BASKETS

Many growers who have these receptacles to fill have only a vague idea as to the amount of stock required. Now is a good time to sum up and either propagate, sow seed, or buy later on what is needed. If plants are required for a shady situation, the following selection is good: *Fuchsias*, *begonias*, *Cyperus alternifolius*, *Ficus elastica*, *aspidistras*, *Farfugium grande*, *selaginellas* and ferns. For centers use *Phoenix rupicola*, *Latania Borbonica*, *Areca lutescens* and *cordylines*. For trailing plants use German ivy, *tradescantias*, *Kenilworth ivy*, and *Asparagus Sprengeri*. Where they will be exposed to the sun the following are very satisfactory: *Geraniums*, *coleus*, *ageratums*, *acalyphas*, *petunias*, dwarf *nasturtiums*, *crotons*, *achyranthes*, *Abutilon vexillarium*, *Grevillea robusta* and *salvias*. For centers use *Dracæna indivisa* or other grassy-leaved species of the *cordyline*. For trailers there is nothing better than *Vinca major*, German ivy, and ivy-leaved *geraniums*. There is lots of material from which to choose, among greenhouse plants and even annuals of many kinds.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: Bulbs; Care of Young Rose Stock; *Dieffenbachias*; *Spiræas*; Sweet Peas; *Vandas*.

The show outlook

The big event of the year—the National Flower Show—is now very close upon us. The well-sustained winter conditions of the past three months leads us to hope for an early spring and favorable weather for the last week of March, which will be greatly appreciated by exhibitors and visitors, should it so transpire. The managers and committees in the various departments have been very active of late and all local details appear to be well in hand. Evidence accumulates daily as to the unprecedented influx of horticulturists from every section of the country which is now assured for the great Boston event.

An abomination

We are pleased to see some of the daily papers taking up a crusade against the artificially colored flowers that have been more or less in evidence in some flower stores, and in demand by a certain class of trade of late. The idea of chemically treated flowers is simply monstrous and repulsive to any person of refined taste, and the florist who displays them as a feature of his business, while he may find some customers for the unnatural stuff, will, we believe, ultimately suffer an equal or greater loss in the estimation of sensible people who feel that nature has some graces beyond the power of art to improve. The dealer in paints and dyes has his uses but he should not tamper with natural flowers.

Trade advertising

Under present day trade methods and conditions trade paper advertising is recognized by all sagacious business men as an unrivalled and indispensable expedient in business building. In the columns of this paper will be found scores of firms—well known in their special lines from one end of the country to the other—whose prosperous career is due directly to their liberality and progressiveness in trade advertising, backed up, of course, by honorable dealing. The man who is stingy in advertising may acquire desired publicity through other means, but it will cost him far more and the good advertiser is certain to out distance him. The dealer who grudgingly draws forth his wallet for the price of an inch or two of advertising and then gets discouraged because the response is meagre is on the wrong tack. Persistency is one of the cardinal points in profitable advertising.

Obituary.

Robert Rodden.

Robert Rodden, who for the past 14 years has carried on the business of a florist at Newton Centre, Mass., died on Saturday, Feb'y 18, from a kidney trouble, after a very brief illness. Mr. Rodden's father was a well-known gardener on some of the famous English and Scottish estates, and the subject of this sketch came to this country about 44 years ago, locating at St. Albans, Vermont. After a few years' residence there he went to Dedham, to take charge of the estate of General S. M. Weld, and later was in charge of the gardens of Colonel Henry Lee of Brookline. He came to Newton Centre about 14 years ago, and erected hot-houses for carrying on a general florist's business, which has proved eminently successful.

Mr. Rodden was of a plain, bluff, honest, sturdy personality, the soul of honor and integrity, and he made hosts of friends with all classes, without any apparent effort on his part to do so. He will be greatly missed by all classes in the community, and by none more than the lovers of flowers who always counted on Mr. Rodden for advice and assistance. He married at St. Albans about 37 years ago Miss Eleanor N. Kyle, who has been a most loving, devoted and efficient helpmate in all his labors. She, with a daughter, Frances M. (Mrs. John McCullough), and three sons, Robert K., who made his home with his parents, Samuel L. of Chicago, Illinois, and Herbert T., at present in South Dakota, are left. The business will be carried on by his widow, with her son, Robert K., as manager.

John H. Taylor.

John H. Taylor, well-known for many years as a leading rose grower, at Bayside, New York, for the New York flower market, died suddenly at the Hotel Martinique, New York City, Saturday, February 25. Mr. Taylor had returned from a winter sojourn in Europe on Thursday in excellent health and his death is attributed to blood poisoning from a cut accidentally inflicted by the barber on board the steamship while shaving him.

Mr. Taylor was born in New York on August 28, 1857. He studied in Europe while a boy and on his return entered Harvard, where he was graduated in 1881. After several years abroad he became manager for his father in the Oakland Nurseries at Bayside and after his father's death he purchased the estate from the heirs. He retired recently from active management of the establishment, having sold part of the estate to the Oakland Golf Club and incorporated the rest of the property in the Draper Realty Company in which he was a stockholder. Together with Mrs. Taylor he has been spending some months in Switzerland and, as the readers of HORTICULTURE know, has sent some very interesting letters to this paper on horticultural topics, which we have published from time to time, the last one appearing in our issue of

ROSE PRINCE DE BULGARIE.

This is one of A. N. Pierson's novelty leaders this season. It is a Pernet-Ducher production and has been

on the American market under the erroneous name of Mrs. Taft for some years. Color shell-pink, very luminous and greatly admired.

February 11. With this communication came a letter expressing pleasure at the prospect of returning and once more meeting his old friends in New York. Poor fellow, his hopes were not to be realized.

We find it hard to express in words the sorrow and sense of loneliness

tality knew no bounds and all the comforts and luxuries of his magnificent estate were at the disposal of his guests, of whom he never could have too many and to whom he endeared himself by his gentlemanly manners and sunny disposition.

He leaves a widow, one son and one daughter. The funeral took place on Monday, February 27.

JOHN H. TAYLOR

caused by the announcement of the passing away of a friend so long known and sincerely loved. His was a rare personality. His affection for flowers for their own sake was consistently followed up by an equal affection for those connected with the flower business. The humblest representative of the craft always received at the hands of John H. Taylor the same welcome that the most distinguished visitors at his mansion enjoyed. His hospi-

THE VISIT TO RIVERTON.

Among the Philadelphians who will be at the Dreer celebration are the following:

CLUBS AND SOCIETIES

AMERICAN ROSE SOCIETY.

The program for the Boston meeting is as follows:

March 27, 2.30 p. m. General Business Meeting. It is planned to have August F. Poehlmann and Wallace R. Pierson present papers at this session.

Tuesday a. m., March 28. Election of officers and a general discussion on New Roses.

Tuesday, 2.30 p. m. A meeting designated by President Elliott—the Amateur's Meeting. Papers by Richard Vincent, Jr., of White Marsh, Md., on what he saw in Belgium; Rev. Dr. Spencer S. Sulliger of Vancouver, Wash., on his visit to the National Rose Show in London, England; William C. McKendrick, the man whose aim is to make Toronto beautiful; an amateur rose grower.

A. N. Pierson, Inc., files the following-described new roses for registration:

Double White Killarney—A sport of White Killarney, originating with The J. A. Budlong & Sons Co., Auburn, R. I., in January, 1910. It is stronger in growth than the parent, with the same general characteristics of foliage and growth. The flower is pure white, with an average of from forty to forty-five petals. It is a wonderful improvement over the parent, having size and substance in summer, when White Killarney is comparatively single. The variety will be disseminated by A. N. Pierson, Inc., in 1912.

Killarney Queen. A deep pink sport of Killarney, originating with The J. A. Budlong & Sons' Co., Auburn, R. I., in 1909. Has the high color of Dark Pink Killarney with an increased vigor in growth. It compares among Killarneys as American Beauty does with other varieties, the stem and foliage being much heavier and the petals nearly twice the size of the petals of Killarney. The variety will be disseminated by A. N. Pierson, Inc., in 1912.

BENJAMIN HAMMOND, Sec'y.

Fishkill-on-Hudson, N. Y.

Feb. 27, 1911.

HORTICULTURAL SOCIETY OF NEW YORK.

An exhibition of plants and flowers will be held at the American Museum of Natural History, New York, in West Assembly Hall, on Wednesday, March 8th, from 1 to 5. A welcome is extended to all who may wish to exhibit, whether members of the society or not. It is desired to make these monthly exhibitions informal, so that plant-lovers may feel at home, both those who exhibit and those who come to see. Schedules of classes and premiums are now ready for distribution, and will be sent on application to the secretary, George V. Nash, New York Botanical Garden, Bronx Park, N. Y. City. The following prizes are offered:

Carnations, Open to All. Best vase, Silver Medal.

For Non-Commercial Growers. 3 vases, 3 kinds, 12 flowers of each, first \$5.00, second \$3.00; 12 Scarlet, 12 Windsor Shade, 12 Enchantress Shade, 12 Crimson, 12 Lawson Shade, 12 Variegated, 12 White; first \$2.00, second \$1.00. In each class.

Vase of 50 blooms, arranged for effect of other foliage permitted, exhibitor may supply vase, first \$4.00, second \$2.00. Monthly means, for Non-Commercial.

Growers—10 plants of Cyclamen, first \$10.00, second \$5.00; 5 do, first \$5.00, second \$3.00; 1 do, first \$3.00; 3 Chinese Primulas, first \$2.00, second \$1.00; 3 Cinerarias, first \$3.00, second \$2.00; 3 pots of Freesias, first \$3.00, second \$2.00.

The fall exhibition of this society will be held at the American Museum of Natural History from November 3 to 7, inclusive. This early notice is given that local societies, the members of which may desire to participate in this large exhibition, may select for their own exhibitions dates that will not conflict with the above.

A schedule for this exhibition is now being prepared, and as soon as ready it will be published.

GEORGE V. NASH, Sec.

NEWPORT HORTICULTURAL SOCIETY.

An important meeting of this society was held Feb. 28, when a paper was read on the history and culture of mushrooms, by William Grey, who has been having grand success lately in growing them. Andrew Dorward also read a very interesting paper, the substance of which was that gardeners in charge of estates should devote more time to the study of landscape work and the harmonious arrangement of plants and flowers. This brought out a lively discussion on the matter, most of the speakers agreeing with Mr. Dorward's views, but others pointed out that as the duties of the average private gardener are so various he cannot make a special study of any one without being a failure in others. The meeting was made memorable by the presence of Vice-president William Mackay, who was there to say good bye to the members before his leaving the city, he having resigned his position as head gardener for E. T. Gerry and in summing up the remarks in connection with his leaving, he is a thorough gardener and a perfect gentleman, a fact that was further proved on the night previous by a delegation of the gardeners headed by President A. S. Meikle making a surprise visit to Mr. and Mrs. Mackay and presenting each with a beautiful umbrella, suitably inscribed. A pleasant hour followed with songs in the cigar smoke. I. R.

PENNSYLVANIA HORTICULTURAL SOCIETY.

The regular monthly meeting was held on the 21st inst. Routine business mostly—of little interest to outside public. The next meeting happening on the first day of the Spring Show, it has been arranged to postpone this until the next day (Wednesday) when a lecture will be given in the afternoon by Dr. Ida A. Keller and a lecture by Dr. Skinner in the evening. Dr. Skinner's lecture will be illustrated by stereopticon. Mrs. Geo. Redford presented the society with a portrait of her father, the late Robert Buist, Sr., who took a great interest in the organization during his lifetime. The first prize for *Cineraria hybrida* was awarded to Samuel Batcheler, and the first for *Primula sinensis alba* went to Fred Huggler, gardener to Mrs. George Vaux. The latter were remarkably fine plants—about as fine as anything seen here in recent years.

AMERICAN CARNATION SOCIETY.

William Kleinheinz, Ogontz, Pa., registers new Carnations Miss Dimple Widener (Mrs. Thos. W. Lawson X Lady Bountiful), scarlet; size, 3½ inches; clean grower, and very free bloomer; long, stiff stems and free from disease; never splits and every flower comes perfect.

Members of the American Carnation Society will please bear in mind that all entries for the Boston show should be in the hands of Secretary A. F. J. Baur, Indianapolis, Ind., by March 18th. \$2.00 will be charged for each entry made after that date. Only members of the A. C. S. are eligible to compete in the general carnation classes, excepting section G.

If you are not a member now, send in your application either now or with your entries, including \$3.00 to cover the first year's dues and entrance fee. The fact that you are not a member now need not prevent you from competing at the show, but you must become a member before your entries will be accepted. Send for a premium list. Copies have been mailed to all the members.

Members may now secure A. C. S. buttons. The price of these is 75 cents each. A very wide distribution of these is desired. When you send in your dues, just include 75 cents extra for a button. Why not send your dues to the secretary now, to save him some work at the convention?

In section H, class 51, the donors request that the requirement of 5 in. in size be omitted. The \$25.00 gold medal, or \$25.00 in gold will be awarded to the twelve largest blooms, one or more varieties, regardless of size. Make a note of this.

A. F. J. BAUR, Sec'y.

MASSACHUSETTS FRUIT GROWERS' ASSOCIATION.

The annual meeting will be held at Horticultural Hall, Worcester, Mass., on Wednesday and Thursday, March 8th and 9th, 1911.

The speakers comprise: Director W. P. Brooks of Mass. Experiment Station, Results of Orchard Fertilizing; stereopticon lecture by Dr. H. T. Fernald, Insect Pests and Their Control; Prof. F. C. Sears, Observations on Pacific Coast Methods; Charles E. Lyman, Conn., Future of Peach Growing in N. E.; J. H. Putnam, Conn., Culture of Small Fruits; Prof. B. S. Pickett, N. H., Starting the Apple Orchard; E. B. Parker, N. H., Method of Raising Peaches in N. H.; a paper by Prof. W. M. Scott, Washington, D. C., on Summer Lime-Sulphur will be read; W. A. Munson, Littleton, Treatment of the Prize Apple Acre, and A. J. Norman of the Extension Department Demonstration Orchards.

All those interested in fruit growing are cordially invited to attend the meeting and become members by the payment of \$1.00 a year.

F. HOWARD BROWN, Sec.

Marlboro, Mass.

The 22nd assessment of the Florists' Hall Association will be levied on April 1st, 1911. Members will be duly notified.

NATIONAL FLOWER SHOW.

Arrangements are well under way for the National Flower Show to be held in Boston from March 25th to April 1st. The space both for competitive and trade exhibits is being rapidly taken. The final schedules have been printed and sent to all the members of the different societies under whose auspices the exposition is held. Manager Chester I. Campbell, whose picture appears in this issue, has had designed one of the most attractive art advertising cards for the

CHESTER I. CAMPBELL

exposition ever seen and these will shortly be sent to all the larger cities in the country. An advertising seal or sticker for stationery has also been arranged for and they, too, will be sent to all the exhibitors and members of the Societies.

Manager Campbell has had long experience in the exposition business and realizes fully the importance of such advertising. Among the many expositions which he has charge of are numbered the Boston Automobile Show, which has the reputation of being the largest in the world, the National Motor Boat and Engine Show, the Style Show, Office Appliance, Textile Machinery, Electric, Exhibition of Aerial Craft, and he will also guide the destinies of the great Boston Chamber of Commerce Industrial and Educational Exhibition which will be held in October.

Every mail is now bringing in appli-

cations for space from those who intend making what may be classed as Show exhibits. A number of Boston florists, while not entering in the competitive classes, intend offering novelties in artistic decorative effects and it may safely be predicted this Exposition will long be remembered as portraying the acme of floriculture in America.

BRITISH VISITORS.

The itinerary of the British party which is to visit America this month under conduct of J. S. Brunton, is as follows: S. S. Mauretania from Liverpool; March 11, New York and Philadelphia; March 17-19, White Marsh, Md.; March 20, Washington; March 21, 22, Richmond, Ind.; March 24-26, Chicago; March 27, Niagara Falls; March 28-31, Boston; April 1-5, New York. The party now numbers fifteen or more.

FLORISTS' CLUB OF WASHINGTON.

The Florists' Club of Washington will hold its annual election of officers on March 7. The club has been invited to join with the Philadelphia, Baltimore and New York Clubs in an excursion on March 8 to visit the new greenhouses of Henry A. Dreer, Inc., at Riverview, N. J., a special train being scheduled to leave Philadelphia on that date to accommodate those who intend taking part in the excursion.

F. J. DYER.

A new monthly publication has been started under the title of Nebraska Horticulture, the first number appearing Monday the 13th of February. This publication will take the place of the bulletins which the Nebraska Horticultural Society formerly issued. The secretary of the society, C. G. Marshall, is the editor. Subscription price is \$1.00 a year.

MID-WINTER SHOW AT BOSTON.

The large exhibition hall of Massachusetts Horticultural Society was nicely filled with a brilliant array of spring-flowering bulbs and blooming plants on February 24, 25 and 26. The number of entries was not as large as expected but the quality was high and the abundant space available for each group was a decided advantage in the way of general effect. In the bulbous classes Wm. Whitman, gard. Martin Sullivan Mrs. J. L. Gardner, gard. Wm. Thatcher and A. N. Preston, gard. J. L. Smith, a new contributor from Swampscott, made the most imposing displays.

On flowering plants the groups were very attractive, especially the *Primula obconica*, cyclamens, acacias and ericas. The obconicas shown by Winthrop Ames, gard. D. Whyte, were from Farquhar's seed and unquestionably the best ever seen here in clearness and variety of color, size of flower, etc., many of the blooms measuring $1\frac{1}{4}$ in. across. *Primula Kewensis* was shown in quantity and was very effective. Among the cyclamens the Giant Salmon and Papilio flowered attracted especial attention. In the cineraria group from Mrs. J. L. Gardner, the new cactus-flowered variety excited admiration. Mrs. Frank Ayer, gard. George Page was the principal exhibitor of ericas and acacias, the large group being exceedingly creditable. A cultural silver medal was worthily awarded to N. P. Harvey for a monster specimen of *Cymbidium Tracyanum* bearing fifteen large spikes of flowers.

In the cut flower section were a collection of 75 blooms showing a great variety of types of *Cattleya Trianae* from W. A. Manda, a table of violets and sweet peas of high quality from Wm. Sim and a vase of handsome Richmond roses from Eber Holmes, Montrose Greenhouses, which received a bronze medal. Following is the list of awards:

Primula Kewensis, six plants: 1st, Winthrop Ames; 2d, Mrs. Frederick Ayer; 3d, Winthrop Ames. *Primula stellata*: 2d, Mrs. J. L. Gardner. *Primula obconica* varieties: 1st, Winthrop Ames; 2d, Winthrop Ames; 3d, Mrs. J. L. Gardner. Cyclamens, twelve plants (commercial growers excluded): 1st, William Whitman; 2d, Mrs. J. L. Gardner; 3d, Mrs. Frederick Ayer. Six plants: 2d, Mrs. Frederick Ayer. Hyacinths, six pans: 1st, William Whitman; 2d, Mrs. J. L. Gardner. Single pan: 1st, Mrs. J. L. Gardner; 2d, Mrs. J. L. Gardner. Early tulips, six pans: 1st, William Whitman. Three pans: 1st, William Whitman. Narcissuses, collection of large trumpet varieties: 1st, William Whitman; 2d, William Whitman. Collection of short trumpet varieties: 1st, William Whitman; 2d, Mrs. J. L. Gardner. General display of spring bulbous plants, arranged with foliage plants: 1st, William Whitman; 2d, William Whitman. Forced bulbs (for amateurs only), six pans: 1st, Margaret A. Rand; 2d, Margaret A. Rand; 3d, Henry L. Bond. Orchids, specimen plant: 1st, Dr. C. G. Weld with *Dendrobium polle Virginale*; 2d, J. T. Butterworth with *C. Trianae*.

First Class Certificate of Merit: E. B. Dane, *Cypripedium Venus* (C. insignis Sanderae x C. niveum); E. B. Dane, *Cypripedium Mauchii* v. *marginatum*.

Cultural Certificate: George Page, specimen plant of *Erica melanthra*. Honorable Mention: E. B. Dane, display of cypripediums.

A ST. LOUIS DEAL.

As announced in our last week's issue, J. F. Ammann of Edwardsville, Ill., is arranging to turn his greenhouse plant over to three of his old and trusted employes, namely, J. H. Buchsenschutz, Edward Buchsenschutz and LeRoy Smith, who expect in the near future to incorporate what will be known as the J. F. Ammann Company. The first named has been in the employ of Mr. Ammann for sixteen years, the last ten of which he has had entire charge of the greenhouses as foreman. LeRoy Smith has had charge of the rose section and has also been with Mr. Ammann for over ten years. Edw. Buchsenschutz has spent eight years on the place and during the latter part has had charge of the carnations. They are all young men of good habits and full of energy and bid fair not only to keep up the good reputation of this well-known establishment but to add to and improve it. The company will

J. F. AMMANN

be incorporated for \$6,000, stock fully paid up and will take over all the stock and equipment about July 1, and in time purchase the entire plant, including greenhouses and five acres of land on which they will hold an option for the present. Mr. Ammann expects to hold a few shares of stock in the new company for a while in order to get the boys well started.

Mr. Ammann has been connected with the florists' business for over 25 years and the present plant consists of 40,000 feet of modern greenhouses, boiler equipment, packing and storage rooms and office. Mr. Ammann will devote most of his time to his retail stores at Alton and East St. Louis.

He is a life member of the S. A. F., and of the Illinois State Florists' Association, of which he was also its first president and is now secretary, member of the American Rose Society, American Carnation Society and is ex-president of the St. Louis Florist Club, also director of the Florists' Hall Association and now serving as president of the local Commercial Club.

FUNGINE

The Newly Discovered Fungicide

An Invaluable Remedy for Mildew, Rust and other Fungus Diseases

IT ERADICATES RUST.

"BLANTYRE" GARDENS.

Thomas Proctor, Supt.

Aphine Manufacturing Company, Madison, N. J.

Lenox, Mass., Feb. 24, 1911.

Dear Sirs:—Replying to your letter of the 21st, in which you request me to advise you as to the results of my trials with your Fungine, I have not had an opportunity of testing its merits on mildew, but, I can, however, unqualifiedly recommend it as being a very effective remedy for Carnation Rust. I bought in some new carnations sometime ago—that were in a bad state with Rust on their arrival—their leaves were completely covered, and after two applications, at proportions of one part Fungine to forty parts water, I found it had the desired effect. For this reason I gladly endorse it.

Yours very truly,

THOMAS PROCTOR.

IT DESTROYS MILDEW.

Farmington, Conn., Feb. 23, 1911.

Aphine Manufacturing Company, Madison, N. J.

Dear Sirs:—In reply to yours of the 21st inst. I would say that my experience with Fungine for mildew has been very satisfactory. I think it is much better and easier than the old way of dusting the plants and painting steam pipes.

The first time I used it I was rather disappointed as it turned the wood-work in the houses, wherever the spray hit it, a dirty yellow, but this all disappeared in a few days.

I have not tried it for rust, but cannot see why Fungine is not going to be to the florists and gardeners what the lime and sulphur wash is to the pomologists.

For black, green and white fly, mealy bug and thrip I have not used anything this season but Aphine. The greenhouses have not been fumigated and plants are in a fine healthy condition.

Yours respectfully,

WARRAN S. MASON, Grd. to A. A. Pope.

IT CURES ROOT ROT.

ZIEGER & SONS

Growers of Decorative Greens and Flowers

Palms Ferns Novelties

Germantown, Philadelphia, Pa., February 23d, 1911.

Aphine Manufacturing Company, Madison, N. J.

Gentlemen:—Concerning the Fungine: we may say that we have not had much occasion to use it, however, we had one delightful experience with it. We had quite a few thousand chrysanthemum cuttings inserted in old sand which had been left in one of our cold houses. As our propagator is accustomed to do, he saturated the sand and kept the cuttings very wet, which caused rot and fungus. The writer noticing this apparent loss went to the Fungine purchased from you. We used it one part to twenty-five parts water and sprayed the entire lot of dampened and partly rotted cuttings, thinking that these cuttings (of which there were several thousand) might as well die one way as another, but to our great surprise, these cuttings after the single application, a thorough one at that, turned to a light green color and seemed to extract the fungus which sort of foamed up and separated from the decay (similar to peroxide on a healing wound).

Now these cuttings at this writing have nearly all made good healthy roots, although a few cuttings rotted in the sand but made roots above the decayed part, which seems remarkable to us. It is not necessary to say that for this experience alone we are highly pleased with the results obtained with Fungine used as above, which is far more than we had ever expected.

We beg to take the liberty to state that Aphine does all it is recommended to do in a very satisfactory manner.

Yours very truly,

ZIEGER & SONS.

Ernest J. F. Zieger, Sec'y.

KNOWN AND USED THE WORLD OVER.

Entebbe, UGANDA (Central Africa), Jan. 16, 1911.

Sirs: Kindly supply me with sufficient Aphine to ensure a fair trial. I should be glad to experiment with this insecticide.

W. GOWDEY, Government Entomologist.

Fritz Bahr says in his article on Lilies in the Florists Exchange of February 18th, 1911:

"We have given our lilies a weak dose of Aphine once a week since they have occupied space on top of the bench, and thus far we haven't noticed even a trace of the pests; that ought to prove that greenflies are not very fond of the stuff, for if there's anything they do like, it is to get into tops of the lilies and it takes an awful lot of coaxing to get them out."

APHINE, \$2.50 per gal., \$1.00 per qt.

IMPORTANT ROSES

We are offering to commercial rose growers, who are alive to the possibilities of increasing their profits, stock of the best there is in the new varieties. These roses represent the nearest to the ideal that exists in roses today and the quality of stock sent out by us is above question.

DARK PINK KILLARNEY. With a Killarney habit and a color that can be equalled only by the lobe of a Cattleya, it sells on sight.

DOUBLE PINK KILLARNEY. Stronger in growth than the parent and with a large, perfect flower, it stands alone in its class as the representative of the highest type of forcing roses.

PRINCE DE BULGARIE. As a twelve months rose this variety is good, while for a spring, summer and fall bloomer it has

no equal in its color. And in its color, there is the character that is called life. It is hard to describe the color. "Rosy flesh" is near, but it does not describe the impression the color makes. For a money-getter the rose has been a wonder.

LADY CROMWELL, MELODY, MRS. AARON WARD, RADIANCE and the older varieties are described in our catalogue.

IMPORTED DENDROBIUMS

We are now receiving our usual importations of Dendrobiums, and can offer the following in excellent value. Many of these plants with early cultivation and careful storing can be had in flower at periods extending from Xmas on the one hand to the end of May on the other.

Dendrobium Wardianum Lowianum—The true large-flowering type.

Crassinode—Specially fine plants of this lovely and distinct variety. Very useful for basket work.

Nobile—From district where specially fine forms have been received.

Dalhousianum—This noble species has seldom been imported in such condition.

Jamesianum—Pearly white large-flowering variety, lasting long in flower.

Chrysotoxum, Fimbriatum, Clavatum—Three of the most lovely free flowering yellow varieties.

Devonianum—Very free and beautiful fringed-lip variety, delicately scented.

FINE FERNS

Ready For Immediate Retail Sale

We have an exceptionally fine and large stock of ferns in the following varieties,—first-class plants of exceedingly good value—plants that will please the most critical buyers, both in regard to quality and value.

NEPHROLEPIS ELEGANTISSIMA (Improved). The finest of this type—never showing a Boston frond; has not reverted in the last four years. Fine plants, 6-in., \$6.00 per dozen; 8-in., \$12.00 per dozen; large specimens in 12-in. pans, \$3.00 to \$5.00 each.

NEPHROLEPIS ELEGANTISSIMA COMPACTA. This bears the same relation to elegantissima compacta that Scottii does to Bostoniensis. It is a dwarf, compact plant, especially fine in the small sizes. Fine plants, 6-in., \$6.00 per dozen.

NEPHROLEPIS SCHOLZELI. Fine plants, 3½-in. pots, \$2.50 per dozen; 6-in. pans, \$6.00 per dozen; 8-in. pans, \$12.00 per dozen.

NEPHROLEPIS BOSTONIENSIS. Extra strong plants, 8-in. pans, \$12.00 per dozen.

NEPHROLEPIS SCOTTII. 8-in. pans, \$12.00 per dozen.

SMALL FERNS FOR FERN PANS. Best and hardiest varieties assorted: Pteris Mayli, Wimsetti, Adiantoides, Aspidium Tsussimense, Crytomium falcatum, etc. Strong plants, 2½-in. pots, \$3.50 per 100.

CROTONS. Nice assortment, well colored, 5-inch, \$8.00 per dozen.

F. R. PIERSON CO., Tarrytown-on-Hudson, New York

CINERARIA HYBRIDA

Remember this is the

BEST PAYER FOR EASTER.

We offer our superior strain in 4 in. pots (medium height), latest improvement in size and color, \$10.00 per 100. Now is the proper time to plant them into 5½ and 6 in. pots for Easter blooming.

Special prices to seedsmen. Contracts taken for 1911.

HERBERT & FLEISHAUER, Aster Specialist, McMinnville, Oregon

¶ He was so stingy that he used the mole on the back of his neck to save a collar-button.

His soul cry was price, price, price. He held the cent so close to his eye that he couldn't see the dollar behind it. So he bought the cheapest lily bulbs in the market. Now he has the most constipated looking lot of lilies you ever saw in you life. He blames the bulbs of course and he is right, but he has forgotten what he paid.

¶ He can cuss now until he gets ankylosis of the jaw-bone and it won't help matters a bit. He got just what he paid for and he's it.

¶ It is better to buy Horseshoe Brand Giganteum than to wish you had. They are the best marketed that we know of and have averaged the best returns of any brand in the world.

Not How Cheap
But How Good

Good Storage Bulbs ready for shipment now or anytime during 1911. Order Now.

Seed Trade

The Pea Shortage.

We are reliably informed that most of the principal pea and bean growers have contracted to their limit on peas and are now compelled to refuse further orders on many of the leading varieties. This applies both to canners' peas as well as the garden varieties and those used by market gardeners. This is an unusual situation for thus early in the year, but from information we had early, we predicted this very condition. Those who are proverbially the last to get on the band wagon, may find it crowded this year, and they may not secure a foothold. In other words, those tardy buyers who are never ready to place their orders until very late in the season, may find difficulty in getting their requirements accepted.

Europe will not be able this year to ease the situation as much as formerly, as we learn that most of the European growers of peas are either already booked up or refuse to contract for future delivery unless the price is left open until harvest. This plan will not prove very satisfactory on this side of the water and those European growers who insist on following this plan, may not secure many contracts, but may be able to offer their crop after harvest, and should there be a good crop this year, they may be sorry they did not follow the usual course instead of introducing revolutionary schemes.

The Bean Situation.

Beans are much easier than peas and, in short, many seedsmen will carry over some varieties, notably Black Valentines. We have already commented on the fact that this variety seems to be very abundant this year, whereas every previous year since its introduction, it has been in very short supply and held at a high premium over most other sorts. This year the conditions are quite reversed, as nearly every seedsman ordered largely in excess of actual requirements to secure enough. A number of them will doubtless carry sufficient over to nearly or quite meet their needs for another year. We presume that the growers will be willing to accept contract orders on beans as late as they are offered this season.

Sugar Corn Deliveries.

We learn that deliveries of sugar corn are very late this year, and that growers are finding it difficult to cure the corn sufficiently to make it safe to shell and bag same. Nearly all are delivering short, one or two of the larger growers under 50 per cent., while others range from 50 to 75 and 80 per cent. The late varieties are undoubtedly proportionately shorter than the earlier, but nearly all are on the short side. It has been stated that the germination of sugar corn will be rather low this year, many lots we are informed, hardly testing 70 per cent. This of course will cause considerable dissatisfaction from seedsmen and canners, but the growers are in no wise in fault, and wherever the blame rests, it is not on them.

Hotel Extortion.

One of the aftermaths of the recent Canners' Convention has been a large number of complaints of over charges by the Milwaukee hotels. To the average disinterested person, the habit of many hotel men of extorting the last farthing they can from guests during such a time as a large convention, is very short-sighted and is usually followed by that particular convention not caring to visit that particular town again for a long time. Hotel people are not in business for a day, but to stay for many years and it would seem to be the part of wisdom as well as justice to deal liberally and fairly with persons who book with them during crowded periods.

The Rochester hotel men are on record in the signed agreement, not to advance their rates to the canners if they decide to hold their convention there next year, and from what we know of the Rochester hotel men, they will live strictly up to their agreement.

About Onion Sets.

The bottom seems to have dropped out of the onion set market and dealers are now offering good samples at prices less than the first cost of production, and it looks as if they were competing as to who should be the first to give them away. Here is one instance where late buyers have it on the early birds, but such instances are rare, and only prove the rule that the early buyer buys the best in the majority of instances.

Great Retail Trade in Prospect.

All indications point to an early spring and this will doubtless bring on a great rush to the retail seedsmen. This is what they are all eagerly looking for, however, and if they can get stocks sufficient to carry them through the season, they will have cause to be grateful, and doubtless will be able to look back upon it as one of the best in the history of the trade.

Crop Conditions Promising.

Crop prospects both in this country and Europe seem to be much better than a year ago. There are a few complaints to be noted from California, but this is nothing unusual and does not mean anything more than the annual wail of the peach growers of Delaware and Maryland. There have been some complaints from Europe, but generally speaking, conditions are far more satisfactory than a year ago, and certainly there are many empty bins to be filled and most seedsmen are hoping for good crops the coming season, as reserves of most of the standard seeds are at the lowest point in many years, while many items are wholly cleaned up. Good crops the coming season will be welcomed by the dealers no less than by the producers.

Notes.

Hamilton, Ill.—J. I. Heisler is now in the seed business, his place being known as the Little Giant Seed Store.

Mail order trade we understand, has improved very much in the past few weeks and all large mail houses are now working nights to keep up with

their orders; in fact, night work has commenced in many establishments who do not make a specialty of mail orders, which is the indication of a very active season.

The Canadian Seed Growers' Association closed its convention at Ottawa on February 17. The old board of officers was re-elected.

We have not definitely learned where the next Seedsmen's Convention is to be held and no change in the situation has occurred so far as we know. As to the next Canners' Convention, it will undoubtedly go to Rochester as previously stated in these columns, unless some conditions now unlooked for, arise in the meantime.

The Indianapolis, Ind. Star under date of Feb. 18th, 1911 says, "Representative Korbly is about to repeat his seed act of last year, this time franking two car loads of free seeds to Indianapolis. But what became of the eighty sackfuls mailed last year? Did anybody plant any, or did any of them grow if planted, or were they fed to the chickens?"

AN INTERESTING SUGGESTION.

Jiro Ohtsuyama, a Japanese gardener, writes that the Chemical Fertilizer Co. of Boston has recently made an important discovery regarding tubers, which, at this season, will be of special interest to planters.

"Some time ago one of our gardeners noticed that the fibrous roots of a turnip grew in two straight lines, on opposite sides of the main root. We proceeded to examine other turnips, beets, radishes, carrots, parsnips, etc., and found the same arrangement in each case. To our surprise, we discovered that these rootlets grew in the direction of east and west, never north and south, owing, perhaps, to the magnetic influence of the earth. Strange as it may seem, this apparently simple fact has been hitherto unknown in any country.

"This discovery will facilitate the raising of tubers in greater numbers and with better results. As the fibrous roots grow east and west, the rows should run north and south, with trenches between, so as to enable the rootlets to absorb the fertilizer easily. Thus the tubers may be planted close together without interfering with each other's growth.

"In these days of high cost of living such intensive farming vastly increases the productivity of a limited space of land."

It is announced that at some period in the current year yet to be decided on, the ownership and management of the "Country Gentleman," of Albany, N. Y., will pass to the Curtis Publishing Company of Philadelphia, and the connection of the present proprietors and editors with the paper will entirely cease. The paper completed last January its eighth year of continuous publication, not a single issue having failed to appear on the appointed day, and it has never changed hands during these fourscore years except by descent from one generation to the next, the present owners being son and grandson of the founder—a record which is believed to be unparalleled, in this country at least.

THE "SPENCER" TYPE OF SWEET PEAS

Burpee's Special Re-selected Stocks for 1911.

"SPENCER" SWEET PEAS are a great specialty with us! We were the first to grow the seed in America—the stock having been entrusted to us before introduction, even in England, of the original Countess Spencer. We have grown "the original Beauty" and its many "sportive" children with painstaking care each season since. There are but few other growers who can supply an equal assortment of True RE-SELECTED "SPENCERS" that are uniformly of such choice quality. Seedsmen and Florists can see how superior our stocks now are by the trials at FORDHOOK FARMS next June or July, while those who may be in California are invited also to inspect the growing crops at our FLORADALE FARM in the beautiful Lompoc Valley. Every planter's garden, however, is really a trial ground and we shall be quite content if any "Doubting Thomas" will send us only a portion of his order and note the difference in character of flowers produced!

 You can buy so-called "Spencer" Sweet Peas at half our prices—but the result will be only disappointment—and when in flower you will surely admit that you would gladly have paid even double our prices to have had the BURPEE-QUALITY of the TRUE SPENCER TYPE!

VICK'S CARDINAL.

VICKS' CARDINAL. For bedding purposes, this Aster is in a class by itself. As striking a color as Scarlet Salvia. The plants are strong and vigorous. The flowers are round and full and are borne on graceful stems of average length, and grow in such abundance from the crest of the plant to the ground and the foliage is so inconspicuous, that each plant resembles a huge bouquet. The plant photographed contained over thirty blooms. Excellent for cut flowers, wherever a deep, rich cardinal is wanted.

Prices: 1-32 oz., 25 cents; 1-16 oz., 40 cents; $\frac{1}{8}$ oz., 60 cents; $\frac{1}{4}$ oz. \$1.00; $\frac{1}{2}$ oz., \$1.75;

VICK'S ROYAL.

VICK'S ROYAL. When we introduced Vick's Royal Purple to the trade a few years ago, it immediately sprang into popular favor because it possesses so many sterling qualities long sought for in an early Aster. The flower stems start from the plant close to the ground, are free from laterals, and consequently give their full strength to the production of numerous, handsomely proportioned flowers. Because of its vigor and productiveness, which equals Vick's Late Branching, Vick's Royal will succeed under conditions which would be fatal to most other varieties. In addition to Vick's Royal Purple, we now have two other colors, Vick's Royal White and Vick's Royal Shell Pink. Take our advice and plant a liberal quantity.

Prices, Vick's Royal Purple: 1-16 oz., 20c.; $\frac{1}{8}$ oz., 35c.; $\frac{1}{4}$ oz., 65c.; $\frac{1}{2}$ oz., \$1.20; 1 oz., \$2.

Prices, other colors: 1-32 oz., 30c.; 1-16 oz., 45c.; $\frac{1}{8}$ oz., 75c.; $\frac{1}{4}$ oz., \$1.25, $\frac{1}{2}$ oz. \$2.25; 1 oz., \$4.00.

Phila., Pa.

the Amoor River Privet (*L. Amurensis*) which in northern sections is the most desirable of all the privets, combining the hardiness of *Ibota* with much of the fine foliage effect of the California. See their advertisement.

Spring, 1911. A business publication without illustrations, giving trade quotations on a very complete list of ornamental trees and shrubs in classified sizes. A most excellent reference book.

Ellwanger & Barry, Rochester, N. Y.—Novelties of Special Interest and Value. This list comprises the best of the recent introductions in pyruses, prunuses, crataeguses, deutzias, weigelas, roses, lilacs and other ornamental shrubs and trees, and border perennials. Anyone wishing to be in the front with the best things for garden work should carefully peruse this list.

Thomas J. Grey Co., Boston, Mass.—Seed and Implement Catalogue for 1911. Covers "neat but not gaudy," front adorned with cluster of scabiosa and the back with a lovely lawn view. This catalogue announces the affiliation with this company of A. F. Barney and J. M. Gleason, long connected with the Schlegel & Fottler Co. The contents are comprehensive and well arranged.

Ross Brothers Co., Worcester, Mass.—Catalogue of Seeds and Agricultural Goods, Spring, 1911. Garden and field seeds are a strong feature of this fine catalogue. Arrangement, press work and illustrations are all that could be desired. The covers in rich sepia tones are artistic and dignified and after a perusal of the contents one is easily persuaded that farming in New England is far from declining.

Leedle Floral Company, Springfield, O.—"Nothing But Roses." This neat little publication contains besides a classified wholesale price list of summer-grown roses on own roots, a descriptive list of the roses offered, alphabetically arranged and will be found useful and dependable by the florist or nurseryman talking roses to a customer. Between four and five hundred varieties, all classes, are listed.

New York—The Elliott Auction Co. are in possession of their first consignment from Holland, consisting of roses and conifers, which will be offered early in March.

Flower Market Reports

BOSTON Plenty of evidence that Lent is now on is found in the wholesale flower marts where flowers of all kinds are accumulating and salesmen are beginning to grow nervous. Prices have fallen all along the line and in the sunny spring weather which has now set in the prospect is for a continuous falling market with the limit a matter of mere conjecture. The day before Ash Wednesday developed a big business as a wind-up to the social mid-winter season and everything that could be unloaded was unloaded. Now comes the deluge, it is feared. All varieties of market flowers are of excellent quality and there is no scarcity on any single item.

BUFFALO Brighter weather, more sunshine, more stock, and business good. Roses are fine, carnations are good and bulbous stock is excellent and lots of it although no complaint can be made that there has been an overabundance. Floral work being well distributed all good flowers have moved readily.

CHICAGO At last the tension is loosened and stock is coming in with something like regularity. Especially is the carnation supply increased and prices have dropped accordingly. Unless something unforeseen occurs there is every probability that from now on carnations will be in sufficient supply to meet the demand. There is not so decided a change in the rose situation, but with the occasional sunshine now coming the worst is probably past. Bulbous stock continues good in quality and there is plenty of it. Growers claim they have found it a profitable investment this year. Forget-me-not sells for 75c. to \$2.00 per 100 stalks and callas for the purchaser's own price, there being no fixed standard and little demand. The violet growers will have troubles of their own, especially those who ship from the East, for the home-grown singles are selling slowly and the eastern doubles still more slowly or not at all. A spring novelty to be a sort of companion to the forced pussy willow appeared this week in the form of dogwood branches in full bloom. They were very attractive and make good window novelties.

CINCINNATI Market conditions continue very satisfactory. There is a bountiful supply of all kinds of flowers but no surplus. Beauties are coming in more freely and are also improving in quality. There is a liberal supply of Bride and Ivory roses, the short and medium grades having the best call. The shortage of most other varieties is also at an end. The receipts of White and Pink Killarney are, however, very light as are Richmond and Rhea Reid. Carnations are in abundant supply with a downward tendency in price, white and light shades having the preference. Miniature Dutch hyacinths find a ready market. White and yellow tulips are in good demand, while the supply of red tulips is sufficient for present needs. Longiflorum lilies are coming in stronger and clean up nicely, while callas move more slowly. The supply of both single and double violets is

(Continued on page 301)

A Pennock-Meehan Suggestion

PATENT ROLL TINFOIL AND HOLDER

THE NEW method of handling foil as illustrated here is a great improvement over the old style. Not only is it handier and more economical in using; but it saves space and worry and is always in place.

IF BOUGHT
FROM
US, COSTS
NO
MORE
THAN
ORDINARY
SHEET
FOIL

Comes plain—also in violet and green, and is the best quality foil on the market. Five pound rolls.

Pennock-Meehan Current Quotations on Tinfoil

Old style 1 pound packages, or new style 5 pound rolls (see illustration)—both same price: Plain, per 100 pounds, \$8.50; Colored, per 100 pounds, \$18.00.

PRICES FOR THIS WEEK ONLY. ORDER AT ONCE.

GREEN CARNATION DYE—Per package, 75c.

Enough to color 200 to 300 flowers (powdered); package will make two quarts liquid. Mailed free at price quoted.

Flower Market Reports

(Continued from page 300)

more than sufficient for requirements. Of lily of the valley, Roman hyacinths and sweet peas, there is a surplus.

A fair average demand DETROIT is the keynote of last week's business with nothing startling and apparently no large things in sight. Roses and lilies are very scarce, which causes much trouble among retailers, especially so regarding the poor quality of local and out-of-town Beauties.

Business last PHILADELPHIA week continued steady and in good volume, and on the whole was quite satisfactory. George's day (22nd) did not cause a ripple outside the ordinary—and was quite a contrast to the day laid aside for the good St. Valentine. Most of the progressive florists are of opinion that the Valentine day business is as yet an untapped mine, and can be largely expanded by judicious catering to, and liberal advertising on the part of the retailers. Flowers generally are more plentiful and about the only really scarce things on the list are good roses. American Beauty especially is scarce, but really good stock is scarce in the other varieties, also. Carnations are splendid stock and in large volume—a little bit more than the market can absorb, so that stock of the lower grades which brought good money recently hangs fire now until the end of the week and does not bring much. The violet market is in prime condition—the mild weather encouraging street wear of these—so that while production is going on at a great rate, there is no glut. Orchids are only medium as to quality at present. There is a fair supply of light colored cattleyas; but the rich dark shades so highly prized are not much in evidence. Some nice oncidiums. Sweet peas are fine and selling all right. White lilac is still of excellent quality and plentiful, but the demand dragged a little last week. Ordinary varieties of tulips go slow, but the fancies such as Couronne D'Or and Murillo bring good figures. All minor items seem to find a good market at good prices. Trailing arbutus and German wallflower are two of the newcomers of the season to be seen in limited quantity. All greens are in good demand and there seems to be no overstock.

The market was very heavy last week, everything seasonable coming in abundance, and the commission

men are looking for a big glut after Lent sets in. Last week also saw a big cut in prices on all stock and especially so with carnations, some being sold as low as \$10 per 1000 and downtown window displays saw signs selling them as low as 25 cents a dozen. Roses are again on crop and quite a lot of good shipments were made to this market; \$10 per 100 for the extra fancy and \$3 per 100 for shorts. All Killarneys have the call. Violets are still good. The warm spell of a week ago nearly put them out of the market. Sweet peas are fine and sell well. In bulbous stock the market is in fine condition, and extra quality tulips are \$3; Dutch hyacinths, \$5; lily of the valley, \$3 to \$4; freesias, \$1.50; callas, \$10; lilies, \$12.50; daffodils, \$2 to \$3 per 100.

Following the severe snap of last week, regular spring weather is bringing out an unusually large quantity of bloom. Prices have already begun to take a downward direction. Everywhere on the street fakirs are offering violets of good quality for a mere song. It is playing havoc with the legitimate retail trade and there seems no way to reach these people. Arbutus is also shown. There is an over-surplus of bulbous stock on the market, but something of a shortage still in roses.

Miles City, Mont.—Smedley & Co., of Fargo, N. D., have decided to establish themselves upon a more pretentious scale at Miles City. Property is to be purchased near the city and a range of greenhouses built. Besides raising flowers for the trade they will cultivate small vegetables for the early spring market.

NOVELTIES

"REAL NOVELTIES AND
NOVEL REALITIES."

In Hardy Plants.

The biggest collection offered anywhere,
is found in our NOVELTY CATALOGUE,
just out.

Of great interest to the amateur and
commercial grower alike.

It describes and illustrates uncommon
plants of singular beauty, desirability and
simplicity of growth; inexpensive to
acquire.

Besides; our low prices, plants are big,
making them valuable, in small or large
quantities.

Mailed along with our illustrated whole-
sale catalogue of Hardy Perennials, etc.,
on receipt of three 2c. stamps, which pays
postage only, and which amount is
credited on first order.

CHICAGO NOTES.

Frank Davis, of R. R. Davis, Morrison, Ill., expects to build a new cucumber house 40x400 feet in the spring.

Anthony Belmont, who has a flower store on West 26th avenue, will open a second store at Polk and Centre avenues April 1st.

A trip to Bassett & Washburn's place at Hinsdale, Ill., found their formosum lilies looking fine and yielding a cut of 2,000 buds daily. They grow 35,000 bulbs.

Henry Tebbins, 1204 S. Ashland avenue, who was shot as he was alighting from a street car at 19th and State streets, is not seriously injured. The young man will be able to tend to business again in a couple of weeks and has had a very fortunate escape.

The wholesalers are still keeping up their game of "pussy in the corner" and no one is willing to state where he will move to if, indeed, he has the knowledge himself. Without doubt they will all be doing business after the first of May, with new leases in their safes and not be found very far from the same old corner.

Two years ago all except what is known as the down-town district in Chicago was renumbered according to a system of 100 to a block using the intersection of State and Madison streets as a starting point. The business district is now to be changed and when this is done, April 1st, the city numbering will be completed. All the wholesale florists will have new numbers for their places of business, but the change is a good one.

Personal.

G. H. Pieser is gaining steadily and when the spring opens hopes to again resume his place in the office at Kenicott Bros. & Co.

Mr. and Mrs. W. E. Wallace, of Eaton Bay, England, are visiting the large greenhouse establishments here. They were accompanied from Richmond, Ind., by E. G. Hill and J. Evans, who will remain a few days. Mr. and Mrs. Wallace will leave the last of the week for an extended trip through the East before returning to England.

Visitors: Mr. and Mrs. W. E. Wallace, Eaton Bay, England; Frank Davis, of R. R. Davis Co., Morrison, Ill.; E. G. Hill, Richmond, Ind.; John

Landscape Gardening

PROF. CRAIG

A course for Home-makers and Gardeners taught by Prof. Craig and Prof. Batchelor, of Cornell University.

Gardeners who understand up-to-date methods and practice are in demand for the best positions. A knowledge of Landscape Gardening is indispensable to those who would have the pleasantest homes.

Evans, Richmond, Ind.; B. Yonkers, Grand Rapids, Mich.; Carl Hirsh, Hillsdale, Mich.; Mr. Eldridge, Belvidier, Ill.

ST. LOUIS NOTES.

George Schrieper, who has charge of the cut-flower and supply departments at Kuehn's wholesale house, St. Louis, was married last week to Miss Fredonia Primble of East St. Louis, Ill., where the happy couple will make their home. George has a great many friends in the trade here who wish him and his bride all the good luck in the world.

There will be quite a lot of meetings of the different local florists' associations next month. They are the St. Louis Florist Club, Thursday, March 9; The Retail Florists' Association, Monday, March 6th; The Engelmann Botanical Club, Monday, March 6th; the Executive Board of the Horticultural Society will also meet some time next week. The local nurserymen will soon get together and talk over matters for the coming meeting of the American Association of Nurserymen which meets here in June.

The Aphine Manufacturing Company seems to continue on its victorious way, judging from the high testimonials to the value of its new Fungine as given in their advertisement this week, which see.

During Recess

Gardeners' and Florists' Club of Boston.

The annual banquet of this lively organization was held on Tuesday evening, February 28, and was a glorious success from start to finish. The banquet, attended by about three hundred members and ladies in evening array, took place in the lecture hall of the Horticultural Building and the big exhibition hall was reserved for the grand march and dancing which followed the feast of reason and flow of soul which supplemented so acceptably the well-directed efforts of the banquet committee and Caterer Whittemore. The halls were beautifully adorned with plants and flowers, George Anderson having again generously devoted a whole afternoon to this laudable purpose and the contributions of flowers, etc., from members and others being very fine. After the appeasement of the inner man (and woman), President Miller voiced a hearty welcome to members and invited guests and introduced Wm. J. Stewart, senior ex-president, as toastmaster. The first speaker was Walter Ballantyne, acting-mayor of Boston, who gave eloquent tribute to the influence of the club in Boston's park work and civic refinement. W. W. Craig spoke forcibly on behalf of the Private Gardener and Peter Fisher for the Commercial Grower. One of the most welcome guests was President Charles W. Parker of the Massachusetts Horticultural Society, who followed Mr. Ballantyne and expressed in hospitable words the maternal feelings of the mother organization towards her lusty progeny, the Gardeners' and Florists' Club. Interspersed between the speeches were duets by Mrs. McKeon and John Miller, and solos by these singers, readings by Miss Connolly, character dancing by the Misses Irvine, zither solos by Louise Eisenhardt, and solos by Neil Miller, together with characteristic and pertinent comment by the toastmaster.

At 9.30 the grand march was on headed by President Miller and Mrs. Parker, C. W. Parker and Mrs. E. M. Gill, Secretary Craig and Mrs. Craig, Treasurer Fisher and Mrs. Fisher and Mr. and Mrs. W. J. Stewart. Then came the dancing, which the young people enjoyed until the last moment under the able management of Wm. McGillivray and his aids. The reception committee under Chairman P. J. Turley did its duty in excellent manner and Miss J. S. Rifford as accompanist, and Hutchins' Orchestra, all filled their part to perfection.

A Good Time at Bar Harbor.

The third annual concert and ball of the Bar Harbor Horticultural Society took place Friday evening, February 24th. The event was a grand success, some 75 couples taking part in the grand march, which was led by Clifford F. Cains and Miss Frances Moran.

The committees in charge were as follows:

Floor manager—Richard Morris. Aids—James Morrison, Benj. A. Gower, John H. Stottford, Isaac Hillison and Martin Brewer; Reception Committee—Edward Kirk, Wm. T. Burton, Wm. Miller, B. S. Higgins, M.

C. Morrison and Hon. B. E. Clark; Decoration Committee—Chas. L. Shand, A. E. Chitman, John Reuwitz and Joseph Kirby; Refreshment Committee—T. P. Jones, Clifford F. Cains and James Cranford.

This society, although young is in a good vigorous condition, having something like two hundred members in good standing, with several of the cottage owners as life members. The officers are: Geo. B. Dorr, president; Lewis B. McEgg, first vice-president; Wm. Miller, second vice-president; Bernard Morris, third vice-president; Chas. L. Shand, clerk; A. C. Chilman, financial secretary; Wm. T. Burton, treasurer; John H. Stottford, sergeant-at-arms. C. L. S.

Buffalo vs. Rochester.

A very enjoyable evening was spent on Thursday last when our brother florists from Rochester paid us a visit for which a match game of bowling had been arranged. A good delegation met them at the depot and escorted them to the Hofbrau for dinner. A very comfortable hour was spent there before going to Oertels' alleys where the remainder of the club members were in waiting.

Three games were bowled and the above shows results, much in favor of Buffalo.

After the match game a fine spread was prepared, after which a match was found between Geo. Jenney and Bart Davis of Rochester, with Sam Wallace and Geo. McClure of Buffalo, the latter taking all three games. Six games for one night; enough said, Buffalo means business.

A return match will be had in Rochester on Wednesday evening, March 8th, and a good bunch of the Buffalo rooters will go down to cheer the home winners. Felix Albert, a former Buffalo florist was with the Rochester rooters.

Chicago Bowlers.

The Chicago Florists' Bowling Club will play the Milwaukee team in their own city March 19th. At their regular meeting, Feb. 22nd, the Chicago team made the following scores:

ROSES.		CARNATIONS.	
	1st 2nd 3rd		1st 2nd 3rd
Wint's'n,	134 148 76	Krauss,	149 189 114
Klunder,	115 129 158	Ayers,	163 190 157
Foster,	145 143 190	H'bn'r, jr.	192 107 105
Wolf,	186 178 148	Schultz,	176 171 182
		A. Zeck,	170 166 187

ORCHIDS.		VIOLETS.	
	1st 2nd 3rd		1st 2nd 3rd
H'bn'r, sr.	131 160 131	Wint's'n, jr.	114 58 81
Zeck,	116 223 199	L'f'm'n,	132 124 99
Graff,	166 179 165	F'r'm'n,	129 136 166
Degman,	143 125 144	Lorman,	121 135 170
Farley,	178 143 139	Riley,	158 159 161

New York Bowlers.

Last Friday evening the following scores were recorded:

Scott,	145 134 175	Holt,	107 129 112
Shaw,	106 123 145	Feurich,	149 127 103
Nugent,	107 125 97	Perly,	139 97
Moltz,	138 117 129	Young,	107 116
Kakuda,	95 119 102		

Astoria Bowlers.

The following scores were made at

the meeting, Astoria, L. I., N. Y., Thursday evening, February 23:

Sieb., W.,	172 154 135	Kessler,	131 150 148
Shaw,	164 151 120	Lorenz,	111 154 123
Ebel,	99 98	Sieb., H.,	131 183
Sieb., Jr.,	165 181 112	Jac'bs'n,	114 102 128
D'n'ld's'n,	128 110 124	Eichm'n'n,	175 160
Miesem,	158 121 170	Heintz,	99 100
Eism'n,	140 153 164	Moltz,	101 105
Dr'h'fer,	161 148	Bl'ckw'n,	141 123
Edmist'n,	102 135 120	Arnold,	100 111

The prize for high score presented by M. C. Ebel was won by H. Siebrecht. As the score shows, the donor of the prize made a special effort not to win it himself. Next meeting will be Ladies' Night.

PHILADELPHIA NOTES.

The American Peony Society held an executive meeting here on the 1st inst.

W. Atlee Burpee left for a brief sojourn in Florida and other parts of the sunny south on the 23rd inst.

B. Eschner, of M. Rice & Co., reports their Easter business far ahead of last year in advance booking. Their factory is now working overtime three nights a week. The demand is especially heavy on plant baskets.

Capt. Burnett Landreth of the Landreth Seed Co., is also among the Florida sojourners. He will make a flying visit incidentally to Cuba (before returning to Philadelphia) on behalf of some business interests he has there.

The sunny south will have a chance to look on the smiling countenance of the only M. Rice, of M. Rice & Co., who sailed on a well-earned vacation from New York on the 25th ult., accompanied by Mrs. Rice. The sojourners expect to return to Philadelphia in about two months.

I. C. Townsend, of Merchantville, N. J., gave an interesting lecture on hardy perennials at Michell's on February 27th. There was a good attendance of the general public and the lecturer was followed with close attention and highly applauded. These monthly talks are doing a great amount of good.

Do not forget the two big events of next week, the King lecture on greenhouse construction at the Florists' Club on Tuesday evening, March 7, and the trip to the new Dreer place at Riverview, Wednesday, March 8th, leaving Market street ferry at 2 p. m. Latter event as guests of Messrs. Dreer. Return 5.45 p. m. All members of Florists' Club invited, and same from New York, Baltimore, Washington and Boston.

"The prodigal son has returned," remarked Robert Gaul this morning. On being asked to explain he pointed to the big stacks of roses and other flowers now coming in—so our dense intellect was properly humbled and we now spell son sun. Mr. Gaul is an important factor in the dissemination of the celebrated P. M. quality, and does his prettiest to keep up the good repute of the house. As Shakespeare would say: "A pun! a pun my word." Is it any wonder the house shines for all, with such brilliancy among its personnel?

Visitors: William J. Halliday, Baltimore, Md.; H. La Valle, grower for J. H. Small & Sons, Washington, D. C.; P. Joseph Lynch, New Castle, Ind.; I. C. Townsend, Merchantville, N. J.; Mr. Bochman, grower for Stockton & Howe, Princeton, N. J.

MARYLAND AGRICULTURAL COLLEGE.

The two weeks' Horticultural Course, which concluded at the Maryland College last week, was a great success. The total enrollment was 65 members, including men and women interested in fruit growing. The course was as practical as possible, each member of the class was required to actually engage in pruning, grafting and packing fruit. They were also given practical work in the control of insect pests and plant diseases. A special demonstration was held, and all the different makes of pumps, including power sprayers, were seen in action. Special lecturers were secured, among them being, Professors W. M. Scott, A. L. Quaintance, E. F. Phillips, and H. P. Gould, all of the Department of Agriculture.

At the conclusion of the course, the president and faculty received the class and student body, at a public reception. At this time the two-weeks' students presented to the college a loving cup, as a token of their appreciation of the course and the courtesies extended by the officers and instructors. The course will no doubt be an annual occurrence hereafter.

A BAR HARBOR ESTABLISHMENT.

Last fall John H. Stalford purchased a lot of land together with the buildings thereon, situated in the rear of the Malvern Hotel, and known as the Malvern Greenhouse property. He also purchased from the Amory estate a tract of land including Amory Lane. Land has been cleared, stables and sheds torn down and the old greenhouses removed, and in their places new greenhouses have just been completed, making a range of 11,000 feet. Melons, grapes and carnations will be grown. The houses were built and heated by Lord & Burnham Co. A Castle circulator has been installed.

A PROSPEROUS NURSERY.

Together with the recently purchased Framingham Nurseries, W. H. Wyman of the Bay State Nursery, North Abington, Mass., now has the largest nursery property in New England—aggregating upwards of 500 acres. At Rockland are located the propagating houses and twelve acres of hardy herbaceous plants. A two-story packing-house and box factory, 60 x 120, has lately been added to the North Abington equipment together with a concrete structure for fumigating purposes. Orderly arrangement and business ability of a high order are everywhere apparent.

WHAT THE USERS SAY

The Kroeschell Does Our Work Easier Than Cast Iron Boilers and Saves 20 to 25 Per Cent Fuel.

The No. 4 boiler is heating 10,000 square feet of glass—it would take care of 13,000 square feet easy. Have no trouble to keep temperature of 50° and 60° in coldest weather. The boiler has given perfect satisfaction. We had two cast iron boilers. These boilers never did the work at their best and when the greenhouses were new. According to our experience with yours, we will save 20 to 25% fuel.

*Do some of your greenhouses
"refuse to heat?"*

Or, do some parts heat with exasperating slowness, endangering the growth of your plants? If so, you need a

Castle Automatic Circulator

It quickly forces the hot water to the uttermost parts of the system.

It corrects errors in piping without expensive alterations, and without putting additional pressure on your system.

It reduces the coal bill.

By speeding up the circulation, more water flows through the piping, more heat is taken from the fire and more heat units are actually used for heating your houses.

GREENHOUSE CONSTRUCTION LUMBER

**John C. Moninger Co.
117 E. Blackhawk St., CHICAGO,**

This Is The Boiler For You

When a boiler is made especially to do a special thing, it stands to reason it will do that thing best. That is exactly where this Boiler of ours stands. It is an "honest injun" boiler. Every inch of it from base to top was designed to meet greenhouse needs. Its easy to put up—easy to fire. Keeps its fire and holds its heat for long intervals without any attention. It is free from the usual grate complications. Of course it is economical—that the first thing we attended to.

If you are the man looking for a dependable boiler made by a dependable firm—here it is. Buy it and stop fussing.

Hitchings & Co.

ELIZABETH, and 1170 Broadway
N. J. N. Y.

The **SERVICE BUILDING** is usually a source of great annoyance to the up-to-date gardener and it requires architectural ability to design appropriate **Potting Houses** that will add to the attractiveness of the Greenhouses. You will admit that this **SERVICE BUILDING** is unusually attractive. Its Old English Architecture is along the same lines as other buildings on this large estate; it is equipped with all modern improvements for the comfort of the gardener and his assistants and the connecting house, sixteen feet long (ample for Propagating purposes), prevents the shading of adjoining houses.

Will be glad to talk to you on the **SERVICE BUILDING**.

THE BEAUTIFUL SYMMETRY of lines ONLY secured in THE LUTON PATENTED CURVED EAVE IRON FRAME HOUSE is easily distinguishable. It is the ARTISTIC application to the small details that commands the attention of the most CRITICAL.

JUST note the construction of the HOOD over door

Erected at Bridgeport, Conn.

way. ITS SIMPLICITY and how IT HARMONIZES with the general appearance of the construction, THAT is only one of the details throughout the entire arrangement. The same original mechanical ability is employed. THEN again this construction is patented, UNITED STATES PATENT NO. 902,155. A POSITIVE ASSURANCE of receiving the genuine successful CURVED EAVE. Lupinus polyphyllus roseus

(See Cover Illustration.)

Perennial lupins are ornamental garden plants, known to be unusually hardy. This explains their great popularity throughout northern latitudes. In regard to preparation of soil and care, the requirements do not go beyond the ordinary line. As a rule lupins are very free in their seed production and by means of outdoor sowing plants can be raised in a very short time, hence their wide distribution and frequency, especially in remotely located rural districts. Under proper treatment in the perennial border lupins rank among the showiest of our old garden inmates. No one seems to admire them more than our metropolitan summer residents. This sentiment has been greatly stimulated by the recent introduction of *Lupinus polyphyllus roseus*, a variety from England with flower spikes of a clear pink shade of wonderful lustre. Its best improvement consists in the remarkably long period of flowering. The old purple and white sorts being at their best in June, bloom very little after this time, while the new pink type continues in its constant produce of spikes until October. Care should be taken, however, to always remove old flowers as soon as they become unsightly. To prevent the plants going into seed is a necessity if ready branching out and a steady and rich floral effect is desired.

Out of a first-class strain of seed a comparatively high percentage of plants true to color can be procured, which, if started early enough are very apt to even flower the first summer. For immediate mass effects, especially in all cases where for reason of a certain color scheme, pure shades are needed, two-year-old plants, previously assorted, should be given preference.

The value of *Lupinus polyphyllus roseus* as a cut flower is limited, but its high decorative merit for the purpose of floral outdoor displays cannot be questioned. By all means, at least throughout the north, the gates of every American garden should be thrown open for this new pink variety.

Richard Roth

Northeast Harbor, Maine.

Crowded Peach Trees

In many gardens these trees are left far too close together, and now is a good time to remedy the evil. I have seen trees so crowded that it was impossible for the next season's wood to mature. Peach pruning with the beginner is not so simple as one would think, and many err in leaving too much of the old wood and too much growth for the allotted space. It is far better to err on the side of thin trees than crowded growths as new wood can be left where there is space enough to do so. Judicious thinning and the removal of weak and superfluous growths in the summer materially reduces the need for severe winter pruning. Peach trees should not be cut back, which is often practiced, but should be permitted to cover a larger space. In these days when young trees must be fruited early there is no gain, once the tree is formed, in cutting back. Far better extend and mature the growths. Grow thinly from the start and secure larger fruit and of better quality.

Joseph Tillson

Fruit and Vegetables Under Glass

REPOTTING YOUNG VINES

Vine eyes that were started early in February will now be rooting through the soil in the 4-in. pots in which they were started. Pot on into 6-in. before the roots become cramped, using good, fresh loam with enough lime rubble and charcoal to keep it open. Clean and well-drained pots should be used, otherwise the ball may be broken when being turned out for the

No. 1.—Eye ready for inserting in soil; cut on underside, giving it a double chance of rooting.

No. 2.—Eye without under-cut.

No. 3.—Safely rooted eye, showing top growth and roots; eye made as in No. 2.

Two-year-old canes are usually used as fruiting

canes. These are decidedly stronger than a one-year-old, but the latter usually breaks away earlier and will carry four or five bunches. If canes are to be grown on two years before forcing eyes are best inserted any time through March and grown on in 6-in. pots the first year, pruning back to one eye before starting the second season's growth, and potting on into "twelves."

ORCHARD HOUSE

Apples, pears, plums, cherries, etc., will now be in flower. Keep night temperature about 45°, giving all the air possible through the day. Orchard trees do not command such a dry atmosphere when in flower as a vine. The walks, etc., can be damped around early mornings and, after fertilizing at noon, it is beneficial to give the trees a fine spray over. If cherries are included in a mixed house they should have the coolest end and have a little more air admitted to them. If the weather permits keep a crack of air on the house all night. Cherries refuse to set if kept too close or too warm.

HEELING IN PEACH TREES

Trellis trees after having all superfluous growths removed will commence to grow rapidly. These young growths want taking in hand at once if the best shaped tree is to be obtained. When about three or four inches long a tie should be put around each growth, pulling them into their right places; after this no tying will be necessary for some time—the growths growing in the right direction. If this heeling-in is not done when the shoots come to be tied in later they will always have a bend in them instead of being straight.

CUCUMBERS

With the increasing sun power cucumbers will need an increasing supply of water. Never allow them to get on the dry side. Admit a crack of air at 80° and keep atmosphere as humid as possible, closing down soon after noon and spraying thoroughly if sun is bright, taking care to have plants dry before night. Cucumbers will not need shade for some time yet. Better results are obtained by keeping them used to bright sun.

MISCELLANEOUS VEGETABLES

Shift artichokes on as roots show through. By the time it is safe to plant out these will be good plants in 6-in. pots.

More onions and leeks can be sown and pricked off into flats and ready for planting out later. A few egg

plants can be sown and placed in a warm house to germinate.

Tomatoes for planting out in the field should be put in and brought along. A batch of plants worked up into pots will pay for the extra trouble spent on them by furnishing fruit two or three weeks ahead of the main crops.

Early celery should be sown in well-drained flats, using a compost of equal parts loam and leaf soil. Seedlings will be stronger by having plenty of light and air and be less liable to damp off. Celery likes an abundance of water during the whole growing season and should never be allowed to become dry. Celery seedlings will stand more than is usually advisable to give to other seedlings.

Lettuce can also be sown in quantity, growing on cool and hardening off with other stuff before planting out.

Seasonable Notes on Culture of Florists' Stock

BULBS

It is not always easy to time the various species under this head so as to be just right for Easter. There is not much trouble in forcing bulbs, especially if you know your stock is furnished with an abundance of active roots. Daffodils, hyacinths, tulips and others belonging to this class that are buried outdoors or under the protection of some frame, should be brought into a cool house not later than the 20th of this month, if intended for Easter trade. In forcing these bulbs at this season it is well to figure on from three to five weeks. Tulips need about 70 degrees until the bloom is developed and should then be gradually hardened off in a cool house. Always select a cool bottom to place them on, but a warm atmospheric temperature overhead. To bring about an exquisite blending of their delicate tints which enhances their value when fully developed they should be placed on a cool bench in a semi-dark place. This is also good for single hyacinths, while, on the other hand, narcissi and hyacinths are better when grown slowly on in a temperature of from 55 to 60 degrees, with a moderate bottom heat.

CARE OF YOUNG ROSES

Roses that have been potted for some time and are pretty well filled with roots will now require a shift. When repotting provide good drainage by placing some potsherds in the bottom of the pots, and on this use the rough pieces of sod that are left when the soil is screened. Use the same soil that is employed in the benches, adding about a 5-inch potful of bone meal to a wheelbarrow load of soil. Pot firmly and give a good watering—enough so that the whole ball is made moist, but not mushy. Give them a front bench where they will get plenty of light and keep a temperature as near 56 degrees at night as possible, with a day temperature of from 70 to 75 degrees. See that a good syringing is not neglected on all good days or red spider will soon begin to assert itself. Fumigate lightly at least once a week. Go over the plants often and allow them a little more room from time to time. See if the ties are all right on grafted plants. Some may be too tight or too loose.

DIEFFENBACHIAS

These tropical foliated plants are exceedingly useful for various purposes. Old plants that have grown lanky can have the tops taken off and inserted in the warm end of a propagating bed, and the succulent stems can be cut into pieces of two eyes each and allowed about four days for ends to dry and then placed in sand where there is a brisk bottom heat; but see that they are not kept too moist, for they are liable to rot. Pot up into small pots when they have made a few small leaves in a mixture of leaf mold, chopped sphagnum and sand, and keep in a temperature of 65 to 70 degrees at night, with a proportionate rise in the day time. They should be protected from the sun's rays with a thin shade on the glass, or the plants will lose their fine color. They like a daily syringing overhead through their growing season. If it is desired to have perfect specimens they should be shifted, using good, rich soil, as the condition of their roots may require. When the desired size pot is reached they can be kept in good condition by the use of manure-water once a week.

SPIRAEAS

These plants can hardly ever be given too much water

as they are very thirsty subjects. They will require close attention for the next four weeks in order to produce nice flowers with good substance. When they have started to open their flowers they are better for a week's stay in a cool house. It is always better to have them a little early than the reverse. Give them some manure water twice a week until they show color, and keep the plants well spread out so as to let the light reach all around them. If far enough in advancement of flower, a temperature of 50 degrees will do, but for plants that are backward 60 degrees can be applied now and the last week before Easter gradually harden them off or they will wilt very soon after they have been cut, or when used for decoration. Be very careful about fumigation, as they don't like it.

SWEET PEAS

Early sowing of this crop outside is of great importance if a fine supply of flowers is expected. They should be planted as soon as the ground is in a working condition. The best place for sweet peas is in a position that is fully exposed to sun and air, which would be for the rows to run north and south. A good, deep loam that has been well enriched with plenty of well-rotted manure and plowed deep, with a surface dressing of bone meal and hardwood ashes, makes an ideal place for the production of plenty of fine blooms. Make a furrow or trench from 6 to 8 inches deep. Sow the seed thickly in the bottom of these trenches and cover with two inches of soil, pressing the soil down firmly. When they come up above the ground thin out to about two inches apart, for if plants are too close they will not attain their proper development. The balance of the soil should be filled into the trench as they grow. To keep the crop in a flowering state as long as possible they should be watered thoroughly and frequently during dry weather, also a mulch of manure or grass in hot weather will be found very beneficial. If possible give liquid manure once a week. This will help them to continue in bloom longer.

VANDAS

It is well to pick out some of the old sphagnum and resurface with chopped live sphagnum moss. Press in rather firmly around the roots. The aerial roots should be coiled around and pegged down on the top of the compost, where they will be induced by the extra amount of moisture to branch out and insert themselves in the sphagnum. Give shading just heavy enough to break the direct solar rays from the plants. A high degree of moisture should be maintained from this out. Give a sufficient quantity of fresh air daily, avoiding cold draughts which would tend to check the growth and produce other evils. Where they have had a winter temperature of from 60 to 65 degrees give them a gradual increase of ten degrees during the summer months, with gradually decreased temperature towards fall until by late in November they will be down to their normal winter temperature. With but a few exceptions all vandas will do satisfactorily under this treatment. *Vanda coerulea*, *V. Amesiana*, and *V. Kimballiana*, with some other Alpine species, like a temperature of about ten degrees cooler. At all seasons during bright days vandas should have a certain amount of water at the roots, with syringing over the plants.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: *Achlmenes*; *Cannas*; *Chrysanthemums*; Double *Pyrethrum*; The Perennial Border; The Propagation of *Dahlias*.

A good season We think it will be conceded by the flower growers generally that the season thus far has been a good one—better, in fact, than we had reason to expect, everything considered. The meagre mid-winter crops of which the rosegrowers and carnation growers have complained have been well offset by the steadily maintained market

values which, in their regularity and freedom from sharp fluctuations, have certainly established a record. We cannot, from now on, expect these conditions to continue. Undoubtedly there will be surpluses in all lines and the usual smashing of values which is sure to follow a congested market, but, taken all together, we think the season will be found, at the finish, to have averaged up as well as, if not better than, any in recent years. Indeed, the winter of 1910-11 has gone far to demonstrate for the flower-growing industry that quality of stability which is sure to interest and attract capital, and its record will have a direct effect on the business development in the immediate future. We look to see a lively spring season for the greenhouse builders.

Ballinger is out, at last. As one of the "hysterical body of headline readers," on whom the President has thought proper to make uncomplimentary comment, we confess to a sense of gratitude over the announcement of Ballinger's resignation and the appointment of a man in his place who is disposed to conduct his office with some regard for the public's property and to pay some attention to the patriotic, economic and scientific plans for the protection and conservation of our natural resources as advocated by his fellow citizens for the public good. It has been the conviction of a large proportion of the American people that the ex-Secretary of the Interior has been pursuing a mistaken and pernicious policy, ready to condone evasions of the law by predatory interests, and deaf to all appeals for protection of the public domain against the wild scramble to strip it of its wealth. It is high time to call a halt on the land grabbing and forest spoilation which has been going on, and in the passing of Ballinger a great forward step towards a patriotic policy in this respect has been taken.

But two weeks distant, the greatest horticultural exhibition ever undertaken in the western hemisphere, if not in the world, will swing open its doors to thousands of interested visitors from all parts of the continent of North America and from Europe also. The success of the National Flower Show is already assured—a three-fold success! Success in the number, size and rare quality of exhibits; success in universal interest elicited, in enterprise on the part of intending exhibitors and in the number and eagerness of coming visitors, and further, success in financing, as shown by the full subscription of the guarantee fund, by the unprecedented demand for trade exhibition space, sales of which now aggregate about three times the amount ever obtained on any former occasion by the S. A. F. and O. H. from this source, and by the indications already manifest, of an attendance far surpassing that of any previous Flower Show. The vast amount of work of the National Flower Show Committee and of the Local Board of Control, accomplished during the past year and a half, was earnestly undertaken, and has been assiduously carried out, and well deserves the golden harvest, which is even now in sight. All honor to Boston for her great achievement! Boston has been ever in the van of Horticulture in the United States, she is the centre of Horticulture today and she is now ready to bid visitors—come and all—from the old world as well as from the remotest corners of the new "Welcome, Thrice Welcome, to the Hub of Horticulture!!!"

THE DREER CELEBRATION.

One hundred and seventy-nine of the leading florists of Philadelphia, Washington, Baltimore, and New York visited the new range of greenhouses of the Dreer Co. at Riverview, N. J., on the 8th inst. A special train was chartered by the courtesy of this firm—who also served a collation after the inspection of the houses to their guests. Robert Craig was spokesman for the visitors, and returned warm thanks for a pleasant and profitable afternoon.

J. Otto Thilow responded for the firm, and read a telegram from William F. Dreer—who is at present in California—extending greetings to the visitors and congratulations to all those concerned in the wonderful feat of having erected three acres of greenhouses—a complete new establishment and all planted and in running order in twelve weeks. L. R. King president of the King Construction Co., was present, and did much to explain knotty points to the visitors, and received many congratulations on the good and quick job he had accomplished. J. D. Eisele, the manager of the Dreer nurseries also received his share of the praises going—as everybody realized that he was the man behind the gun—or as Mr. Thilow stated it—the fire behind the engine. A group photograph was

House of Variegated Pineapple.

general verdict. Even far-away Boston was represented in the person of our good friend Thomas Roland. The New York delegation was headed by

Messrs. Eisele, Strohle, Tull, Clark and other officers of the company were indefatigable in their personal efforts to make the visit agreeable to their

The New Dreer Range.

taken by Mr. Pancoast at the wind-up as a memento of the occasion. A very pleasant and profitable afternoon and one long to be remembered was the

John Birnie, who took fatherly care of his crowd, and among other things gave us entertaining dissertations on the shortcomings of King David.

guests. Captains of departments too numerous to mention, were ubiquitous and always on hand where the inquiry or the want of a guest expressed itself. We congratulate the company and all concerned on the beautiful and smooth arrangements, and the splendid and all round success of the outing.

House of Phoenix Roebeleni.

The Boiler House.

CLUBS AND SOCIETIES

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Department of Registration.

As no objections have been filed, public notice is hereby given that the registration of the geraniums, "Dr. E. M. Moore" and "A. B. Lamberton," by Robert Dukelou, of Rochester, New York, becomes complete.

Public notice is hereby given that A. N. Pierson, Inc., of Cromwell, Connecticut, offer for registration the roses described below. Any person objecting to the registration or to the use of the proposed names, is requested to communicate with the secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

Double White Killarney: A sport of White Killarney originating with the J. A. Budlong & Son Co., Auburn, R. I., in January, 1910. It is stronger in growth than the parent, with the same general characteristics of foliage and growth. The flower is pure white in color, with an average of from forty to forty-five petals. It is a wonderful improvement over the parent, having size and substance in summer, when White Killarney is comparatively single. The variety will be disseminated by A. N. Pierson, Inc., in 1912.

Killarney Queen: A deep pink sport of Killarney originating with the J. A. Budlong & Son Co., Auburn, R. I., in 1909, that has the high color of Dark Pink Killarney with an increased vigor in growth. It compares among Killarneys as American Beauty does with other varieties, the stem and foliage being much heavier, and the petals nearly twice the size of the petals of Killarney. The variety will be disseminated by A. N. Pierson, Inc., in 1912.

Additional S. A. F. Appointments.

The following gentlemen have been appointed as state vice-presidents:

Massachusetts East, W. A. Hastings, Boston; Massachusetts West, G. H. Sinclair, Holyoke; Pennsylvania West, W. J. Smith, Pittsburgh.

Convention Notes.

The following letter has been sent to all the members of the society:

It has been ordered that each member in good standing, of the S. A. F. & O. H. and allied societies holding meetings and exhibitions in conjunction with the National Flower Show in Boston on March 25th to April 1st, shall be entitled to one members' season ticket admitting the owner to the exhibition hall. Only one ticket, however, will be issued to any one person even though he belong to several societies. These tickets will be non-transferable and will be collected and canceled if found in hands other than the owners.

In compliance with the directions of the President, orders for members' season tickets are being sent to all members of the S. A. F. & O. H. in good standing; that is to all those who have paid their 1911 dues or are Life or Pioneer members. These orders must be presented to the proper officials at the exhibition hall and be exchanged

for regular members' tickets. These orders must be presented by the owners in person as all orders presented by others than the owners will be taken up and canceled.

Be sure and bring your order with you as the duties of the secretary's office are such that it will be impossible for him to issue duplicate orders. This rule will be enforced.

If your order is not enclosed with this letter, send your dues for 1911 so as to reach the secretary's office before March 20th and the order will be mailed to you. If your dues reach here after that date your order may be secured at the secretary's office at the Exhibition Hall. Kindly give this your attention now and save much confusion at the time of the meeting.

A rate of one and three-fifths (1 3-5) on the certificate plan has been granted by the New England and Trunk Line Associations. The Southeastern and Western Associations have refused to grant rates owing to small numbers and 2-cent rate now in existence. The Central Association and Eastern Canadian Association will report early in March and their decisions will be presented in the trade journals.

You cannot afford to miss the greatest flower show ever held. *Come.*

All Life and Pioneer members and those annual members who have paid their dues for 1911 have received their orders for membership tickets.

It has been decided not to have headquarters for the S. A. F. at Boston. The statement that one Boston hotel was selected as headquarters was not official.

H. B. DORNER, Sec'y.

WORCESTER COUNTY (MASS.) HORTICULTURAL SOCIETY.

Wednesday evening, March 8, will long be remembered by the members of the Worcester County Horticultural Society and their guests as a gala night. No less than 350 sat down to the 21st annual reunion and banquet in Horticultural Hall, Worcester, and made merry with friendly intercourse and congratulation, music and eloquence and, finally, dancing. President E. W. Breed should feel highly elated over the splendid response to the Society's invitation to get together under its banner and talk of the past, plan for the future, and demonstrate by numbers and enthusiasm how strong the horticultural sentiment exists in "the Heart of the Commonwealth."

Among the invited guests who graced the festive board and made speeches in the post-prandial section of the occasion were: C. W. Parker, president of the Massachusetts Horticultural Society; W. P. Rich, secretary of that body; R. M. Bowen, treasurer Rhode Island Horticultural Society; Thos. Hope, president of that body; Rev. W. T. Hutchins, of sweet pea fame; S. T. Maynard, president New England Fruit Growers' Association; Hon. James Logan, mayor of Worcester; Chas. T. Tatman, president of the Board of Trade. President Breed officiated as toastmaster. The halls were beautifully decorated under the direction of Secretary L. C. Midgley.

FLORISTS' CLUB OF PHILADELPHIA.

One of the best attended meetings in years took place on the 7th inst., the attraction being the illustrated lecture by L. R. King, president of the King Construction Co., who delighted his audience with a plain unvarnished tale of structural work and interior mechanical arrangements. The photographs of actual work thrown on the screen were lucidly explained so that the most inexpert could easily understand, and a more educational or valuable exposition in this important development has seldom been given to the members of the craft. The committee who arranged for this excellent educative feature are to be highly commended. J. Otto Thilow has again shown in a masterly way how committees can lead in the march of progress.

Adolph Farenwald again brought up the matter of the Club's having a spring celebration in the shape of a banquet. Most of the members favored the congenial spirit in which Mr. Farenwald urged this, but the lack of some special occasion to celebrate seemed to hold back the enthusiasm. The matter was left in the hands of the committee. William H. Wanger, David Adam, George Hampton, and H. Wintzer were elected to membership and seven new members were proposed and referred for action to the next monthly meeting.

Samuel Batchelor exhibited a splendid vase of Dorothy Gordon carnations and received a very complimentary report from the committee. Some hypercritical members had a good deal to say about the similarity between this variety and Rose Pink Enchantress, but the committee side-stepped the issue very cleverly and came out with flying colors. In the absence of Joseph Heacock, who is attending to his senatorial duties in Harrisburg, the vice-president, Alfred Burton, accepted the chair.

CHICAGO FLORISTS' CLUB.

There was a good attendance at the regular meeting, Feb. 28th, and the following were elected to membership: Harry I. Gray, of Desplaines, Ill.; Wm. Wolf, 5708 Emerald avenue, Chicago; Robt. E. Newcomb, 84 Randolph street; Edw. Goldstein, 84 Randolph street; C. A. Beatty, 335 Dearborn street.

The transportation committee reported all arrangements completed for the trip to the National Flower Show at Boston. The train leaves the La Salle St. Station over the Lake Shore road March 23rd, at 5.30 P. M., reaching Boston March 24th, 8.30 P. M. As the transportation arrangements are all completed the special meeting scheduled for March 14 was called off.

There was an exhibition of carnations from Dornier's, Lafayette, Ind., in which Glorioso showed up finely and won 86 points. White wonder, however, arrived in poor condition and was not shown. Members were disappointed in not having the collection of new roses from A. N. Pierson's that was expected, as they arrived too late.

The April meeting will include on its program interesting papers on and discussion of fertilizers by those interested in the manufacture and sale of those products.

DETROIT FLORIST CLUB.

Club meeting on March 6, was very well attended and Robt. Jean, the new owner of E. A. Scribner's establishment, was elected to membership. E. A. Scribner was made an honorary member.

After the transaction of the regular business the members spent a most interesting hour and a half following ex-mayor Breitmeyer's very interesting narration of his recent trip to Cuba.

Mr. Breitmeyer told of crotons and acalyphas which grow to a height of 15 to 20 feet, arecas, dracaenas and bougainvilleas, the latter seen on most all houses, which is not very artistic because of its magenta flowers and the generally prevailing yellow paint on the houses. He said that all cities are paying great attention to the making of parks, boulevards and good streets leading into the suburbs. In fact they spend more money and build much more substantially than American cities do, as a rule. The government is trying out all kinds of vegetables. The growing of vegetables is in the hands of the Chinese and they produce most beautiful and tempting fruit and vegetables.

CLEVELAND FLORISTS' CLUB.

The Cleveland Florists' Club is going to have a special car, Cleveland to Boston, to attend the second National Flower Show. The Cleveland Florists invite all who can to join them on this train. Lets make this and Ohio Special. Cleveland is the logical starting point for Ohio and we should be able to bring a crowd of Ohio florists into Boston that would open their eyes. Don't "Let George do it." Go yourself and see for yourself what a National Flower Show is.

Lake Shore train leaves Union Station, Cleveland, Friday, March 24th, at 7.40 P. M., arriving in Boston 2.40 P. M. on the 25th. Railroad fare \$13.25 one way; lower berth \$3.50, upper berth \$2.80. Send in your reservations early as we may need two cars. Address Frank A. Friedley, Rocky River, Ohio, Vice-President, Ohio North.

CLUB AND SOCIETY NOTES.

The Greater New York Florists' Association held its first annual dinner and reception at Rau's restaurant, Brooklyn, N. Y., on Wednesday evening, March 8.

At the regular meeting of the North Shore Horticultural Society, March 3, Peter Miller, president of the Gardeners' and Florists' Club of Boston, was present with a paper on "Varieties of Grasses for Lawns." The paper was of great interest to the members present. A lively discussion followed, during which Thomas J. Grey brought out some points. Government inspection of seeds was discussed.

Among the interesting exhibits at the Spring Show of the Worcester County (Mass.) Horticultural Society, on March 2nd, was a remarkable group of seedling orchids raised by George McWilliam. *Cymbidium Whitiniana* (its first exhibition), *Calanthe Orpetiana*, *C. McWilliami*, *C. Whitiniana* and other gems of the orchid family were among them. L. C. Midgley, H. F. A. Lange and E. W. Breed were well represented in the various plant and cut flower classes.

A LINE OF NOVELTIES.

Messrs. Zirkman and Shoch are at the Quincy House, Boston, this week with a superb display of M. Rice & Co.'s florists' supplies comprising many rich novelties as well as staple goods. They occupy two large sample rooms and are doing a big business. Among the most attractive wares are twig, reed and willow baskets in innumerable designs finished in verde antique effect, a color basis with which the tints and shades of all flowers and foliage make harmonious combination. There are new ferneries, also, in this finish as well as gold. Bridal lace scarfs for use instead of ribbon are among the best sellers and they show a chaste parchment paper in watered-silk finish which is intended as a substitute for ordinary waxed paper in flower boxes of the finer class. Ribbons in two-toned effects, lavender ruscus wreaths for use with white flowers, etc., particularly after violet wreaths have gone by, are shown in fine array. There is a very large collection of metal wreaths for which orders are being taken for delivery after Easter for Memorial Day use.

CHICAGO HUSTLERS.

Our esteemed friend P. J. Foley of the Foley Mfg. Co., Chicago, calls our attention to the fact that in our account of the thirteen new greenhouses being erected by Pöhlmann Bros. we omitted to mention the main fact that his company had furnished all of the wood work as well as certain parts of the metal used in connection with the woodwork. Furthermore, he states that he is now shipping the woodwork for the second batch of 13 houses for Pöhlmann, which constitutes the next addition to this immense establishment. The poet says that

"Praise from a friend or censure from a foe
Are lost on hearers who our merits know."
Everybody knows Foley, *Verb. sap.*

A BEAUTIFUL NEW CATTLEYA.

John McFarland of North Easton, Mass., was awarded a silver medal by the Massachusetts Horticultural Society on March 4, for a plant of a seedling cattleya raised by himself. The seedling has not yet been named, but will within a short time. It is the result of a cross of *Cattleya Dowiana*, pollen parent, on *C. Lawrenceanum* McFarlandi. The characteristic gold striping of *Dowiana* appears in the throat but the lip and, in fact, the entire flower is larger than that of *Lawrenceanum*, while the color is so dark as to be almost red, the sepals and petals being only slightly lighter in tint than the lip. It has been pronounced by experts as unique. The plant bore two flowers.

CINCINNATI NOTES.

Thos. Windram left Tuesday, March 7, for a two weeks' visit to his asparagus farm at Leesburg, Fla.

Geo. Tromeys returned on Monday, March 6, from a week's visit to New Orleans.

Miss Margaret Anstead has returned from New Orleans and reported having had a delightful time attending the Mardi Gras carnival.

Eddie Bossmeyer, with C. E. Critchell, who has been on the sick list with grip, is again on duty.

OBITUARY.

Mary E. Habermehl.

Mary E. Habermehl, wife of Edward W. Habermehl, 2230 Diamond street, Philadelphia, died on the 6th inst. Mrs. Habermehl, we understand, died very suddenly after an operation at the hospital. Edward W. Habermehl is the junior partner in J. J. Habermehl's Sons, florists, to whom the trade extends sincere sympathy.

NEWS NOTES.

Rochester, N. Y.—David McGregor has purchased the business of George J. Morgan, 211 Lexington avenue.

Newport, Ky.—The florist business of the late H. Edwards, Alexander Pike, has been purchased by Anton Hummel.

Cleveland, Ohio—Harry Dow has purchased the flower and seed business of Miss M. Schueren, 4403 Loraine avenue.

Chattanooga, Tenn.—Chattanooga Nursery Co., I. W. Hunter, proprietor, has been purchased by J. C. Hale, who has taken possession of the property.

New York City—Judgment for \$335.00 is reported by Charles Millang to have been secured against the Valentine Company, David Bell, manager, 158 East 110th street.

New York—Another strike, declared by the drivers for the U. S. Express Co. on Friday last, carried dismay to the flower trade of this city and caused considerable delay and embarrassment for a few hours, but before night the trouble was amicably settled.

Lompoc, Cal.—Definite steps have been taken towards the erection of a warehouse for the Lompoc Seed Growers' Association. It is their intention to erect a building 75 x 300 feet as nearly fireproof as possible. Land adjoining the range has already been secured.

Clayton, Ohio—The range of greenhouses belonging to the St. Louis Carnation Co. has been purchased by C. De Wever and he is moving them to St. Louis, rebuilding already having commenced there. This will add four houses, each 25 x 100 feet, to his St. Louis range.

New York—Changes among the W. 28th street wholesale florist establishments are still going. James McManus will move from 42 to 57 as soon as the latter is vacated by A. H. Langjahr. Kessler Bros., now at 136-138, will move across the street to a new store now being remodeled.

New York, N. Y.—Two stores being remodeled at 111-113 West 28th street have been leased by Kessler Bros. One store and the greenhouses in the rear will be occupied by Kessler Bros., and the other store has been leased to the Growers' Cut Flower Co., who expect to occupy it about May 1st.

Sandpoint, Idaho—Arrangements have been made for the location here of a factory for the manufacture of non-rusting and non-breakable transplanting flower pots, patent of which is held by Will C. Hill of this city. Construction is expected to start shortly on a building 40 x 80 feet in which it is said will be employed fifty men.

CHICAGO NOTES.

Trade Items.

O. F. Larson has opened a retail store under the name of the Ogden Park Florist, at 1635 63rd street. Mr. Larson was in business for several years at Joliet and for the past year has been with Swain & Nelson.

It looks now as if a large number of Chicago florists would attend the National Flower Show at Boston, March 25th to April 1st. There is much enthusiasm and a large party will no doubt leave here on the Lake Shore road March 23 at 5.30 P. M.

A. C. Rott of Joliet, Ill., was in the city arranging for stock Monday. Mr. Rott makes a special feature of window advertising, bringing out something original for each holiday, and says he finds the time and money spent for these special days a good investment.

There are plenty of indications that the green and other artificially colored carnations will be in evidence again for St. Patrick's day. Nothing altogether new has been offered for an attraction on that day, and the sham-rocks will have their innings as usual.

Personal.

Miss Josepha Then has taken a position in O. J. Friedman's retail store.

Mike Fink has been missed from his accustomed place at Kennicott's the past week. He has been ill with grip.

L. H. Winkleton, who has been 16 years with Bassett & Washburn in their wholesale store, will leave after Easter to go into another line of business.

Ernest Farley and W. O. Johnson left the Percy Jones Co. last week. W. O. Johnson is now at Vaughan & Sperry's and J. Heidelberg, formerly of the A. L. Randall Co., takes his place.

PHILADELPHIA NOTES.

Alexander B. Scott is enjoying a very pleasant vacation at Hot Springs, Va. He expects to return in about a week.

We had a pleasant call from R. T. Brown of Cottage Gardens Co., on the 1st inst. We understand this company has discontinued the landscape feature of their business.

There will be a large delegation from this city to the National Flower Show at Boston—which opens on the 25th. Almost every other man you meet answers the inquiry promptly by saying, "Yes, I'm going."

We are pleased to report that one of the right-hand men of the Michell outfit (Israel Rosnosky), who has been confined to his room for two weeks with a severe case of the grip is mending slowly and hopes to be able to take

his place with Maurice Fuld and others in looking after the firm's interests at Boston during the continuance of the National Flower Show.

Robert Craig arrived home last week after a pleasant sojourn in the Isle of Pines, etc. Health much improved, sleeves rolled up, ears pinned back—and ready for the biggest spring business on record. It's fine to be chipper and cheerful!

Chas. Henry Fox will move in a few days to his new store, 223 South Broad street, a few doors below his present location on the same side. The property on the corner of Broad and Walnut streets has been sold to the Rentz-Santley Co., who will erect a hotel on same.

The "Prinz Oscar" arrived this week with a large shipment for M. Rice & Co., supplementing among other things their depleted stocks of lace corsage shields, bridal scarfs, Easter baskets, butterflies and lace bouquet holders.

This firm has had a tremendous run on their new designs in these items this season.

Among the visitors at the executive meeting of the Peony Society on the 1st inst., were: Bertrand H. Farr, Reading, Pa.; R. H. Humphreys, F. Mendelsohn Meehan and Harry Sim—the latter representing J. D. Eisele, of the Henry A. Dreer Co.

Visitors: Mr. Albert, manager for E. C. Campbell & Co., Rochester, N. Y., and about ninety-five other distinguished strangers from distant points—most of the latter being at the invitation of Messrs. Dreer, to inspect their big new range of greenhouses at River-view, March 8th; R. M. Ward, New York.

"Buds," the enterprising young New York seed house has presented a silver cup for award at the National Flower Show, in such class as the managers may select.

AMOS H. WHIPPLE, Proprietor

During Recess

Nassau County Horticultural Society.

The Euchre and Dance held at Pembroke Hall on Monday night, Feb. 27, under the auspices of the Nassau County Horticultural Society was a brilliant success. The sale of tickets were limited to 300 and long before the date of the affair the entire supply had been disposed of and more could have been sold but under the circumstances it was impossible as the Hall was filled to its utmost capacity.

After the Euchre was over and the prizes distributed to the winners, the remainder of the night was devoted to dancing which was kept up until the "wee sma' hours." Miller's orchestra provided the music. Several couples also enjoyed some Scotch dances, the music for the latter was provided by Harry Tough on the bagpipe. There was also a supper which was enjoyed by all.

E. WESTLAKE, Cor. Sec'y.

The New York Banquet.

The outlook for the annual dinner of the New York Florists' Club, March 18, is very brilliant. A member of the committee reports that already practically every seat on the ground floor—230 chairs—has been sold.

Ladies' Night at Astoria.

Last week's session of the Astoria, N. Y., Bowling Club was Ladies' Night, about twenty being in attendance. There was a nice supper and plenty of bowling, the first prize, a pair of candlesticks, presented by Mr. Arnold, being captured by Mrs. Einsman. Among the other useful presents distributed were some capacious pocket-books.

Rutherford vs. New York.

A fine reception and lunch was given the New York bowlers by the Rutherford boys on March 1st at the Cronstadt alleys where the return match was held on March 1. Rutherford led by 60 in total pins and the noise and exultation of the Jerseyites can better be imagined than described. The scores follow:

ST. LOUIS NOTES.

W. J. Pilcher's new violet Mazzura is holding up remarkably and flowers and stems are as large as in mid-season. Mr. Pilcher says the flowers brought him big returns all season. When Californias sell at 50 cents per 100, the Mazzura brings \$1.00.

Friends of George Schriefer of Kuehn's, St. Louis, who was married recently, got together a good sized purse and purchased a fine cut glass water set which was presented to the happy pair. They were also presented with a handsome leather couch by C. A. Kuehn.

William C. Smith, president of the W. C. Smith Wholesale Floral Co., St. Louis, was married on March 9th, to Miss Helen West, of Edwardsville, Ill. The couple will spend their honeymoon with friends in Chicago and Mil-

waukee. Mr. Smith is treasurer of the St. Louis Florist Club and has many friends in the trade who wish them much joy and happiness throughout their married life.

Harry Young, treasurer of the St. Louis Horticultural Society, is a great worker in behalf of the society. Mr. Young says that the show this year will be the largest and best the society has yet held. The Chrysanthemum Society of America, which meets here at same time will also be a great help and attraction. The officers of last year hold over this year. The show will again be held in the Coliseum.

New York plant auction sales begin next week. See our advertising columns for information concerning this inevitable sign of approaching spring time.

You can rely on it for positive results, without fear of failure or dissatisfaction.

\$2.50 per gallon; \$1.00 per quart.

"FUNGINE"

An infallible remedy for mildew, rust and other fungus diseases. A clean, safe and easily applied spraying material, particularly adapted for the greenhouse.

\$2.00 per gallon; 75c. per quart.

FOR SALE BY SEEDSMEN

Send for name of nearest selling agent.

Our products are not alone endorsed, but are continuously used by leading commercial growers, professional gardeners, park departments and state colleges of the country.

APHINE MANUFACTURING COMPANY
MADISON, N. J.

FIRE RECORD.

St. Louis, Mo.—The flower store of W. A. Murray, 1254 Union Boulevard, was damaged by fire on February 24th; loss about \$500.

Floral Park, N. Y.—The residence of the late E. V. Hallock was practically destroyed by fire, February 19th; loss estimated at \$6,000.

Sandy, Utah—The floral establishment of B. C. Ward was destroyed by fire Tuesday, February 21st; loss about \$1500, no insurance.

Connellsville, Pa.—Through the burning of a neighbor's stable one of the greenhouses of George Schomer was destroyed with all its contents.

Pittsburg, Kan.—Fire starting in the steam heating plant almost totally destroyed Wright's Greenhouse on February 23rd. Loss about \$1,000, partially covered by insurance.

Hot Springs, Ark.—Fire starting in an unoccupied dwelling next the Vestal Floral Co.'s building destroyed both structures causing a loss of \$3000, partially covered by insurance. The Vestal Floral Co. purchased this property only about three or four weeks ago and had just installed a complete outfit.

 Frau Helene Harms. New yellow, \$2.00 per doz.
 Lafayette. Crimson-scarlet, \$1.50 per doz.; \$10.00 per 100.

GLOXINIAS

Choicest Mixture, or in Separate Colors, as Blue, Red, White, Red with white edge, and Blue with white edge, 60c. per doz.; \$3.50 per 100; \$30.00 per 1000.

FANCY LEAVED CALADIUMS

We have the largest stock in the world. Over 400 varieties, including not only all the good standard sorts but many new varieties never offered in quantity before. This is one of the most valuable plants for decoration of the florists' store window during the summer months and during recent years we have sold many thousands for this purpose. We especially recommend the choice rare and new varieties at \$15.00 per 100 for this purpose.

We offer special selections according to variety as follows:
 Choice Standard Varieties. The finest collection ever offered at the price, \$1.75 per doz.; \$12.00 per 100; \$100.00 per 1000.
 Choice Rare and New Varieties. A splendid assortment, especially valuable for the retail florist, \$2.25 per doz.; \$15.00 per 100; \$140.00 per 1000.
 Rare New Varieties. The most recent introductions, \$3.50 per doz.; \$25.00 per 100.

Gladiolus, Tuberoses, Ismene, Montbretias, Tigridias and other Summer Flowering Bulbs are offered in our QUARTERLY WHOLESAL LIST, and also a full list of Seasonable Plants, Seeds, etc. Write for it if you have not already received a copy.

THE ABOVE PRICES FOR THE TRADE ONLY.

IMPORTANT ROSES

We are offering to commercial rose growers, who are alive to the possibilities of increasing their profits, stock of the best there is in the new varieties. These roses represent the nearest to the ideal that exists in roses today and the quality of stock sent out by us is above question.

DARK PINK KILLARNEY. With a Killarney habit and a color that can be equalled only by the lobe of a Cattleya, it sells on sight.

DOUBLE PINK KILLARNEY. Stronger in growth than the parent and with a large, perfect flower, it stands alone in its class as the representative of the highest type of forcing roses.

PRINCE DE BULGARIE. As a twelve months rose this variety is good, while for a spring, summer and fall bloomer it has

no equal in its color. And in its color, there is the character that is called life. It is hard to describe the color. "Rosy flesh" is near, but it does not describe the impression the color makes. For a money-getter the rose has been a wonder.

LADY CROMWELL, MELODY, MRS. AARON WARD, RADIANCE and the older varieties are described in our catalogue.

If you are progressive, write us for your young stock and get the best that can be produced.

FINE FERNS

Ready For Immediate Retail Sale

We have an exceptionally fine and large stock of ferns in the following varieties, -first-class plants of exceedingly good value—plants that will please the most critical buyers, both in regard to quality and value.

NEPHROLEPIS ELEGANTISSIMA (Improved). The finest of this type—never showing a Boston frond; has not reverted in the last four years. Fine plants, 6-in., \$6.00 per dozen; 8-in., \$12.00 per dozen; large specimens in 12-in. pans, \$3.00 to \$5.00 each.

NEPHROLEPIS ELEGANTISSIMA COMPACTA. This bears the same relation to elegantissima compacta that Scottii does to Bostoniensis. It is a dwarf, compact plant, especially fine in the small sizes. Fine plants, 6-in., \$6.00 per dozen.

NEPHROLEPIS SCHOLZELI. Fine plants, 3½-in. pots, \$2.50 per dozen; 6-in. pans, \$6.00 per dozen; 8-in. pans, \$12.00 per dozen.

NEPHROLEPIS BOSTONIENSIS. Extra strong plants, 8-in. pans, \$12.00 per dozen.

NEPHROLEPIS SCOTTII. 8-in. pans, \$12.00 per dozen.

SMALL FERNS FOR FERN PANS. Best and hardiest varieties assorted: Pteris Mayii, Wimsettii, Adiantoides, Aspidium Thaisiense, Crytomium falcatum, etc. Strong plants, 2½-in. pots, \$3.50 per 100.

CROTONS. Nice assortment, well colored, 5-inch, \$9.00 per dozen.

F. R. PIERSON CO., Tarrytown-on-Hudson, New York

CINERARIA HYBRIDA

Remember this is the
BEST PAYER FOR EASTER.

We offer our superior strain in 4 in. pots (medium height), latest improvement in size and color, \$10.00 per 100. Now is the proper time to plant them into 5½ and 6 in. pots for Easter blooming.

491 Bourse Bld. PHILADELPHIA, PA.

The National Horticulturist, a fruit-growers' periodical, the official organ of the "National Horticultural Congress," has been reorganized and will be published hereafter by O. O. Buck, of Council Bluffs, Ia.

A bill—Assembly Bill No. 349—has been introduced in the New Jersey legislature by Mr. Burke providing for the erection of a range of greenhouses at the New Brunswick station for horticultural experiment purposes and the prospects look favorable.

¶ Lily bulbs have two arch enemies—green-fly and too much water. When lilies are bad, one or both prevails as a general thing. Of course, sometimes the bulbs are at fault but 75 % of the time they are not. Any grower who permits his lilies to be infected with green-fly don't deserve good lilies. He has no more business to allow green-fly on his lilies than he has to allow fleas on his body. Again a grower will permit a greenhorn to water the bulbs—whereas it takes a man who knows how and when. Any grower who buys Horseshoe Brand Giganteum lily bulbs and gives them the attention they deserve, cannot help but have first class lilies at any time of the year, with a minimum of loss. There are positively no better bulbs grown anywhere in the world and no one takes as much pains toward quality as the producers of the Horseshoe Brand Products.

¶ Of course, they cost more than others because they cost more to produce. But they don't cost more than they are worth. Try them.

Not How Cheap
But How Good

Seed Trade

A Virtuous Seedsman.

According to some of the misguided people in official positions, there is no such thing as "a virtuous seedsman." But we think all must admit that the seedsman whose picture we present herewith must be "virtuous" at least—if nothing else. This picture has been enlarged from an accidental discovery of a tintype of Howard M. Earl at the age of 16. Mr. Earl is now 42 years old and manager for the seed house of Burpee & Co., Philadelphia. If he was not virtuous at 16, then the inno-

HOWARD M. EARL

At the age of sixteen.

cent look of this picture bears false witness. If he is not without guile now, after 26 years' continuous service with the same firm, the present writer, among his hosts of friends all over the world, would like to see some one get up and say something. Mr. Earl, you are a standing menace to all those who accuse the seed trade of crookedness. You are a walking advertisement of sincerity, industry, and achievement in the advancement of the "Best Seeds that Grow"; not only powerful, but tireless and sleepless—as well as virtuous—in improving the quality and quantity of the farm and garden products of the country, and deserve a monument. May you live long and prosper. G. C. WATSON.

A collection of seedling gladioli, over 300 in number, produced by A. E. Kunderd of Goshen, Ind., has been purchased by Montague Chamberlain of Boston, and will be planted on his farm at Groton, Mass. Mr. Kunderd is best known as the originator of the Ruffled gladioli.

Mr. Chamberlain's is a new name among New England growers, though he is credited with having already a large and well selected collection.

BEAUTIFUL EASTER NOVELTIES NOW ARRIVING

THE Florist Supply House of America

[Without A Competitor]

H. BAYERSDORFER & CO., 1129 Arch Street, PHILADELPHIA, PA.

PERSONAL.

John McNeerney has taken a position as designer and decorator with J. J. McManmon, Lowell, Mass.

Miss Marion Davis, daughter of Charles A. Davis, florist of Dover, N. H., was married to M. Reade Hall on February 22nd.

John Yolsner of College Point, N. Y., just recovering from pneumonia, has gone to Bermuda for a few weeks' recuperation.

William Fischer, proprietor of the

South End greenhouses, Southington, Conn., fell through a broken floor at his place of business and broke one of his ribs.

Ernest Philips, recently assistant gardener at "Castle Gould," L. I., has succeeded William Mackay as head gardener for E. T. Gerry, at Newport, R. I.

John I. Raynor and Mrs. Raynor, who have been sojourning in California, are due to arrive home in New York on March 24.

John Donaldson, of Elmhurst, N. Y., has been confined to the house for the past two weeks with a very severe and painful attack of inflammatory rheumatism.

A letter from E. H. Wilson, dated at Ischang, China, February 3, states that he will sail from Shanghai for Vancouver on March 14, and hopes to be again in Boston by middle of April.

A card from J. McHutchison, dated at San Pauli, Brazil, states that he is enjoying his South American vacation greatly and will proceed as far as Valparaiso. He is enthusiastic over the grandeur of the Brazilian vegetation.

Visitors in New York: Sam M. Sibley, representing Leonard Seed Co., Chicago, Ill.; A. Cowee and Mrs. Cowee, Berlin, N. Y.; G. H. Fenson, Somerville, N. J.; J. C. Vaughan, Chicago, Ill.

Flower Market Reports

BOSTON Stock is accumulating rapidly in the city wholesale marts and values have taken a substantial drop on large quantities of any kind of stock, although on small selections the quotations do not vary greatly from those of last week. There are practically no American Beauties in this market worthy of the name, but of all other roses there is an abundance. Carnations are still enjoying a good demand and are cleaned out satisfactorily from day to day. Bulb flowers are exceedingly plentiful with prevailing prices below cost of stock and production. Violets are away down lower than ever before at this season. Sweet peas are plentiful and many have a hard job to find a customer, but those with long stems seem to find a ready market still. Length of stem seems to count for more than quality of flower with sweet peas at present. Lilies are in full supply, with moderate call. The best being received here are from Burns of Spring Valley, N. Y., and despite the distance they have to travel they display remarkable substance and endurance. Sales of gardenias are slow and the same is true of cattleyas.

Bright weather the past week brought on a good supply of everything. There is no shortage in the rose or carnation line, the latter being in good supply. Some excellent Killarney, Richmond, White Killarney, Bon Silene, and other roses are in and are having a good call. Violets and lily of the valley have been on the quiet side, but sweet peas have sold well.

There are plenty of lilies and bulbous material.

CHICAGO Chicago market responded very quickly to the few days of sunshine. Stock increased quickly and business was active during the past week. The second week in March finds trade comparatively slow but stock still not plentiful enough to go to waste, the previous week having used up everything. Roses especially were scarce when compared to the demand and Saturday they were entirely sold out.

Carnations, too, were scarce and only bulbous stock available near the close of the day. Beauties are good but scarce, especially long ones, and at this writing medium roses of all kinds are in short supply. There are plenty of good tulips in the market and selling well. All bulbous stock is bringing in good returns this week and the supply is expected to hold out till Easter. Quantities of violets are seen and are moving slowly. A good supply of miscellaneous stock is on the counters and

Flower Market Reports

(Continued from page 327)

afford variety for window display. Asparagus strings are scarce. Sweet peas sell well, especially good long-stemmed stock. Callas are very much in evidence everywhere.

The opening of the CINCINNATI Lenten season has had little or no effect on business. Market conditions continue very satisfactory. Good Beauties are on the short side. There is a liberal supply of other roses, and the call for short and medium grades is heavy and at times the supply is not equal to the demand. Carnations are plentiful and have taken a drop in price. White being in exceptionally good demand price on these has held very firm. Enchantress and Rose Pink enjoy a fair call while red and Lawson move more slowly and prices on these have to be sacrificed to make sales. The past week found an accumulation of bulbous stock all of which move slowly and sales are made at buyers' price. White and lavender Dutch hyacinths move freely as do La Reine and Murillo tulips and paper whites. Callas and lilies are plentiful with only a fair demand. Sweet peas are in heavy crop and price is low. Single violets have let up a little in supply with a slight advance in price. Double violets are sufficient for present needs. Asparagus plumosus and Sprengerii in good supply and demand.

Heavier shipments have DETROIT brought wholesale prices down a few notches. Roses, which have been very scarce for several weeks, are coming more plentifully, but lilies are still on the short side. Carnations are coming in fine and prices reduced. All other stock is coming in good quality and quantity.

Trade has been decidedly stagnant on NEW YORK most lines since Lent began. The market is dull and, with sunny weather, a considerable surplus has been piling up from day to day in wholesale hands with the inevitable result of declining prices and conditions strongly favoring the bargain counter job lot purchaser. If anything can be said to be in demand it is American Beauty roses with good heads. Most of the Beauties just now are gnarled and discolored, regardless of length of stem. Richmonds of the higher grades profit somewhat from the generally crippled condition of the Beauties. Tulips of the deeper colors

are selling fairly well also, especially such as Flamingo. Color is also demanded in cattleyas and the deeper the shade the better the price and readier sale. Daffodils, lilies, freesias, and violets are still in oversupply.

The early part of PHILADELPHIA the week was all right, but as soon as Lent struck there was a big falling off. It always takes about a week for things to adjust themselves after Lent sets in; after that there is very little difference. Everything plentiful with the exception of American Beauty roses, and perhaps in a minor degree good white roses. There are enough and to spare of "runts" in American Beauty, but the higher grades are very scarce indeed. There were a few flowers on view of the Double Killarney this week, and certainly this is a magnificent variety as to size, substance and color. If there be any doubting Thomas still unconvinced let him look it up. Carnations are in large supply but nothing to the violets! The latter are here by the carload and, to make matters worse, the police are busy chasing the curb merchants off the streets. In cattleyas there seems to be a larger supply and mostly of the light-colored Schroderae. The rich, dark-colored Trianae is scarce. Most buyers prefer the latter. Southern daffodils have just begun to make their appearance. Lower prices rule and there is plenty of fine stock in all lines. The buyer is now having his innings in good earnest.

The market last week ST. LOUIS was crowded up with stock. Dull trade the first few days of Lent caused the slump. Quality is of the best and prices have dropped on everything. The weather has become spring-like, and the great crowds out have made great transient trade for the down-

town stores. Prices on roses run from \$3 to \$8 per 100; Beauties \$5 per dozen for long fancy; carnations \$1 to \$2.50; violets 25 to 50 cents; callas and Harrixi \$10 to \$12.50; lily of the valley \$2 to \$3; bulbous stock, all kinds, from \$1.50 to \$4.00. Ferns have gone up to 25 cents per 100.

NOVELTIES

"REAL NOVELTIES AND NOVEL REALITIES."
In Hardy Plants.

The biggest collection offered anywhere, is found in our NOVELTY CATALOGUE, just out.

Of great interest to the amateur and commercial grower alike.

It describes and illustrates uncommon plants of singular beauty, desirability and simplicity of growth; inexpensive to acquire.

Besides; our low prices, plants are big, making them valuable, in small or large quantities.

Mailed along with our illustrated wholesale catalogue of Hardy Perennials, etc., on receipt of three 2c. stamps, which pays postage only, and which amount is credited on first order.

HEATING TROUBLES OVERCOME

The exasperating slowness of a hot-water system having a defective circulation is overcome by a

CASTLE AUTOMATIC CIRCULATOR

This device positively forces the hot water through the system, no matter how long the pipe lines or how complicated the piping.

Its action does not depend upon temperature nor upon additional pressure which is likely to cause leakage.

It corrects errors in piping without expensive alterations. Cold returns are unknown with this device in operation.

Uniform heat in all portions of the system.

Our booklet tells you all about it.

WHAT THE USERS SAY

Use Soft Coal — The Kroeschell Works Like a Charm.

The No. 2 Kroeschell boiler has been in operation for some time. We are using soft or bituminous coal, and it works like a charm. We are very much pleased with it indeed.

J. T. LOVETT, Little Silver, N. J.

Used a Sectional — Prefers Kroeschell.

Have no trouble to keep up temperatures in my houses with the No. 10 Kroeschell boiler. The boiler has given entire satisfaction. We had a cast iron sectional boiler—I wouldn't have one for a gift any more.

California Sends 3000 Miles for the Material for this Greenhouse

That's a long way! But Mr. J. B. Coryell, of Menlo Park, wanted a greenhouse that was planned, designed and manufactured by Expert greenhouse people. The matter of sending 3000 miles for his house was not a consideration. He wanted the best Iron Frame house he could get. He got it. We recently sent him materials for two more.

Next time our California friends order a house, we will ship it direct from the factory at Chicago.

Just as we are going to press, Mr. Coryell has ordered material for another house, the length of the last two ordered.

The **SERVICE BUILDING** is usually a source of great annoyance to the up-to-date gardener and it requires architectural ability to design appropriate **Potting Houses** that will add to the attractiveness of the Greenhouses. You will admit that this **SERVICE BUILDING** is unusually attractive. Its Old English Architecture is along the same lines as other buildings on this large estate; it is equipped with all modern improvements for the comfort of the gardener and his assistants and the connecting house, sixteen feet long (ample for Propagating purposes), prevents the shading of adjoining houses.

Will be glad to talk to you on the **SERVICE BUILDING**.

Fruit and Vegetables Under Glass

INARCHING AND GRAFTING

Inarching and grafting are methods of propagation of the vine, apple, pear and other fruit trees, but it is the vine I would refer to now. Inarching seems to be conveyed to the mind at once when we think of the vine growing in its wild state with its long trailing stems, intertwining with each other and being supported by stronger trees. Rods or stems will cross each other and with a motion caused by the wind an abrasion of the outer barks results and while the sap is flowing freely a union of the two will often ensue. Much may be learned from this nature lesson and coupled with science and skill can be of great help in propagating or changing our vines grown under glass. Weakly constitutioned varieties are improved by inarching or grafting on hardier and more vigorous stocks. West St. Peters, a variety little known, when put on a robust stock has proved a great success. Again, shy bearers can be made sure croppers by giving them another's roots. Take, for instance, Gros Guillaume, better known as Barbarossa, (but which is not

INARCHING.

A. scion (still supported on its own roots).

B. stock.

Tongue graft as it would appear before strings and grafting wax have been applied. (A) Scion in form of a bud. (B) Stock on parent to be changed. (C) Scion ready for fixing onto stock.

Barbarossa: the true Barbarossa is not worth cultivation.) It is described as having a reddish color and poor flavor. Gros Guillaume has been known to only yield a few bunches to a fully developed vine and keep this up for years with apparently no reason, while other rods of the same variety show no trouble whatever. Black Hamburgh is often used as a stock while Foster's Seedling and Muscat of Alexandria have been used for productiveness. Experiments have been made by double grafting, as is the case with some apples and pears, but no reliable line has been secured.

Another advantage of inarching is that there is no necessity to lose a crop. An eye can be put on and the growth run up beside the old rod as it carries its crop, taking this latter out when pruning next season, and leaving the new variety to take its place. Along through March is the best time to do this work, as the conditions are generally suitable. It is necessary that five or six leaves be fully expanded to draw the sap up to the scion and also to pass off any excess through the spores or stomata of the leaves. Loss of vitality through bleeding is thus nullified and a speedy union is effected. The scion can take the form of a vine in a pot, easily placed in position on a lateral which was saved at pruning and has been stored away in a cool moist place. This latter can have its base end inserted in a bottle filled with water,—a few pieces of charcoal being put in to keep it sweet—and suspended in the required position. The scion should be kept in the same house as the stock for a few days before operating, to cause a little excitement, making the bud ready to take up the sap. One method is to cut both scion and stock on the side as you would for an eye-graft, seeing that both fit the other and the different tissues of both come together, binding them up tightly with raffia and covering over with grafting wax. Stop the growth back to four or five leaves, which throws the sap back into the scion bud. The better method is to put a tongue into it. A union is formed quicker and better and in six weeks it should be ready to be cut away from the parent. This should be done gradually, first loosening the strings to allow the wood to swell and later cutting one half of the stem away at one time. Grafting is similar but it does not give the scion any support. Should a variety be needed on different roots it can be grafted in a pot and grown on a season before planting. Where an eye has been accidentally rubbed out of a spur, a bud can be put in close to this to take its place.

THINNING GRAPES

This is a tedious job, requiring a steady hand and good eye. Looking at a bunch which has just been thinned one would imagine in the majority of cases that it would never fill up, as apparently not enough berries are left, but after a few weeks a different opinion is forthcoming. Much depends on the variety one is working as to how many berries should be left. The size of the full grown berry must always be borne in mind and after a little practice this will seem to present itself to the mind's eye. Such large-berried varieties as Gros Colman, Gros Maroc and Princess of Wales will need a much more severe thinning than smaller-berried ones, as Black Hamburgh, Foster's Seedling and Buckland's Sweetwater. Muscats are in a class by themselves. It is advisable to go over each bunch twice, leaving an interval of ten or fifteen days between. This allows of leaving two or more berries, should the required one be doubtful.

To commence, tie up any heavy shoulders to the supports above. This allows berries to be left on the under side. Start by taking off the surplus berries from the bottom of the bunch and work up. Always leave the extreme end berries which helps to enlarge the bunch

and the others should have their stems run at right angles to the main stem of the bunch, or, in other words, should look to be in tiers, each tier of berries being one flat row. In nearly every case this will necessitate all the underneath berries and any growing upwards being removed. Seedless berries are useless and can be removed right away. Do not allow berries to get too large and over-crowded before thinning, otherwise it will take double the amount of time and berries are often pricked with the scissors. The grafting of bunches can be reduced at time of thinning. Five is enough for a pot vine to carry successfully.

STRAWBERRIES

Cease feeding strawberries as soon as the fruit begins to show color. Give as much clear water as they will take, and all the air and light possible. A shelf near the glass is an ideal place. Leave a crack of air on the house all night if the weather will allow. Other batches can be brought in at intervals and will come along much more quickly than formerly.

MELONS

Melons started the first of the year will now be swelling their fruit and will need nets to support them. Two or three fruits are all that plants will carry successfully now. If surface roots are plentiful give a light top dressing, adding some good manure to the soil. This can be repeated as the roots show through again, but do not put any soil around the stem or later on it may cause canker. Feed twice a week if no top dressing is added. Syringe morning and afternoon, shutting up early enough to run the house up to 90 degrees and taking care to have the plants dry again before night.

PEAS AND DWARF BUSH BEANS

These can be sown in boxes 3 feet by 6 inches, having bottoms which are easily removed. These can be brought on inside and as soon as the weather is safe can be transferred to the open ground, by removing the bottom, without damaging the young plants. They will be in several weeks ahead of any sown in the open ground.

George H. Penson

Mr. Penson's next notes will be on: Care of Muscat vines; Packing strawberries; Apples and pears; Late peach houses; Work in the kitchen garden.

The Cultivation of Gardenias for Winter Blooming

To cultivate the gardenia successfully and profitably it is necessary to have good strong plants well rooted in 3-inch pots ready to plant in the benches by the middle of May. To have plants this size the cuttings should have been rooted in January in a good bottom heat, placed inside a glass case, and will as a rule be ready to pot into small pots in about three weeks, when they should be returned to the case until they are nicely rooted in the soil, after which they should be taken out and placed on a bed of ashes as close to the glass as is reasonable.

If possible lay up a heap of good sod with alternate layers of green cow manure, the latter to be spread so that it is about one third the thickness of the layers of

sod. This should be laid up as long as possible before using and, as above stated, the plants should be ready for benching by about the middle of May. Cover the bottom of the benches with a thinly-cut sod, laying the grass side downwards. Chop down and bring in the soil which has been laid up, and fill the benches level to the top which, I presume, will be about five inches deep inside, and which is all the depth necessary. Let the soil lie in this state exposed to the sun three or four days to dry it out thoroughly, then give the bed a thorough pounding all over, making it as level as possible. This will incorporate the cow manure with the soil so that it will be scarcely noticeable and also counteract the crudeness of the same. Now set the plants out fifteen inches apart each way.

I prefer benches that are not too wide—about four feet and five or six inches wide as they dry out better and are more easy to get at in syringing. These will take three rows of plants planted about four inches from the outside of the benches and it also gives a better circulation of air through the plants. Use no shade on the glass whatsoever, giving them all the sun possible, and syringe them five or six times a day all through the summer, keeping plenty of moisture on the floors at all times. Toward the fall some of the syringing can be dispensed with, but not entirely so all through the year, as these plants should be sprayed over at least twice a day even in winter, providing you have your temperature right; in the morning and again early in the afternoon. This is very essential as if applied with force it tends to keep down red spider and mealy bug to which they are an easy prey.

Water the plants individually after they are first planted until the roots begin to run well in the soil when the benches should be watered all over. It would be well, in fact it is almost necessary—to have water in the winter time, both for syringing and watering, the same temperature as the house they are growing in. This prevents any check, helps the buds to expand and open more quickly and also is one of the preventives of the falling of the buds. Plenty of air should be given all through the summer and the early fall. Throw the ventilators wide open both on the top and front all through the hot weather, not even closing the top ones at night and if the nights are warm leave the front air on as well. This is very important as it helps to solidify and ripen the wood without which your show of flowers will be very scant. Even in the winter time air should be given in small quantities on all favorable occasions raising the ventilators on top about half an inch when the inside temperature reaches 75 degrees and increase in small quantities as the glass continues to rise, without giving any chilling effects, closing them down when the thermometer touches 72 degrees and at the same time damping the floors down well. The night temperature in the winter should be kept about 68 to 70 degrees.

After the plants have grown six or seven inches pinch back all the leading shoots on each plant to make them break and give them a foundation. Continue this up until the latter part of July, at the same time taking off any flower buds which may appear. Now let the plants make all the growth possible after which when completed they will set their flower buds for the winter. Be sure that the plants never suffer for water as this is likely to cause the buds to fall off in a shower.

Another very essential thing is the position of the hot water pipes. It is almost useless to attempt to grow these plants unless the pipes run underneath each bench as there is nothing in my estimation which will give gardenias the sickly foliage sometimes seen, as to have their feet all the time wet and cold. As the beds become filled

with roots liquid manure waterings twice a week if necessary will not harm them, or a top dressing of the same compost they are growing in with a little more cow manure added as dry as possible will help them out in good shape.

Some people prepare a very elaborate mixture of soil for these plants, but I have always found the simple compost above mentioned to be adequate for a good clean healthy growth and A-1 flowers.

Arthur Griffin

Seasonable Notes on Culture of Florists' Stock

ACHIMENES

Tubers that have been stored away should be started into growth now. A good way is to place them quite thickly in pans, that have been previously filled with good drainage material finished off with sand so the pans will be three-quarters full. Then cover the tubers with sand. Keep the sand moist but not too wet or the tubers will be ruined. Place them in a house where a temperature of at least 65 degrees can be given. Young growth should appear in about three weeks and when the plants have made a growth of an inch or two they should be potted up using 6 to 8 in either a 5 or 6-inch pan or pot. Give them ample drainage and on this place some turfy material or sphagnum moss. Use a compost of two parts fibrous loam, two parts leaf mold and one part sand, then after placing the plants an equal distance apart, cover the roots with an inch of the compost, firming it around the roots. They should be then placed near the glass, and in a similar temperature to that in which they were started. Achimenes, while growing, like a good supply of water. When flowering begins they will take liquid manure about twice a week. If needed for decorations—as they make beautiful subjects for that purpose—they should be hardened off some before being removed from their warm quarters.

CANNAS

Cannas make very desirable plants for the center of formal beds, in borders to form the background for smaller plants, and for bold planting generally. Roots that have wintered over in a firm and sound state should now be started by dividing the clumps and cutting into pieces of two eyes. Discard any piece that is unsound and place them on dampened moss or sand on a bench and cover lightly with moss. They should have bottom heat, and temperature of from 60 to 65 degrees. When they have made 4 or 5 inches of growth they can be lifted and potted into 4-inch pots using any good rich soil, giving them the fullest light possible so that by planting-out time they will stand the strong sun and wind without harm.

CHRYSANTHEMUMS

Early varieties and those that are intended for exhibition should not be allowed to get root-bound as they will become hardened, which will check their growth. These plants are gross feeders so it is very important to look to the fertility of your soil if you mean to produce fine plants and bloom. Sod that was piled up last fall and mixed at the rate of one part of well-decomposed manure to three of chopped sod is good for shifts up to

May and after that use half its bulk of half-decomposed manure with some bone meal which will make an excellent compost for pot plants. Don't delay propagating all kinds that were especially meritorious last year. For a succession of propagation see that the stock plants are placed in good light and airy quarters. For medium and late varieties, of course, good stock can be propagated as late as the middle of May, but to have first-class stock get all the propagating done as soon after March as possible. To dispose of the black fly give two or three consecutive fumigations.

DOUBLE PYRETHRUM

Plants that are intended for Memorial Day should now be far enough advanced to go into 4-inch pots. Use a good loam three parts, manure one part, and place them in a house where they will have all the sun and plenty of ventilation. They like a cool atmosphere with a sufficient amount of moisture at the roots. As the weather gets milder and with strong sun they will do better if placed in a frame. About the end of April they will require another shift into either 5 or 6-inch pots. Keep the plants nicely staked up and do not overlook fumigating so green fly will not be allowed to get a foothold.

THE PERENNIAL BORDER

All florists should try to make their homes and places of business attractive by the use of plants. It will induce the people to love, care for, and use plants more abundantly in their own homes. As the ground dries up, remove the covering from the perennial border, and then look over the plants as the winter sometimes does considerable injury to many things. Now is a good time to make new show borders. Give plenty of manure and see that the ground is well trenched, because hardy perennials attain the most perfect development when not disturbed for some years. It is a good plan to replant the border every fifth or sixth year, digging up all the plants and giving the soil a liberal amount of cow manure and bone. The strong-growing kinds will need dividing. Before commencing to plant a border, it is well to construct tables or make a list of the material, specifying respective times of flowering, colors, and attitudes so as to have good arrangement. A good dressing of well-rotted manure thoroughly incorporated with the soil is absolutely essential for good results.

THE PROPAGATION OF DAHLIAS

Roots that were started early in this month should produce now some nice sturdy cuttings. Place these on a few inches of well-firmed sand with a little bottom heat. Given good care as to spraying, shading, and ventilation they will be ready in two or three weeks to pot up. After they are well established give them a place where they will have plenty of light and a temperature of from 50 to 55 degrees with ample ventilation. Don't forget to syringe on all bright days to keep down thrips and spider. Young seedlings that show the true leaves can be potted into 2-inch pots, and repotted as they may need it as it is not safe to plant out in this latitude before the first of June. These are all better if hardened off in a frame before they are planted out in the open ground.

John J. M. Farrell

South Norwalk, Conn.

Mr. Farrell's next notes will be on the following: Asters; Anthrums; Candytuft and Stocks; Care of Orchids; Nephrolepis; Preparation for Easter.

seed selling, in any or all of the nursery industries or in any of the allied avocations, you will find pleasure and profit, education and inspiring stimulus in this most notable event in American horticulture. It will be a week well-spent, yielding results material and intellectual which will repay a thousand fold for the effort. The Hub florists and gardeners are fully alive to the great honor which their city enjoys in being the Mecca of horticulture on this auspicious occasion and will leave nothing undone on their part as hosts to the visitors.

An opportunity neglected

Our seed trade notes make reference to the anomalous situation which will exist should the Canadian reciprocity agreement become a law. The privilege of shipping seeds to Canada free of duty loses much of its value to the seed trade if an almost prohibitive duty is exacted on seed catalogues. It is to be regretted that this possible complication was not detected sooner and effort made to have a more reasonable provision inserted. An opportunity, equally desirable, was neglected by the cut flower trade of New York and New England in not making some endeavor to have flowers included in the free list. Lower Canada has always been a good customer for American flowers and still will be, because of her short mid-winter days and low temperature. She would use many more of our flowers if it were not for that 25 per cent. duty and the risks and losses due to custom house delays and interferences.

"The bottom of the ocean"

Prof. Bailey, in his masterly address before the Massachusetts Horticultural Society, spoke of the cities as "half-way stations between the potash, phosphoric acid and nitrogen of the farms and the bottom of the ocean." Passing through a certain flower trade district a day or two later, in the morning hours, we were forcibly reminded of Prof. Bailey's remark on seeing the accumulation of withered flowers heaped in the garbage boxes awaiting transportation to the "bottom of the ocean." Musing on the capability of these products of the florists' labor to disseminate sunshine and gladness and, not lacking in inborn love for flowers ourselves, we confess to having experienced a twinge of regret for the wasted life of these most beautiful and inspiring of Nature's gifts. And then we pondered on the costly miscarriage of the fruits of the flower growers' labor which was here made manifest. An ignominious ending surely for flowers such as the highest exponent of the art could not produce a decade ago! Dr. Bailey's country produce in its prodigal course to the bottom of the sea had contributed something to the comfort of humanity as it passed along. But these flowers—"better they had never been born." We are to have a big gathering—unprecedented in numbers and in attainments—at Boston next week. The experts will have much to tell one another and to proclaim to the world concerning the production of flowers such as never grew before. Would it not be well that they should devote a goodly share of their time and thought to that waste barrel and its mouldy contents—to the labor in vain and broken hopes that go with its cargo to "the bottom of the sea?" Here is an economic question the vital importance of which will keep on growing from year to year and eventually force itself on us with a pertinacity from which there can be no escape.

This is our last word with our readers previous to the opening of the great National Flower Show. HORTICULTURE is a Boston publication, consequently it becomes our especial duty and pleasure to say COME. Boston will extend a cordial welcome to all. Whether engaged in floriculture as a commercial or private grower, dealer or artist, in landscape or garden work, in seed growing or

THE OUTLOOK COUNTRYWARD.

Professor L. H. Bailey, director of the New York State College of Agriculture at Cornell University, Ithaca, N. Y., was the speaker before the Massachusetts Horticultural Society Saturday afternoon, March 11.

Professor Bailey's subject was "The Outlook Countryward," and he said in part:

"Two important movements are now before the country—the country-life movement and the back-to-the-land movement. The country-life movement is the expression of the desire to make the farming regions as satisfying and effective socially and economically as are the towns and the cities. The movement is not only sound but is fundamental, for the reason that an effort to effectualize any necessary existing society is part of the progress of civilization.

"The present back-to-the-land agitation is largely a city effort, expressing many motives and ideas. It is in part an effort of the city to relieve its congestion, in part a desire to find labor for the unemployed, in part the result of the doubtful propaganda to decrease the cost of living by sending more persons to the land, in part the desire of certain persons to escape the city, and in part the effort of real estate dealers to sell land. There can be no objection to properly qualified city persons moving out to the open country, and many of them make good farmers; but for the most part the back-to-the-land movement is socially and economically unsound.

"Something can be done, perhaps, to relieve city congestion by finding opportunities for urban citizens in the country, but the extent of relief that really can be secured in this way is very small and it does not reach the core of the question; for the core of the question is that the city must learn to take care of its own and to solve its inherent problems, and that the whole interrelation of city and country must be solved by fundamental processes. Part of the congestion of cities is the increase due to immigration. Undoubtedly much can be done properly to disperse our aliens and to place them where they will be of service to themselves and to employers without constituting a problem of congestion. This, however, is a question of plain distribution rather than of land settlement. The real country-life movement itself will do something directly to relieve city congestion, because it will tend to keep country people in the country; and yet we must recognize the fact that many country people are better fitted by temperament for city life than for agricultural life.

"There seems to be much needless alarm over the decline of rural populations. We must remember that we have passed through the rural or agricultural phase of our evolution. In 1790, about nine-tenths of all our people were on the farms; a hundred years later about one-third (counting men, women and children) were on the land or very closely connected with it. I expect that the present census will show a smaller proportion, and possi-

bly the census of 1920 will show a still smaller ratio, although the ratio has already undoubtedly sunk too low in some localities or regions. We shall never again be a rural people. The best society is neither exclusively rural nor exclusively urban. What proportion the rural population must hold to the whole population, no one now knows. The decline in rural population is only one expression of the sorting of our people into their groups; and we have not yet struck bottom in this process.

"The powers of a single farmer are being much augmented by the application of knowledge, the development of business management, the use of machinery, and by cooperative enterprises. Of course, the actual number of farmers will immensely increase, but the ratio cannot be expected to increase. There will be a great increase in demand for products of the farm as civilization progresses and as tastes become more complex, but the expanding powers of individual landmen will be able to supply these enlarging demands. What will be the ra-

DR. LIBERTY H. BAILEY

tio of increase in demand for agricultural products, no one yet can say. It is true that the progress of civilization does not greatly enlarge a man's eating capacity, but it greatly increases the variety of his food and improves its quality, and this of itself, wholly aside from the quantity of the demand, will call for much greater activity and skill on the part of the farmer. But human food crops are probably not one-half the agricultural produce, and these other products increase in intimate ratio with the progress of civilization. These other supplies are cotton, wool, hemp and other fibres, timber and all timber products, all paper materials, the output of floriculture and other special industries, leather, and practically all other produce of the earth with the exception of metals and minerals and coal. Very much is going to be demanded of the farmer to supply all this wealth and variety of material.

"There is probably sufficient ratio of persons now living on the land, to supply all this increasing demand for the raw materials, if only these persons were properly effective. To displace

them or to augment them by city people may provide a corrective here and there, but it can be only an incidental factor. The great question is how to reach the people who live on the land, how to sort out those who ought not to live on the land, and how to direct our economic and social growth so as to make it profitable and attractive and in every way worth while for a man to live on the land throughout his life.

"I do not think that the mere lessening of the numbers of rural people has any very close relation to the cost-of-living question. The great problem in this regard is to improve our means of distribution, so that the materials may be taken from the producer to the consumer with the least delay, the least cost and the least waste. It is a shameful commentary on our economic and social system that in these days of great production of agricultural produce in the fertile land of North America, people still suffer for food in the great cities. We need to give much more attention to the distribution of our products than merely to placing more persons on the land. Persons will be satisfied to live on the land just as rapidly and as far as it is economically profitable and socially pleasant for them to live there.

"Our civilization is a system of economic loss. Society is built on the process of waste. The city drains the goods from the open country, extracts the kernel, and throws the husks into the rivers and the sea. The cities are half-way stations between the potash, phosphoric acid and nitrogen of the farms and the bottom of the ocean. The city tends always to destroy its province. It sits like a parasite, running its roots into all the surrounding country and draining it of its life-blood. Many a rural community is already sucked dry. Our business or commercial structure is responsible for the wastes of distribution. That it should require sixty-five cents out of every hundred to remove a good part of our produce from the land to the dinner table, is an indication that we are living in a very imperfect and undeveloped economic era.

"The organization of society does not seem to have within itself the means of its own correction or salvation. We are obliged to apply correctives by extraneous legislative and legal processes in order to control the streams of waste. Until we evolve a structure in which economic waste is inherently reduced to the minimum, we cannot expect to make great progress toward a self-sustaining civilization. We have yet no large permanent agriculture; and this means that we have yet no permanent civilization.

"To find some real economic relationship between city and country whereby the city will give back something to the country rather than to take everything from it, and whereby it will be as much interested in maintaining the producing-power of land as in developing art and literature and municipal systems, is the fundamental problem of civilization. City and country are coming together sympathetically, but this is largely a matter of acquaintanceship. There is no real adequate coordination between the two. If the city is ever really to aid the country, it must be mostly by the development of this mutual coordination and not by the city going into farming. Farming is a business for farmers.

NATIONAL FLOWER SHOW

Convention Program of Society of American Florists and Affiliated Organizations

CONVENTION NOTES.

A special rate of 1 3-5 on the certificate plan has been granted by the New England Passenger Association excepting Eastern Steamship Co., the Trunk Line Association, and the Central Passenger Association. Tickets may be secured not earlier than March 22nd and not later than March 27th and will be good returning to April 5th, inclusive. In securing your tickets purchase regular full one-way first-class fare and be sure to ask for a certificate. No reduction in fare will be made unless a certificate be secured at the time of the purchase of the ticket.

When returning, certificates should be presented at the railway ticket office and a ticket at three-fifths (3-5) of the regular fare will be furnished you.

For those living west of Chicago and St. Louis, tickets should be bought to those cities from which points tickets may be secured at the reduced rates. It will be well to confer with your agent concerning rates and routes.

The offices of the secretaries are in Mechanics Building.

Office of the National Flower Show Committee is in Mechanics' Building. Chester I. Campbell, manager of the show, is in charge. All business connected with the Flower Show should be presented there.

New Members. Those desiring to become members of any of the societies should apply at the office of the respective secretaries.

Paying Dues. Dues may be paid and orders for members' tickets obtained at the office of the respective secretaries.

Railway Certificates. Railway certificates should be deposited with the Secretary of the S. A. F. & O. H. immediately upon arrival at Mechanics Building. The fee of 25 cents must be paid when certificate is deposited. Certificates will be signed by the agent from 9 a. m. to 6 p. m. on March 27, 28 and 29. No certificate will be signed before or after these dates. Certificates must be called for before 11 a. m. on March 31st.

Members' Tickets. Orders for members' tickets must be presented to the committee in charge of admission and exchanged for regular tickets. All orders and tickets in hands other than the owners will be taken up and cancelled.

Register. All members of the S. A. F. & O. H. and affiliated societies should register with the secretary of the S. A. F. & O. H., so that a record may be kept of the attendance, and so that members may be located when asked for.

PROGRAM FOR THE MARCH CONVENTIONS.

MONDAY, MARCH 27, 1911.

First Day—Opening Session.

S. A. F. & O. H.

10:30 A. M. General meeting for the opening of the Convention. Welcome by President Asmus. Welcome by Boston florists.

First Day—Afternoon Session.

American Rose Society.

2:30 P. M. Call to order by President W. H. Elliott. Address by President. Secretary's report. Treasurer's report. Reports of Committees.

First Day—Evening Session.

American Rose Society.

8:00 P. M. Paper, August Poehlmann, Morton Grove, Ill. Paper, "The Science of Rose Growing," W. R. Pier-son, Cromwell, Conn.

TUESDAY, MARCH 28, 1911

Second Day—Morning Session

American Rose Society.

10:30 A. M. Selection of place of meeting, 1912. Election of officers. Discussion on new roses to be opened by prominent rosarians. Miscellaneous business.

Second Day—Afternoon Session.

American Rose Society.

2:30 P. M. Papers by: Richard Vincent, Jr., White Marsh, Md., upon his trip to Brussels Exhibition; Rev. Spencer S. Sulliger, Vancouver, Wash., special representative at the National Rose Exhibition held in London, England. Address by W. G. MacKendrick, Toronto, Can. Unfinished business.

National Sweet Pea Society.

2:00 P. M. Meeting of Executive Committee.

Second Day—Evening Session.

American Carnation Society.

7:30 P. M. Call to order. President's address. Secretary's report. Treasurer's report. Report of Nomenclature Committee. Miscellaneous business. Invitations for 1912 meeting. Nomination of officers. Short talks on the American carnation in Europe by visitors from abroad. Report of judges.

WEDNESDAY, MARCH 29, 1911.

Third Day—Morning Session.

Chrysanthemum Society of America.

10:00 A. M. Call to order. Discussion of questions of day. Miscellaneous business.

Florists' Telegraph Delivery.

10:00 A. M. Business meeting.

Third Day—Afternoon Session.

National Sweet Pea Society.

3:00 P. M. Welcome by George Asmus, president S. A. F. & O. H. President's address and reply. "Trials of Sweet Peas Under Glass as Tested in the Experiment Station at Cornell

University," Prof. A. C. Beal. "Sweet Peas and the Results of Our Experiments at the Trial Grounds," Prof. Craig. "The Growing of Sweet Peas Under Glass," Mr. Wm. Sim. "The Latest Novelties in Sweet Peas," G. W. Kerr. Invitations by cities and societies for meeting place for the exhibition and convention next summer.

Are you a member of the National Sweet Pea Society of America? If not, you should send for an application blank; the annual dues are \$2, life membership \$25. For further information write to the secretary, Harry A. Bunyard, 342 West 14th street, New York, N. Y.

Florists' Telegraph Delivery.

2:30 P. M. Business meeting.

Third Day—Evening Session.

American Carnation Society.

8:00 P. M. Call to order. Deferred reports. Deferred business. Selection of meeting place for 1912. Discussion of president's address and secretary's report. New business. Appointment of committees. Election of officers.

THURSDAY, MARCH 30, 1911.

Fourth Day—Morning Session.

American Carnation Society.

9:30 A. M. Call to order. Final report of judges. Deferred business. Adjournment.

The reading of papers and all other unnecessary business has been eliminated from the program this year. It was deemed desirable to make the meetings short, on account of the great amount of interesting and instructive displays in the show. Members will find enough in the show to occupy their full time. All the meetings have been set for the evenings to give the members opportunity to visit the growers in the vicinity of Boston, without having to miss the meetings.

Notice—The secretary will leave for Boston on Sunday, March 26th. All mail which would not reach him by Saturday, March 25th, should be addressed to him at the Hotel Lenox, Boston, which will be A. C. S. headquarters.

You can still make entries for the show, but you will have to add \$2.00 for each entry you make after March 18th.

Fourth Day—Afternoon Session.

American Gladiolus Society.

2:00 P. M. Reading of minutes of last meeting. Reports of officers, bulletin committee, exhibition committee, Boston show, Baltimore show, committee on nomenclature, exhibition committee on rules governing the awarding of "certificates of merit," and suggesting a "scale of points" to use in judging. New business. Discussion: "What action shall our Society take when the same name has been given to several different varieties of gladi-

oli and when different names have been given to the same variety?" Opened by A. Cowee, Berlin, N. Y.

National Society of Gardeners.

Fourth Day—Evening Session.

In the hands of Boston florists.

FRIDAY, MARCH 31, 1911.

Fifth Day—Morning Session.

S. A. F. & O. H.

9:00 A. M. President's address. Report of the secretary. Report of the treasurer. Preliminary report of National Flower Show committee. Miscellaneous business.

Fifth Day—Afternoon Session.

S. A. F. & O. H.

2:00 P. M. 10-minute talks by presidents of various societies: George Asmus, president, S. A. F. & O. H.; Fred Burki, president, A. C. S.; W. H. Elliott, president, A. R. S.; Elmer D. Smith, president, C. S. A.; W. Atlee Burpee, president, N. S. P. A.; I. S. Hendrickson, president, A. G. S.; J. A. Valentine, president, F. T. D.; William Kleinheinz, president, N. S. G.

Fifth Day—Evening Session.

S. A. F. & O. H.

8:00 P. M. Illustrated lecture, "Trees, Shrubs and Flowering Plants," John Dunbar, Asst. Supt. of Parks, Rochester, N. Y.

SATURDAY, APRIL 1, 1911.

Sixth Day—Morning Session.

S. A. F. & O. H.

9:00 A. M. Unfinished business. Adjournment.

ADDITIONAL PRIZES.

The National Flower Show Committee announces the following additional prizes to the schedule:

- No. 446. King Construction Co., prize for vase of 30 blooms of any rose introduced since Jan. 1, 1900; silver cup.
- No. 447. Display of cut lilac blooms; 1st prize, \$15.00; 2nd, \$10.00.
- No. 448. Display of cut blooms of lily of the valley; 1st prize, \$15.00; 2nd, \$10.00.
- No. 449. Display of cut blooms of Amaryllis; 1st prize, \$15.00; 2nd, \$5.00.
- No. 450. Display of blooms of Marguerites; 1st prize, \$10.00; 2nd, \$5.00.
- All to be staged Saturday, March 25; judging at 3 P. M.
- No. 451. Ladies' S. A. F. prize for the best table decoration, silver cup.
- No. 452. Boston Flower Exchange prize for the best floral design, originality to count 25 points; 1st prize, \$50.00; 2nd, \$30.00; 3rd, \$20.00.

To be staged Friday, March 31st; judging at 3 P. M.

The National Society of Gardeners

will also offer about thirty silver cups and numerous medals for prizes to be competed for at the National Flower Show, schedule of which society will be issued in a few days.

By order of the President, notice is hereby given that the mid-lent meeting of the Executive Board of the Society of American Florists and Ornamental Horticulturists will be held at Boston, Mass., from March 25th until April 3rd with an adjourned meeting to be held at Baltimore on April 4th. Meetings are called at Boston for 9 A. M. each morning from March 25th to April 3rd inclusive. The meeting at Baltimore is called for 10 A. M. on April 4th and will remain in session until all business is disposed of.

H. B. DORNER,
Secretary S. A. F.

OUR BRITISH VISITORS.

The party of British tourists which sailed for the United States last Saturday includes a quartette of Covent Garden growers, namely:—G. Prickett who excels in chrysanthemums, one of the oldest members of the National Chrysanthemum Society, W. A. Cull and G. Pratley who grow ferns and pot plants by the million, and L. M. Graves in the front rank with cyclamens and primulas. Roses will be represented by J. Brown of W. & J. Brown, Stamford; hardy flowers by J. S. Gunn of Gunn & Sons, Birmingham who grow and show phlox and hardy flowers second to none; the carnation by C. Engelmann, the raiser of Carola, one of the best growers and keenest hybridizers, also by J. S. Brunton, one of the originators and Chairman of the Perpetual Flowering Carnation Society since its inception. The Horticultural Sundries trade will be represented by S. South of London and E. Barker of Manchester, etc.

Should any American friends desire to correspond with members of the party, they should address letters to:—Care Messrs. Thos. Cook & Sons, 1200 Broadway, New York.

BUFFALO FLORISTS' CLUB.

The annual banquet and flower show which was held by the Buffalo Florists' Club last week was a decided success.

Officers for ensuing year were elected as follows: President, George McClure, Jr.; vice-president, Joseph Sangster; secretary, Wm. Legg; financial secretary, J. Deutscher; treasurer, Chas. Sandiford; directors, W. J.

Palmer, W. A. Adams, Chas. Guenther.

The banquet hall was beautifully decorated. New varieties in roses were sent by A. N. Pierson, including Lady Cromwell, a shell-pink sport of My Maryland, Prince de Bulgarie, Reliance and Dark Pink Killarney. The new red carnation, Bonfire, and Aaron Ward roses came from E. G. Hill & Co.; Rainbow carnation from Wanoka Greenhouse; carnations from F. Dornier & Son and Chicago Carnation Co.; the new light pink Ideal from N. C. Stroh, Attica; carnations from C. T. Guenther and W. J. Palmer & Son; White and Pink Killarney and Richmond roses from Erie Floral Co.; Sweet peas from Wm. Ehmann. The members were much taken up with the fine display of blooms.

A fine programme of entertainment was arranged by the committee including lantern slides by O. G. Gilles consisting not alone of cartoons of the members but some interesting slides of bridal bouquets, table and church decorations, landscapes and winter scenes at Niagara Falls.

The able toastmaster, Wm. F. Kastling, called on many for a few remarks and those heard from were well appreciated. An invitation was read from the Rochester Bowling Club to induce every member of the Buffalo Bowlers to join in the return match on March 8th.

E. C. B.

ST. LOUIS RETAIL FLORISTS' ASSOCIATION.

The Retail Florists' Association held its monthly meeting on March 6th. The meeting was well attended and they voted favorably to condemn any wholesaler, local or outside, who sold flowers to any local department stores having no regular floral department. The report of the "crepe pulling" committee was received and will be acted upon at the next meeting.

CLUB AND SOCIETY NOTES.

On Saturday night, March 18, occurs the annual dinner of the New York Florists' Club at Shanley's. We understand that the sale of tickets for the event has been unprecedented, practically every seat being sold in advance.

The Gardeners' and Florists' Club of Boston will have its regular monthly meeting next Tuesday evening, March 21, and this being the last meeting before the opening of the National Flower Show, a large attendance is anticipated.

Visiting Florists at Dreer's Riverview Establishment, March 8, 1911.

CLUBS AND SOCIETIES

NEW YORK FLORISTS' CLUB.

The attendance at the March meeting was nearly 100. Mr. O'Mara reported hopefully on the recent trip to Albany on behalf of the appropriation for greenhouses at Cornell. Mr. Totty told of the similar movement in New Jersey for greenhouses at New Brunswick. Mr. Weathered reported on the outlook for the club dinner, March 18, and Secretary Young reported on behalf of the Outing Committee that the outing would be on June 28 at Wetzel's Point Grove. "Souvenir Program" will be discontinued.

Frank McMahon of Seabright, N. J., addressed the meeting on the dangers of gas distribution under pressure through old and short-lived pipe and protested against permitting its use as deadly to street trees. Many members participated in the discussion. Mr. Weathered said he had never known of a wrought iron pipe lasting over 10 years. He says all pipe used now is steel tubing and five years is the limit of its life. Mr. Berry spoke of pipes, cast iron, lasting 60 years. Mr. O'Mara referred to a case in Jersey where a man collected damages for leaking gas, and thought a municipality could collect damages for injured trees by gas. Mr. Totty referred to Mr. Simpson's experience at Clifton, N. J., and a suit for damages he is bringing against the company. The subject was referred to the legislative committee. Mr. Bunyard's report recommending the Fall River Line route to the Boston Exhibition was approved. Mr. Siebrecht reported that the Board of Aldermen had passed the resolution for the new flower market and that on April 1 the Canal Street market would move to space between First and Second avenues, the permanent market to be ready by July 1. A committee was appointed to meet the English visitors due to arrive on Friday and extend to them an invitation to the club dinner. Five minute talks on various practical topics were made by A. L. Miller, John Birnie, H. A. Bunyard, E. S. Hendrickson, Jas. T. Scott, Robert E. Berry and Harry Turner.

The committee on awards reported on visit to C. H. Totty to inspect carnation Wodenethe and gave 93 points to that fine variety, which entitles it to a certificate. They also reported 88 points and a certificate to Wm. Kleinhertz of Ogontz, Pa., for carnation Dimple Widener.

Among the exhibits on the tables were the following: L. P. Lord, Frost-proof Plant Box; Chas. Weber, carnation Brooklyn and seedling, No. 2; Wm. Eccles, carnations; Howard Gould carnations; A. C. Zvolanek, 75 varieties of sweet peas. Certificates were recommended by the judges for Mr. Zvolanek and Mr. Lord; cultural certificate for Mr. Eccles, and "highly commended" for Mr. Weber.

TUXEDO HORTICULTURAL SOCIETY.

A regular meeting was held by this society on Wednesday evening, March 1st. There was a very good attendance. The exhibits of roses, carna-

tions and other cut flowers were good. David McIntosh, George Thomson and Simon Hilmer were appointed judges and they awarded the following prizes:

Roses. Class A—D. S. Miller, Killarney, first; D. S. Miller, Bridesmaid, second; Joseph Tansey, Bridesmaid, third; D. S. Miller, White Killarney, first; D. S. Miller, Bride, second; Joseph Tansey, Bride, third; Joseph Tansey, Richmond, first. Class B—Albert Fischer, Bridesmaid, first.

Carnations. Class A—D. S. Miller, Rose Pink, first; Joseph Tansey, Alma Ward, first; D. S. Miller, White Enchantress, second; Joseph Tansey, Red, first; D. S. Miller, second. Class B—Patrick Cassidy, Red, first; Albert Fischer, Enchantress and White Enchantress, first.

Sweet Peas. Albert Fischer, Xmas white, first; pink, second.

Violets. Patrick Cassidy, first.

Honorable Mention to Albert Fischer for Antirrhinum and to Wm. Hastings for a very fine display of cut flowers. First Class Certificate of Merit to Albert Fischer for Cattleya Percivaliana.

A very interesting lecture was given on "Botany as an Aid to Horticulture," by James Scott, Elmsford, N. Y. Mr. Scott combined the scientific and practical in a way one seldom hears from the botanist. He dissected a carnation flower, explaining its various parts and their uses. He dwelt particularly on the color of the petals and the part they play in attracting insects for the purpose of polonization and showing how fertilization takes place. He explained at length how the leaves absorb the carbon-dioxide of the atmosphere, liberating the oxygen and give it back in a free state. Then how the carbon that was left in the store of the leaf was combined with the hydrogen and oxygen that was drawn up from the roots by capillary attraction and to form starch which had again to be changed to dextrine or grape sugar in order to flow freely down the plant cells.

At the close of the lecture Mr. McIntosh asked what ingredients the plant took up by means of the roots. Mr. Scott gave the names of six or seven essential ingredients. Mr. McIntosh was particularly anxious to know what influence bacteria had in the soil. Mr. Scott explained that it was particularly useful in rendering many of the ingredients more available. The society extended a hearty vote of thanks to Mr. Scott.

ALBERT FISCHER, Sec.

AMERICAN PEONY SOCIETY.

A meeting of the committee to arrange for the next exhibition of the American Peony Society to be held under the auspices of the Pennsylvania Horticultural Society in Horticultural Hall, Philadelphia, Pa., next June was held at the Pennsylvania Horticultural Society's rooms on Wednesday afternoon, March 1, 1911.

There was a full attendance of the committee as follows: Bertrand H. Farr, President of the American Peony Society, chairman; J. H. Humphreys of the Andorra Nurseries, H. C. Simm of Henry A. Dreer Co., S. Mendelson Meehan of Thomas Meehan & Sons, and J. H. Styer of Concordville, Pa. Also present David Rust, secretary of the Pennsylvania Horticultural Society, and R. T. Brown of the Cottage Gardens Co., New York.

The meeting was very enthusiastic and gave encouraging promise of a

most successful exhibition next June. The committee were gratified to receive the offer of a number of special premiums from different firms and were assured by Mr. Rust of the hearty co-operation of the Pennsylvania Horticultural Society and other local exhibitors. It is intended if possible, to arrange the date so that the local mid-season varieties will be in their prime, which will allow exhibitors from the north to send their earlier varieties and those from the south will be enabled to exhibit their later kinds.

YONKERS HORTICULTURAL SOCIETY.

A largely attended meeting of this society was held on Friday, March 3rd. It was decided that the fall exhibition be so arranged that the date will not clash with other shows in the New York district. A committee was appointed to get busy and arrange for a clam bake, the date to be decided later.

R. Cochrane's prize brought out quite an array of exhibits. Messrs. Wright, Hoffman and Hebach were appointed judges and reported as follows: First, *Lilium Harrisii* var. Jamesii, finely shown by S. Untermyer, Sup't A. Herrington; second, violet Princess of Wales, from W. B. Trevor, Sup't H. Nichols. Gardenias from the Lilienthal estate, Sup't H. Scott received honorable mention. The new carnation White House, showing perfect quality, was finely exhibited by C. H. Totty, of Madison, N. J. Next regular meeting is to take the form of a social evening, being given over to music and refreshments, with a prize for the most meritorious exhibit.

H. M. B.

HUNTINGTON HORTICULTURAL AND AGRICULTURAL SOCIETY.

The annual carnation exhibition of this society was held on Feb. 23. The awards were as follows:

H. T. & A. H. Funnell for dark pink carnations, white carnations, freesias, mignonette and spring flowers. R. W. Deforest, gardener Robt. Hillock, first for Enchantress. L. D. Hurd first for scarlet carnations and sweet peas. Kramer Bros., Farmingdale, first for carnations and specimen blooming plant. W. J. Matheson, gardener Jos. Kirby, first for violets.

Kramer Bros. were given a certificate of merit for a new *Asparagus plumosus* originating with them, and for a seedling carnation of fine color, form and stem. H. T. & A. H. Funnell received a cultural certificate for cyclamen, and James Kirby honorable mention for *Primula obconica* and *narcissus*. James Duthie was the judge.

A. H. Funnell, Sec.

TARRYTOWN HORTICULTURAL SOCIETY.

At the regular monthly meeting of the Tarrytown Horticultural Society held on Friday evening, February 27, favorable action was taken on a communication from the New York Florists' Club asking the co-operation of this Society in securing the passage of a bill appropriating \$50,000 to erect greenhouses at Cornell for experimental purposes.

It was announced that the fall show will be held October 31 to November 2nd in Music Hall, Tarrytown. Subject and exhibits for the next meeting will be Roses and Bulbous Flowers.

GEO. MCINTOSH,
Cor. Sec'y.

AMERICAN ROSE SOCIETY.

The following gentlemen have accepted the positions of judges in the rose division of the National Flower Show: William F. Kasting, Buffalo, N. Y.; Frederick Burki, Gibsonia, Pa.; Otto G. Koenig, St. Louis, Mo., and Emil Buettner, Park Ridge, Chicago, Ill.

The program provides for three meetings, headed the "Commercial Growers' Meeting," the "Business Meeting" and the "Amateur Rose Growers' Meeting."

Eber Holmes is manager of the rose division and will look after details on the spot. Anyone having special prizes to offer, dues to pay, or other matters of interest, should write to the secretary.

A special prize has been added to the list for the coming show in Mechanic's Hall, Boston, from Mr. Alexander Montgomery, Natick, Mass.—a silver cup, valued at \$25, to be offered for the Best New Rose of American Origin of 1909-1910. The Toronto Horticultural Society of Toronto, Ont., offers two prizes—a silver medal, first, and a bronze medal, second, for Specimen Hardy Climbing Roses and, in judging, fragrance is to count 33 points.

Eber Holmes, of Montrose, Mass., manager of the Rose Section, writes that everything is going on fine, and that the vases for the cut flowers will be furnished.

Thomas Roland, of Nahant, Mass., will make a rose garden, and M. H. Walsh, of Woods Hole, Mass., will send on a remarkable display of pot roses.

Tickets will be issued to the members of the American Rose Society who do not belong to the Society of American Florists and Ornamental Horticulturists. These tickets will not be transferable.

BENJAMIN HAMMOND, Sec

AMERICAN CARNATION SOCIETY.**Registration of New Carnations.**

By J. H. Leach & Son, North Easton, Mass., Pink Supreme—Seedling X Boston Market; color flesh pink; size 3½ inches; habit similar to Fairmaid; flower larger and fuller; strong stiff stem; does not split the calyx.

By Chas. Weber, Lynbrook, L. I., N. Y.—Brooklyn—Prosperity X Mrs. Thos. W. Lawson. Color bright deep pink; size 3½ inches; habit same as Lawson, with foliage not quite so heavy; free growing, very healthy, prolific, every shoot running to flower; form of flower somewhat irregular, slightly fringed.

A. F. J. BAUR, Sec'y.

OBITUARY.

William Webster.

At the age of 94 years, William Webster, died March 7 at his home in Rochester, N. Y. Death was due to the weaknesses of extreme age. Mr. Webster was born in Hamstead, England; in 1828 he came to New York city with his father, and since 1833 he had made his home in Rochester. As a landscape gardener he laid out many public and private places in various parts of the country. He was a frequent contributor to technical magazines on the subject of horticulture, and was the author of "Webster's Landscape and Ornamental Gardener"

B. F. Washington.

B. F. Washington, colored, a florist of North Stoughton, Mass., and a stallholder in one of the Boston flower markets, died on March 15, aged 70 years. Death was caused by a bron-

chial trouble of only four days' duration.

Richmond, Va.—For the purpose of testing the ordinance under which an effort was made by members of the Markets Committee to compel flower dealers having stands at the entrance to the Second Market to vacate, J. D. Hooper, who conducts a greenhouse and sells his flowers and plants in the city, was arrested and haled to the police court on March 7. The hearing was held after the regular session of the police court, Hooper being charged with obstructing the street and refusing to remove the obstruction when asked to by the police. He claimed that he grew his flowers and brought them to market the same as the farmer and trucker disposes of his stock. He claimed exemption from the operation of the ordinance, explaining that he was a flower farmer.

COPLEY SQUARE HOTEL

Huntington Avenue, Exeter and Blagden Streets

BOSTON, MASS.

Nearest hotel (only one block) to Flower Show. Rooms without bath \$1.50 per day up, with bath \$2.00 per day up. European plan. 350 rooms, 200 private baths.

AMOS H. WHIPPLE, Proprietor

During Recess

Greater New York Florists' Association.

About 80 members of the Greater New York Florists' Association with their wives and invited guests, assembled at the Cafe Raub, last Thursday evening, on the occasion of their first annual reception and banquet.

Hugo H. Jahn, vice-president of the association, acted as toastmaster for the evening. In response to a "Toast to the Organization," David Y. Mellis, the president, welcomed the guests in a cordial manner and expressed his gratification on seeing such a large and representative body of florists from Brooklyn. Among those present from New York were President J. B. Nugent, S. S. Butterfield, J. Austin Shaw and J. H. Pepper.

The committee on arrangements comprised: Hugo H. Jahn, chairman; Robert G. Wilson, William A. Phillips, George I. Laird and F. G. Van Mater.

New York Bowlers.

Friday evening, March 10, saw a good-sized crowd at the alleys on West 23rd street, but, with the exception of the invincible Chadwick, no one covered himself with glory in the way of scores. Below is the record:

Miller . . 100	—	Shaw . . 111	117	112
A. R'ds. 132	—	Kakuda 119	134	99
Kl'man . 147	—	Nugent . 120	103	107
Scott . . 120	109	M'shall . 101	104	154
F'n'rich . 140	147	W. R'ds. 151	149	132
Duggan . 141	95	Ch'wick 186	173	201
Holt . . 117	112	108		

Buffalo vs. Rochester.

The match game of bowling between Buffalo and Rochester was had on March 8th at Rochester and the Buffalo boys returned as winners. About twenty joined the party for Buffalo and reports from those in attendance state that an excellent time was had by all. The visitors were sumptuously entertained.

PHILADELPHIA NOTES.

Maurice Fuld gave a lecture on Dahlias at the monthly meeting of the Germantown Horticultural Society on the 13th inst.

George Samtman, one of the most noted rose growers in this part of the country will go in largely for the new Double Pink Killarney this season. Myers & Samtman of Chestnut Hill will also grow this variety. Both concerns have just placed their orders for heavy blocks of the young stock with the Pennock-Meehan Co.

Arthur Zirkman and Robert Schoch knights errant for M. Rice & Co., have returned from their New England campaign. They had show rooms in Boston for two weeks and were besieged with visitors all that time. Fat orders, many of them running into eight, ten and twelve pages each, were gleefully flashed in your correspondent's face—and the stacks of them pointed to with pride. Best trip ever! Other sections of the country may be all right but, oh, you Down East.

Visitors: James Brown, Jr., Coatesville, Pa.; J. Murray Bassett, Hammononton, N. J.; George Samtman, Hatfield, Pa.; W. C. Langbridge, Cambridge, N. Y.

NEWS NOTES.

Corfu, N. Y.—The Farnham Greenhouses have been purchased by Thomas Doyle, who will use them in growing carnations and peas for the Buffalo market.

West Chester, Pa.—A two-story 36x80 foot building is being erected

by the Morris Nursery Co. on the site of the burned packing shed near Maple avenue station.

New Bedford, Mass.—Rumor has it that the greenhouses on Hillman street will be leased by Wm. E. Mosher, whose place on North street was burned out on Dec. 3, 1910.

Boddington's Quality Sweet Peas

INCLUDING ALL THE SUPERB SPENCER VARIETIES

If you are an up-to-date florist you should include these varieties in your order.

At the exhibition of the National Sweet Pea Society of America, held at the American Museum of Natural History, New York City, July 12 and 13, 1910, we were again awarded the C. C. Morse Co.'s **SILVER CUP** for the finest collection of Sweet Peas. Open to the trade only.

See our Florists' Catalogue for Quality Seeds, Bulbs and Plants, mailed free. For Cannas see our adv., page 285 March 4 issue of Horticulture.

ARTHUR T. BODDINGTON, Seedsman, 342 W. 14th St. New York City

CHICAGO NOTES. Trade Items.

What has been long known as the Flower Growers' Market will be divided when the old lease expires May 1.

Few novelties are seen in honor of St. Patrick. The green carnations, roses and tulips no longer cause surprise and now that they have become common there are fewer of them seen on the counters.

The last touches are being put on Harry Rowe's store and it is one of the most tasteful and complete retail stores in Chicago. Two immense Austrian jardiniers of exquisite coloring are added to the window equipment.

A Lang is showing novelties suitable for St. Patrick's Day. Among them are the green shamrock pots, fashioned with three compartments, shamrock shape and holding three plants, and they take well. The new green hat pot-covers in different sizes were also seen here.

A new company, to be known as the Chicago Flower Association, is the latest enterprise struggling into existence. It will consist of a large number of stockholders. The object is a commission house to sell their own stock. Some of the largest growers in this vicinity are interested and the project, if it materializes, may cut heavily into the business of some of the older houses.

The Foley Manufacturing Co., 25th street and Western avenue, are making arrangements that, when completed, will greatly facilitate the office work. Their new general catalogue will soon be out and will include their new steel gutters with wood sill which they have used extensively this year and which can be seen at Calvary cemetery and at Geo. Weiland's new range at Evanston, Ill. Mr. Foley expects to be with the Chicago party at Boston next week.

John Sinner, for several years their manager, has, with the J. A. Budlong Co., rented the second floor of the building two doors north of E. C. Amling's on Randolph street and will take with him several of the present stockholders. The others will occupy the southeast end of their present quarters. The J. A. Budlong business has grown to such proportions that more space was a necessity and their old quarters in the Atlas block will be gladly left for the larger ones May 1.

The Chicago Artificial Flower Co., whose office is at 4813-15 North 40th avenue, has lately added a second factory to their plant. They specialize in paper flowers for decorative purposes and a feature is the furnishing of flowers to florists for automobile decorations and other uses where fresh material cannot be conveniently used, and accompanying blue prints to show how best to use them.

This company was organized 15 years ago. The present owner and manager, F. Spikings, purchased the business six years ago and has replaced the old equipment with new and modern machinery. He would be pleased to send samples as per advertisement on another page.

Personal.

Allie Zeck has been quite ill for a week but is out again. Mrs. Frank Ben has also been sick.

The Toledo Jardinere and Stand

is a work of art. They are made from quartered white oak, golden finish and polished. Hoops, handles, etc., are made of polished brass. They stand 31½ inches high, 9½ inches in diameter.

Toledo Tree Tubs

are made of the everlasting red cedar. They have the extension stave foot, that holds the tub up from floor or carpet, this feature permits air circulation between the tub and the floor,

also prevents rot and decaying. They have electric welded galvanized basic steel wire hoops that will not rust or break. They are made in all sizes from two quarts to two barrels.
